

China Tunnel Boring Machine (TBM) Industry Report (2016–2021), Market Research and Investment Forecast

目 录

CONTENTS

Chapter 1: Review of development of China's tunnel boring machine industry

- 1.1 definition of tunnel boring machine industry
 - 1.1.1 definition of tunnel boring machine industry
 - 1.1.2 advantage of tunnel boring machine industry
- 1.2 overview of product of tunnel boring machine
 - 1.2.1 classification and feature of tunnel boring machine
 - 1.2.2 advantage of construction of tunnel boring machine
 - 1.2.3 disadvantage of construction of tunnel boring machine
 - 1.2.4 principle of selection of tunnel boring machine
 - 1.2.5 system design of tunnel boring machine
 - (1) host system of tunnel boring machine
 - (2) supporting system
- 1.3 development environment of tunnel boring machine industry
 - 1.3.1 analysis of policy environment of the industry
 - (1) analysis of related policies of the industry
 - (2) analysis of development planning of the industry
 - 1.3.2 analysis of economic environment of the industry
 - (1) analysis of the country's macroeconomic environment
 - 1) analysis of economic growth
 - 2) analysis of industrial growth
 - 3) analysis of investment in fixed assets
 - (2) impact of economic environment on the industry

Chapter 2: Analysis of development of China's tunnel boring machine industry

- 2.1 overview of development of China's tunnel boring machine industry
 - 2.1.1 analysis of advantages and disadvantages of China's tunnel boring machine industry
 - (1) advantages of China's tunnel boring machine industry
 - (2) disadvantages of China's tunnel boring machine industry
 - 2.1.2 overview of development of China's tunnel boring machine industry
 - 2.1.3 market scale of China's tunnel boring machine industry
- 2.2 analysis of China's tunnel boring machine market
 - 2.2.1 overview of tunnel boring machine market
 - 2.2.2 analysis of shield machine market
 - (1) analysis of China's shield machine manufacturing enterprises
 - (2) analysis of China's shield machine construction enterprises
 - (3) analysis of market of main product of shield machine
 - 1) analysis of market of earth pressure balance shield machine
 - 1. analysis of market of slurry shield machine
 - (4) analysis of market capacity of China's shield machine
 - (5) forecast of market of China's shield machine
 - 2.2.3 analysis of market of hard rock TBM
 - (1) comparison of hard rock TBM and shield machine
 - (2) analysis of market of main product of hard rock TBM
 - 1) analysis of market of open TBM
 - 2) analysis of market of single shield TBM
 - 3) analysis of market of double shield TBM
- 2.3 analysis of technology of China's tunnel boring machine industry
 - 2.3.1 development course of technology of tunnel boring machine
 - 2.3.2 status quo of development of technology of tunnel boring machine
- 2.4 analysis of localization of China's tunnel boring machine

- 2.4.1 analysis of localization of tunnel boring machine
- 2.4.2 analysis of localization model of tunnel boring machine
 - (1) Shanghai Tunnel : independent R & D model
 - (2) North Heavy Industry : merger model
 - (3) Dalian Heavy Industry : co-operation model

Chapter 3: Analysis of structure of investment of China' s tunnel project

3.1 analysis of investment in fixed assets of rail transport

- 3.1.1 analysis of scale of investment of rail transport
 - (1) status quo of scale of investment
 - (2) analysis of structure of investment
 - (3) forecast of scale of investment
 - (4) total scale of construction
- 3.1.2 composition of source of investment funding of rail transport
- 3.1.3 analysis of construction of investment project of rail transport
- 3.1.4 analysis of function of investment funding of rail transport
 - (1) composition of investment capital flow
 - (2) proportion of investment funding of different levels of project
 - (3) proportion of investment in new construction, expansion and renovation project
- 3.1.5 analysis of composition of main bodies of investment of rail transport

3.2 analysis of investment in fixed assets of tunnel project

- 3.2.1 analysis of scale of investment of tunnel project
- 3.2.2 composition of source of investment funding of tunnel project
- 3.2.3 analysis of construction of investment project of tunnel project
- 3.2.4 analysis of function of investment funding of tunnel project
 - (1) composition of investment capital flow
 - (2) proportion of investment funding of different levels of project
 - (3) proportion of investment in new construction, expansion and renovation project
- 3.2.5 analysis of composition of main bodies of investment of tunnel project

