China Smart Medical Industry Report (2016-2021), Development Prospect and Investment Strategic Planning

目 录

CONTENTS

Chapter 1: Background of development of China's intelligent medical treatment industry
1.1 background of development of intelligent medical treatment industry
1.1.1 definition of intelligent medical treatment industry
1.1.2 system and functions of intelligent medical treatment
(1) for device management
(2) for business management
(3) for process management
(4) for resource management
1.1.3 characteristics of development of intelligent medical treatment industry
1.1.4 necessity of construction of intelligent medical treatment
(1) reduce health care costs
(2) improve the level of medical service
(3) medical information exchange
(4) ease the pressure on health care resources
1.2 analysis of industrial chain of intelligent medical treatment industry
1.2.1 introduction of industry chain of the industry
1.2.2 analysis of the upstream of industry chain
(1) analysis of data acquisition industry
(2) analysis of Internet communications industry
(3) analysis of mobile terminal market
1.3 analysis of development environment of intelligent medical treatment industry
1.3.1 analysis of policy environment of intelligent medical treatment industry
(1) regulatory regime of the industry
(2) related policies and regulations of the industry
(3) development strategy and planning of the industry
1.3.2 analysis of economic environment of intelligent medical treatment industry
(1) forecast of the international macro economic environment
1) status quo of the international macro economy
2) forecast of the international macro economy
(2) forecast of the domestic macro economic environment
1) status quo of the domestic macro economy
2) economic environment of medical industry
3) forecast of the domestic macro economy
1.3.3 talent supply of intelligent medical treatment industry
(1) talent supply of the industry
(2) talent demand of the industry
(3) proposals for personnel training of the industry
1.3.4 impact of new health care reform on intelligent medical treatment
(1) direction of China's medical reform
1) separation of clinic from pharmacy
2) reform of ownership structure of public hospitals
3) to solve uneven distribution of medical and health resources
(2) interpretation of the new medical reform plan
(3) focus and capital flows of new medical reform
(4) requirements of new health care reform for IT
1) medical services provider
2) the field of public health and health administration
3) pharmaceutical and equipment suppliers
4) medical services payer

(5) health care reform to promote construction of informatization
Chapter 2: Analysis of development of the global intelligent medical treatment industry
2.1 summary of development of the global intelligent medical treatment industry
2.1.1 course of development of the global intelligent medical treatment industry
2.1.2 analysis of characteristics of development of intelligent medical treatment in various countries
2.2 development of intelligent medical treatment in major countries
2.2.1 experience and inspiration of development of intelligent medical treatment in America
(1) development course of intelligent medical treatment in America
(2) status quo of development of intelligent medical treatment in America
(3) major problems of intelligent medical treatment in America
(4) role of government agencies in intelligent medical treatment in America
(5) impact of American health care reform on intelligent medical treatment
(6) implications of intelligent medical treatment in America for China
2.2.2 Japan's development experience and inspiration of electronic medical records
(1) status quo of development of intelligent medical treatment in Japan
(2) development course of Japan's electronic medical records
(3) features and benefits of Japan's electronic medical records
1) five features of Japan's electronic medical records
2) seven benefits of Japan's electronic medical records
(4) development trends of Japan's electronic medical records
(5) implications of intelligent medical treatment in Japan for China
1) implications of Japan's electronic medical records
2) implications of construction of Japan's intelligent medical treatment
3) inspiration of Japan's medical information technician system
2.2.3 experience and inspiration of development of intelligent medical treatment in Europe
(1) overview of development of European medial informatization
(2) framework of European medial informatization
(3) status quo of development of telemedicine in Europe
1) German telemedicine
2) U K's telemedicine
3) Italian telemedicine
4) Poland telemedicine
5) Norwegian telemedicine
(4) development trends of European medial informatization
1) development trends of Europe
2) development trends of Member States
2.3 operation and latest technology trends of multinational corporations
2.3.1 operation of Japan's Toshiba
(1) operation of Toshiba
(2) layout of Toshiba in China
(3) the company's latest technology trends in intelligent medical treatment
2.3.2 operation of American GE
(1) operation of American GE
(2) layout of American GE in China
(3) the company's latest technology trends in intelligent medical treatment
2.3.3 operation of German Siemens
(1) operation of Siemens
(2) layout of Siemens in China
(3) the company's latest technology trends in intelligent medical treatment
2.3.4 operation of Philips
(1) operation of Philips
(2) layout of Philips in China
(3) the company's latest technology trends in intelligent medical treatment
2.3.5 operation of Schneider
(1) operation of Schneider
(2) layout of Schneider in China
(3) the company's latest technology trends in intelligent medical treatment
2.3.6 operation of IBM

