

China Tunnel Boring Machine Industry Report (2016–2021), Development Prospect and Investment Strategic Planning

目 录

CONTENTS

Chapter 1: Related overview of tunnel boring machine

1.1 definition and classification of tunnel boring machine

1.1.1 definition of tunnel boring machine

1.1.2 classification of tunnel boring machine

1.1.3 construction of tunnel boring machine

1.2 analysis of features of construction of tunnel boring machine

1.2.1 features of construction of tunnel boring machine

1.2.2 advantages of construction of tunnel boring machine

1.2.3 process of construction of tunnel boring machine

1.3 analysis of industrial chain of tunnel boring machine industry

1.3.1 industrial chain of tunnel boring machine industry

1.3.2 relevance with the upstream and impact

1.3.3 relevance with the downstream and impact

Chapter 2: Analysis of external environment of tunnel boring machine industry

2.1 analysis of policy environment of tunnel boring machine industry

2.1.1 support policies of tunnel boring machine industry

2.1.2 development goals of tunnel boring machine industry

2.1.3 relevant standards of tunnel boring machine

2.2 analysis of economic environment of tunnel boring machine industry

2.2.1 GDP growth and forecast

2.2.2 fixed asset investment

2.2.3 operation of industrial economy

2.2.4 purchasing managers' index of manufacturing industry

2.3 analysis of technical environment of tunnel boring machine industry

2.3.1 development course of technology of tunnel boring machine

2.3.2 status quo of R&D of tunnel boring machine industry

2.3.3 technology trends of tunnel boring machine industry

(1) analysis of technical activity of the industry

(2) analysis of leading-technology enterprises of the industry

(3) analysis of hot technology of the industry

2.3.4 gap between domestic and foreign industry technology

2.3.5 development trends of technology of tunnel boring machine industry

Chapter 3: Analysis of development trend of the international tunnel boring machine industry

3.1 status quo of development of the international tunnel boring machine industry

3.1.1 analysis of development course of the international tunnel boring machine

3.1.2 analysis of status quo of application of the international tunnel boring machine

3.1.3 scale of production of the international tunnel boring machine industry

3.1.4 competitive landscape of the international tunnel boring machine industry

3.2 analysis of major international brands of tunnel boring machine industry

3.2.1 Herrenknecht

(1) basic information of the company

(2) the company's technical level of tunnel boring machine

(3) the company's production capacity of tunnel boring machine

(4) the company's operation performance of tunnel boring machine

3.2.2 Robbins

(1) basic information of the company

(2) the company's technical level of tunnel boring machine

(3) the company's production capacity of tunnel boring machine

(4) the company's operation performance of tunnel boring machine

3.2.3 Caterpillar

(1) basic information of the company

(2) the company's technical level of tunnel boring machine

(3) the company's production capacity of tunnel boring machine

(4) the company's operation performance of tunnel boring machine

3.2.4 Komatsu

(1) basic information of the company

(2) the company's technical level of tunnel boring machine

(3) the company's production capacity of tunnel boring machine

(4) the company's operation performance of tunnel boring machine

3.2.5 Japan's Mitsubishi Heavy Industries

(1) basic information of the company

(2) the company's technical level of tunnel boring machine

(3) the company's production capacity of tunnel boring machine

(4) the company's operation performance of tunnel boring machine

3.2.6 Kawasaki Heavy Industries

(1) basic information of the company

(2) the company's technical level of tunnel boring machine

(3) the company's production capacity of tunnel boring machine

(4) the company's operation performance of tunnel boring machine

3.2.7 Italian Serri Company

(1) basic information of the company

(2) the company's technical level of tunnel boring machine

(3) the company's production capacity of tunnel boring machine

(4) the company's operation performance of tunnel boring machine

3.3 analysis of development trends of the international tunnel boring machine industry