3.3 analysis of investment in fixed assets of hydraulic project

- 3.3.1 analysis of scale of investment of hydraulic project
 - (1) status quo of scale of investment
 - (2) analysis of structure of investment
 - (3) total scale of construction
- 3.3.2 composition of source of investment funding of hydraulic project
- 3.3.3 analysis of construction of investment project of hydraulic project
- 3.3.4 analysis of function of investment funding of hydraulic project
 - (1) composition of investment capital flow
 - (2) proportion of investment funding of different levels of project
 - (3) proportion of investment in new construction, expansion and renovation project
- 3.3.5 analysis of composition of main bodies of investment of hydraulic project

3.4 analysis of investment in fixed assets of pipeline project

- 3.4.1 analysis of scale of investment of pipeline project
- 3.4.2 composition of source of investment funding of pipeline project
- 3.4.3 analysis of construction of investment project of pipeline project
- 3.4.4 analysis of function of investment funding of pipeline project
 - (1) composition of investment capital flow
 - (2) proportion of investment funding of different levels of project
 - (3) proportion of investment in new construction, expansion and renovation project
- 3.4.5 analysis of composition of main bodies of investment of pipeline project

3.5 analysis of investment in fixed assets of power project

- 3.5.1 analysis of scale of investment of power project
 - (1) status quo of scale of investment
 - (2) analysis of structure of investment
 - (3) total scale of construction
- 3.5.2 composition of source of investment funding of power project
- 3.5.3 analysis of construction of investment project of power project
- 3.5.4 analysis of function of investment funding of power project
 - (1) composition of investment capital flow
 - (2) proportion of investment funding of different levels of project

(3) proportion of investment in new construction, expansion and renovation project

3.5.5 analysis of composition of main bodies of investment of power project

Chapter 4: Analysis of demand for China's tunnel boring machine

4.1 overview of application of China's tunnel boring machine

4.2 demand for tunnel boring machine in urban subway

4.2.1 planning of construction of urban subway

4.2.2 analysis of application of tunnel boring machine in urban subway

4.2.3 status quo of demand for tunnel boring machine in urban subway

(1) Shanghai is the first to use shield machine for subway construction

(2) Beijing, Shanghai, Guangzhou and Shenzhen and other places have to use shield machine for subway tunnel construction

(3) application of boring machine in subway tunnel in some cities

4.2.4 forecast of demand for tunnel boring machine in urban subway

4.3 demand for tunnel boring machine in highway tunnel

4.3.1 planning of construction of highway

(1) national expressway network planning

(2) "Twelfth Five Year Plan" of transportation

4.3.2 analysis of application of tunnel boring machine in highway tunnel

4.3.3 status quo of demand for tunnel boring machine in highway tunnel

4.3.4 forecast of demand for tunnel boring machine in highway tunnel

4.4 demand for tunnel boring machine in railway tunnel

4.4.1 planning of construction of railway

4.4.2 analysis of application of tunnel boring machine in railway tunnel

4.4.3 status quo of demand for tunnel boring machine in railway tunnel

4.4.4 forecast of demand for tunnel boring machine in railway tunnel

4.5 demand for tunnel boring machine in hydraulic project

4.5.1 planning of construction of hydraulic project

4.5.2 analysis of application of tunnel boring machine in hydraulic project

4.5.3 status quo of demand for tunnel boring machine in hydraulic project

4.6 demand for tunnel boring machine in municipal project

4.6.1 planning of construction of municipal project

4.6.2 analysis of application of tunnel boring machine in municipal project

4.6.3 status quo of demand for tunnel boring machine in municipal project

4.7 demand for tunnel boring machine in power plant project

4.7.1 planning of construction of power plant project

4.7.2 analysis of application of tunnel boring machine in power plant project

4.7.3 status quo of demand for tunnel boring machine in power plant project

4.8 demand for tunnel boring machine in petrochemical pipeline project

4.8.1 planning of construction of petrochemical pipeline project

4.8.2 status quo of demand for tunnel boring machine in petrochemical pipeline project

4.8.3 forecast of demand for tunnel boring machine in petrochemical pipeline project