(1) operation of IBM
(2) layout of IBM in China
(3) the company's latest technology trends in intelligent medical treatment
Chapter 3: Analysis of development of China's intelligent medical treatment industry
3.1 analysis of development of China's health course
3.1.1 overview of development of medical industry
3.1.2 scale of investment of medical industry
3.1.3 analysis of development of medical and health institutions
(1) analysis of scale of development of medical and health institutions
(2) analysis of operation of health institutions
(3) analysis of competition of health institutions
3.1.4 forecast of development of medical industry
3.2 analysis of development of China's intelligent medical treatment industry
3.2.1 course of development of China's intelligent medical treatment industry
3.2.2 stage of development of China's intelligent medical treatment industry
3.2.3 scale of market of intelligent medical treatment industry
(1) overall scale of the market
(2) scale of hardware market
(3) scale of software market
(4) scale of service market
3.2.4 analysis of competition of intelligent medical treatment industry
(1) competitive landscape of intelligent medical treatment industry
(2) market concentration of China's intelligent medical treatment industry
(3) trends of competition of China's intelligent medical treatment industry
3.3 analysis of opportunities and challenges of China's intelligent medical treatment industry
3.3.1 analysis of development opportunities of intelligent medical treatment industry
3.3.2 analysis of challenges of intelligent medical treatment industry
3.4 analysis of development trends of China's intelligent medical treatment industry
3.4.1 overall development trends of China's intelligent medical treatment industry
3.4.2 development trends of informatization of different types of medical institutions
(1) development trends of informatization of large-scale hospital
(2) development trends of informatization of small and medium sized hospital
3.4.3 trends of products of China's intelligent medical treatment industry
3.5 forecast of development of China's intelligent medical market
3.5.1 forecast of market of intelligent medical treatment industry
3.5.2 forecast of scale of market of intelligent medical treatment industry
(1) forecast of scale of overall market
(2) forecast of scale of hardware market
(3) forecast of scale of software market
(4) forecast of scale of service market
3.5.3 development prospects of informatization of small and medium sized hospital
Chapter 4: Analysis of development of China's intelligent medical treatment industry key areas
4.1 analysis of development of electronic medical record (EMR) market
4.1.1 summary of development of electronic medical records
(1) concept of electronic medical records
(2) analysis of characteristics of electronic medical records
(3) stage of development of electronic medical records
(4) significance of development of electronic medical records
4.1.2 reference of foreign application experience of EMR
4.1.3 status quo of domestic application of EMR
4.1.4 analysis of application benefits of electronic medical records
4.1.5 problems of electronic medical records
4.1.6 proposals for development of electronic medical records
4.1.7 development trends of electronic medical record market
4.1.8 forecast of market demand for electronic medical records
4.2 analysis of development of mobile health market
4.2.1 analysis of scale of mobile health market
4.2.2 analysis of structure of mobile health market

