

China Electric Power Survey and Design Industry Report (2016–2021), Development Forecast and the Strategy of Transformation & Upgrading

目 录

CONTENTS

Chapter 1: Overview of development of electric power survey and design industry

1.1 basic concept of electric power survey and design industry

- 1.1.1 concept of engineering survey and design
- 1.1.2 definition of electric power survey and design industry
- 1.1.3 major scope and contents of electric power survey and design
- 1.1.4 framework of this report

1.2 overview of development of electric power survey and design industry

- 1.2.1 development course of engineering survey and design industry
- 1.2.2 development stage of engineering survey and design enterprise
- 1.2.3 industry position of electric power survey and design industry

1.3 characteristics of development of electric power survey and design industry

- 1.3.1 characteristics of technology of electric power survey and design industry
- 1.3.2 characteristics of resources of electric power survey and design industry
- 1.3.3 characteristics of customer of electric power survey and design industry
- 1.3.4 characteristics of products of electric power survey and design industry
- 1.3.5 characteristics of value chain of electric power survey and design industry
- 1.3.6 characteristics of production of electric power survey and design industry

Chapter 2: Analysis of external environment of electric power survey and design industry

2.1 analysis of policy environment of electric power survey and design industry

- 2.1.1 impact of power system reform on the industry
- 2.1.2 impact of relevant policies and regulations on the industry
- 2.1.3 impact of system reform of survey and design industry on the industry
- 2.1.4 main standards of electric power survey and design industry

2.2 analysis of economic environment of electric power survey and design industry

- 2.2.1 analysis of domestic GDP growth
 - (1) analysis of domestic GDP growth
 - (2) analysis of correlation between GDP and electric power survey and design industry
- 2.2.2 analysis of growth of domestic industrial added value
 - (1) analysis of growth of industrial added value
 - (2) analysis of correlation between industrial added value and electric power survey and design industry

industry

2.3 analysis of social environment of electric power survey and design industry

- 2.3.1 regional barriers of industry
- 2.3.2 environmental issues facing the development of the industry

2.4 analysis of technical environment of electric power survey and design industry

- 2.4.1 status quo of technology of electric power survey and design industry
- 2.4.2 outcomes of technology of electric power survey and design industry
 - (1) achievements of engineering consulting
 - (2) QC awards of power engineering survey and design enterprises
- 2.4.3 technology of electric power survey and design industry and gap with foreign
- 2.4.4 analysis of technology trends of electric power survey and design industry

Chapter 3: Analysis of status quo of development of electric power survey and design industry

3.1 status quo of development of engineering survey and design industry

- 3.1.1 analysis of development course of engineering survey and design industry
- 3.1.2 analysis of operational scale of engineering survey and design industry
- 3.1.3 analysis of talent structure of engineering survey and design industry

3.1.4 analysis of regional layout of engineering survey and design industry

3.2 status quo of development of electric power survey and design industry

3.2.1 analysis of operational scale of electric power survey and design industry

3.2.2 analysis of profitability capability of electric power survey and design industry

3.2.3 business structure of electric power survey and design industry

3.2.4 research investment of electric power survey and design industry

3.2.5 main problems existing in electric power survey and design industry

3.3 analysis of competitive trends of electric power survey and design industry

3.3.1 analysis of three competition levels of electric power survey and design industry

(1) the first competition level of the industry and competitive characteristics

(2) the second competition level of the industry and competitive characteristics

(3) the third competition level of the industry and competitive characteristics

3.3.2 analysis of competitive strength of electric power survey and design industry

(1) competition among existing enterprises

(2) bargaining power of buyers

(3) analysis of threat of new entrants

(4) analysis of threat of substitutes

3.3.3 training strategy of competitiveness of electric power survey and design enterprises

3.4 analysis of informatization of electric power survey and design industry

3.4.1 analysis of status quo of informatization of electric power survey and design industry

3.4.2 significance of informatization construction of electric power survey and design industry

3.4.3 major problems of informatization of electric power survey and design industry

3.4.4 development direction of informatization of electric power survey and design industry

Chapter 4: Analysis of business structure of electric power survey and design industry

