

China Integrated Building Industry Report of Forecast and Investment Strategic Plan Analysis, 2013–2017

目 录

CONTENTS

Chapter 1: Analysis of development of China integrated construction industry

- 1.1 Overview of the integrated construction industry
 - 1.1.1 definitions
 - 1.1.2 category
 - 1.1.3 features
- 1.2 analysis of benefit of Integrated building
 - 1.2.1 analysis of energy-saving efficiency
 - 1.2.2 analysis of economic benefit
 - 1.2.3 analysis of social benefit
- 1.3 Analysis of development status of integrated building industry
 - 1.3.1 The overall development status of integrated building industry
 - (1) development stage
 - (2) industrial base construction
 - 1.3.2 analysis of scale of integrated building industry
 - 1.3.3 analysis of profitability of integrated building industry
- 1.4 Analysis of development of integrated building in key provinces and cities
 - 1.4.1 development of integrated building in Shenzhen
 - 1.4.2 development of integrated building in Shenyang
 - 1.4.3 development of integrated building in Beijing
 - 1.4.4 development of integrated building in Shanghai
 - 1.4.5 development of integrated building in Tianjin
 - 1.4.6 development of integrated building in Hunan
 - 1.4.7 development of integrated building in Anhui
- 1.5 Analysis of import and export of mobile house
 - 1.5.1 Summary of import and export of mobile house
 - 1.5.2 Analysis of mobile house export
 - (1) export scale
 - (2) export prices
 - 1.5.3 Analysis of mobile house import
 - (1) import scale
 - (2) import prices

Chapter 2: Analysis of the upstream development of China integrated building

- 2.1 Overview of the integrated building industry chain
- 2.2 Effect of the steel industry on the crane industry
 - 2.2.1 analysis of production quantity
 - 2.2.2 import and export analysis
 - 2.2.3 analysis of apparent consumption
 - 2.2.4 analysis of supply and demand balance
 - 2.2.5 prediction of supply and demand trends
 - 2.2.6 Analysis of competition in the steel industry
 - 2.2.7 Analysis of steel industry prices
 - 2.2.8 the impact of the steel industry on integrated building industry
- 2.3 Market analysis of concrete piles
 - 2.3.1 analysis of production quantity
 - 2.3.2 import and export analysis
 - 2.3.3 analysis of supply and demand balance
 - 2.3.4 analysis of concrete pile prices
 - 2.3.5 Analysis of competition in the concrete pile industry
 - 2.3.6 the impact of the concrete pile industry on integrated building industry

2.4 Market analysis of timber industry

- 2.4.1 analysis of production quantity
- 2.4.2 analysis of supply and demand balance
- 2.4.3 analysis of concrete pile prices
- 2.4.4 analysis of competition in the concrete pile industry
- 2.4.5 the impact of the timber industry on integrated building industry

Chapter 3: Analysis of demand and market potential of China integrated building sector

3.1 application area and structure

3.2 Analysis of demand potential of houses for construction site

- 3.2.1 application form
- 3.2.2 application scale
- 3.2.3 development
- 3.2.4 The potential demand

3.3 Analysis of demand potential of governmental resettlement houses

- 3.3.1 application form
- 3.3.2 analysis of the potential demand
 - (1) demand for resettlement houses for demolition and relocation
 - (2) demand for resettlement houses for disaster relief
- 3.3.3 Analysis of examples of governmental resettlement houses

3.4 Analysis of demand potential of city commercial houses

- 3.4.1 application form
- 3.4.2 demand
- 3.4.3 application examples
- 3.4.4 potential demand

3.5 Analysis of demand potential of tourist houses

- 3.5.1 application form
- 3.5.2 demand
- 3.5.3 application examples
- 3.5.4 potential demand

3.6 Analysis of demand potential of field operation houses

- 3.6.1 application form
- 3.6.2 demand
- 3.6.3 potential demand

3.7 Analysis of demand potential of houses for municipal public engineering

- 3.7.1 application form
- 3.7.2 demand
- 3.7.3 potential demand

3.8 Analysis of demand potential of military interim houses

- 3.8.1 application form
- 3.8.2 demand
- 3.8.3 potential demand

3.9 Analysis of demand potential of enterprise and institution houses

- 3.9.1 application form
- 3.9.2 demand
- 3.9.3 potential demand

Chapter 4: Development model and technology system of China integrated building

4.1 Prefabricated concrete structural system (PC)

- 4.1.1 technical definition of the system
- 4.1.2 advantages of the form
- 4.1.3 development and application
- 4.1.4 types and features
- 4.1.5 analysis of engineering design
- 4.1.6 development prospects

4.2 light steel integrated building system

- 4.2.1 definition
- 4.2.2 features
- 4.2.3 form
- 4.2.4 structural system
- 4.2.5 development

- 4.2.6 development of cold-formed thin-walled steel building (CFSF)
- 4.2.7 development prospect

4.3 Container modular building system

- 4.3.1 basic overview
- 4.3.2 the main features
- 4.3.3 applications
- 4.3.4 development status
- 4.3.5 combination mode
- 4.3.6 market structure
- 4.3.7 development trends
- 4.3.8 opportunities and challenges

4.4 integrated building system of wooden structure

- 4.4.1 Summary of the development of integrated building system of wooden structure
 - (1) description
 - (2) the need for development
 - (3) the feasibility of developing
 - (4) overseas development
 - (5) domestic development
 - (6) the market structure
- 4.4.2 Analysis of lightweight wood frame construction system
 - (1) definition
 - (2) structural features
 - (3) the main features
 - (4) development status
 - (5) development prospects
- 4.4.3 Analysis of heavy wood construction system
 - (1) definition
 - (2) main features
 - (3) application
 - (4) prospects
- 4.4.4 analysis of SIP plate structure building system
 - (1) SIP plate structural system
 - (2) characteristics of SIP plate structural system
 - (3) advantage of SIP panels
 - (4) the development prospects of SIP plate structure building

Chapter 5: Analysis of development of China CSI residence building system

5.1 Overview of SI residence system

- 5.1.1 SI residence connotation
- 5.1.2 SI residence development
- 5.1.3 the implementation of the significance of SI residence

5.2 Development of Japan KSI residence system

- 5.2.1 summary of KSI residence development
- 5.2.2 necessary conditions for KSI residence construction
- 5.2.3 demonstration projects of KSI residence
 - (1) Sangenjaya KSI residence projects
 - (2) Meguro KIS residence projects
 - (3) KSI residence projects of H block of Shiodome area

5.3 Development of China CSI residence system

- 5.3.1 generation of CSI residence
- 5.3.2 core features of CSI residence
