

China Energy Conservation Service Industry Report (2016–2021), Market Forecast and Investment Strategic Planning

目 录

CONTENTS

Chapter 1: Analysis of background of development of China's energy conservation service industry

- 1.1 basic theories of energy conservation service industry
 - 1.1.1 definition of energy conservation service industry
 - 1.1.2 business content of energy conservation service industry
 - 1.1.3 life cycle of energy conservation service industry
- 1.2 analysis of business model of energy conservation service industry
 - 1.2.1 business model of contract energy management
 - (1) basic types of contract energy management
 - (2) structure of application fields of contract energy management
 - (3) forecast of application of contract energy management in various industries
 - 1.2.2 business model of energy-saving and property integration
- 1.3 analysis of policies of energy conservation service industry
 - 1.3.1 summary of related policies and regulations of the industry
 - 1.3.2 analysis of impact of policy on energy conservation service industry

Chapter 2: Development experience of the international energy conservation service industry and inspiration

- 2.1 status quo of development and prospects of the international energy conservation service industry
 - 2.1.1 overview of development of the international energy conservation service industry
 - 2.1.2 distribution of business fields of the international energy conservation service industry
 - 2.1.3 barriers of development of the international energy conservation service industry
 - 2.1.4 forecast of development of the international energy conservation service industry
- 2.2 development of energy conservation service industry in main countries and enlightenment
 - 2.2.1 analysis of development of energy conservation service industry in America
 - (1) America's support for energy conservation service industry
 - (2) development stage of energy conservation service industry in America
 - (3) scale and structure of energy conservation service industry in America
 - (4) market competition of energy conservation service industry in America
 - (5) source of profits of energy conservation service industry in America
 - 2.2.2 analysis of development of energy conservation service industry in Japan
 - (1) Japan's support for energy conservation service industry
 - (2) development stage of energy conservation service industry in Japan
 - (3) analysis of Japan's leading energy conservation service enterprises
 - (4) development trends and prospects of energy conservation service industry in Japan
 - 2.2.3 analysis of development of energy conservation service industry in Germany
 - (1) Germany's support for energy conservation service industry
 - (2) development stage of energy conservation service industry in Germany
 - (3) Germany's leading energy conservation service enterprises
 - 2.2.4 inspiration of experience of the international energy conservation service industry
- 2.3 analysis of investment layout of multinational energy conservation service enterprises in China
 - 2.3.1 Honeywell
 - (1) brief introduction of the company's development
 - (2) analysis of the company's operation
 - (3) analysis of the company's energy conservation service fields
 - (4) analysis of the company's investment layout in China
 - 2.3.2 Johnson Controls
 - (1) brief introduction of the company's development
 - (2) analysis of the company's operation

- (3) analysis of the company's energy conservation service fields
- (4) analysis of the company's investment layout in China
- 2.3.3 Siemens
 - (1) brief introduction of the company's development
 - (2) analysis of the company's operation
 - (3) analysis of the company's energy conservation service fields
 - (4) analysis of the company's investment layout in China
- 2.3.4 Schneider Electric
 - (1) brief introduction of the company's development
 - (2) analysis of the company's operation
 - (3) analysis of the company's energy conservation service fields
 - (4) analysis of the company's investment layout in China

Chapter 3: Analysis of development scale and status quo of competition of China's energy conservation service industry