4.1 analysis of power supply construction

4.1.1 overall construction of power supply

(1) analysis of construction scale of power supply

(2) structure of construction and investment of power supply

4.1.2 analysis of thermal power construction

(1) analysis of investment of thermal power construction

(2) analysis of thermal power installed capacity

1) thermal power installed capacity

2) thermal power installed structure

(3) key construction projects of thermal power

1) key projects have been built

2) key projects under construction or for proposal

(4) development planning and trends of thermal power construction

4.1.3 analysis of hydropower construction

(1) analysis of hydropower construction and investment

(2) analysis of hydropower installed capacity

1) total installed capacity of hydropower

2) structure of hydropower installed

3) planning of hydropower installed

(3) key construction projects of hydropower

1) key projects have been built

2) key projects under construction or for proposal

(4) development planning and trends of hydropower construction

4.1.4 analysis of nuclear power construction

(1) analysis of nuclear power construction and investment

(2) analysis of nuclear power installed capacity

(3) key construction projects of nuclear power

1) key projects have been built

2) key projects under construction or for proposal

(4) development planning and trends of nuclear power construction

4.1.5 analysis of wind power construction

(1) analysis of wind power construction and investment

(2) analysis of wind power installed capacity

1) total installed capacity of wind power generation

(3) forecast of wind power generation installations

- (4) key construction projects of wind power
 - 1) key projects have been built
 - 2) key projects under construction or for proposal
- (5) development planning and trends of wind power construction
- 4.1.6 analysis of construction of photovoltaic power generation
 - (1) analysis of installed capacity of photovoltaic power generation
 - (2) key construction projects of photovoltaic power generation
 - 1) key projects have been built
 - 2) key projects under construction or for proposal
 - (3) development planning and trends of construction of photovoltaic power generation

4.2 analysis of power grid construction

- 4.2.1 analysis of investment of grid
 - (1) analysis of investment scale of power grid
 - (2) analysis of focus of grid investment
 - (3) analysis of investment of smart grid
 - 1) scale of investment of smart grid
 - 2) structure of investment of smart grid
 - (4) analysis of investment of UHV power grid
 - (5) analysis of planning and investment of grid
- 4.2.2 analysis of power grid construction
 - (1) analysis of construction scale of power grid
 - (2) analysis of construction of various aspects of grid
 - 1) analysis of construction of transmission link
 - 2) analysis of construction of substation link
 - 3) analysis of construction of distribution link
 - (3) construction of smart grid pilot project
 - 1) main pilot project in 2009年以来
 - 2) smart grid pilot project in.....2011
 - 3) smart grid pilot project in.....2012
 - 4) smart grid pilot project in.....2013
 - 1. development planning and trends of power grid construction

Chapter 5: Strategy of transformation and upgrade of engineering general contracting of electric power survey and design enterprises

5.1 need for transformation of general contracting of electric power survey and design enterprises

- 5.1.1 market environment of transformation and upgrading of the industry
- 5.1.2 policy environment of transformation and upgrading of the industry
- 5.1.3 industry environment of transformation and upgrading of the industry

5.2 analysis of modes of power engineering general contracting

- 5.2.1 related concepts of power engineering general contracting
 - (1) connotation of power engineering general contracting
 - (2) contracting body of power engineering general contracting
 - (3) three main modes of power engineering general contracting
 - (4) advantages of mode of power engineering general contracting
- 5.2.2 reference of experience of large foreign companies' general contracting
- 5.2.3 status quo of development of power engineering general contracting mode in China

5.3 mode of transformation of electric power survey and design enterprise to general contracting

- 5.3.1 analysis of mode of transformation of electric power survey and design enterprise
 - (1) "one step " type
 - (2) " hand in hand " type
 - (3) " progressive " type
 - (4) " inaction " type
- 5.3.2 applied conditions for mode of transformation of electric power survey and design enterprise
 - (1) external environmental factors
 - (2) internal environmental factors
- 5.3.3 selection of transformation mode of electric power survey and design enterprise

5.4 development direction of business of general contracting of electric power survey and design enterprise

- 5.4.1 status quo of business of general contracting of electric power survey and design enterprise
- 5.4.2 management mode of power engineering general contracting

5.4.3 development direction of general contracting business of electric power survey and design enterprise

5.5 analysis of operating difficulties of general contracting of electric power survey and design enterprise

5.5.1 lack of policy support system

5.5.2 its own characteristics of electric power industry to limit the development of engineering general contracting

5.5.3 shortage in the international market competitiveness of power survey and design general contracting

5.5.4 problems of electric power survey and design enterprise as a general contractor

5.6 strategy to improve general contracting capability of electric power survey and design enterprises

5.6.1 analysis of core competitiveness of engineering general contracting capability