Chapter 5: Analysis of market competition of China's tunnel boring machine

5.1 analysis of development of the international market of tunnel boring machine

5.1.1 overview of development of the international tunnel boring machine

5.1.2 producers of the international tunnel boring machine

5.2 analysis of competition of the international giants of tunnel boring machine

5.2.1 German Herrenknecht Company

(1) overview of the company's development

(2) analysis of the company's products

(3) analysis of the company's technology

(4) analysis of the company's engineering project

(5) analysis of the company's investment in China

5.2.2 American Robbins Company

(1) overview of the company's development

(2) analysis of the company's products

(3) analysis of the company's technology

(4) analysis of the company's investment in China

5.2.3 Japan's Kawasaki Heavy Industries

(1) overview of the company's development

- (2) analysis of the company's products
- (3) analysis of the company's technology
- (4) analysis of the company's investment in China
- 5.2.4 Mitsubishi Heavy Industries
 - (1) overview of the company's development
 - (2) analysis of the company's products
 - (3) analysis of the company's technology
 - 1) analysis of the company's investment in China
- 5.2.5 Japan's Komatsu
 - (1) overview of the company's development
 - (2) analysis of the company's products
 - (3) analysis of the company's technology
 - (4) analysis of the company's investment in China
- 5.2.6 Hitachi Zosen Corporation
 - (1) overview of the company's development
 - (2) analysis of the company's technology
 - (3) analysis of the company's investment in China

5.3 analysis of market competition of China's tunnel boring machine

- 5.3.1 analysis of market competition of China's tunnel boring machine industry
 - (1) foreign brands have strong competitiveness
 - (2) development of domestic brands should not be underestimated
- 5.3.2 analysis of five-force model of China's tunnel boring machine industry
 - (1) analysis of the bargaining power of the upstream industry
 - (2) analysis of the bargaining power of the downstream industry
 - (3) analysis of threat of alternatives of the industry
 - (4) analysis of threat of new entrants of the industry
 - (5) analysis of status quo of competition in the industry

5.4 analysis of investment, merger, reorganization and integration of the industry

- 5.4.1 background of investment, merger, reorganization and integration of the industry
- 5.4.2 overview of investment, merger, reorganization and integration of the industry
- 5.4.3 developments of investment, merger, reorganization and integration of the industry

Chapter 6: Analysis of industrialization of China's tunnel boring machine industry

6.1 significance of industrialization of China's tunnel boring machine industry

6.2 value chain of China's tunnel boring machine industry

- 6.2.1 analysis of value chain of tunnel boring machine industry
- 6.2.2 main models of value chain of tunnel boring machine industry
 - (1) European and American model
 - (2) Japanese model
 - (3) Chinese model

6.3 achievements of industrialization of China's tunnel boring machine industry

- 6.3.1 base construction of industrialization of tunnel boring machine
- 6.3.2 independent design and manufacturing of EPB shield
- 6.3.3 digestion and absorption and design of large diameter slurry shield

6.4 methods of industrialization of China's tunnel boring machine industry

- 6.4.1 methods of industrialization of tunnel boring machine industry
 - (1) cooperation between state-owned and foreign enterprises
 - (2) state-owned independent manufacturer
 - (3) methods of industrial construction enterprises
- 6.4.2 approach of industrialization of tunnel boring machine

6.5 direction of industrialization of China's tunnel boring machine industry

- 6.5.1 industrialization and series of EPB shield
- 6.5.2 development of slurry shield and composite shield
- 6.5.3 research on key technologies of tunnel boring machine

Chapter 7: Analysis of import and export of China's tunnel boring machine industry

7.1 summary of import and export of tunnel boring machine industry

7.2 analysis of export market of tunnel boring machine industry

- 7.2.1 overall situation of export
 - (1) analysis of export sales
 - (2) analysis of export volume

7.2.2 structure of export products

7.3 analysis of import market of tunnel boring machine industry

7.3.1 overall situation of import

(1) analysis of import sales

(2) analysis of import volume

7.3.2 structure of import products

7.4 forecast of import and export of tunnel boring machine and recommendations

7.4.1 forecast of export of tunnel boring machine and recommendations

7.4.2 forecast of import of tunnel boring machine and recommendations

Chapter 8: Analysis of operation of China's leading enterprises of tunnel boring machine

8.1 analysis of operation of China's leading enterprises of tunnel boring machine

8.1.1 North Heavy Industry Group Co., Ltd.

(1) overview of the company's development

(2) analysis of the company's product structure

(3) analysis of the company's production and sales capabilities

(4) analysis of the company's profitability capability

(5) analysis of the company's operation capability

(6) analysis of the company's solvency capability

(7) analysis of the company's development capability

(8) analysis of the company's R & D capability
