

China Children's Hospital Industry Report (2016–2021), Analysis of Supply, Demand and Prospect

目 录

CONTENTS

Chapter 1: Background of development of the industry and scope of the research

1.1 summary of the research of the industry

- 1.1.1 background of the research of the industry
- 1.1.2 significance of the research of the industry
- 1.1.3 analysis of the industry chain

1.2 analysis of policy environment of the industry

- 1.2.1 regulatory system
- 1.2.2 related policies of maternal and child health
 - (1) China's related planning of maternal and child health
 - (2) China's related systems of maternal and child health
 - (3) interpretation of policies
- 1.2.3 important policies of healthcare

1.3 analysis of economic environment of the industry

- 1.3.1 analysis of residents' income level
- 1.3.2 analysis of residents' consumption capability
- 1.3.3 the impact of the macro environment on women's and children's hospital industry

1.4 analysis of social environment of the industry

- 1.4.1 the total population growth
- 1.4.2 change of demographic structure
 - (1) change in the proportion of the child population
 - (2) urbanization progress
- 1.4.3 change of disease spectrum
- 1.4.4 change of the concept of health

Chapter 2: Development status quo of China's women's and children's hospital industry

2.1 analysis of development of China's women's and children's hospital industry

- 2.1.1 development course of China's women's and children's hospital industry
- 2.1.2 development status quo of China's women's and children's hospital industry
- 2.1.3 development scale of China's women's and children's hospital industry
 - (1) statistics of quantity of women's and children's hospital
 - (2) distribution of type of women's and children's health organization
 - (3) statistics of personnel of women's and children's hospital
 - (4) statistics of bed of women's and children's hospital
 - (5) statistics of equipment of women's and children's hospital
 - (6) statistics of construction area of women's and children's hospital

2.2 analysis of services of China's women's and children's hospital industry

- 2.2.1 analysis of outpatient services of women's and children's hospital industry
 - (1) statistics of attendances
 - (2) statistics of outpatient services
- 2.2.2 analysis of inpatient services of women's and children's hospital
 - (1) statistics of admissions
 - (2) statistics of inpatient services
- 2.2.3 analysis of utilization of beds of women's and children's hospital industry

2.3 analysis of operation of Chinese women's and children's hospital industry

- 2.3.1 analysis of operation scale of women's and children's hospital industry
 - (1) scale of asset liabilities of women's and children's hospital
 - (2) revenue and profit scale of women's and children's hospital
- 2.3.2 analysis of operation of women's and children's hospital industry
 - (1) analysis of profitability capability
 - (2) analysis of solvency capability

- (3) analysis of operation capability
- (4) analysis of development capability

2.4 analysis of competition of Chinese women's and children's hospital industry

- 2.4.1 competition between women's and children's hospital and the general hospital
- 2.4.2 competition between women's and children's hospital and community health service

organization

- 2.4.3 competition between subdivided market of women's and children's hospital
- 2.4.4 internal competition of various types of women's and children's hospital
 - (1) competition between children's hospital
 - (2) competition between obstetrics and gynecology (division) hospital
 - (3) competition between maternal and child health centre

2.5 analysis of Chinese residents' medical expenses

- 2.5.1 analysis of health costs
 - (1) scale of the total health costs
 - (2) structure of health cost
 - (3) share of the total health expenditure in GDP
- 2.5.2 analysis of government health spending
 - (1) analysis of growth of government health spending
 - (2) analysis of structure of government health spending
- 2.5.3 health care spending of urban and rural residents
 - (1) analysis of growth of health care spending of urban and rural residents
 - (2) regional structure of health care spending of urban and rural residents per capita
- 2.5.4 medical expense of average disease hospitalization
 - (1) medical expense of average hospitalization for 30 kinds of diseases
 - (2) medical expense of average hospitalization for 30 kinds of diseases in five grades of

hospitals

Chapter 3: Analysis of supply and demand of Chinese children's hospital and prospects

3.1 analysis of the demand of Chinese children's hospital

- 3.1.1 statistics of China's children population
- 3.1.2 morbidity and mortality of children
 - (1) prevalence of childhood diseases
 - (2) mortality of children
 - (3) birth defects of children
- 3.1.3 characteristics of China's children's medical demand
 - (1) consumer groups gradually increase
 - (2) consumers prefer specialized hospital
 - (3) separation of patient and consumer
- 3.1.4 outlook for children's medical demand

