China Online Education Industry Report, Market Prospect and Investment Forecast

目 录

CONTENTS

Chapter 1: Analysis of background of development of China's online education industry
1.1 definition of online education
1.1.1 definition and classification of online education
(1) definition of online education
(2) classification of online education
(3) overview of online education in various areas
1.1.2 comparison of online education and other forms of education
(1) comparison of online education and distance education
(2) comparison of online education and adult education, self education
1.1.3 features and advantages of online education
1.2 analysis of properties of online education industry
1.2.1 life cycle of online education industry
1.2.2 response of online education industry to economic cycle
1.3 research methods and research unit of the report
1.3.1 introduction of research unit
1.3.2 overview of research methods
(1) data analysis method with qualitative and quantitative combination
(2) polynomial regression analysis
Chapter 2: Status quo of development of international online education and experience reference
2.1 overview of development of global online education
2.1.1 international technical standards for online education
2.1.2 status quo of development of global online education
(1) analysis of scale of development
(2) analysis of conduct situation
2.2 analysis of development of online shopping in America
2.2.1 introduction of America's online education
(1) purpose of online education
(2) content of online education
(3) online education resource conditions
2.2.2 status quo of development of America's online education
(1) overview of America's online education
(2) scale of America's online education
(3) type of school to provide online education
(4) introduction of examples of America's online education
(5) analysis of online education policy

(1) government regulation of online education
(2) major policies, laws and regulations of online education
(3) analysis of policy environment of online education
3.1.2 analysis of user environment of online education
(1) scale of China's Internet users
(2) student is the main body of China's Internet users
3.1.3 analysis of economic environment of online education
(1) GDP operation
(2) analysis of financial revenue
(3) analysis of residents' income
3.1.4 analysis of social environment of online education
(1) status quo of development of education industry
(2) level of national expenditure on education
(3) changes in awareness of online education
3.1.5 analysis of technical environment of online education
(1) realization of Internet-based online education
(2) rapid development of digital technology
(3) analysis of patented technology of online education
3.2 overall development of online education
3.2.1 overview of development of online education
(1) rapid development of online education
(2) schools to conduct online education and level increase
3.2.2 analysis of scale of development of online education
(1) analysis of scale of online education market
(2) analysis of scale of online education users
3.2.3 analysis of competitive landscape of online education
3.2.4 problems of online education market
3.2.5 proposals to promote development of online education
3.3 development trends and forecast of online education
3.3.1 analysis of development trends online education
3.3.2 forecast of online education
Chapter 4: Status quo of development of China's online education for primary and secondary school and forecast
4.1 comparative analysis of online education for primary and secondary school in developed countries
4.1.1 status quo of development of online education for primary and secondary school in developed countries
(1) online education for primary and secondary school in America
(2) online education for primary and secondary school in the UK
(3) online education for primary and secondary school in Japan
4.1.2 features of online education for primary and secondary school in developed countries
4.1.3 implications of online education for primary and secondary school in developed countries for China
4.2 status quo and construction of China's primary and secondary online education resources
4.2.1 overview of online education resources for primary and secondary school
(1) development course
(2) online education resources for primary and secondary school