- (1) capability of technology development
- (2) capability of management decision-making
- (3) capability of project management
- (4) capability of market operation
- (5) capability of financing

5.6.2 external environment to enhance engineering general contracting capability

- (1) analysis of industrial structure
 - 1) analysis of landlord needs
 - (2) analysis of financing needs

5.6.3 internal conditions to upgrade engineering general contracting capability

- (1) human resources
- (2) organizational structure
- (3) technical level

5.6.4 selection of strategies to enhance engineering general contracting capability

- (1) to enhance engineering general contracting capability
- (2) selection of strategies for partner
- (3) selection of strategies for power design enterprise

5.7 analysis of cases of engineering general contracting of electric power survey and design enterprises

5.7.1 basic situation of DB power design institute

- (1) introduction of DB power design institute
- (2) technical level of DB power design institute
- (3) engineering general contracting projects of DB power design institute

5.7.2 specific measures of DB Power Design Institute to improve engineering general contracting capability

5.7.3 analysis of Qianzhan's reform measures for DB Power Design Institute

Chapter 6: Analysis of service and marketing strategy of electric power survey and design industry

6.1 analysis of importance of marketing service of electric power design

6.1.1 particularity of marketing of electric power design industry

6.1.2 importance of design of marketing strategy of electric power design industry

6.2 analysis of service quality and productivity of electric power survey and design

6.2.1 to improve service quality of electric power survey and design industry

- (1) existing problems of service quality of electric power survey and design industry
- (2) strategies to improve service quality of electric power survey and design industry

6.2.2 to improve production efficiency of electric power survey and design industry

- (1) existing problems of production efficiency of electric power survey and design industry
- (2) countermeasures to improve production efficiency of electric power survey and design industry

industry

6.2.3 to well deal with the relationship between service quality and service productivity

6.3 strategy of relationship marketing of electric power survey and design industry

6.3.1 necessity of relationship marketing of electric power survey and design industry

- (1) diversification of competition body
- (2) features of electric power design products
- (3) inadequacy of traditional marketing methods

6.3.2 strategy of customer relationship marketing of electric power survey and design industry

6.3.3 strategy of relationship marketing of stakeholders of electric power design industry

6.4 implementation of service marketing strategy of electric power survey and design industry

6.4.1 construction of corporate culture of engineering survey and design enterprises

6.4.2 coordinated development with power system reform

Chapter 7: Analysis of structure of human resources of electric power survey and design industry

7.1 characteristics of structure of human resources of electric power survey and design industry

7.1.1 changes of practitioner quantity of electric power survey and design industry

7.1.2 educational structure of electric power survey and design industry

7.1.3 structure of professional titles of electric power survey and design industry

7.2 basic situation of electric power survey and design institute

7.2.1 business scope of electric power survey and design institute

7.2.2 organizational structure of electric power survey and design institute

7.2.3 personnel composition and characteristics of electric power survey and design institute

7.2.4 main problems existing in management of electric power survey and design institute

7.3 status quo of compensation system of electric power survey and design institute

7.3.1 status quo of compensation system of electric power survey and design institute

7.3.2 problems existing in compensation system of electric power survey and design institute

(1) lack of market orientation

(2) lack of an effective incentive mechanism

(3) narrow paths for development of employee career

7.4 improvement program of compensation system of electric power survey and design institute

7.4.1 principles and general ideas of the improvement program

7.4.2 process of improvement of compensation system of electric power survey and design institute

(1) use of qualitative analysis to carry out work

(2) use of Heidegger's evaluation method to conduct job evaluation

(3) use of survey questionnaire on compensation system to conduct salary and positioning

(4) comprehensive assessment to divide position grade

7.4.3 establish harmony-based compensation mode

Chapter 8: Analysis of operation of major enterprises of electric power survey and design industry

8.1 analysis of the overall development of electric power survey and design enterprises

8.1.1 overall situation of China's electric power survey and design enterprises

8.1.2 credit rating of China's electric power survey and design enterprises

8.1.3 comparison of development path of electric power survey and design enterprises

8.2 analysis of operation of regional electric power survey and design enterprises