- 3.1 overview of China's energy-saving potential and energy conservation service industry
 - 3.1.1 analysis of energy consumption and energy-saving potential
 - (1) efficiency of energy economy and energy-saving potential
 - (2) efficiency of energy use and energy-saving potential
 - (3) energy-saving potential of main electrical equipment
 - 3.1.2 overview of development of energy conservation service industry
 - 3.1.3 distribution of business fields of energy conservation service industry
- 3.2 analysis of scale of development of China's energy conservation service industry
 - 3.2.1 growth of enterprise quantity of energy conservation service industry
 - 3.2.2 growth of employees of energy conservation service industry
 - 3.2.3 analysis of scale of output value of energy conservation service industry
 - 3.2.4 analysis of scale of investment of energy conservation service industry
 - 3.2.5 analysis of energy-saving and emission reduction of energy conservation service industry
- 3.3 analysis of operating efficiency of development of China's energy conservation service industry
 - 3.3.1 analysis of revenue constituent of energy conservation service industry
 - 3.3.2 analysis of profit level of energy conservation service industry
- 3.4 analysis of competition and strategy of China's energy conservation service industry
 - 3.4.1 four camps of energy conservation service company
 - 3.4.2 competitive landscape of energy conservation service industry
 - 3.4.3 analysis of enterprises' competitive tactics
- 3.5 analysis of opportunities and challenges of China's energy conservation service industry
 - 3.5.1 analysis of opportunities of energy conservation service industry
 - 3.5.2 analysis of challenges of energy conservation service industry
- 3.6 forecast of development of China's energy conservation service industry
 - 3.6.1 forecast of scale of enterprise
 - 3.6.2 forecast of employees
 - 3.6.3 forecast of scale of output value
 - 3.6.4 forecast of scale of investment
 - 3.6.5 forecast of energy-saving capability

Chapter 4: Analysis of development and subdivided markets of China's construction energy conservation service industry

- 4.1 analysis of development of the international construction energy conservation service industry and experience reference
 - 4.1.1 analysis of development of the international construction energy conservation service industry
 - (1) analysis of development of construction energy conservation service industry in America
 - (2) analysis of development of construction energy conservation service industry in Canada
 - (3) analysis of development of construction energy conservation service industry in Japan
 - (4) analysis of development of construction energy conservation service industry in Germany
 - 4.1.2 experience reference of the international construction energy conservation service industry
- 4.2 analysis of development of China's construction energy conservation service industry
 - 4.2.1 related policies of construction energy conservation service industry
 - 4.2.2 construction area and status quo of energy consumption
 - 4.2.3 scale of development of construction energy conservation service industry
 - (1) development of energy conservation service industry

- (2) market scale of construction energy conservation service industry
- (3) comparison of domestic and foreign construction energy conservation service industry
- 4.2.4 analysis of investment returns of construction energy conservation service industry
- 4.2.5 analysis of major customer groups of construction energy conservation service industry
- 4.2.6 analysis of corporate development of construction energy conservation service industry
 - (1) analysis of advantages and disadvantages of various types of construction energy conservation service companies
 - (2) competition of energy conservation service industry
- 4.3 analysis of subdivided markets of China's construction energy conservation service industry**
 - 4.3.1 analysis of construction equipment monitoring system (BAS) market
 - 4.3.2 analysis of construction energy saving electrical equipment market
 - (1) analysis of scale of construction energy saving electrical equipment service market
 - (2) analysis of construction electrical equipment energy saving transformation market
 - 1) analysis of central air-conditioning energy saving market
 - 2) analysis of lighting system energy-saving transformation market
 - 3) analysis of elevator energy-saving transformation market
- 4.4 analysis of opportunities and challenges of China's construction energy conservation service industry**
 - 4.4.1 analysis of opportunities of construction energy conservation service industry
 - 4.4.2 analysis of challenges of construction energy conservation service industry
 - 4.4.3 proposals for development of construction energy conservation service industry

Chapter 5: Analysis of development and subdivided markets of China's industrial energy conservation service industry

