

China Coalbed Methane Industry Report (2016–2021), Economic Evaluation & Investment Strategic Planning

目 录

CONTENTS

Chapter 1: Review of China's coalbed methane industry

1.1 definition of coalbed methane industry

- 1.1.1 definition of coalbed methane
- 1.1.2 development mode of coalbed methane
- 1.1.3 scope of the industry in the report

1.2 development course of coalbed methane industry

Chapter 2: Analysis of technical expertise of China's coalbed methane industry

2.1 analysis of geophysical detection technology

- 2.1.1 status quo of geophysical detection technology
 - (1) coalbed methane well logging detection technology
 - 1) coalbed methane well logging methods
 - (2) coalbed methane reservoir logging evaluation technique
- (2) coalbed methane seismic exploration technology
- 2.1.2 analysis of adaptability of geophysical detection technology
 - (1) adaptability of coalbed methane well logging technology
 - (2) adaptability of coalbed methane seismic exploration technology
- 2.1.3 development direction of geophysical detection technology
 - (1) forecast of coalbed methane well logging technology
 - (2) forecast of coalbed methane seismic exploration technology

2.2 analysis of major coalbed methane drilling technologies

- 2.2.1 status quo of development of major drilling technologies
- 2.2.2 analysis of adaptability of major drilling technologies
 - (1) analysis of adaptability of major drilling technologies
 - (2) analysis of adaptability of major coring technologies
 - (3) analysis of adaptability of major completion technologies
 - (4) analysis of adaptability of major cementing technologies
- 2.2.3 development trends of major coalbed methane drilling technologies

2.3 analysis of coalbed methane mining technology

- 2.3.1 status quo of coalbed methane mining technology
 - (1) status quo of drainage gas production
 - (2) status quo of pinnate horizontal wells
- 2.3.2 application of coalbed methane mining technology
 - (1) analysis of application of drainage gas production
 - (2) analysis of application of pinnate horizontal well technology
- 2.3.3 development trends of coalbed methane mining technology
 - (1) development trends of drainage gas production technology
 - (2) development trends of pinnate branch horizontal well
- 2.3.4 water treatment of coalbed methane mining

2.4 analysis of coalbed methane output increase technology

- 2.4.1 analysis of status quo of coalbed methane output increase technology
- 2.4.2 analysis of application of major output increase technologies
 - (1) analysis of coalbed methane fracturing technology
 - (2) analysis of coalbed methane gas injection technology
 - (3) analysis of coalbed methane multilateral well technology
- 2.4.3 development direction of major output increase technologies

2.5 design of development program of coalbed methane reservoir area

- 2.5.1 suitable coalbed methane development technology
 - (1) drilling technology
 - (2) mining technology

(3) output increase technology

2.5.2 forecast of coalbed methane output

Chapter 3: Status quo of development and planning of China's coalbed methane industry chain

3.1 coalbed methane reserves and planning

3.1.1 analysis of coalbed methane reserves

3.1.2 geographical distribution of coalbed methane resources

3.1.3 planning of coalbed methane exploration

3.2 status quo and planning of coalbed methane mining

3.2.1 status quo and planning of coalbed methane mining

(1) scale of coalbed methane mining

(2) planning of coalbed methane mining

3.2.2 status quo and planning of surface mining

(1) scale of coalbed methane drilling

1) scale of coalbed methane surface mining

(2) project of coalbed methane surface mining

(3) planning of coalbed methane surface mining

3.2.3 status quo and planning of underground drainage

(1) scale of coalbed methane underground drainage

(2) project of coalbed methane underground drainage

(3) planning of coalbed methane underground drainage

3.2.4 contrast of surface mining and underground drainage

(1) contrast of surface mining and underground drainage

1) analysis of proportion of surface mining and underground drainage

(2) forecast of surface mining and underground drainage

3.3 status quo and planning of construction of coalbed methane pipeline

3.3.1 status quo and planning of construction of coalbed methane pipeline

(1) status quo of construction of coalbed methane pipeline (2) planning of construction of coalbed methane pipeline

3.3.2 status quo and planning of construction of natural gas pipeline network

(1) status quo of construction of natural gas pipeline network

(2) planning of construction of natural gas pipeline network

3.4 status quo of utilization and demand outlook of coalbed methane

3.4.1 scale of utilization of coalbed methane

3.4.2 structure of utilization of coalbed methane

3.4.3 status quo of utilization of coalbed methane

(1) utilization of coalbed methane for civilian fuel

(2) status quo of utilization of coalbed methane for civilian fuel

1) construction of coalbed methane projects for civilian fuel

(3) coalbed methane power generation

1) overview of coalbed methane generation

2) price of coalbed methane generation

3) project of coalbed methane generation

(4) the industrial utilization of coalbed methane

3.4.4 forecast of utilization of natural gas / coalbed methane

(1) forecast of power generation demand of natural gas / coalbed methane

(2) forecast of chemical demand of natural gas / coalbed methane

(3) forecast of industrial gas demand of natural gas / coalbed methane

(4) forecast of civil gas demand of natural gas / coalbed methane

Chapter 4: Economic evaluation of China's coalbed methane industry

4.1 system of economic evaluation of coalbed methane target area

4.1.1 method of economic evaluation of coalbed methane target area

4.1.2 parameter of economic evaluation of coalbed methane target area

4.1.3 estimation method of parameter of economic evaluation of coalbed methane target area

4.1.4 basic data of economic evaluation of coalbed methane target area

4.2 economic evaluation of major coalbed methane target areas

4.2.1 comparison of economic evaluation of vertical wells and multi-lateral horizontal wells

4.2.2 economic evaluation of typical coalbed methane target areas

(1) economic evaluation of Hancheng target area

(2) economic evaluation of other target areas

4.3 social evaluation of coalbed methane development

4.3.1 contribution of coalbed methane development to coal mine safety production

(1) reduce the incidence of coal mine gas accident

(2) estimation of the contribution to coal mine safety production

4.3.2 contribution of coalbed methane development to environmental protection

(1) to reduce greenhouse gas emissions

(2) estimation of the contribution to environmental protection

4.3.3 contribution of coalbed methane development to energy security

(1) the role of China's energy security

(2) estimation of the contribution to China's energy security

Chapter 5: Construction of China's coalbed methane base and mining area

5.1 construction of coalbed methane surface mining industry base

5.1.1 construction of coalbed methane surface mining industry base

(1) coalbed methane industry base in Qinshui basin

1) coalbed methane resource in Qinshui basin

2) investors of coalbed methane in Qinshui basin

3) investment scale of coalbed methane in Qinshui basin

4) investment potential of coalbed methane in Qinshui basin

5) development projects of coalbed methane in Qinshui basin

6) development planning of coalbed methane in Qinshui basin

(2) Dongyuan coalbed methane industry base in Ordos Basin

1) coalbed methane resource in Ordos basin

2) investors of coalbed methane in Ordos basin

3) investment scale of coalbed methane in Ordos basin

4) investment potential of coalbed methane in Ordos basin

5) development projects of coalbed methane in Ordos basin

6) development planning of coalbed methane in Ordos basin

(3) development of coalbed methane in other areas

1) development of coalbed methane in Fuxin

2) development of coalbed methane in Liaoning Tiefa mining area

3) development of coalbed methane in Henan Jiaozuo

4) development of coalbed methane in Pingdingshan

5) development of coalbed methane in Zhijin - Anshun

5.2 construction of key and demonstration mining area of coalbed methane underground extraction

5.2.1 construction of large-scale mining area of coal mine gas extraction and utilization

(1) construction of large-scale mining area in Shanxi

(2) construction of large-scale mining area in Liaoning