4.2.3 analysis of competition of mobile health market
4.2.4 analysis of demand of mobile health market
4.3 analysis of development of telemedicine
4.3.1 service model of telemedicine
4.3.2 key technologies of telemedicine
4.3.3 investment of telemedicine
4.3.4 status quo of development of telemedicine
4.3.5 obstacles to development and strategy of telemedicine
4.3.6 forecast of demand of telemedicine market
4.4 analysis of development of hospital management information system
4.4.1 overview of hospital management information system
4.4.2 scale of investment of hospital informatization
4.4.3 regional development of hospital informatization
4.4.4 analysis of development of hospital information system
(1) status quo of construction of hospital information system
(2) benefits of application of hospital information system
(3) problems and strategies of construction of hospital information system
(4) development trends of hospital information system
4.5 analysis of hospital information systems (HIS) market
4.5.1 analysis of scale of hospital information system market
4.5.2 analysis of structure of hospital information system market
4.5.3 analysis of competition of hospital information system market
(1) forecast of demand of hospital information system market
4.6 analysis of clinical information system (CIS) market
4.6.1 overview of clinical information system
(1) concept and structure of clinical information system
(2) main purposes to establish clinical information system
(3) features of clinical information system
4.6.2 status quo of application of domestic clinical information system
4.6.3 status quo of application of foreign clinical information system
4.6.4 problems and strategies of construction of clinical information system
4.6.5 development trends of clinical information system
4.6.6 analysis of clinical information system market
(1) analysis of scale of clinical information system market
(2) analysis of structure of clinical information system market
(3) analysis of competition of clinical information system market
(4) forecast of demand of clinical information system market
4.7 analysis of market of picture archiving and communication systems (PACS)
4.7.1 analysis of development of picture archiving and communication system
(1) principles of design of picture archiving and communication system
(2) status quo of development of the international picture archiving and communication system
(3) analysis of market scale of picture archiving and communication system
(4) analysis of market competition of picture archiving and communication system
(5) problems of construction of picture archiving and communication system
4.7.2 analysis of application of picture archiving and communication system
(1) status quo of application of picture archiving and communication system
(2) benefits of application of picture archiving and communication system
4.7.3 analysis of subdivided markets of picture archiving and communication system
(1) analysis of radiology information system (RIS) market
(2) analysis of other subdivided markets of PACS
4.7.4 development trends of picture archiving and communication system market
4.7.5 forecast of demand of picture archiving and communication system market
4.8 analysis of laboratory information system (LIS) market
4.8.1 status quo of development of laboratory information system
(1) status quo of development of the international laboratory information system
(2) status quo of development of the domestic laboratory information system
4.8.2 benefits of application of hospital information system
4.8.3 problems of hospital information system
4.8.4 reference of experience of the international laboratory information system

4.8.5 development trends of laboratory information system
Chapter 5: Development of intelligent medical treatment in China's major cities
5.1 analysis of development of intelligent medical treatment in Beijing
5.1.1 configuration of medical and health resources in Beijing
5.1.2 development planning of intelligent medical treatment in Beijing
5.1.3 scale of investment of intelligent medical treatment in Beijing
5.1.4 progress of construction of intelligent medical treatment in Beijing
5.1.5 development prospects of intelligent medical treatment in Beijing
5.2 analysis of development of intelligent medical treatment in Shanghai
5.2.1 configuration of medical and health resources in Shanghai
5.2.2 development planning of intelligent medical treatment in Shanghai
5.2.3 scale of investment of intelligent medical treatment in Shanghai
(1) progress of construction of intelligent medical treatment in Shanghai
5.2.4 development prospects of intelligent medical treatment in Shanghai
5.3 analysis of development of intelligent medical treatment in Xiamen
5.3.1 configuration of medical and health resources in Xiamen
5.3.2 development planning of intelligent medical treatment in Xiamen
5.3.3 scale of investment of intelligent medical treatment in Xiamen
5.3.4 progress of construction of intelligent medical treatment in Xiamen
5.3.5 development prospects of intelligent medical treatment in Xiamen
5.4 analysis of development of intelligent medical treatment in Zhejiang
5.4.1 configuration of medical and health resources in Zhejiang
5.4.2 development planning of intelligent medical treatment in Zhejiang
5.4.3 scale of investment of intelligent medical treatment in Zhejiang
5.4.4 progress of construction of intelligent medical treatment in Zhejiang
(1) intelligent medical treatment in Hangzhou
(2) intelligent medical treatment in Ningbo
5.4.5 development prospects of intelligent medical treatment in Zhejiang
5.5 analysis of development of intelligent medical treatment in Guangdong
5.5.1 configuration of medical and health resources in Guangdong
5.5.2 development planning of intelligent medical treatment in Guangdong
5.5.3 scale of investment of intelligent medical treatment in Guangdong
5.5.4 progress of construction of intelligent medical treatment in Guangdong
5.5.5 development prospects of intelligent medical treatment in Guangdong
5.6 analysis of development of intelligent medical treatment in Jiangsu
5.6.1 configuration of medical and health resources in Jiangsu
5.6.2 development planning of intelligent medical treatment in Jiangsu
5.6.3 scale of investment of intelligent medical treatment in Jiangsu
5.6.4 progress of construction of intelligent medical treatment in Jiangsu
5.6.5 development prospects of intelligent medical treatment in Jiangsu
5.7 analysis of development of intelligent medical treatment in Chongqing
5.7.1 configuration of medical and health resources in Chongqing
5.7.2 development planning of intelligent medical treatment in Chongqing
5.7.3 scale of investment of intelligent medical treatment in Chongqing
5.7.4 progress of construction of intelligent medical treatment in Chongqing
5.7.5 development prospects of intelligent medical treatment in Chongqing
5.8 analysis of development of intelligent medical treatment in Anhui
5.8.1 configuration of medical and health resources in Anhui
5.8.2 development planning of intelligent medical treatment in Anhui
5.8.3 scale of investment of intelligent medical treatment in Anhui
5.8.4 progress of construction of intelligent medical treatment in Anhui
5.8.5 development prospects of intelligent medical treatment in Anhui
Chapter 6: Analysis of development of key technologies of China's intelligent medical treatment industry
6.1 application of technology of Internet of Things within intelligent medical treatment industry
6.1.1 analysis of development of Internet of Things
(1) industry chain of Internet of Things
(2) characteristics of development of Internet of Things
(3) scale of development of Internet of Things

