

China Noise and Vibration Control Industry Report (2016–2021), Market Research & Investment Forecast

目 录

CONTENTS

Chapter 1: Review of China noise and vibration control industry

1.1 concepts and definitions of the industry

- 1.1.1 definition of noise and vibration pollution
- 1.1.2 category of noise and vibration pollution
- 1.1.3 evaluation criteria of noise and vibration
 - (1) evaluation criteria of noise
 - (2) evaluation criteria of vibration
- 1.1.4 division of noise and vibration pollution industry

1.2 status quo of noise and vibration pollution

- 1.2.1 major sources of noise and vibration pollution
- 1.2.2 national environmental noise
- 1.2.3 regional environmental noise
- 1.2.4 road traffic noise
- 1.2.5 noise of urban functional areas

1.3 status quo of noise and vibration control

- 1.3.1 analysis of ways to control noise and vibration
 - (1) ways to control noise
 - (2) ways to control vibration
- 1.3.2 analysis of status quo of noise and vibration control
 - (1) status quo of noise and vibration control
 - (2) pressure facing noise and vibration control

Chapter 2: Analysis of development environment of China noise and vibration control industry

2.1 analysis of policy environment of the industry

- 2.1.1 regulatory system of noise and vibration control
- 2.1.2 interpretation of the main laws and regulations of the industry
 - (1) "Environmental Protection Law of People's Republic of China"
 - (2) "Noise Pollution Environmental Prevention Law of People's Republic of China"
- 2.1.3 interpretation of major standards of the industry
 - (1) "Engineering Technical Guidelines for Environmental Noise and Vibration Control"
 - (2) "Standards for noise emission from social life environment"
 - (3) "Standards for noise emission from industrial enterprises"
 - (4) "Standards for sound environmental quality"
 - (5) "Standards for urban environmental vibration"
- 2.1.4 interpretation of major policy planning of the industry
 - (1) "National Environmental Protection Planning of Twelfth-five-year"
 - (2) "Development planning of energy-saving environmental protection industry"
 - (3) "Guiding opinions on strengthening the prevention and control of environmental noise pollution to improve the acoustic quality of urban and rural environment"
 - (4) "Notice on issues related to ambient noise of environmental impact assessment of the road and rail (including light rail) and other construction projects"

2.2 analysis of economic environment of the industry

- 2.2.1 analysis of GDP
- 2.2.2 analysis of the development of the industry
- 2.2.3 analysis of manufacturing PMI index

2.3 analysis of technical environment of the industry

- 2.3.1 analysis of the development and application of new technologies of the industry
 - (1) noise control engineering design
 - (2) technology of transportation noise control

- (3) technology of sound barrier
- (4) technology of railway noise and vibration control
- (5) technology of damping spring and floating slab vibration isolation
- (6) technology of aircraft noise control
- (7) technology of active noise control
- (8) acoustic material innovation
- (9) technology of environmental noise measurement
- 2.3.2 analysis of gap between domestic and foreign industry technology
 - (1) research design
 - (2) formulation of standardized design documents
 - (3) engineering design
 - (4) product quality and production scale
- 2.3.3 analysis of development trends of industry technology

Chapter 3: Analysis of development of China noise and vibration control industry

3.1 analysis of development of environmental protection industry

- 3.1.1 development course of environmental protection industry
- 3.1.2 development status quo of environmental protection industry
- 3.1.3 analysis of output of environmental protection industry
- 3.1.4 analysis of investment of environmental protection industry
 - (1) the total investment in environmental pollution control
 - (2) structure of investment of environmental pollution control
 - (3) regional investment of environmental pollution control
- 3.1.5 urban investment in environmental infrastructure construction
 - (1) the total infrastructure investment
 - (2) the structure of infrastructure investment
- 3.1.6 investment of industrial pollution control
 - (1) total investment in industrial pollution control
 - 1) structure of industrial pollution control investment
- 3.1.7 investment in pollution control facilities
 - (1) direct investment in pollution control facilities
 - (2) operating costs of pollution control facilities
- 3.1.8 analysis of construction of environmental service institutions

3.2 analysis of development of noise and vibration control industry

- 3.2.1 analysis of development status quo of the industry
- 3.2.2 analysis of market demand of the industry
- 3.2.3 analysis of development scale of the industry
- 3.2.4 analysis of investment scale of the industry
- 3.2.5 analysis of sales of the industry
 - (1) the rapid growth of sales revenue
 - 1) sustained profit growth
- 3.2.6 analysis of profitability capability of the industry
 - (1) sales profit of the industry
 - (2) gross margin of the industry
 - (3) cost margin of the industry
 - (4) return on total assets of the industry
 - (5) ROE of the industry
- 3.2.7 analysis of problems of the industry

3.3 analysis of competition of noise and vibration control industry

- 3.3.1 analysis of competition of domestic market
 - (1) threat of potential entrants of the industry
 - (2) threat of alternatives of the industry
 - (3) competition within the industry
- 3.3.2 development of foreign companies and development in China
 - (1) German GERB Company
 - (2) German BSW Company
 - (3) Japan Silencer Institute
 - (4) Hong Kong Xinguang International Limited
 - (5) Hong Kong Yinda Acoustic Research Ltd.
 - (6) German Müller BBM Group

3.3.3 analysis of competitiveness of domestic and international companies

Chapter 4: Analysis of market segments of China noise and vibration control industry

