

China Enterprise Accelerator Report (2013–2018), Market Prospect and Investment Strategy Planning

目 录

CONTENTS

Chapter 1: Background of development of China's enterprise accelerator

- 1.1 related definition of enterprise accelerator
 - 1.1.1 definition of foreign enterprise accelerator
 - 1.1.2 definition of domestic enterprise accelerator
 - 1.1.3 relevant spatial relationships of enterprise accelerator
 - 1.1.4 comparison of enterprise accelerator and incubator
- 1.2 main types of enterprise accelerator
 - 1.2.1 integrated enterprise accelerator
 - 1.2.2 enterprise accelerator of university science park
 - 1.2.3 professional technology accelerator
- 1.3 analysis of construction frame of enterprise accelerator
 - 1.3.1 service system of enterprise accelerator
 - 1.3.2 customer demand of enterprise accelerator
 - 1.3.3 enterprise accelerator and industrial development
- 1.4 analysis of construction benefits of enterprise accelerator
 - 1.4.1 accelerate enterprises' growth
 - 1.4.2 promote economic development in the region
 - 1.4.3 create jobs
- 1.5 evolution trends of high-tech companies during different periods
 - 1.5.1 high-tech companies of the gestation period
 - 1.5.2 high-tech companies of the start-up period
 - 1.5.3 high-tech companies of the growing period
 - 1.5.4 high-tech companies of the mature period

Chapter 2: Market environment of construction of China's enterprise accelerator

- 2.1 analysis of policy environment of construction of enterprise accelerator
 - 2.1.1 policy support for enterprise accelerator
 - 2.1.2 analysis of laws and regulations of enterprise accelerator
 - 2.1.3 the National Science and Technology Development Plan during the twelfth-five year period
- 2.2 analysis of economic environment of construction of enterprise accelerator
 - 2.2.1 analysis of the macroeconomic situation
 - (1) analysis of the country's GDP growth
 - (2) investment in fixed assets
 - 2.2.2 enterprise accelerator and regional economic development
 - 2.2.3 the correlation between enterprise accelerator and macroeconomy
- 2.3 analysis of operation environment of enterprise accelerator in parks
 - 2.3.1 analysis of operation indicator of high-tech zone
 - (1) construction scale of high-tech development zone
 - (2) regional pattern of high-tech development zone
 - (3) operational efficiency of high-tech development zone
 - (4) practitioners of high-tech development zone
 - 2.3.2 analysis of operation indicator of economic and technological development zone

Chapter 3: Analysis of customer resource of China's enterprise accelerator

- 3.1 description of customer resource of enterprise accelerator
 - 3.1.1 analysis of structure of target customer of enterprise accelerator
 - 3.1.2 analysis of characteristics of target customer of enterprise accelerator
 - 3.1.3 factors of decision of target customer of enterprise accelerator
 - (1) factors of selection of SMEs within a development zone
 - (2) factors of selection of enterprise of strategic emerging industries
 - (3) factors of selection of outstanding graduate enterprise from incubator

- 3.1.4 benefit to develop target customer of enterprise accelerator
 - (1) benefit to develop target customer for SMEs within a development zone
 - (2) benefit to develop target customer for enterprise of strategic emerging industries
 - (3) benefit to develop target customer for outstanding graduate enterprise from incubator

3.2 analysis of SME resource in the development zone

- 3.2.1 analysis of SME resource in the economic and technological development zone (ETDZ)
 - (1) analysis of enterprise scale in ETDZ
 - (2) spatial distribution in ETDZ
 - (3) analysis of corporate structure in ETDZ
 - (4) analysis of corporate industry in ETDZ
 - (5) corporate growth ability in ETDZ
- 3.2.2 analysis of SME resource in bonded zone
 - (1) analysis of enterprise scale in bonded zone
 - (2) spatial distribution in bonded zone
 - (3) analysis of corporate structure in bonded zone
 - (4) analysis of corporate industry in bonded zone
 - (5) corporate growth ability in bonded zone
- 3.2.3 analysis of SME resource in high-tech zone
 - (1) analysis of enterprise scale in high-tech zone
 - (2) spatial distribution in high-tech zone
 - (3) analysis of corporate structure in high-tech zone
 - (4) analysis of corporate industry in high-tech zone
 - (5) corporate growth ability in high-tech zone
 - 1) corporate earning assets
 - 2) corporate ability of large-scale operation
 - 3) corporate ability of technology development
 - 4) corporate internationalization level
 - 5) high-level enterprise and group of listed companies

3.3 analysis of enterprise resource of strategic emerging industries

- 3.3.1 development prospects of strategic emerging industries
 - (1) analysis of structure of strategic emerging industries
 - (2) analysis of investment value of strategic emerging industries
 - (3) forecast of market capacity of strategic emerging industries
- 3.3.2 analysis of enterprise resource of strategic emerging industries
 - (1) analysis of development dilemma of strategic emerging enterprise
 - (2) scale concentration of strategic emerging enterprise
 - (3) geographical distribution of strategic emerging enterprise
 - (4) spatial distribution of strategic emerging enterprise
 - (5) analysis of growth capability of strategic emerging enterprise

3.4 analysis of excellent enterprise resource graduated from incubator

- 3.4.1 analysis of operation indicator of enterprise incubator
 - (1) analysis of quantity scale of enterprise incubator
 - (2) analysis of site area of enterprise incubator
 - (3) analysis of personnel scale of enterprise incubator
- 3.4.2 analysis of enterprise resource within enterprise incubator
 - (1) situation of enterprise incubator within incubator
 - 1) analysis of enterprise scale under incubation
 - 2) analysis of enterprise scale of graduation
 - (2) analysis of corporate revenue within incubator

Chapter 4: Analysis of operation of Chinese enterprise accelerator industry

4.1 analysis of attractiveness of enterprise accelerator construction

- 4.1.1 analysis of development scale of enterprise accelerator
- 4.1.2 trends of scale growth of enterprise accelerator
- 4.1.3 the degree of competition in enterprise accelerator industry
 - (1) analysis of spatial distribution of enterprise accelerator
 - (2) analysis of industry distribution of enterprise accelerator
 - (3) competition of service price of enterprise accelerator
- 4.1.4 analysis of profitability level of enterprise accelerator

4.2 analysis of investors of enterprise accelerator

- 4.2.1 analysis of construction scale by High-tech Zone Management Committee
- 4.2.2 analysis of construction scale by other investors
- 4.3 analysis of profitable method of enterprise accelerator**
 - 4.3.1 analysis of revenue from property service
 - 4.3.2 revenue from public service platform
 - 4.3.3 equity investment of settled enterprises
- 4.4 analysis of operation mechanism of enterprise accelerator**
 - 4.4.1 corporate access and exit mechanism
 - 4.4.2 corporate investment and financing mechanism
 - 4.4.3 corporate innovation mechanism
 - 4.4.4 corporate service evaluation mechanism
- 4.5 analysis of settled enterprises of accelerator**
 - 4.5.1 method of selection of settled enterprises of accelerator
 - (1) internal implantation
 - (2) external access
 - (3) join cooperative
 - 4.5.2 risk of selection of settled enterprises of accelerator
 - (1) reputation risk
 - (2) capital risk
 - (3) institutional risk
 - 4.5.3 analysis of status quo of settled enterprises of accelerator
- 4.6 analysis of exit of enterprise accelerator**
 - 4.6.1 analysis of type of enterprise of exit
 - 4.6.2 method for enterprise to actively exit
 - (1) analysis of publicly traded channel