(4) analysis of competition of Internet of Things
(5) forecast of development of Internet of Things
6.1.2 policy environment of application of Internet of Things in intelligent medical treatment
(1) foreign related policies
(2) domestic related policies
6.1.3 related applications of Internet of Things in intelligent medical treatment
(1) personnel positioning
(2) wireless medical monitoring
(3) collecting the vital signs
(4) pharmaceutical product management
(5) medical device management
(6) medical waste management
(7) blood management
6.1.4 problems of application of Internet of Things in intelligent medical treatment
(1) in terms of technology
(2) in terms of development of industrial applications
6.1.5 forecast of application of Internet of Things in intelligent medical treatment
6.2 application of RFID technology within intelligent medical treatment industry
6.2.1 overview of RFID technology and market
6.2.2 overview of development of the global RFID technology
(1) standard system of the global RFID technology
(2) market scale of the global RFID industry
(3) analysis of price of the Global RFID products
(4) analysis of patents of the global RFID technology
(5) development trends of the global RFID technology
6.2.3 overview of development of the domestic RFID technology
(1) course of development of the domestic RFID technology
(2) market scale of the domestic RFID industry
(3) market layout of the domestic RFID industry
(4) development trends of the domestic RFID technology
(5) leading enterprises of the domestic RFID industry
(6) problems of development of the domestic RFID
6.2.4 demand for RFID technology in the field of intelligent medical treatment
6.2.5 case of application of RFID technology in the field of intelligent medical treatment
6.2.6 latest trends of RFID technology in the field of intelligent medical treatment
6.3 application of sensor technology within intelligent medical treatment industry
6.3.1 overview of sensor technology and market
6.3.2 overview of development of the international sensor market
(1) situation of the international sensor manufacturing market
(2) competition of the international sensor manufacturing market
(3) development trends of the international sensor manufacturing market
(4) competitive strategy of multinational sensor manufacturers
6.3.3 overview of development of the domestic sensor industry
(1) characteristics of market of sensor manufacturing industry
(2) economic indicators of sensor manufacturing industry
(3) supply and demand balance of sensor manufacturing industry
(4) analysis of the domestic sensor technology patents
(5) analysis of domestic leading enterprises in sensor technology
(6) problems of the domestic sensor market
6.3.4 status quo of application of sensor technology in the field of intelligent medical treatment
6.3.5 status of sensor technology in the field of intelligent medical treatment
6.3.6 forecast of application of sensor technology in the field of intelligent medical treatment
6.3.7 latest trends of sensor technology in the field of intelligent medical treatment
6.4 application of cloud technology within intelligent medical treatment industry
6.4.1 development of cloud computing
(1) definition of cloud computing
(2) features of development of cloud computing
(3) scale of the cloud computing market
(4) analysis of competition of cloud computing

