

China Community Medical Service Industry Report (2016–2021), Market Forecast and Investment Strategic Planning

目 录

CONTENTS

Chapter 1: Overview of development of China's community medical service industry

1.1 background and significance of research of China's community medical service industry

- 1.1.1 background of research of the industry
- 1.1.2 significance of research of the industry
- 1.1.3 methods of research of the industry

1.2 overview of China's community medical service industry

- 1.2.1 definition of community medical service and scope of the research
- 1.2.2 service contents and methods of community medical service organizations
 - (1) service contents of community medical service organizations
 - (2) service methods of community medical service organizations
- 1.2.3 difference between community medical service institution and big hospital
- 1.2.4 analysis of operational model of China's community medical service industry
- 1.2.5 position of China's community medical service industry in the health care system

1.3 analysis of policy environment of the industry

- 1.3.1 department in charge and supervision system of the industry
- 1.3.2 related policies and regulations and standards of the industry
 - (1) "Opinions of the CPC Central Committee and State Council on Deepening the Health Care Reform"

- (2) "Opinions on Reform of Price Formation Mechanism of Drugs and Medical Service"
- (3) "Guidance on the Development of Urban Community Medical Service"
- (4) "Approaches on management of urban community health services."
- (5) "Basic Standards for Urban Community Health Service Centers and Stations"

- 1.3.3 development planning of community medical service industry
- 1.3.4 importance of policy for community medical service industry
- 1.3.5 impact of new health care reform on community medical service industry
 - (1) financial investment in community medical service during new health care reform
 - (2) opportunities facing community medical service during new health care reform
 - (3) challenge facing community medical service during new health care reform

1.4 analysis of economic environment of the industry

- 1.4.1 China's GDP growth
- 1.4.2 residents' income growth
- 1.4.3 residents' spending levels

Chapter 2: Analysis of the development of the international community medical service industry and implications for China

2.1 analysis of the development of the international community medical service industry

- 2.1.1 development process the international community medical service industry
- 2.1.2 development environment the international community medical service industry
- 2.1.3 status quo of development of the international community medical service industry
- 2.1.4 development trends of the international community medical service industry

2.2 analysis of development of community medical service industry in the UK

- 2.2.1 constituents of medical health service system in the UK
- 2.2.2 organizational form of community medical service in the UK
- 2.2.3 operational model of community medical service industry in the UK
- 2.2.4 financing structure of community medical service industry in the UK
- 2.2.5 resource allocation of community medical service in the UK

2.3 analysis of development of community medical service industry in America

- 2.3.1 constituents of medical health service system in America
- 2.3.2 organizational form of community medical service in America
- 2.3.3 operational model of community medical service industry in America

2.3.4 financing structure of community medical service industry in America

2.3.5 resource allocation of community medical service in America

2.4 analysis of development of community medical service industry in Japan

2.4.1 constituents of medical health service system in Japan

2.4.2 organizational form of community medical service in Japan

2.4.3 operational model of community medical service industry in Japan

2.4.4 financing structure of community medical service industry in Japan

2.4.5 resource allocation of community medical service in Japan

2.5 analysis of development of community medical service industry in Singapore

2.5.1 constituents of medical health service system in Singapore

2.5.2 organizational form of community medical service in Singapore

2.5.3 operational model of community medical service industry in Singapore

2.5.4 financing structure of community medical service industry in Singapore

2.5.5 resource allocation of community medical service in Singapore

2.6 foreign community medical service model and inspirations for China

2.6.1 major foreign community medical service models

(1) British government-led model

(2) American market-driven model

(3) Singapore model of government-led, multi- participation

2.6.2 analysis of differences of a variety of medical service models

(1) difference between the structure and methods of medical service financing

(2) difference between the nature of main community medical service institutions

(3) difference between degree and manner of the role of government in community medical service

2.6.3 analysis of commonalities of a variety of medical service models

(1) in terms of responsibility of the government

(2) in terms of division and co-ordination of medical institutions

(3) the role of family doctors in community medical service

2.6.4 revelations of foreign community medical service models for China

Chapter 3: Analysis of development of China's community medical service industry

3.1 analysis of development of China's community medical service industry

3.1.1 development course of China's community medical service industry

3.1.2 development scale of China's community medical service industry

(1) quantity and regional distribution of community medical service institutions

(2) distribution of type of community medical service institutions

(3) statistics of personnel of community medical service institutions

(4) statistics of beds of community medical service institutions

(5) statistics of equipment of community medical service institutions

(6) statistics of construction area of community medical service institutions

3.1.3 features of development of China's community medical service industry

3.2 analysis of service of China's community medical service industry

3.2.1 analysis of outpatient service of community medical service institutions

(1) statistics of attendance of community medical service institutions

(2) statistics of outpatient service of community medical service institutions

3.2.2 analysis of hospitalization service of community medical service institutions