- 5.1 analysis of development of China's industrial energy conservation service industry**
 - 5.1.1 related policies of industrial energy conservation and emission reduction
 - 5.1.2 industrial development and energy consumption
- 5.2 status quo and forecast of China's motor system energy conservation service market**
 - 5.2.1 pathways and occasion of use of motor system energy conservation
 - 5.2.2 analysis of main measures of motor system energy conservation
 - 5.2.3 subdivided markets of motor system energy conservation service
 - (1) analysis of motor speed control energy conservation market
 - (2) analysis of energy efficient motor market
 - 5.2.4 key enterprises of motor system energy conservation service
 - 5.2.5 forecast of motor system energy conservation
- 5.3 status quo and forecast of China's waste heat utilization market**
 - 5.3.1 distribution of waste heat resources and energy conservation potential
 - 5.3.2 analysis of subdivided markets of waste heat utilization
 - (1) analysis of cogeneration market
 - 1) analysis of cogeneration market in cement industry
 - 2) analysis of cogeneration market in steel industry
 - 3) analysis of cogeneration market in glass industry
 - 4) analysis of cogeneration market in chemical industry
 - 5) analysis of cogeneration market in non-ferrous metal industry
 - 5.3.3 analysis of heat pump market
 - (1) analysis of scale of demand of heat pump market
 - (2) analysis of competitive landscape of heat pump market
 - 5.3.4 analysis of key enterprises of waste heat utilization
 - 5.3.5 analysis of waste heat utilization project
 - 5.3.6 forecast of waste heat utilization market
- 5.4 status quo and forecast of China's cogeneration market**
 - 5.4.1 analysis of status quo of development of cogeneration
 - 5.4.2 demand for construction of thermal power plant in industrial enterprises
 - 5.4.3 analysis of key enterprises of cogeneration
 - 5.4.4 analysis of key projects of cogeneration
 - 5.4.5 forecast of cogeneration market
- 5.5 analysis of China's distribution system energy-saving transformation market**
 - 5.5.1 energy consumption of distribution system
 - 5.5.2 analysis of distribution system energy-saving transformation market
 - 5.5.3 analysis of key enterprises of distribution system energy-saving transformation

5.5.4 analysis of key projects of distribution system energy-saving transformation

5.5.5 forecast of distribution system energy-saving transformation market

Chapter 6: Status quo of development and forecast of energy conservation service industry in other areas

6.1 status quo of development and prospects of China's transportation energy conservation service industry

6.1.1 related policies and orientation of transportation energy conservation service industry

6.1.2 related policies of transportation energy conservation service industry

(1) future policy orientation of transportation energy conservation

6.1.3 transportation energy consumption and energy efficiency

(1) rail transportation energy consumption and energy efficiency

(2) road transportation energy consumption and energy efficiency

(3) water transportation energy consumption and energy efficiency

(4) aviation transportation energy consumption and energy efficiency

(5) pipeline transportation energy consumption and energy efficiency

6.1.4 transportation energy conservation service model and potential

(1) rail transportation energy conservation model and potential

(2) road transportation energy conservation model and potential

(3) urban transportation energy conservation model and potential

(4) water transportation energy conservation model and potential

(5) aviation transportation energy conservation model and potential

6.1.5 problems of transportation energy conservation service industry and international experience

(1) problems of transportation energy conservation service industry

(2) related international experience

6.1.6 forecast of development of transportation energy conservation service industry

6.2 status quo of development and prospects of China's public institution energy conservation service industry

6.2.1 related policies of public institution energy conservation service

6.2.2 energy consumption and energy saving potential of public institutions

6.2.3 analysis of energy saving measures in public institutions

6.2.4 analysis of subdivided markets of public institution energy conservation service

(1) analysis of energy conservation service market in government agencies

(2) analysis of energy conservation service market in hotels

(3) analysis of energy conservation service market in shopping malls and supermarkets

6.2.5 problems of public institution energy conservation service

6.2.6 analysis of projects of public institution energy conservation service

6.2.7 forecast of development of public institution energy conservation service industry

Chapter 7: Case study of enterprises of China's energy conservation service industry

7.1 analysis of overall situation of China's energy conservation service enterprises

7.1.1 brand enterprises of energy conservation service industry in.....2012

7.1.2 enterprises with most growth of energy conservation service industry in.....2012

