

China Educational Informatization Industry Report of Forecast and Investment Opportunity Analysis, 2016–2021

目 录

CONTENTS

Chapter 1: Analysis of the background of China education informationization

- 1.1 overview of education informationization
 - 1.1.1 definition of education informationization
 - 1.1.2 purpose of education informationization
 - 1.1.3 content of education informationization
- 1.2 analysis of educational informatization value chain
 - 1.2.1 analysis of value chain
 - 1.2.2 student / user
 - 1.2.3 teaching implementers
 - 1.2.4 teaching organizers
 - 1.2.5 professional developers
 - 1.2.6 government administration
- 1.3 PEST analysis of education informationization
 - 1.3.1 policy environment (P)
 - (1) department in charge of education informationization
 - (2) policy for education informatization industry
 - (3) standard for education informatization industry
 - 1.3.2 economic environment (E)
 - (1) national economic operation
 - (2) educational investment and GDP growth
 - 1.3.3 social environment (S)
 - (1) development status of education industry
 - (2) development status of Internet
 - 1.3.4 technology environment (T)
 - (1) applications of education informatization technology
 - 1) the construction of the campus network
 - 2) the application of multimedia courseware production technology
 - 3) realization of online education based on Internet
 - 4) rapid development of digital technology
 - 5) construction of metro education network is developing
 - (2) analysis of industry patent
 - 1) analysis of the number of disclosed patents
 - 1. analysis of industry patent applicants
 - 2) analysis of technology structure of industry patents

Chapter 2: Summary of development and experience of foreign educational informatization

- 2.1 educational informatization development in America
 - 2.1.1 the development process of educational informatization
 - 2.1.2 development status of educational informatization
 - 2.1.3 problems and prospects of educational informatization
- 2.2 educational informatization development in the UK
 - 2.2.1 the development process of educational informatization
 - 2.2.2 development status of educational informatization
 - 2.2.3 problems and prospects of educational informatization
- 2.3 educational informatization development in France
 - 2.3.1 the development process of educational informatization
 - 2.3.2 development status of educational informatization
 - 2.3.3 problems and prospects of educational informatization
- 2.4 educational informatization development in Germany
 - 2.4.1 the development process of educational informatization

- 2.4.2 development status of educational informatization
- 2.4.3 problems and prospects of educational informatization
- 2.5 educational informatization development in Canada**
 - 2.5.1 the development process of educational informatization
 - 2.5.2 development status of educational informatization
 - 2.5.3 problems and prospects of educational informatization
- 2.6 educational informatization development in Hongkong**
 - 2.6.1 the development process of educational informatization
 - 2.6.2 development status of educational informatization
 - 2.6.3 problems and prospects of educational informatization
- 2.7 educational informatization development in Taiwan**
 - 2.7.1 the development process of educational informatization
 - 2.7.2 development status of educational informatization
 - 2.7.3 problems and prospects of educational informatization
- 2.8 educational informatization development in South Korea**
 - 2.8.1 the development process of educational informatization
 - 2.8.2 development status of educational informatization
 - 2.8.3 problems and prospects of educational informatization
- 2.9 educational informatization development in Singapore**
 - 2.9.1 the development process of educational informatization
 - 2.9.2 development status of educational informatization
 - 2.9.3 problems and prospects of educational informatization
- 2.10 educational informatization development in Japan**
 - 2.10.1 the development process of educational informatization
 - 2.10.2 development status of educational informatization
 - 2.10.3 problems and prospects of educational informatization
- 2.11 summary of experience of foreign education informationization**
 - 2.11.1 government guidance to promote
 - 2.11.2 integrate social resources to build a resource library
 - 2.11.3 building an open environment for all to learn
 - 2.11.4 improve teachers' IT capability

Chapter 3: Analysis of investment and progress of China education informatization

- 3.1 analysis of China education IT investment**
 - 3.1.1 the scale of investment in education funding
 - 3.1.2 analysis of education IT investment
 - (1) scale
 - (2) product structure
 - (3) regional structure
 - (4) key areas
- 3.2 analysis of progress of Chinese educational informationization**
 - 3.2.1 development history
 - 3.2.2 progress
 - 3.2.3 current characteristics
 - 3.2.4 main problems
- 3.3 analysis of key projects of China educational informationization**
 - 3.3.1 "211 Project"
 - 3.3.2 "985 Project"
 - 3.3.3 "distance education project in rural primary and secondary schools."
 - 3.3.4 "computer network construction project in western university campus"
 - 3.3.5 "school-to-school link" project

Chapter 4: Analysis of construction and application of Chinese education informatization technology

- 4.1 analysis of construction status of educational information facilities**
 - 4.1.1 the content of construction of educational information facilities
 - 4.1.2 status quo of construction of educational information facilities
 - 4.1.3 analysis of construction of education information network
 - (1) university campus (University City) network construction
 - 1) definition and features
 - 2) strategy and planning

- 3) construction and operation mode
- 4) survey of overall construction of the
- 5) IPv6 technology upgrade
- 6) analysis of construction trend of wireless campus network
- 7) construction problems and countermeasures
- (2) analysis of "school-to-school link" project
- (3) analysis of education backbone network construction
- (4) analysis of education MAN

4.2 development and construction of digital teaching resources

- 4.2.1 construction history
- 4.2.2 ways to build
 - (1) construction of high-quality course
 - (2) digital library information resources
 - (3) professional talents to develop digital teaching resources
- 4.2.3 platform construction
 - (1) features of platform of different construction bodies
 - (2) features of platform of different forms of distribution
- 4.2.4 sharing system construction
- 4.2.5 major problems of development

4.3 analysis of development status and trends of networked teaching

- 4.3.1 definition
- 4.3.2 development history
- 4.3.3 features
- 4.3.4 development situation
 - (1) network teaching in educational institutions
 - (2) market size
 - (3) user scale
 - (4) main problems
- 4.3.5 market segment analysis
 - (1) analysis of development of synchronous network education
 - (2) analysis of development of online school of extracurricular activities
 - (3) analysis of development of online school of higher education
 - (4) analysis of development of online school of vocational and technical training
- 4.3.6 development prospects
- 4.3.7 development forecast

4.4 analysis of current development situation and trend of multimedia teaching

- 4.4.1 advantages
- 4.4.2 current situation
- 4.4.3 main problems
- 4.4.4 development prospects

4.5 analysis of current development situation and trend of digital campus

- 4.5.1 concept
- 4.5.2 analysis of system structure
- 4.5.3 analysis of construction demand
- 4.5.4 analysis of construction stage
- 4.5.5 planning and design
- 4.5.6 analysis of construction mode
 - (1) analysis of construction pattern of digital campus
 - 1) self-development mode
 - 2) outsourcing model (vendor models)
 - 3) mixed-mode (cooperative development mode)
 - 4) leasing model
 - (2) evaluation of the pros and cons of digital campus construction modes
- 4.5.7 analysis of digital campus deployment patterns
 - (1) pattern analysis
 - (2) analysis of the pros and cons
 - (3) evaluation of the pros and cons
- 4.5.8 status quo and trends of wisdom campus
 - (1) connotation

- (2) objectives and significance
- (3) main content
- (4) platform construction for application system of wisdom campus
- (5) analysis of construction situation
- (6) construction case study
- (7) development outlook of wisdom campus

Chapter 5: Research and analysis of the various stages of education informatization in China

5.1 survey of basic education informationization

- 5.1.1 overview of basic education informationization construction
- 5.1.2 survey of basic education informationization