(5) forecast of development of cloud computing
6.4.2 status quo of application of cloud computing in the field of intelligent medical treatment
(1) online software service
(2) data storage service
(3) calculation analysis service
(4) hardware rental service
6.4.3 problems of application of cloud technology in the medical field
6.4.4 forecast of application of cloud technology in the medical field
6.5 application of wireless technology within intelligent medical treatment industry
6.5.1 application of wireless technology in the field of intelligent medical treatment
(1) telemedicine
(2) patient identification and data capture
(3) drug tracking
(4) medical waste tracking
(5) medical equipment management
(6) blood management
6.5.2 status quo of application of wireless medical technology at home and abroad
(1) status quo of foreign applications
(2) status quo of domestic applications
6.5.3 problems of application of wireless technology in the field of intelligent medical treatment
(1) network security of wireless local area
(2) interference of radio signal
(3) data reliability
6.5.4 forecast of application of wireless technology in the medical field
Chapter 7: Analysis of operation of leading enterprises of China's intelligent medical treatment industry
7.1 analysis of success factors of intelligent medical treatment solution provider
7.2 analysis of China's intelligent medical treatment solution provider
7.2.1 Shanghai Kingstar Winning Software Co., Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's products and solutions
(3) the company's R&D strength
(4) analysis of the company's typical customers
(5) analysis of the company's major economic indicators
(6) analysis of the company's profitability capability
(7) analysis of the company's operation capability
(8) analysis of the company's solvency capability
(9) analysis of the company's development capability
(10) distribution of the company's business network
(11) analysis of advantages and disadvantages of the company's operation
(12) analysis of the company's development strategy
(13) analysis of the company's latest development trend
7.2.2 Neusoft Group Co., Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's products and solutions
(3) the company's R&D strength
(4) analysis of the company's typical customers
(5) analysis of the company's major economic indicators
(6) analysis of the company's profitability capability
(7) analysis of the company's operation capability
(8) analysis of the company's solvency capability
(9) analysis of the company's development capability
(10) distribution of the company's business network
(11) analysis of advantages and disadvantages of the company's operation
(12) analysis of investment, merger and restructuring of the company
(13) analysis of the company's latest development trend
7.2.3 Wonders Information Co., Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's products and solutions

(3) the company's R&D strength
(4) analysis of the company's typical customers
(5) analysis of the company's major economic indicators
(6) analysis of the company's profitability capability
(7) analysis of the company's operation capability
(8) analysis of the company's solvency capability
(9) analysis of the company's development capability
(10) distribution of the company's business network
(11) analysis of advantages and disadvantages of the company's operation
(12) analysis of the company's latest development trend
7.2.4 DHC Software Co., Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's products and solutions
(3) the company's R&D strength
(4) analysis of the company's typical customers
(5) analysis of the company's major economic indicators
(6) analysis of the company's profitability capability
(7) analysis of the company's operation capability
(8) analysis of the company's solvency capability
(9) analysis of the company's development capability
(10) distribution of the company's business network
(11) analysis of advantages and disadvantages of the company's operation
(12) analysis of investment, merger and restructuring of the company
(13) analysis of the company's latest development trend
7.2.5 Enjoyor Co., Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's products and solutions
(3) the company's R&D strength
(4) analysis of the company's typical customers
(5) analysis of the company's major economic indicators
(6) analysis of the company's profitability capability
(7) analysis of the company's operation capability
(8) analysis of the company's solvency capability
(9) analysis of the company's development capability
(10) distribution of the company's business network
(11) analysis of advantages and disadvantages of the company's operation
(12) analysis of investment, merger and restructuring of the company
(13) analysis of the company's latest development trend
there are another 17 enterprises
Chapter 8: Analysis of investment opportunities and strategies of China's intelligent medical treatment industry
8.1 influencing factors of development of China's intelligent medical treatment industry
8.1.1 favorable factors of intelligent medical treatment industry
(1) policy support
(2) comply with development trends of the industry
(3) other favorable factors
8.1.2 unfavorable factors of intelligent medical treatment industry
(1) current market scale is limited
(2) standards of the industry to be improved
(3) other unfavorable factors
8.2 analysis of risks of investment of China's intelligent medical treatment industry
8.2.1 analysis of policy risk of intelligent medical treatment industry
8.2.2 analysis of technical risk of intelligent medical treatment industry
(1) risk of product and technology development
(2) risk of compromised core technology
(3) risk of intellectual property protection
8.2.3 analysis of risks of competition of intelligent medical treatment industry
8.2.4 analysis of other risks of intelligent medical treatment industry
8.3 analysis of characteristics of investment of China's intelligent medical treatment industry

8.3.1 analysis of entry barriers of intelligent medical treatment industry
(1) technical barrier
(2) product barrier
(3) experience barrier
(4) talent barrier
(5) barrier of technical standards of the industry
8.3.2 analysis of profit model of intelligent medical treatment industry
8.3.3 analysis of profit factor of intelligent transportation industry
8.4 analysis of profit factor of China's calcium carbide industry
8.4.1 scale of investment of intelligent medical treatment industry
8.4.2 structure of investment of intelligent medical treatment industry
8.4.3 opportunity of investment of intelligent medical treatment industry
8.4.4 Qianzhan's investment advice for intelligent medical treatment industry
