# China Energy Management Contract (EMC) Industry Development Prospects and Investment Strategy Report, 2013-2017

## 目 录

*CONTENTS*

Chapter 1: Development Background of EMC Industry
1.1 Concepts Related to EMC
1.1.1 Basic Concept of EMC
(1) Basic Definition of EMC
(2) Features of EMC
(3) Basic Types of EMC
1.1.2 Basic Concept of EMCO
(1) Definition of EMCO
(2) Types of China EMCO
(3) Business Features of EMCO
(4) Business Content and Process of EMCO
1.2 Necessity for Development of EMC Industry
1.2.1 Resources and Environment Pressure Gradually Becoming Greater
(1) China Facing Transformation of Extensive Economic Growth Pattern
(2) Consumption Structure Based on Fossil Energy Urgent to Be Changed
(3) Contradiction between Energy Utilization and Environmental Protection to Be on the Rise
(4) China Energy Utilization Ratio Lower than World's Level
(5) Potential Overall Energy Shortages Will Be in Long-term Energy Supply
1.2.2 Position and Function of Energy Saving in China Social and Economic Development
(1) Energy Saving - A Long-term Strategic Target in China Social and Economic Development
(2) Energy Saving - A Effective Measure in China Economic Competitiveness
(3) Energy Saving - An Effective Measure for Slowing down and Treat Pollution
(4) Energy Saving - A Effective Measure in UNFCCC
1.3 Policies and Regulations Related to Development of EMC Industry
1.3.1 Policies and Regulations Related to National Energy Saving Investment
(1) Opinions on Further Developing Comprehensive Utilization of Resources
(2) Energy Saving Law and Supporting Laws and Regulations
(3) Medium and Long-term Planning for Energy Saving
(4) "Twelfth Five-year" Comprehensive Work Plan for Energy Saving and Emission Reduction
(5) Notice on Gradually Prohibiting Import and Selling General Lighting Incandescent Lamp
(6) "Twelfth Five-year" Planning Outline for Urban Green Lighting
1.3.2 National Policies and Regulations on EMC
(1) Notice on Further Promoting "Energy Management Contract" Mechanism
(2) Opinions on Further Promoting Energy Management Contract to Promote Development of Energy Saving Service Industry
(3) National Standards for General Principles of Energy Management Contract Technology
(4) Fund Interim Management Measures on Financial Incentive Fund for Energy Management Contract Projects
(5) Notice on Supervision and Inspection Work for Further Strengthening Energy Management Contract Projects
(6) Interim Management Measures on Financial Incentive Fund for Shenzhen Energy Management Contraction
1.3.3 Stability Analysis of National Energy Saving and EMC Policies
Chapter 2: Analysis of Development Conditions of Foreign EMC Industry
2.1 Development Overview of Global EMC Industry
2.1.1 Development Overview of US EMC Industry
2.1.2 Development Overview of Global EMC Industry
2.1.3 Foreign Energy Services Companies and Industry Distribution Conditions
2.1.4 Major Obstacles for Development of International ESCo