4.1 analysis of development of materials market

4.1.1 analysis of development of sound-absorbing material

- (1) performance and classification
- (2) analysis of application status quo
 - 1) latest research progress
- (3) main producers
- (4) analysis of development trends

4.1.2 analysis of development of insulation materials

- (1) performance and classification
- (2) analysis of application status quo
 - 1) latest research progress
- (3) main producers
- (4) analysis of development trends

4.1.3 analysis of development of damping material

- (1) performance and classification
- (2) analysis of application status quo
 - 1) latest research progress
- (3) main producers
- (4) analysis of development trends

4.1.4 analysis of development of composite materials

4.1.5 development trends of acoustic material

4.2 analysis of market of equipment manufacturing industry

4.2.1 analysis of the overall development

4.2.2 analysis of production scale of the industry

- (1) production growth
- (2) the geographical distribution of production

4.2.3 analysis of markets of main products

- (1) analysis of muffler market
- (2) principles and classification
 - 1) analysis of application status quo
 - 2) market scale of products
 - 3) status quo of product R & D
 - 4) major producers
 - 5) analysis of development trends
- (3) analysis of noise insulation market
 - 1) analysis of market of soundproof door
 - 2) analysis of market of soundproof window
 - 3) analysis of market of soundproof room
 - 4) analysis of market of soundproof enclosure
 - 5) analysis of market of soundproof barrier
- (4) analysis of market of vibration isolation equipment
 - 1) analysis of market of shock absorber
 - 2) analysis of market of isolator
- (5) analysis of market of noise and vibration meter
- (6) analysis of market of low noise

4.2.4 analysis of market competition

4.3 analysis of market of engineering and technical service industry

4.3.1 analysis of the overall development

4.3.2 selection of noise control schemes

- (1) principle of selection
- (2) program of selection

4.3.3 analysis of bidding of the industry

- (1) bidding approach
- (2) bidding trends

4.3.4 analysis of competition in the industry

4.3.5 analysis of development trends of the industry

Chapter 5: Analysis of demand of noise and vibration control in key areas and trends

5.1 analysis of demand of noise and vibration control in transportation**5.1.1 analysis of infrastructure and investment of transportation industry**

- (1) analysis of road construction and investment
- (2) analysis of investment of highway environmental protection
- (3) analysis of railway construction and investment
- (4) aviation airport construction and investment
- (5) investment of airport noise and vibration control

5.1.2 analysis of car market development and demand

- (1) analysis of car ownership
- (2) analysis of automobile production and sales
- (3) classification of car noise
- (4) evaluation of car noise
- (5) the importance of car noise and vibration control
- (6) methods of car noise and vibration control

5.1.3 standards and policies of traffic noise and vibration control**5.1.4 traffic noise and vibration control measures and comparative analysis**

- (1) comparison of key measures of noise control
- (2) comparison of key measures of vibration control

5.1.5 prospects of traffic noise and vibration control industry

- (1) prospects of road construction
- (2) prospects of railway construction
- (3) prospects of airport construction
- (4) prospects of automotive market

5.2 analysis of demand of noise and vibration control in industrial production**5.2.1 analysis of the status quo of industrial noise and vibration pollution**

- (1) production and harms of industrial noise and vibration
- (2) standards and policies of industrial noise and vibration control

5.2.2 analysis of the status quo of industrial noise and vibration control

- (1) the status quo of fan noise and vibration control
- (2) the status quo of air compressor noise and vibration control
- (3) the status quo of motor noise and vibration control
- (4) the status quo of diesel engine noise and vibration control
- (5) the status quo of loom noise and vibration control
- (6) the status quo of punching machine noise and vibration control
- (7) the status quo of saw machine noise and vibration control
- (8) the status quo of mill noise and vibration control
- (9) the status quo of the high-pressure venting exhaust noise and vibration control
- (10) the status quo of wind drilling machine noise and vibration control

5.2.3 noise and vibration control projects in industry and equipment demand**5.2.4 prospects of industrial noise and vibration control****5.3 analysis of analysis of demand of noise and vibration control in construction****5.3.1 analysis of status quo of construction noise and vibration pollution**

- (1) analysis of development scale of construction industry
- (2) analysis of development trends of construction industry
- (3) generation of construction noise and hazards
- (4) standards and policies of construction noise control

5.3.2 analysis of main methods of construction noise control**5.3.3 noise and vibration control projects in construction and equipment demand****5.3.4 prospects of construction noise and vibration control****5.4 analysis of demand of noise and vibration control in social life****5.4.1 analysis of status quo of noise pollution of social life**

- (1) overview of noise pollution of social life
- (2) status quo of noise pollution of social life and hazards
- (3) standards and policies of noise control of social life

5.4.2 analysis of methods of social life noise control**5.4.3 social life noise control projects and equipment demand****5.4.4 analysis of trends of social life noise control demand****Chapter 6: Analysis of operation of main companies of China noise and vibration control industry**

6.1 analysis of leading companies of acoustic material of noise and vibration control industry**6.1.1 Fujian Tiansheng Hengda Acoustic Material Technology Co., Ltd.**

- (1) overview of the company's development
- (2) analysis of the company's product structure
- (3) analysis of the company's sales network
- (4) analysis of the company's operation advantages and disadvantages

6.1.2 Guangzhou Xinjingjie Silencer Materials Co., Ltd.

- (1) overview of the company's development
