

China Pipeline Transportation Industry Report of Development Prospect Forecast and Investment Strategy Planning, 2016–2021

目 录

CONTENTS

Chapter 1: Analysis of Development Environment of China Pipeline Transportation Industry

1.1 Background of pipeline transportation industry

- 1.1.1 definition of pipeline transportation industry
- 1.1.2 basic conditions of pipeline transportation industry
- 1.1.3 operation mode analysis of pipeline transportation industry
- 1.1.4 analysis of price management of pipeline transportation
- 1.1.5 position of pipeline transportation industry in the transportation sector

1.2 Pipeline transport chain analysis

- 1.2.1 Introduction of pipeline transportation industry chain
- 1.2.2 analysis of upstream of pipeline transportation industry chain
- 1.2.3 analysis of downstream of pipeline transportation industry chain

1.3 analysis of environment of pipeline transport industry

- 1.3.1 policy environment analysis
 - (1) management department
 - (2) main policies and regulations
 - (3) industry development plan
- 1.3.2 economic environment analysis
- 1.3.3 social environment analysis
 - (1) analysis of the energy consumption structure
 - (2) analysis of urbanization

Chapter 2: Analysis of the overall development of domestic and international transportation pipelines

2.1 Development of International pipeline transport

- 2.1.1 The general overview of international development pipeline transport
- 2.1.2 Analysis of pipeline transport development in North America
- 2.1.3 Development of pipeline transport in Europe
- 2.1.4 Development of pipeline transport in Russia
- 2.1.5 Analysis of pipeline transport development in the Middle East

2.2 Development of China pipeline transportation

- 2.2.1 Pipeline transportation development
 - (1) the length of pipeline transportation route
 - (2) pipeline transport freight
- 2.2.2 Comparative analysis with the other four modes of transport
 - (1) comparison of the transport line length
 - (2) comparison of freight
- 2.2.3 Analysis of pipeline transportation competition
 - (1) analysis of industry competition
 - (2) analysis of the main business market share
- 2.2.4 Analysis of onshore oil and gas inlet channel
 - (1) analysis of Northwest Oil inlet channel
 - (2) analysis of Northeast and gas inlet channel
 - (3) analysis of Southwest Oil inlet channel
- 2.2.5 profit level and trends of pipeline transportation
 - (1) factors influencing profit of pipeline transportation
 - (2) characteristics and causes of pipeline transportation profit changes

Chapter 3: Development prospects and trends forecast for China natural gas pipeline

3.1 development status and trend analysis of international natural gas pipeline

- 3.1.1 Overview of international natural gas pipeline construction
- 3.1.2 analysis of North American natural gas pipeline construction investment

- 3.1.3 analysis of Russian gas pipeline construction investment
- 3.1.4 international inspirations for China gas pipeline construction

3.2 analysis of China gas pipeline construction and operation

- 3.2.1 Analysis of the natural gas pipeline grid network
 - (1) the overall pattern of the natural gas pipeline network
 - (2) the regional distribution of natural gas pipeline network
- 3.2.2 Comparison of major natural gas pipeline networks
 - (1) comparison of the ability to deliver gas
 - (2) comparison of the pipe network diameter size
 - (3) comparison of network transmission distance
 - (4) comparison of the investment scale
- 3.2.3 The gas pipeline construction plan

3.3 analysis of China natural gas pipeline supply and demand

- 3.3.1 Analysis of the production and consumption of natural gas
 - (1) natural gas production analysis
 - (2) natural gas consumption analysis
- 3.3.2 needs analysis of gas pipeline transportation
 - (1) analysis of the proportion of natural gas pipeline
 - (2) demand forecasts for the natural gas pipeline transportation
- 3.3.3 analysis of the total length of natural gas pipelines and gas transmission capacity

3.4 development trend forecast of China natural gas pipeline

- 3.4.1 development prospect analysis of natural gas pipeline
- 3.4.2 development trend forecast of natural gas pipeline

Chapter 4: Development trend and forecasting prospects of China crude oil pipeline transportation

4.1 development status and trend analysis of International crude oil pipeline transportation

- 4.1.1 distribution of the world's crude oil pipeline
- 4.1.2 introduction of international crude oil pipeline typical
- 4.1.3 analysis of the price system of international crude oil pipeline transportation
 - (1) method of determining the price of American oil pipeline
 - (2) the method of determining the price of Russian crude oil pipeline transportation
 - (3) the method of determining the price of Canadian oil pipeline

4.2 Analysis of China crude oil pipeline construction

- 4.2.1 development of China crude oil pipeline
- 4.2.2 introduction of typical China oil pipelines
- 4.2.3 crude oil pipeline construction
- 4.2.4 Analysis of the crude oil pipeline construction planning

4.3 supply and demand gap analysis of China crude oil pipeline transportation

- 4.3.1 Analysis of the production and consumption of crude oil
 - (1) crude oil production analysis
 - (2) crude oil consumption analysis
- 4.3.2 Analysis of the crude oil pipeline transportation needs
 - (1) analysis of the proportion of crude oil pipeline
 - (2) demand forecast for crude oil pipeline transportation
- 4.3.3 analysis of the total mileage and delivery ability of crude oil pipeline

4.4 development trend of China crude oil pipeline transportation

- 4.4.1 problems and suggestions of crude oil pipeline transportation
- 4.4.2 development prospects of crude oil pipeline transportation
- 4.4.3 development trend forecast of crude oil pipeline transportation

Chapter 5: Prospects and trend forecasting of China pipeline transportation

5.1 analysis of development status and trend of international pipeline transport

- 5.1.1 development status and trend of international pipeline transport
 - (1) development status of the U.S. pipeline
 - (2) development status of the Western Europe pipeline
- 5.1.2 development trend of international pipeline transportation
- 5.1.3 global pipeline implications for China development

5.2 analysis of China pipeline construction and operation

- 5.2.1 Analysis of the finished pipeline grid
- 5.2.2 pipeline construction

5.2.3 Analysis of pipeline construction planning

5.3 supply and demand gap analysis of China Pipeline transportation

5.3.1 analysis of production and consumption of oil products

(1) analysis of oil production

(2) refined oil consumption analysis

5.3.2 needs analysis of pipeline transportation

(1) the ratio analysis of pipeline transportation

(2) pipeline transportation demand forecasts

5.4 trends forecast of China pipeline transportation

5.4.1 development prospect of pipeline transportation

5.4.2 future direction of pipeline transportation

Chapter 6: Development status and the potential forecast of coal slurry pipeline transportation in China

6.1 analysis of research and application of domestic coal pipeline

6.1.1 analysis of research and application of foreign coal pipeline

6.1.2 analysis of research and application of coal in the domestic pipeline

6.2 analysis of China Shenwei Coal pipeline project

6.2.1 construction plan

6.2.2 expected investment returns

6.2.3 construction difficulties and countermeasures

6.3 development potential estimates of China coal slurry pipeline transport

6.3.1 Analysis of coal production and consumption

(1) coal production analysis

(2) coal consumption analysis

6.3.2 analysis of status of coal transportation

6.3.3 estimated potential of coal slurry pipeline transportation