8.2.1 China Power Engineering Consulting Group Corporation

(1) brief introduction of the company's development

(2) analysis of the company's organizational structure

(3) the company's main business and qualifications

(4) the company's R&D capability

(5) analysis of the company's human resources

(6) the company's major project performance

(7) analysis of advantages and disadvantages of the company's operation

(8) analysis of the company's latest development trend

8.2.2 North China Power Engineering Co., Ltd. of China Power Engineering Consulting Group

(1) brief introduction of the company's development

(2) analysis of the company's organizational structure

(3) the company's main business and qualifications

(4) the company's R&D capability

(5) analysis of the company's human resources

(6) the company's major project performance

(7) analysis of advantages and disadvantages of the company's operation

(8) analysis of the company's latest development trend

8.2.3 Northeast Electric Power Design Institute of China Power Engineering Consulting Group

(1) brief introduction of the company's development

(2) analysis of the company's organizational structure

(3) the company's main business and qualifications

(4) the company's R&D capability

- (5) analysis of the company's human resources
 - (6) the company's major project performance
 - (7) analysis of advantages and disadvantages of the company's operation
 - (8) analysis of the company's latest development trend
- 8.2.4 Northwest Electric Power Design Institute of China Power Engineering Consulting Group
- (1) brief introduction of the company's development
 - (2) the company's main business and qualifications
 - (3) the company's R&D capability
 - (4) analysis of the company's human resources
 - (5) the company's major project performance
 - (6) analysis of advantages and disadvantages of the company's operation
 - (7) analysis of the company's latest development trend
- 8.2.5 China Power Engineering Consulting Group ECEPDI
- (1) brief introduction of the company's development
 - (2) analysis of the company's organizational structure
 - (3) the company's main business and qualifications
 - (4) the company's R&D capability
 - (5) analysis of the company's human resources
 - (6) the company's major project performance
 - (7) analysis of advantages and disadvantages of the company's operation
 - (8) analysis of the company's latest development trend
- 8.2.6 Southwest Electric Power Design Institute of China Power Engineering Consulting Group
- (1) brief introduction of the company's development
 - (2) analysis of the company's organizational structure
 - (3) the company's main business and qualifications
 - (4) the company's R&D capability
 - (5) analysis of the company's human resources
 - (6) the company's major project performance
 - (7) analysis of advantages and disadvantages of the company's operation
 - (8) analysis of the company's latest development trend
- 8.2.7 Central and South Electric Power Design Institute of China Power Engineering Consulting Group
- (1) brief introduction of the company's development
 - (2) analysis of the company's organizational structure
 - (3) the company's main business and qualifications
 - (4) the company's R&D capability
 - (5) analysis of the company's human resources
 - (6) the company's major project performance
 - (7) analysis of advantages and disadvantages of the company's operation
 - (8) analysis of the company's latest development trend
- 8.2.8 Power Construction Engineering Consulting Corporation of China Power Engineering Consulting Group
- (1) brief introduction of the company's development
 - (2) analysis of the company's organizational structure
 - (3) the company's main business and qualifications
 - (4) the company's R&D capability
 - (5) analysis of advantages and disadvantages of the company's operation
 - (6) analysis of the company's latest development trend
- 8.2.9 State Nuclear Electric Power Planning and Design Institute
- (1) brief introduction of the company's development
 - (2) analysis of the company's organizational structure
 - (3) the company's main business and qualifications
 - (4) the company's R&D capability
 - (5) analysis of the company's human resources
 - (6) the company's major project performance
 - (7) analysis of advantages and disadvantages of the company's operation
 - (8) analysis of the company's latest development trend
- 8.2.10 China Hydropower Engineering Consulting Group Corporation
- (1) brief introduction of the company's development

- (2) analysis of the company's organizational structure
- (3) the company's main business and qualifications
- (4) the company's R&D capability
- (5) analysis of the company's human resources
- (6) the company's major project performance
- (7) analysis of advantages and disadvantages of the company's operation
- (8) analysis of the company's latest development trend

8.3 analysis of operation of provincial / municipal power survey and design enterprises

8.3.1 Hebei Electric Power Survey and Design Institute

- (1) brief introduction of the company's development
- (2) analysis of the company's organizational structure
- (3) the company's main business and qualifications
- (4) the company's R&D capability
- (5) analysis of the company's human resources
- (6) the company's major project performance
- (7) analysis of advantages and disadvantages of the company's operation
- (8) analysis of the company's latest development trend

8.3.2 Shanxi Electric Power Design Institute

- (1) brief introduction of the company's development
- (2) the company's main business and qualifications
- (3) the company's R&D capability
- (4) the company's major project performance
- (5) analysis of advantages and disadvantages of the company's operation
- (6) analysis of the company's latest development trend

