

China Lightning Protection Industry Report of Market Prospective and Investment Strategy Planning, 2013-2017

目 录

CONTENTS

Chapter 1: Analysis of development trend of China lightning protection industry

- 1.1 Defining the scope of the lightning protection industry
 - 1.1.1 definition
 - 1.1.2 governing body
 - 1.1.3 qualification level and scope of lightning protection design, construction units
- 1.2 Analysis of the thrust of the raw materials market on the lightning protection industry
 - 1.2.1 Analysis of market dynamics of the copper industry
 - (1) analysis of supply and demand balance of the copper industry
 - (2) analysis of the copper market price trend
 - 1.2.2 Analysis of market dynamics of the steel industry
 - (1) analysis of supply and demand balance of the steel industry
 - (2) analysis of the steel market price trend
 - 1.2.3 Analysis of market dynamics of the plastics industry
 - (1) analysis of supply and demand balance of the plastics industry
 - (2) analysis of the plastics market price trend Dynamic
 - 1.2.4 Analysis of market dynamics of the rubber industry
 - (1) analysis of supply and demand balance of the rubber industry
 - (2) analysis of the rubber market price trend
 - 1.2.5 Analysis of market dynamics of the electronic components industry
 - (1) analysis of supply and demand balance of the electronic components industry
 - (2) analysis of supply and demand balance of the electronic elements industry
 - 1.2.6 the impact of raw material on lightning protection industry
- 1.3 Analysis of development dynamics of China lightning protection industry
 - 1.3.1 market size analysis
 - (1) supply scale analysis
 - (2) demand size analysis
 - 1.3.2 growth analysis of lightning protection industry
 - 1.3.3 regional market distribution of lightning protection industry
 - 1.3.4 analysis of key sales areas of lightning protection industry
 - (1) the market situation in Northeast China
 - (2) the market situation in North China
 - (3) the market situation in Central China
 - (4) the market situation in East China
 - (5) the market situation in southern China

Chapter 2: Analysis of data monitoring of China lightning protection products manufacturing industry

- 2.1 overall data analysis of China lightning protection products manufacturing industry
 - 2.1.1 analysis of economic indicators
 - 2.1.2 analysis of data of enterprises of different sizes
 - (1) medium-sized enterprises
 - (2) small enterprises
 - (3) analysis of the proportion of major economic indicators in enterprises of different sizes
- 2.2 market structure analysis of lightning protection products manufacturing industry
 - 2.2.1 analysis of supply structure of national lightning protection manufacturing industry
 - (1) industry output analysis
 - (2) finished product analysis
 - 2.2.2 demand structure analysis
 - (1) sales output value analysis
 - (2) sales revenue analysis

2.2.3 market structure analysis of national lightning protection manufacturing industry

Chapter 3: dialysis of market operation situation of China lightning protection industry

3.1 structural analysis of market demand of lightning protection industry

3.2 needs analysis of lightning protection industry in the field of communication

3.2.1 market size

- (1) overview of the communication industry
- (2) main application features of lightning protection industry in the field of communication
- (3) market size

3.2.2 competition analysis of lightning protection industry in the field of communication

3.2.3 market outlook forecast for lightning protection industry in the field of communication in

2013-2017

3.3 needs analysis of lightning protection industry in the field of construction

3.3.1 market size

- (1) overview of the construction industry
- (2) main application features of lightning protection industry in the field of construction
- (3) market size

3.3.2 competition analysis of lightning protection industry in the field of construction

3.3.3 market outlook forecast for lightning protection industry in the field of construction in

2013-2017

3.4 needs analysis of lightning protection industry in the field of electricity

3.4.1 market size

- (1) overview of the electricity industry
- (2) main application features of lightning protection industry in the field of electricity
- (3) market size

3.4.2 competition analysis of lightning protection industry in the field of electricity

3.4.3 market outlook forecast for lightning protection industry in the field of electricity in

2013-2017

3.5 needs analysis of lightning protection industry in the field of railway

3.5.1 market size

- (1) overview of the railway industry
- (2) main application features of lightning protection industry in the field of railway
- (3) market size

3.5.2 competition analysis of lightning protection industry in the field of railway

3.5.3 market outlook forecast for lightning protection industry in the field of railway in 2013-

2017

3.6 needs analysis of lightning protection industry in the field of petrochemical

3.6.1 market size

- (1) overview of the petrochemical industry
- (2) main application features of lightning protection industry in the field of petrochemical
- (3) market size

3.6.2 competition analysis of lightning protection industry in the field of petrochemical

3.6.3 market outlook forecast for lightning protection industry in the field of petrochemical in

2013-2017

Chapter 4: Analysis of competition and competition strategy of China lightning protection industry

4.1 analysis of opportunities and threats of China lightning protection industry

4.1.1 opportunities

- (1) the gradual stabilization of the macroeconomic
- (2) to promote the rapid development of urbanization
- (3) policy support
- (4) 1. 2 threats
- (5) poor financing channels
- (6) the market structure to be further optimized
- (7) lack of social awareness products

4.2 analysis of concentration of China lightning protection industry

4.2.1 market concentration analysis

4.2.2 analysis of the distribution of industries and enterprises

4.3 analysis of five forces model of China lightning protection industry

4.3.1 competition in existing enterprises

- 4.3.2 the threat of potential entrants
- 4.3.3 bargaining power of suppliers
- 4.3.4 bargaining power of the downstream industry
- 4.3.5 alternatives threat
- 4.3.6 summary of attractiveness and profitability points of lightning protection industry

4.4 analysis of competition strategy of China lightning protection industry

Chapter 5: Analysis of forecast and investment strategies of China lightning protection industry

5.1 trends and forecast of China lightning protection industry

5.1.1 development trend analysis of China lightning protection industry

- (1) the market structure tends to concentrate
- (2) the industry is more diversified in downstream demand

5.1.2 forecast of China lightning protection industry in 2013-2017

5.2 analysis of investment strategy of China lightning protection industry

5.2.1 investment risk analysis

- (1) the risk of talent loss
- (2) product development risks
- (3) risk of raw material price volatility

5.2.2 investment opportunities

- (1) product investment opportunities
- (2) analysis of investment opportunities in the regions

5.2.3 investment strategy proposal

- (1) to do deep penetration in the market segments in their own advantages
- (2) to focus on cooperation in R & D with universities, research institutions
- (3) to build personnel training echelon
- (4) to build the industrial chain integration

Chapter 6: Selection and analysis of key enterprises in China lightning protection industry

6.1 selection criteria of key enterprises in China lightning protection industry

6.2 analysis of key enterprises of lightning protection products manufacturing industry

6.2.1 Guangdong Mingjia Technology Co., Ltd.

- (1) business profile
- (2) corporate positioning
- (3) the corporate organization
- (4) product structure
- (5) the level of the company's technology
- (6) the company's customer base
- (7) the company's operation
 - 1) main economic indicators
 - 2) operations capability
 - 3) profitability capability
 - 4) solvency capability
 - 5) development capability