3.3.1 forecast of the international tunnel boring machine industry

3.3.2 forecast of trends of the international tunnel boring machine industry

Chapter 4: Analysis of operation of China's tunnel boring machine industry

4.1 overview of development of tunnel boring machine industry

4.1.1 development course of tunnel boring machine industry

4.1.2 characteristics of development of tunnel boring machine industry

4.1.3 influencing factors of tunnel boring machine industry

4.2 analysis of supply capacity of tunnel boring machine industry

4.2.1 quantity of producers of tunnel boring machine

4.2.2 analysis of production capacity of tunnel boring machine

4.2.3 analysis of localization rate of tunnel boring machine

4.2.4 constraints of production of tunnel boring machine

4.3 demand of tunnel boring machine industry and export statistics

4.3.1 sales volume of tunnel boring machine industry

4.3.2 scale of ownership of tunnel boring machine industry

4.3.3 scale of export of tunnel boring machine industry

4.4 analysis of operation of tunnel boring machine industry

4.4.1 sales revenue of tunnel boring machine industry

4.4.2 profit level of tunnel boring machine industry

4.4.3 development capability of tunnel boring machine industry

4.5 analysis of development pattern of tunnel boring machine industry

4.5.1 "joint manufacturing" model

4.5.2 "homegrown" model

4.5.3 "equipment manufacturing" model

Chapter 5: Analysis of main product markets of China's tunnel boring machine industry

5.1 classification by applicable geology

5.1.1 Hard Rock TBM

(1) features of Hard Rock TBM

(2) status quo of production of Hard Rock TBM

(3) demand for application of Hard Rock TBM

(4) development trends of Hard Rock TBM

5.1.2 Soft Rock TBM

- (1) features of Soft Rock TBM
- (2) status quo of production of Soft Rock TBM
- (3) demand for application of Soft Rock TBM
- (4) development trends of Soft Rock TBM
- 5.1.3 Soft Soil TBM
 - (1) features of Soft Soil TBM
 - (2) status quo of production of Soft Soil TBM
 - (3) demand for application of Soft Soil TBM
 - (4) development trends of Soft Soil TBM
- 5.1.4 composite tunnel boring machine
- 5.2 classification by the form of pressurization and stabilization of dig surfacing**
 - 5.2.1 slurry tunnel boring machine
 - (1) features of slurry tunnel boring machine
 - (2) status quo of production of slurry tunnel boring machine
 - (3) demand for application of slurry tunnel boring machine
 - (4) development trends of slurry tunnel boring machine
 - 5.2.2 EPB tunnel boring machine
 - (1) features of EPB tunnel boring machine
 - (2) status quo of production of EPB tunnel boring machine
 - (3) demand for application of EPB tunnel boring machine
 - (4) development trends of EPB tunnel boring machine

Chapter 6: Analysis of downstream demand of China's tunnel boring machine industry

- 6.1 analysis of demand for tunnel boring machine in urban subway construction**
 - 6.1.1 status quo and planning of urban subway construction
 - 6.1.2 advantage of tunnel boring machine technology in subway construction
 - 6.1.3 case of application of tunnel boring machine in subway construction
 - 6.1.4 capacity of demand for tunnel boring machine in subway construction
- 6.2 analysis of demand for tunnel boring machine in highway tunnel construction**
 - 6.2.1 analysis of status quo of highway tunnel construction
 - 6.2.2 advantage of tunnel boring machine technology in highway tunnel construction
 - 6.2.3 case of application of tunnel boring machine in highway tunnel construction
 - 6.2.4 forecast of demand for tunnel boring machine in highway tunnel construction
- 6.3 analysis of demand for tunnel boring machine in railway tunnel construction**
 - 6.3.1 analysis of status quo of railway tunnel construction
 - 6.3.2 advantage of tunnel boring machine technology in railway tunnel construction
 - 6.3.3 case of application of tunnel boring machine in railway tunnel construction
 - 6.3.4 forecast of demand for tunnel boring machine in railway tunnel construction
- 6.4 analysis of demand for tunnel boring machine in municipal engineering construction**
 - 6.4.1 analysis of status quo of urban underground pipeline construction
 - 6.4.2 demand for tunnel boring machine technology in urban underground pipeline construction
 - 6.4.3 case of application of tunnel boring machine in underground pipeline construction
 - 6.4.4 forecast of demand for tunnel boring machine in underground pipeline construction
- 6.5 analysis of demand for tunnel boring machine in hydraulic engineering construction**
 - 6.5.1 analysis of status quo of hydraulic construction
 - 6.5.2 analysis of demand for tunnel boring machine in diversion tunnel
 - 6.5.3 case of demand for tunnel boring machine in diversion tunnel
 - 6.5.4 forecast of demand for tunnel boring machine in hydraulic engineering construction
- 6.6 analysis of demand for tunnel boring machine in hydropower construction**
 - 6.6.1 analysis of status quo of hydropower construction
 - 6.6.2 demand for application of tunnel boring machine technology in hydropower construction
 - 6.6.3 case of application of tunnel boring machine in hydropower construction
 - 6.6.4 forecast of demand for tunnel boring machine in hydropower construction
- 6.7 analysis of demand for tunnel boring machine in coal mining industry**
 - 6.7.1 analysis of status quo of coal mining
 - 6.7.2 analysis of feasibility of tunnel boring machine in coal mining
 - 6.7.3 analysis of case of application of tunnel boring machine in coal mining
 - 6.7.4 forecast of demand for tunnel boring machine in coal mining industry