2.1.5 Development Prospects Analysis of International EMC Industry
**2.2 Development Conditions of EMC Industry Energy Management Contract in Major Countries**
2.2.1 Development of US EMC Industry
(1) US Governmental Energy Saving and Energy Reduction Supporting Policies
(2) Development Phase of US ESCO Industry
(3) Market Scale of US ESCO Industry
(4) Application Fields of US ESCO Industry
(5) Enterprise Types of US ESCO Industry
(6) Market Pattern of US ESCO Industry
(7) Development Trend and Prospects for US ESCO Industry
2.2.2 Development of EU EMC Industry
(1) EU Governmental Energy Saving and Energy Reduction Supporting Policies
(2) Development Overview of EU ESCO Industry
(3) Development Conditions of Germany ESCO Industry
(4) Development Conditions of Spain ESCO Industry
(5) Application Fields and Market Pattern of EU ESCO
2.2.3 Development of Japan EMC Industry
(1) Japan Governmental Energy Saving and Energy Reduction Supporting Policies
(2) Development Overview of Japan EMC Industry
**2.3 Enlightenment on Development of China EMC Industry**
2.3.1 EMCO’s Practice in China
(1) China Energy Saving Promotion Projects and Pilot EMCO Practice
(2) Advantages of EMCO in China
2.3.2 Financial Policies Promoting Development of EMC Market
2.3.3 Public Department Providing Largest Market Shares
Chapter 3: Analysis of Development Conditions of China Energy Saving Services Industry
**3.1 Life Cycle and Market Potential of China Energy Saving Services Industry**
3.1.1 Life Cycle Analysis of Energy Saving Services Industry
3.1.2 Potential Analysis of China Energy Saving Services Industry
(1) GDP Unit Consumption and Energy Saving Market Potentials
(2) Energy Usage Effectiveness and Energy Saving Market Potentials
(3) Analysis of Electricity Potentials for Current-using Equipment
**3.2 Analysis of Development Scale of China Energy Saving Services Industry**
3.2.1 Enterprise Quantity Growth of Energy Saving Services Industry
3.2.2 Employee Quantity Growth of Energy Saving Services Industry
3.2.3 Analysis of Output Scale of Energy Saving Services Industry
3.2.4 Analysis of Energy Saving and Emission Reduction of Energy Saving Services Industry
3.2.5 Scientific and Technological Innovation of Energy Saving Services Industry
**3.3 Five-force Model Analysis of China Energy Saving Services Industry**
3.3.1 Analysis of Competitors in Current Industry
3.3.2 Supplier Bargaining Power
3.3.3 Customer Bargaining Power
3.3.4 Analysis of Potential Competitors in Industry
3.3.5 Analysis of Substitutes Threats in Industry
**3.4 Analysis of Technological Level of China Energy Saving Services Industry**
3.4.1 Energy Saving Analysis of Process
3.4.2 Energy Saving of Energy Management Service
**3.5 Problems and Transformation Measures in China Energy Saving Service Enterprises**
3.5.1 Problems in EMCO Separated from Traditional Large-scale Energy Consumption Departments
(1) Problems in EMCO Transformed from or Invested by Traditional Manufacturing Enterprises
(2) Problems in EMCO Depending on Itself Technology and Professional Knowledge
3.5.2 Measures for Transforming Marketing Methods of Energy Saving Enterprises
(1) Salesmen Need to Know Technology
(2) Energy Saving Technological Exchange Requires to Seek Truth from Facts
(3) Make Clear Risks in Energy Saving Transformation
(4) Focusing on Energy Saving Effectiveness Rather than Investment Quota
(5) Savings Affirmation Should Be Simplified
(6) Let Users out of Shared Days Misunderstanding
**3.6 China Energy Saving Market Obstacles and Energy Saving Mechanism Transformation**

3.6.1 Market Energy Saving Obstacles in China’s Market
(1) Obstacle of Energy Saving Mechanism
(2) Obstacle of Energy Saving Investment
(3) Obstacle of Energy Saving Information
3.6.2 Transformation of Energy Saving Mechanism
(1) Urgent Necessity for Energy Saving Mechanism Transformation
(2) Operational Experience of International Energy Saving
3.6.3 Major Development Problems for China ESCO
(1) Energy Saving Benefits Quantitative System Urgent to Be Established
(2) Shared Savings Benefit Mechanism Should Be Improved
(3) Environmental Obstacles in the Development of China Energy-saving Services Industry
3.6.4 Problems in Current Energy-saving Services Industry
3.6.5 Key Development Directions for Energy-saving Services Industry during “Twelfth-five Year” Period
3.6.6 Development Prospects Forecast for Energy-saving Services Industry during “Twelfth-five Year” Period

**Chapter 4: Analysis of Development Conditions of China EMC Industry in nationwide and Key Regions**

**4.1 Analysis of Development Conditions of China EMC Industry**
4.1.1 Development Conditions of EMC Industry
4.1.2 Investment Scale of EMC Industry
4.1.3 Implementation Status for China EMC Projects
(1) Implementation Status for Per EMC Project
(2) Quantity Analysis of Per EMC Project
(3) Energy Saving Amount Analysis of Per EMC Project
(4) Investment Quota Analysis of Per EMC Project
(5) Contract Types Distribution of EMC
4.1.4 Development Key Factors to EMC in China