(1) statistics of admission of community medical service institutions

(2) statistics of inpatient service of community medical service institutions

3.2.3 analysis of beds in use of community medical service industry

3.2.4 quality and efficiency of service of community medical service industry

3.3 analysis of operation of China's community medical service industry

3.3.1 scale of operation of community medical service institutions

(1) scale of assets and liabilities of community medical service institutions

1) scale of revenue and profit of community medical service institutions

3.3.2 situation of operation of community medical service institutions

(1) profitability capability

(2) solvency capability

(3) operation capability

(4) development capacity

Chapter 4: Analysis of demand for China's community medical service

4.1 the total population and the structural changes

4.1.1 total population growth

4.1.2 demographic changes

(1) the trend of population aging

1) speed up the process of urbanization

4.2 analysis of disease incidence among population

4.2.1 disease incidence of residents in two weeks

(1) by gender

(2) by age

1) by received education

(3) by the form of Medicare

(4) by the employment situation

(5) by type of disease

4.2.2 residents' incidence of chronic diseases

(1) by gender

(2) by age

(3) by type of disease

4.3 analysis of residents' seeking medical service

4.3.1 constituents of diseases of discharged patients

4.3.2 residents' attendance rate in two weeks

(1) by gender

(2) by age

1) by received education

(3) by the form of Medicare

(4) by the employment situation

(5) by type of disease

4.3.3 residents' hospitalization rate

(1) by gender

(2) by age

1) by received education

(3) by the form of Medicare

(4) by the employment situation

(5) by type of disease

4.3.4 residents' often visiting treatment units and reasons

4.3.5 distance and time of residents' getting to the nearest medical institution

4.3.6 constituents of residents' medical insurance system

4.4 residents' medical expenses

4.4.1 analysis of medical service costs

(1) total medical service expenditure

(2) distribution of the structure of medical service costs

(3) share of total medical service expenditure in GDP

4.4.2 analysis of governmental medical service spending

(1) analysis of growth of governmental medical service spending

(2) analysis of structure of governmental medical service spending

4.4.3 urban and rural residents' medical service spending

(1) analysis of growth of urban and rural residents' medical service spending

1) structure of region of urban and rural residents' medical service spending

4.4.4 medical spending per capita

(1) medical spending for outpatient per capita

1) analysis of growth of medical spending per capita of hospital outpatients

2) analysis of growth of outpatients' medical spending per capita of all levels of hospitals

1. distribution of outpatient medical spending per capita in various regions

(2) medical spending for discharged patients per capita

1) analysis of growth of medical spending per capita of discharged patients

2) analysis of growth of discharged patients' medical spending per capita of all levels of hospitals

hospitals

1. distribution of discharged patients' medical spending per capita in various regions

4.4.5 average medical spending for disease

(1) average medical spending for 30 kinds of diseases

(2) average medical spending for 30 kinds of diseases at levels of hospitals

Chapter 5: Analysis of market competition of China's community medical service industry

5.1 analysis of market competition of China's community medical service industry

- 5.1.1 analysis of competition pattern of China's community medical service industry
- 5.1.2 analysis of price management of community medical service industry
- 5.1.3 problems facing community medical service industry

5.2 analysis of two-way transfer between community medical institution and hospital

- 5.2.1 target, meaning and object needs to implement two-way transfer
- 5.2.2 status quo of implementation of two-way transfer between community medical institution and hospital in China
- 5.2.3 key factors influencing two-way transfer between community medical institution and hospital in China
- 5.2.4 construction of operation model of two-way transfer between community medical institution and hospital in China

5.3 pathway to develop human resources of community medical institutions

- 5.3.1 realistic value and meaning to develop human resources of community medical institutions
- 5.3.2 policy support to develop human resources of community medical institutions
- 5.3.3 status quo of survey on human resources of community medical institutions
- 5.3.4 pathway to develop human resources of community medical institutions

Chapter 6: Status quo of development of China's community medical service industry in key cities

6.1 analysis of development of community medical service industry in Beijing

- 6.1.1 development environment of community medical service industry in Beijing
 - (1) the total population and structure in Beijing
 - (2) residents' income level in Beijing
 - (3) consumers' spending level in Beijing
 - (4) residents' healthcare spending in Beijing
- 6.1.2 analysis of scale of community medical service industry in Beijing
 - (1) quantity of community medical service organizations in Beijing
 - (2) quantity of beds of community medical service organizations in Beijing
 - (3) personnel of community medical service organizations in Beijing
- 6.1.3 operation of community medical service industry in Beijing
- 6.1.4 service of community medical service organizations in Beijing
 - (1) situation of outpatient service
 - (2) situation of hospitalization service
- 6.1.5 supporting measures and development planning of community medical service industry in Beijing
- 6.1.6 forecast of community medical service industry in Beijing

6.2 analysis of development of community medical service industry in Shanghai

- 6.2.1 development environment of community medical service industry in Shanghai
 - (1) the total population and structure in Shanghai
 - (2) residents' income level in Shanghai
 - (3) consumers' spending level in Shanghai
 - (4) residents' healthcare spending in Shanghai
- 6.2.2 analysis of scale of community medical service industry in Shanghai
 - (1) quantity of community medical service organizations in Shanghai
 - (2) quantity of beds of community medical service organizations in Shanghai
 - (3) personnel of community medical service organizations in Shanghai
- 6.2.3 operation of community medical service industry in Shanghai
- 6.2.4 service of community medical service organizations in Shanghai
 - (1) situation of outpatient service
 - (2) situation of hospitalization service
- 6.2.5 supporting measures and development planning of community medical service industry in Shanghai
- 6.2.6 forecast of community medical service industry in Shanghai

6.3 analysis of development of community medical service industry in Tianjin

- 6.3.1 development environment of community medical service industry in Tianjin
 - (1) the total population and structure in Tianjin
 - (2) residents' income level in Tianjin
 - (3) consumers' spending level in Tianjin