4.2.2 construction of online education resources for primary and secondary school
(1) construction form
(2) problems
(3) hierarchical model
(4) development trends
4.3 status quo of development of China's online education for primary and secondary school and forecast
4.3.1 status quo of development of online education for primary and secondary school
(1) positioning of online education for primary and secondary school
(2) status quo of online education for primary and secondary school
(3) scale of financing of online education for primary and secondary school
4.3.2 problems of online education for primary and secondary school and advice
(1) problems of online education for primary and secondary school
(2) advice to carry out online education for primary and secondary school
4.3.3 forecast of online education for primary and secondary school
(1) forecast of capacity of online education for primary and secondary school
(2) development potential of online education for primary and secondary school
Chapter 5: Status quo of development of China's online education for higher education and forecast
5.1 comparative analysis of development of online education for higher education in developed countries
5.1.1 overview of development of online education for higher education in developed countries
(1) online education for higher education in America
(2) online education for higher education in the UK
5.1.2 comparative analysis of China's and British and American online education for higher education
5.1.3 implications of online education for higher education in developed countries for China
5.2 status quo of development of China's online education for higher education and forecast
5.2.1 overview of development of online education for higher education
(1) analysis of policy of online education for higher education
(2) scale of development of higher education industry
5.2.2 status quo of development of online education for higher education
(1) positioning of online education for higher education
(2) development situation of online education for higher education
(3) analysis of model of online education for higher education
5.2.3 problems of online education for higher education and advice
(1) problems of online education for higher education
(2) advice for online education for higher education
5.2.4 forecast of online education for higher education
5.3 analysis of development of sub-industries of China's online education for higher education
5.3.1 analysis of development of online education in regular institutions of higher learning
(1) analysis of scale of development of online education in regular institutions of higher learning
(2) status quo of implementation of online education in regular institutions of higher learning
5.3.2 analysis of development of online education in higher vocational education institutions
(1) application of online teaching in higher vocational education
(2) necessity of development of online education in higher vocational education institutions
(3) environmental of online education in higher vocational education institutions
Chapter 6: Status quo of development and trends of other subdivided markets of online education
6.1 status quo of development and trends of online education for children
6.1.1 status quo of development of online education for children
(1) category of education for children
(2) application of online education for children
6.1.2 development trends of online education for children
6.1.3 case study - Oladao online education for children
(1) to establish a platform for parents
(2) to create virtual network space for kids
6.2 status quo of development and trends of corporate E-learning

6.2.1 status quo of development of corporate E-learning
(1) use of corporate E-learning
(2) advantages of corporate E-learning
(3) analysis of industry chain of corporate E-learning
(4) status quo of corporate E-learning
(5) competition of E-learning industry

6.3.1 analysis of development of vocational and certification training
(1) overview of vocational and certification training
(2) business model of vocational and certification training
(3) characteristics of vocational and certification training market
(4) competition model of vocational and certification training
6.3.2 development trends of vocational and certification training
6.3.3 case study - CDEL and global world
Chapter 7: Analysis of China's major colleges and universities to carry out online education
7.1 overall development of colleges and universities to carry out online education
7.2 analysis of China's major colleges and universities to carry out online education
7.2.1 Online Education College of Northeast University of Finance
(1) introduction to online education institute
(2) teaching mode of online education
(3) enrollment level and profession of online education
(4) schooling and education background of online education
(5) course setting of online education
(6) online education fees
(7) online education management system
7.2.2 Online Education College of Peking University
(1) introduction to online education institute
(2) teaching mode of online education
(3) enrollment level and profession of online education
(4) schooling and education background of online education
(5) course setting of online education
(6) online education fees
(7) online education management system
7.2.3 Central Radio and Television University
(1) introduction to online education institute
(2) teaching mode of online education
(3) enrollment level and profession of online education
(4) schooling and education background of online education
(5) course setting of online education
(6) online education fees
(7) online education management system
7.2.4 Online Education College of Southwest University of Finance
(1) introduction to online education institute
(2) teaching mode of online education
(3) enrollment level and profession of online education
(4) schooling and education background of online education
(5) course setting of online education
(6) online education fees
(7) online education management system
7.2.5 Online Education College of East China Normal University
(1) introduction to online education institute
(2) teaching mode of online education
(3) enrollment level and profession of online education

(4) schooling and education background of online education
(5) course setting of online education
(6) online education fees
(7) online education management system
there are another 5 enterprises
Chapter 8: Analysis of operation of China's major online education enterprises
8.1 overall operation of online education enterprises
8.2 analysis of operation of major online education enterprises
8.2.1 China E-learning Group LTD.
(1) brief introduction of the company's development
(2) analysis of the company's operation
(3) analysis of the company's operation of online education
(4) analysis of the company's business strategy and development strategy
(5) analysis of advantages and disadvantages of the company's operation