8.3.3 Inner Mongolia Electric Power Survey & Design Institute

- (1) brief introduction of the company's development
- (2) analysis of the company's organizational structure
- (3) the company's main business and qualifications
- (4) the company's R&D capability
- (5) analysis of the company's human resources
- (6) the company's major project performance
- (7) analysis of advantages and disadvantages of the company's operation
- (8) analysis of the company's latest development trend

8.3.4 Beijing Electric Power Economic and Technological Research Institute

- (1) brief introduction of the company's development
- (2) the company's main business and qualifications
- (3) the company's R&D capability
- (4) analysis of the company's human resources
- (5) the company's major project performance
- (6) analysis of advantages and disadvantages of the company's operation

8.3.5 Tianjin Electric Power Design Institute

- (1) brief introduction of the company's development
- (2) the company's main business and qualifications
- (3) the company's R&D capability
- (4) analysis of the company's human resources
- (5) the company's major project performance
- (6) analysis of advantages and disadvantages of the company's operation
- (7) analysis of the company's latest development trend

8.3.6 Heilongjiang Electric Power Survey & Design Institute

- (1) brief introduction of the company's development
- (2) the company's main business and qualifications
- (3) the company's R&D capability
- (4) analysis of the company's human resources
- (5) the company's major project performance
- (6) analysis of advantages and disadvantages of the company's operation
- (7) analysis of the company's latest development trend

8.3.7 Jilin Electric Power Survey and Design Institute

- (1) brief introduction of the company's development
- (2) the company's main business and qualifications

- (3) the company's R&D capability
 - (4) analysis of the company's human resources
 - (5) the company's major project performance
 - (6) analysis of advantages and disadvantages of the company's operation
 - (7) analysis of the company's latest development trend
- 8.3.8 Liaoning Electric Power Survey and Design Institute
- (1) brief introduction of the company's development
 - (2) the company's main business and qualifications
 - (3) the company's R&D capability
 - (4) analysis of the company's human resources
 - (5) the company's major project performance
 - (6) analysis of advantages and disadvantages of the company's operation
 - (7) analysis of the company's latest development trend
- 8.3.9 Shenyang Electric Power Survey & Design Institute
- (1) brief introduction of the company's development
 - (2) the company's main business and qualifications
 - (3) the company's R&D capability
 - (4) analysis of the company's human resources
 - (5) the company's major project performance
 - (6) analysis of advantages and disadvantages of the company's operation
- 8.3.10 Shaanxi Electric Power Design Institute
- (1) brief introduction of the company's development
 - (2) the company's main business and qualifications
 - (3) the company's R&D capability
 - (4) analysis of the company's human resources
 - (5) the company's major project performance
 - (6) analysis of advantages and disadvantages of the company's operation
 - (7) analysis of the company's latest development trend
- 8.3.11 Ningxia Electric Power Design Institute
- (1) brief introduction of the company's development
 - (2) the company's main business and qualifications
 - (3) the company's R&D capability
 - (4) analysis of the company's human resources
 - (5) the company's major project performance
 - (6) analysis of advantages and disadvantages of the company's operation
- 8.3.12 Zhejiang Electric Power Design Institute
- (1) brief introduction of the company's development
 - (2) analysis of the company's organizational structure
 - (3) the company's main business and qualifications
 - (4) the company's R&D capability
 - (5) analysis of the company's human resources
 - (6) the company's major project performance
 - (7) analysis of advantages and disadvantages of the company's operation
 - (8) analysis of the company's latest development trend
- 8.3.13 Anhui Electric Power Design Institute
- (1) brief introduction of the company's development
 - (2) analysis of the company's organizational structure
 - (3) the company's main business and qualifications
 - (4) the company's R&D capability
 - (5) analysis of the company's human resources
 - (6) the company's major project performance
 - (7) analysis of advantages and disadvantages of the company's operation
 - (8) analysis of the company's latest development trend
- 8.3.14 Hunan Electric Power Design Institute
- (1) brief introduction of the company's development
 - (2) the company's main business and qualifications
 - (3) the company's R&D capability
 - (4) analysis of the company's human resources
 - (5) the company's major project performance

