

China Natural Gas Power Industry Report (2016–2021), Market Forecast and Investment Strategy Planning

目 录

CONTENTS

Chapter 1: Background of development of China natural gas power industry

- 1.1 definition of natural gas power
 - 1.1.1 definition of natural gas power
 - 1.1.2 characteristics of natural gas power
 - 1.1.3 analysis of models of natural gas power generation
- 1.2 interpretation of policies of natural gas power industry
 - 1.2.1 interpretation of electricity pricing policy
 - 1.2.2 interpretation of natural gas power pricing policy
 - 1.2.3 interpretation of industry tax policy
 - 1.2.4 interpretation of national environmental policy
 - 1.2.5 interpretation of national investment and financing policy
 - 1.2.6 planning of natural gas power policy
- 1.3 analysis of the necessity of natural gas power
 - 1.3.1 the need to relieve environmental pressures
 - 1.3.2 the need to optimize the energy structure
 - 1.3.3 the need of the safe operation of the power grid
 - 1.3.4 the need of development of natural gas power industry
- 1.4 analysis of competitiveness of other energy power generation industries
 - 1.4.1 analysis of competitiveness of hydroelectric industry
 - 1.4.2 analysis of competitiveness of conventional coal power generation industry
 - 1.4.3 analysis of competitiveness of clean coal thermal and new technology of power generation
 - 1.4.4 analysis of competitiveness of nuclear power industry
 - 1.4.5 analysis of competitiveness of new energy industry
- 1.5 experience and implications of international natural gas power
 - 1.5.1 development status quo and development trends of international natural gas power
 - 1.5.2 experience and lessons of international natural gas power
 - (1) experience of natural gas power industry in United States and Europe
 - (2) experience of natural gas power industry in Japan and South Korea
 - (3) experience and lessons of natural gas power industry in South America
 - 1.5.3 trends of international gas power trade
 - 1.5.4 implications of international natural gas power for China

Chapter 2: Analysis of development of Chinese natural gas power industry in.....2013

- 2.1 analysis of development of China's natural gas power industry in.....2013
 - 2.1.1 natural gas reserves and distribution.....2013
 - 2.1.2 analysis of natural gas supply in.....2013
 - 2.1.3 analysis of natural gas demand in.....2013
 - 2.1.4 construction of natural gas infrastructure in.....2013
 - (1) construction of natural gas pipeline in.....2013
 - (2) construction of LNG project.....2013
 - (3) construction of natural gas storage in.....2013
 - 2.1.5 analysis of price trends of natural gas in.....2013
 - 2.1.6 forecast of market supply and demand of natural gas in 2015–2030.....2013
- 2.2 analysis of development of Chinese natural gas power industry in.....2013
 - 2.2.1 review of the development of natural gas power industry.....2013
 - 2.2.2 development status quo of natural gas power industry in.....2013
 - (1) capacity scale of natural gas power generators
 - (2) developments of natural gas power projects
 - (3) analysis of the proposed natural gas power projects
 - 2.2.3 analysis of development of centralized natural gas power in.....2013