3.2 major childhood diseases and medical demands

- 3.2.1 bronchopneumonia
 - (1) prevalence
 - (2) treatment equipment and medicine requirement
 - (3) treatment expenses
 - (4) recent advances in the treatment technology
- 3.2.2 infectious diarrhea
 - (1) prevalence
 - (2) treatment equipment and medicine requirement
 - (3) treatment expenses
 - (4) recent advances in the treatment technology
- 3.2.3 pediatric cold
 - (1) prevalence
 - (2) treatment equipment and medicine requirement
 - (3) treatment expenses
 - (4) recent advances in the treatment technology
- 3.2.4 congenital heart disease
 - (1) prevalence
 - (2) treatment equipment and medicine requirement
 - (3) treatment expenses
 - (4) recent advances in the treatment technology

3.3 analysis of the supply of Chinese children's hospital

3.3.1 analysis of scale of Chinese children's hospital

- (1) statistics of quantity of children's hospital
- (2) statistics of pediatric beds of hospital
- (3) statistics of personnel of children's hospital
- (4) statistics of equipment of children's hospital

3.3.2 delivery of service of Chinese children's hospital

- (1) outpatient treatment visits
- (2) quantity of admissions
- (3) quantity of open beds
- (4) utilization rate of bed
- (5) physicians' daily burden

3.3.3 analysis of operation of Chinese children's hospital

- (1) analysis of profitability capability
- (2) analysis of solvency capability
- (3) analysis of operation capability
- (4) analysis of development capability

3.4 prospects of Chinese children's hospital

3.4.1 analysis of development opportunities of Chinese children's hospital

- (1) health care reform
- (2) families' raise attention on children

3.4.2 threats facing the development of Chinese children's hospital

- (1) private capital enters, market competition tends to confusion
- (2) shortage of talent, restricting development scale of hospital

3.4.3 forecast of Chinese children's hospital

3.4.4 development strategy of China's children's hospital

Chapter 4: Analysis of the development of China's children's hospital in key regions

4.1 analysis of the development of children's hospital in Beijing

4.1.1 development environment of children's hospital in Beijing

- (1) total population of children in Beijing
- (2) maternity and insurance in Beijing

4.1.2 pediatric services of hospital in Beijing

- (1) quantity of pediatric beds of hospital in Beijing
- (2) quantity of pediatric outpatient visits of hospital in Beijing
- (3) quantity of pediatric discharges of hospital in Beijing

4.1.3 pediatric health service demands in Beijing

4.2 analysis of the development of children's hospital in Shanghai

4.2.1 development environment of children's hospital in Shanghai

- (1) total population of children in Shanghai
- (2) maternity and insurance in Shanghai

4.2.2 pediatric services of hospital in Shanghai

- (1) quantity of pediatric beds of hospital in Shanghai
- (2) quantity of pediatric outpatient visits of hospital in Shanghai
- (3) quantity of pediatric discharges of hospital in Shanghai

4.2.3 pediatric health service demands in Shanghai

4.3 analysis of the development of children's hospital in Guangdong

4.3.1 development environment of children's hospital in Guangdong

- (1) total population of children in Guangdong
- (2) maternity and insurance in Guangdong

4.3.2 pediatric services of hospital in Guangdong

- (1) quantity of pediatric beds of hospital in Guangdong
- (2) quantity of pediatric outpatient visits of hospital in Guangdong
- (3) quantity of pediatric discharges of hospital in Guangdong

4.3.3 pediatric health service demands in Guangdong

4.4 analysis of the development of children's hospital in Shandong

4.4.1 development environment of children's hospital in Shandong

- (1) total population of children in Shandong
- (2) maternity and insurance in Shandong

4.4.2 pediatric services of hospital in Shandong

- (1) quantity of pediatric beds of hospital in Shandong
- (2) quantity of pediatric outpatient visits of hospital in Shandong
- (3) quantity of pediatric discharges of hospital in Shandong
- 4.4.3 pediatric health service demands in Shandong

4.5 analysis of the development of children's hospital in Jiangsu

- 4.5.1 development environment of children's hospital in Jiangsu
 - (1) total population of children in Jiangsu
 - (2) maternity and insurance in Jiangsu
- 4.5.2 pediatric services of hospital in Jiangsu
 - (1) quantity of pediatric beds of hospital in Jiangsu
 - (2) quantity of pediatric outpatient visits of hospital in Jiangsu
 - (3) quantity of pediatric discharges of hospital in Jiangsu
- 4.5.3 pediatric health service demands in Jiangsu

Chapter 5: Analysis of operation of China's leading children's hospitals

5.1 case study of China's leading children's hospital

- 5.1.1 Beijing Children's Hospital
 - (1) overview of the hospital's development
 - (2) analysis of scale and level of the hospital's equipment
 - (3) analysis of scale and level of the hospital's technical staff
 - (4) analysis of the hospital's operation and service
 - (5) analysis of the hospital's operation advantages and disadvantages
 - (6) analysis of the hospital's latest developments