**4.2 Analysis of Development Conditions of EMC Industry in Key Regions**
4.2.1 Analysis of Development Conditions of Shanghai EMC Industry
(1) Distribution of Shanghai Industry Structure
(2) Shanghai Energy Consumption
(3) Policies Related to Shanghai EMC Industry
(4) Performance of Shanghai EMC Projects
(5) Competition of Shanghai EMC Market
(6) Development Trend of Shanghai EMC Industry
4.2.2 Analysis of Development Conditions of Beijing EMC Industry
(1) Distribution Structure of Beijing Industry Structure
(2) Beijing Energy Consumption
(3) Policies Related to Beijing EMC Industry
(4) Performance of Beijing EMC Projects
(5) Competition of Beijing EMC Market
(6) Development Trend of Beijing EMC Industry
4.2.3 Analysis of Development Conditions of Guangdong EMC Industry
(1) Distribution Structure of Guangdong Industry Structure
(2) Guangdong Energy Consumption
(3) Policies Related to Guangdong EMC Industry
(4) Performance of Guangdong EMC Projects
(5) Competition of Guangdong EMC Market
(6) Development Trend of Guangdong EMC Industry
4.2.4 Analysis of Development Conditions of Shandong EMC Industry
(1) Distribution Structure of Shandong Industry Structure
(2) Shandong Energy Consumption
(3) Policies Related to Shandong EMC Industry
(4) Performance of Shandong EMC Projects
(5) Competition of Shandong EMC Market
(6) Development Trend of Shandong EMC Industry
4.2.5 Analysis of Development Conditions of Hebei EMC Industry
(1) Distribution Structure of Hebei Industry Structure

(2) Hebei Energy Consumption
(3) Policies Related to Hebei EMC Industry
(4) Performance of Hebei EMC Projects
(5) Competition of Hebei EMC Market
(6) Development Trend of Hebei EMC Industry
Chapter 5: Analysis of Application Fields of EMC
5.1 Distribution of EMC Application Fields
5.1.1 Project Distribution of EMC in Each Field
5.1.2 Investment Quota Distribution of EMC in Each Field
5.1.3 Investment Intensity Distribution of EMC in Each Field
5.2 Application of EMC in Industrial Circle
5.2.1 Policy Environment of Industrial Energy Saving
5.2.2 Application of EMC in Steel Industry
(1) Background and Consumption of Steel Industry
1) Development of Steel Industry
2) Energy Consumption Status and Trend of Steel Industry
(2) EMC Application in Energy Saving of Steel Enterprises
(3) EMC Problems in Steel Application
5.2.3 Application of EMC in Chemical Industry
(1) Development Background and Consumption of Chemical Industry
1) Development of Chemical Industry
2) Energy Consumption Status and Trend of Chemical Industry
5.3 EMC Application in Construction
5.3.1 Background and Energy Consumption of Construction Industry
(1) Development of Construction Industry
(2) Energy Consumption Status and Trend of Construction Industry
5.3.2 Scale of Construction Services Market
5.3.3 Energy-saving Services Market Competition in Construction Field
5.3.4 Analysis of EMC Application Prospects in Building Field
5.4 EMC Application in Transportation
5.4.1 Background and Energy Consumption of Transportation Industry
(1) Development of Transportation Industry
(2) Energy Consumption Status of Transportation Industry
5.4.2 Analysis of EMC Application Prospects in Transportation Field
5.5 EMC Application in Public Authorities
5.5.1 Energy Consumption Status and Trend of Public Authorities
5.5.2 Analysis of EMC Application Prospects in Public Authorities
5.6 EMC Application in Telecommunication
5.6.1 Energy Consumption Status and Trend of Telecommunication Industry
5.6.2 EMC Application Status and Prospects in Telecommunication
5.6.3 EMC Problems in Telecommunication
Chapter 6: Analysis of EMC Application Cases
6.1 Analysis of EMC Application Cases in Industrial Circle
6.1.1 Analysis of EMC Application Cases in Steel Industry
(1) EMC Case Study of Xinyu Iron & Steel Group Co., Ltd.
1) Project Profile
2) Project Investment Program
3) Evaluation on Project Economic Benefits
(2) EMC Case Study of Hunan Hualing Steel Group Ltd.
1) Project Application Background
2) Project Energy Savings Calculation
3) Project Ex-post Energy Savings Calculation
6.1.2 Analysis of EMC Application Cases in Cement Industry
(1) EMC Case Study of Kashgar Dragon Cement Co., Ltd.
1) Project Overview
2) Project Investment Program
1. Project Cooperation and Operational Plan
2. Project Capital Source
3. Project Equipment Plan