7.1.3 top ten enterprises in terms of energy-saving volume in.....2013

7.2 case study of enterprises of China's energy conservation service industry

7.2.1 CECEP Technology Investment Co., Ltd.

(1) brief introduction of the company's development

(2) analysis of the company's operation business

(3) analysis of the company's qualification and honor

(4) analysis of the company's operation

(5) the company's major project performance

(6) analysis of advantages and disadvantages of the company's operation

(7) analysis of the company's latest trend

7.2.2 Beijing Shenwu Environment and Energy Technology Group Co., Ltd.

(1) brief introduction of the company's development

(2) analysis of the company's product structure

(3) analysis of the company's technical level

(4) analysis of the company's qualification and honor

(5) analysis of the company's operation

(6) the company's major project performance

(7) analysis of advantages and disadvantages of the company's operation

- (8) analysis of the company's latest trend
- 7.2.3 Liaoning Nengfa Weiye Energy Technology Company Ltd.
 - (1) brief introduction of the company's development
 - (2) analysis of the company's operation business
 - (3) analysis of the company's technical level
 - (4) analysis of the company's qualification and honor
 - (5) analysis of the company's operation
 - (6) the company's major project performance
 - (7) analysis of advantages and disadvantages of the company's operation
 - (8) analysis of the company's latest trend
- 7.2.4 Guangzhou Zhiguang Energy Conservation Limited
 - (1) brief introduction of the company's development
 - (2) analysis of the company's operation business
 - (3) analysis of the company's technical level
 - (4) analysis of the company's qualification and honor
 - (5) analysis of the company's operation
 - (6) analysis of advantages and disadvantages of the company's operation
 - (7) analysis of the company's latest trend
- 7.2.5 Shandong Rongshihua Financial Leasing Co., Ltd.
 - (1) brief introduction of the company's development
 - (2) analysis of the company's operation business
 - (3) analysis of the company's technical level
 - (4) analysis of the company's qualification and honor
 - (5) the company's major project performance
 - (6) analysis of the company's operation
 - (7) analysis of advantages and disadvantages of the company's operation

there are another 30 enterprises

Chapter 8: Analysis of credit and financing of China's energy conservation service industry

8.1 analysis of risks of China's energy conservation service industry

- 8.1.1 analysis of credit risk of energy conservation service industry
- 8.1.2 analysis of construction risk of energy conservation service industry
- 8.1.3 analysis of equipment risk of energy conservation service industry
- 8.1.4 analysis of financial risk of energy conservation service industry
- 8.1.5 analysis of risk of energy-saving volume of energy conservation service industry

8.2 credit opportunities and recommendations of China's energy conservation service industry

- 8.2.1 overall credit opportunity and credit suggestions
- 8.2.2 credit opportunity of subdivided industries and credit suggestions
 - (1) credit opportunities and recommendations of building energy conservation service industry
 - (2) credit opportunities and recommendations of industrial energy conservation service industry
- 8.2.3 regional credit opportunity and suggestions
 - (1) features and summary of regional development
 - (2) credit suggestions for regional market
- 8.2.4 corporate credit opportunity and suggestions

8.3 analysis of status quo of financing of China's energy conservation service industry

- 8.3.1 analysis of financing environment of energy conservation service industry
- 8.3.2 analysis of financing obstacles of energy conservation service industry
 - (1) institutional and conceptual obstacles
 - (2) scale obstacle
 - (3) limitations of financial service capability and level
 - (4) obstacle of information asymmetry
 - (5) obstacle of credit system
- 8.3.3 analysis of status quo of financing of energy conservation service industry
- 8.3.4 situation of financial institutions to support energy conservation service industry

8.4 analysis of financing models of China's energy conservation service industry

- 8.4.1 analysis of characteristics of energy conservation service projects
- 8.4.2 reference of financing models of foreign energy conservation service projects
 - (1) financing model of energy conservation service projects in America
 - (2) financing model of energy conservation service projects in Brazil

- (3) reference of financing models of foreign energy conservation service projects for China
- 8.4.3 analysis of applicability of common financing methods in China's energy conservation service projects
 - (1) analysis of debt financing
 - (2) analysis of equity financing
 - (3) analysis of financing by convertible bonds
- 8.4.4 design of financing models of China's energy conservation service projects
 - (1) design of financing models for small and medium sized energy conservation service projects
 - (2) design of financing models for large-scale energy conservation service projects