Chapter 7: Analysis of competitive landscape and leading enterprises of China's tunnel boring machine industry

7.1 analysis of competitive landscape and characteristics of tunnel boring machine industry

7.1.1 analysis of five-force model of tunnel boring machine industry

- (1) analysis of competitive landscape within the industry
- (2) analysis of bargaining power of upstream suppliers
- (3) analysis of bargaining power of downstream customers
- (4) analysis of threat of new entrants
- (5) analysis of threat of substitutes

7.1.2 analysis of characteristics of competition of tunnel boring machine industry

- (1) comparison of competitiveness of domestic and foreign enterprises
- (2) analysis of M & A and restructuring of the industry
- (3) forecast of future competitive trends of the industry

7.2 analysis of operation of foreign enterprises in China

7.2.1 Herrenknecht

- (1) Herrenknecht (Guangzhou) Tunnelling Equipment Co., Ltd.
 - 1) brief introduction of the company's development
 - 2) the company's core products and business
 - 3) the company's production capacity of tunnel boring machine
 - 4) the company's operation performance of tunnel boring machine
 - 5) analysis of the company's financial indicators
 - 6) analysis of advantages and disadvantages of the company's operation
 - 7) analysis of the company's investment and merger
 - 8) the company's latest development trend
- (2) Guangzhou Herrenknecht Tunnelling Machinery Co., Ltd.
 - 1) brief introduction of the company's development
 - 2) the company's core products and business
 - 3) the company's production capacity of tunnel boring machine
 - 4) the company's operation performance of tunnel boring machine
 - 5) analysis of the company's financial indicators
 - 6) analysis of advantages and disadvantages of the company's operation
 - 7) analysis of the company's investment and merger
 - 8) the company's latest development trend
- (3) Herrenknecht (Chengdu) Tunnelling Equipment Co., Ltd.
 - 1) brief introduction of the company's development
 - 2) the company's core products and business
 - 3) the company's production capacity of tunnel boring machine
 - 4) the company's operation performance of tunnel boring machine
 - 5) analysis of the company's financial indicators
 - 6) analysis of advantages and disadvantages of the company's operation
 - 7) analysis of the company's investment and merger
 - 8) the company's latest development trend
- (4) Beijing Shougang Herrenknecht Tunnelling Machinery Co., Ltd.
 - 1) basic information of the company
 - 2) analysis of the company's main business
 - 3) the company's production capacity of tunnel boring machine
 - 4) the company's operation performance of tunnel boring machine
 - 5) analysis of the company's financial indicators
 - 6) analysis of advantages and disadvantages of the company's competition
 - 7) analysis of the company's latest trend

7.2.2 Robbins

- (1) analysis of business layout of Robbins in China
- (2) Robbins (Shanghai) Underground Engineering Equipment Company
 - 1) brief introduction of the company's development
 - 2) the company's core products and business
 - 3) the company's production capacity of tunnel boring machine
 - 4) the company's operation performance of tunnel boring machine
 - 5) analysis of the company's financial indicators
 - 6) analysis of advantages and disadvantages of the company's operation
 - 7) analysis of the company's investment and merger
 - 8) the company's latest development trend

7.2.3 Caterpillar

- (1) the company's business layout in China
- (2) the company's operation performance in China
- (3) advantages and disadvantages of the company's competition in China