(1) analysis of advantages of centralized natural gas power	
(2) analysis of positioning of centralized natural gas power	
(3) capacity centralized natural gas power generators	
(4) the power scale of centralized natural gas power	
(5) operation efficiency of centralized natural gas power	
(6) forecast of centralized natural gas power	
2.2.4 analysis of development of distributed natural gas power in.....	2013
(1) analysis of advantages of distributed natural gas power	
(2) economic benefits of distributed natural gas power	
(3) application scope of distributed natural gas power	
(4) capacity centralized natural gas power generators	
(5) difficulties of distributed natural gas power	
(6) forecast of distributed natural gas power	
2.3 analysis of the main problem of Chinese natural gas power industry	
2.3.1 natural gas power industry is uncompetitive	
2.3.2 natural gas power industry faces the contradictions of bidding system and take or pay	
2.3.3 methods of natural gas supply constraints on the operation of natural gas power plants	
2.3.4 gas sources for natural gas power are insufficient	
Chapter 3: Analysis of economic benefits of Chinese natural gas power industry in.....	2013
3.1 analysis of cost of natural gas power	
3.1.1 structure of natural gas power cost	
3.1.2 calculation of feed-in tariff of natural gas power	
(1) estimation of power generation cost	
(2) estimation of feed-in tariff	
3.2 analysis of economic benefits of natural gas power	
3.2.1 impact of price of natural gas on economic benefits of natural gas power	
3.2.2 impact of yearly utilization hours on economic benefits of natural gas power	
3.2.3 impact of yearly average thermal efficiency on economic benefits of natural gas power	
3.3 analysis of economic benefits of coal to natural gas power projects	
3.3.1 case introduction	
3.3.2 analysis of benefits of reconstruction projects under the CDM mechanism	
(1) analysis of benefits of the type of exhaust combustion and transformation of the type of water heating	
(2) analysis of benefits of the of transformation of HRSG	
3.4 analysis of environmental benefits of natural gas power industry	
3.4.1 comparison of pollutant emissions from natural gas power plant and pollutant emissions from conventional power plant	
(1) calculation of coal-fired power plant emissions	
(2) calculation of natural gas power emissions	
(3) comparison between the two	
3.4.2 assessment of environmental impact of 500MW natural gas power plant	
3.4.3 analysis of environmental benefits of natural gas power	
Chapter 4: Analysis of Chinese natural gas power generation equipment market in.....	2013
4.1 analysis of market of gas power turbine	
4.1.1 main application markets of gas power turbine	
4.1.2 types of gas power turbine and their characteristics	
4.1.3 analysis of quantity of installed gas power turbines	
4.1.4 major manufacturers of gas power turbine	
4.1.5 analysis of subdivided market of gas power turbine	
(1) analysis of market of heavy-duty gas power turbine	
(2) analysis of market of light gas power turbine	
(3) analysis of market of microturbine	
4.1.6 analysis of R & D progress of gas power turbine	
4.1.7 forecast of gas power turbine market	
4.2 analysis of market of waste heat boiler of gas power turbine	
4.2.1 analysis of production scale of waste heat boiler of gas power turbine	
4.2.2 major manufacturers of waste heat boiler of gas power turbine	
4.2.3 analysis of R & D progress of waste heat boiler of gas power turbine	
4.2.4 forecast of waste heat boiler of gas power turbine	

4.3 analysis of other markets of gas power devices

- 4.3.1 analysis of market of steam turbine of power plant
 - (1) analysis of production scale of steam turbine of power plant
 - (2) major manufacturers of steam turbine of power plant
 - (3) forecast of steam turbine of power plant
- 4.3.2 analysis of market of generator
 - (1) analysis of production scale of generators
 - (2) major manufacturers of generator
 - (3) forecast of generator market
- 4.3.3 analysis of transformer market
 - (1) analysis of production scale of transformer
 - (2) major manufacturers of transformer
 - (3) forecast of transformer market

Chapter 5: Analysis of development of natural gas power industry in key areas in.....2013**5.1 analysis of development of natural gas power industry in Yangtze River Delta**

- 5.1.1 supporting policies for natural gas industry
- 5.1.2 status quo of power supply and demand situation and contradictions
- 5.1.3 analysis of supply and demand of natural gas
- 5.1.4 development status quo of natural gas power industry
- 5.1.5 construction of natural gas power projects

5.2 analysis of development of natural gas power industry in southeast coast

- 5.2.1 supporting policies for natural gas industry
- 5.2.2 status quo of power supply and demand situation and contradictions
- 5.2.3 analysis of supply and demand of natural gas
- 5.2.4 development status quo of natural gas power industry
- 5.2.5 construction of natural gas power projects

5.3 analysis of development of natural gas power industry in Bohai Rim

- 5.3.1 supporting policies for natural gas industry
- 5.3.2 status quo of power supply and demand situation and contradictions
- 5.3.3 analysis of supply and demand of natural gas
- 5.3.4 development status quo of natural gas power industry
- 5.3.5 construction of natural gas power projects

5.4 analysis of development of natural gas power industry in Northwest China

- 5.4.1 supporting policies for natural gas industry
- 5.4.2 status quo of power supply and demand situation and contradictions
- 5.4.3 analysis of supply and demand of natural gas