3) Evaluation on Project Benefits
1. Evaluation on Project Economic Benefits
2. Evaluation on Project Social Benefits
(2) EMC Case Study of Frequency Conversion in Shanxi Qinling Cement Co., Ltd.
1) Project Profile
2) Project Investment and Equipment Makers
3) Project Cooperation Methods
4) Evaluation on Project Economic Benefits
6.1.3 Analysis of EMC Application Cases in Coal Industry
(1) EMC Case Study of Huozhou Coal Electricity Group Co., Ltd.
1) Project Profile
2) Project Investment Scale
3) Project Transformation Program
4) Evaluation on Project Benefits
6.1.4 Analysis of EMC Application Cases in Electricity Industry
(1) EMC Case Study of Jiangxi Xinyu Power Generation Co., Ltd.
1) Project Implementation Background
2) Project Transformation Content
3) Project Implementation Conditions
4) Evaluation on Project Benefits
**6.2 Analysis of EMC Application Cases in Construction**
6.2.1 EMC Case Study of Shanghai Oriental Building
(1) Project Overview
(2) Research on Energy and Gas Consumption in Construction
(3) Evaluation on Project Benefits
6.2.2 EMC Case Study of Shanghai Wumao Hotel
(1) Project Overview
(2) Basic Situation of Original System
(3) Project Implementation Program
(4) Project Energy Saving Benefits and Economic Benefits
**6.3 Analysis of EMC Application Cases in Transportation**
6.3.1 EMC Case Study of Rizhao Port Co., Ltd.
(1) Project Overview
(2) Project Implementation Program
1) Project Implementation Scope
2) Project Calculation Methods
(3) Evaluation on Project Benefits
1) Social Benefits
2) Energy Saving Benefits
3) Economic Benefits
**6.4 Analysis of EMC Application Cases in Public Authorities**
6.4.1 EMC Case Study of Nanshan District Procuratorate in Shenzhen
(1) User Profile
(2) Project Background
(3) Project Implementation Program
(4) Evaluation on Project Benefits
**6.5 Analysis of EMC Application Cases in Telecommunication**
6.5.1 Analysis of EMC in Telecommunication Industry
(1) Project Overview
(2) Project Implementation Program
(3) Evaluation on Project Benefits
Chapter 7: Operation Analysis of Leading Enterprises in EMC Industry
**7.1 Overall Analysis of Enterprises in China EMC Industry**
7.1.1 Brand Enterprises of Energy-saving Services Industry in.....2011
7.1.2 EMC Excellent Pilot Projects in.....2011
**7.2 Case Study of Leading Enterprises in China EMC Industry**
7.2.1 Operation Analysis of Beijing Shenwu Environment & Energy Technology Co., Ltd.
(1) Analysis of Enterprise Development Profile
(2) Analysis of Enterprise Operation Conditions

1) Analysis of Enterprise Revenue Capability
2) Analysis of Enterprise Debt-paying Ability
3) Analysis of Enterprise Operation Capability
4) Analysis of Enterprise Profitability
5) Analysis of Enterprise Development Capability
(3) Performance of Main Projects in Enterprise
(4) Analysis of Enterprise Operational Advantages and Disadvantages
(5) Analysis of Enterprise Latest Trend
7.2.2 Operation Analysis of Nengfa Weiye Energy Technology Company Ltd.
(1) Analysis of Enterprise Development Profile
(2) Analysis of Enterprise Operation Conditions
1) Analysis of Enterprise Revenue Capability
2) Analysis of Enterprise Debt-paying Ability
3) Analysis of Enterprise Operation Capability
4) Analysis of Enterprise Profitability
5) Analysis of Enterprise Development Capability
(3) Performance of Main Projects in Enterprise
(4) Analysis of Enterprise Operational Advantages and Disadvantages
(5) Analysis of Enterprise Latest Trend
7.2.3 Operation Analysis of Shangdong Rongshihua Leasing Co., Ltd.