7.2.4 Komatsu

- (1) the company's business layout in China
- (2) the company's operation performance in China
- (3) advantages and disadvantages of the company's competition in China

7.2.5 Japan's Mitsubishi Heavy Industries

- (1) the company's business layout in China
- (2) the company's operation performance in China
- (3) advantages and disadvantages of the company's competition in China

- 1)there are another 4 enterprises

7.3 analysis of operation of domestic leading enterprises

7.3.1 China Railway Engineering Equipment Co., Ltd.

- (1) brief introduction of the company's development
- (2) the company's core products and business
- (3) the company's production capacity of tunnel boring machine
- (4) the company's operation performance of tunnel boring machine
- (5) analysis of the company's financial indicators
- (6) analysis of advantages and disadvantages of the company's operation
- (7) analysis of the company's investment and merger
- (8) the company's latest development trend

7.3.2 China Railway Construction Heavy Industry Group Co., Ltd.

- (1) brief introduction of the company's development
- (2) the company's core products and business
- (3) the company's production capacity of tunnel boring machine
- (4) the company's operation performance of tunnel boring machine
- (5) analysis of the company's financial indicators
- (6) analysis of advantages and disadvantages of the company's operation
- (7) analysis of the company's investment and merger
- (8) the company's latest development trend

7.3.3 Shanghai Tunnel Engineering Co., Ltd.

- (1) brief introduction of the company's development
- (2) the company's core products and business
- (3) the company's production capacity of tunnel boring machine
- (4) the company's operation performance of tunnel boring machine
- (5) analysis of the company's financial indicators
 - 1) analysis of capabilities of production and marketing
 - 2) analysis of operation capability
 - 3) analysis of profitability capability
 - 4) analysis of solvency capability
 - 5) analysis of development capability
- (6) analysis of advantages and disadvantages of the company's operation
- (7) analysis of the company's investment and merger
- (8) the company's latest development trend

7.3.4 North Heavy Industry Group Co., Ltd.

- (1) brief introduction of the company's development
- (2) the company's core products and business
- (3) the company's production capacity of tunnel boring machine
- (4) the company's operation performance of tunnel boring machine
- (5) analysis of the company's financial indicators
 - 1) analysis of capabilities of production and marketing
 - 2) analysis of operation capability
 - 3) analysis of profitability capability
 - 4) analysis of solvency capability
 - 5) analysis of development capability
- (6) analysis of advantages and disadvantages of the company's operation
- (7) analysis of the company's investment and merger

- (8) the company's latest development trend
- 7.3.5 Qinhuangdao Tianye Communications Industry Co., Ltd.
 - (1) brief introduction of the company's development
 - (2) the company's core products and business
 - (3) the company's production capacity of tunnel boring machine
 - (4) the company's operation performance of tunnel boring machine
 - (5) analysis of the company's financial indicators
 - 1) analysis of capabilities of production and marketing
 - 2) analysis of operation capability
 - 3) analysis of profitability capability
 - 4) analysis of solvency capability
 - 5) analysis of development capability
 - (6) analysis of advantages and disadvantages of the company's operation
 - (7) analysis of the company's investment and merger
 - (8) the company's latest development trend

there are another 10 enterprises

Chapter 8: Development trends of China's tunnel boring machine industry and investment advice

- 8.1 analysis of development trends of tunnel boring machine industry
 - 8.1.1 forecast of development prospects of the industry
 - 8.1.2 forecast of development trends of the industry
- 8.2 analysis of entry barriers of tunnel boring machine industry
 - 8.2.1 barrier of market access
 - 8.2.2 technical barrier
 - 8.2.3 barriers of capital and scale
 - 8.2.4 barrier of client development
 - 8.2.5 barrier of non-standard products
- 8.3 analysis of risks of investment of tunnel boring machine industry
 - 8.3.1 policy risk
 - 8.3.2 risk of macro economy
 - 8.3.3 market risk
 - 8.3.4 technical risk
 - 8.3.5 risk of raw materials
 - 8.3.6 other risks
- 8.4 investment opportunities of tunnel boring machine industry and recommendations
 - 8.4.1 investment opportunities of tunnel boring machine industry
 - 8.4.2 investment direction of tunnel boring machine industry
 - 8.4.3 entry strategy of tunnel boring machine industry