- (6) analysis of advantages and disadvantages of the company's operation
- (7) analysis of the company's latest development trend
- 8.3.15 Hubei Electric Power Survey & Design Institute
 - (1) brief introduction of the company's development
 - (2) the company's main business and qualifications
 - (3) the company's R&D capability
 - (4) analysis of the company's human resources
 - (5) the company's major project performance
 - (6) analysis of advantages and disadvantages of the company's operation
 - (7) analysis of the company's latest development trend
- 8.3.16 Fujian Electric Power Survey and Design Institute
 - (1) brief introduction of the company's development
 - (2) the company's main business and qualifications
 - (3) the company's R&D capability
 - (4) analysis of the company's human resources
 - (5) the company's major project performance
 - (6) analysis of advantages and disadvantages of the company's operation
- 8.3.17 Shanghai Electric Power Design Institute Co., Ltd.
 - (1) brief introduction of the company's development
 - (2) the company's main business and qualifications
 - (3) the company's R&D capability
 - (4) analysis of the company's human resources
 - (5) the company's major project performance
 - (6) analysis of advantages and disadvantages of the company's operation
- 8.3.18 Sichuan Electric Power Design Consulting Co., Ltd.
 - (1) brief introduction of the company's development
 - (2) the company's main business and qualifications
 - (3) the company's R&D capability
 - (4) analysis of the company's human resources
 - (5) the company's major project performance
 - (6) analysis of advantages and disadvantages of the company's operation
 - (7) analysis of the company's latest development trend
- 8.3.19 Guangxi Electric Industrial Power Survey and Design Institute
 - (1) brief introduction of the company's development
 - (2) the company's main business and qualifications
 - (3) the company's R&D capability
 - (4) analysis of the company's human resources
 - (5) the company's major project performance
 - (6) analysis of advantages and disadvantages of the company's operation
- 8.3.20 Guangdong Electric Power Design Institute
 - (1) brief introduction of the company's development
 - (2) analysis of the company's organizational structure
 - (3) the company's main business and qualifications
 - (4) the company's R&D capability
 - (5) analysis of the company's human resources
 - (6) the company's major project performance
 - (7) analysis of advantages and disadvantages of the company's operation
 - (8) analysis of the company's latest development trend
- 8.3.21 Shenzhen Power Supply Planning and Design Institute Limited
 - (1) brief introduction of the company's development
 - (2) analysis of the company's organizational structure
 - (3) the company's main business and qualifications
 - (4) the company's R&D capability
 - (5) analysis of the company's human resources
 - (6) the company's major project performance
 - (7) analysis of advantages and disadvantages of the company's operation
- 8.3.22 Guizhou Electric Power Design Institute
 - (1) brief introduction of the company's development
 - (2) the company's main business and qualifications

- (3) the company's R&D capability
 - (4) analysis of the company's human resources
 - (5) the company's major project performance
 - (6) analysis of advantages and disadvantages of the company's operation
- 8.3.23 Henan Electric Power Survey & Design Institute
- (1) brief introduction of the company's development
 - (2) the company's main business and qualifications
 - (3) the company's R&D capability
 - (4) analysis of the company's human resources
 - (5) the company's major project performance
 - (6) analysis of advantages and disadvantages of the company's operation
 - (7) analysis of the company's latest development trend
- 8.3.24 Yunnan Electric Power Design Institute
- (1) brief introduction of the company's development
 - (2) the company's main business and qualifications
 - (3) the company's R&D capability
 - (4) analysis of the company's human resources
 - (5) the company's major project performance
 - (6) analysis of advantages and disadvantages of the company's operation
 - (7) analysis of the company's latest development trend
- 8.3.25 Jiangxi Electric Power Design Institute
- (1) brief introduction of the company's development
 - (2) the company's main business and qualifications
 - (3) the company's R&D capability
 - (4) analysis of the company's human resources
 - (5) the company's major project performance
 - (6) analysis of advantages and disadvantages of the company's operation
 - (7) analysis of the company's latest development trend

Chapter 9: Development trends and analysis of investment of electric power survey and design industry

9.1 development trends of China's electric power survey and design industry

9.1.1 analysis of development trends of China's electric power survey and design industry

- (1) analysis of overall trends of electric power survey and design industry
- (2) development trends of business structure of electric power survey and design enterprises

9.1.2 forecast of development prospects of China's electric power survey and design industry

9.2 analysis of characteristics of investment of electric power survey and design industry

9.2.1 analysis of entry barriers of electric power survey and design industry

9.2.2 analysis of profit model of electric power survey and design industry

9.2.3 analysis of profit factor of electric power survey and design industry

9.3 risks of investment of China's electric power survey and design industry
