

China Automotive Electronics Industry Analysis Report of Depth Market Research & Investment Forecast, 2013– 2017

目 录

CONTENTS

Chapter 1: Summary of the development of China auto electronics industry

1.1 Overview of auto electronics

- 1.1.1 The definition of e auto electronics
- 1.1.2 Classification of automotive electronic products
- 1.1.3 Analysis of the automotive electronics industry chain
- 1.1.4 Analysis of the cost of automotive electronics
- 1.1.5 Analysis of automotive electronics industry's position

1.2 Analysis of development environment of China auto electronics industry,

- 1.2.1 Analysis of policy environment of China auto electronics industry
 - (1) analysis of main policies for the automotive electronics industry
 - (2) The development of automotive electronics products' standards
 - (3) envelopment plan for the automobile industry
- 1.2.2 Analysis of the economic environment of automotive electronics industry
 - (1) Analysis of the macroeconomic environment
 - (2) Analysis of the impact of macroeconomic environment on the industry
- 1.2.3 Analysis of the social environment of automotive electronics industry
 - (1) new energy vehicles to create opportunities for vehicle electronic control
 - (2) increasing consumer demand for electronic car
 - (3) demand for innovation pushing up the development of automotive electronics
- 1.2.4 Analysis of the technical environment of automotive electronics industry
 - (1) Analysis of technology development of automotive electronic control system platform
 - (2) Analysis of information system platform and network bus technology
 - (3) Analysis of the development of the underlying technology platform for the automotive electronics
 - (4) Analysis of independent development and application of China automotive electronics technology
 - (5) Analysis of patents of the automotive electronics industry

Chapter 2: Analysis of China auto industry development

2.1 Development of foreign car markets

- 2.1.1 Development of the Japanese auto market
 - (1) analysis of Japanese auto production scale
 - (2) analysis of the Japanese auto market's sales model and brand structure
 - (3) analysis of the export size of the Japanese auto market
 - (4) analysis of the Japanese auto market's export models and brand structure
- 2.1.2 Analysis of the Korean automotive market developments
 - (1) analysis of South Korea car ownership
 - (2) analysis of the Korean automotive market's production scale
 - (3) analysis of the Korean auto market's model structure
 - (4) analysis of South Korean automobile export scale
 - (5) analysis of the Korean auto market's export model structure
- 2.1.3 Development of the U.S. auto market
 - (1) analysis of U.S. auto production scale
 - (2) analysis of the U.S. auto market's model structure
- 2.1.4 Development of the European car market
- 2.1.5 Development of the Indian car market
 - (1) analysis of the size of the Indian car market production and marketing
 - (2) analysis of the Indian auto market's model structure

2.2 Overall performance of China automobile industry

- 2.2.1 overall situation China auto production and marketing

(1) analysis of auto production and marketing In January-June.....	2013
(2) analysis of auto production and marketing from 2005 to.....	2012
(3) analysis of rate of auto production and marketing from 2005 to.....	2012
1) analysis of the trend of the share in the world's automobile production and sales volume	
2.2.2 China auto imports and exports	
(1) analysis of China auto imports	
(2) analysis of China auto exports	
(3) regional analysis of China auto imports and exports	
(4) analysis of China auto trade competitiveness	
2.2.3 The overall operation of China automobile	
(1) analysis of operating effectiveness of the automotive industry	
(2) analysis of the automotive industry's profitability	
(3) analysis of the automotive industry's operational capability	
(4) analysis of the automotive industry's solvency	
(5) analysis of the automotive industry's development capacity	
2.3 Production and marketing situation of different auto models in China	
2.3.1 Production and marketing situation of passenger car	
(1) analysis of the overall production and marketing situation of passenger car	
(2) analysis of the share of passenger car production and trends	
(3) analysis of model structure of passenger car production	
(4) analysis of the overall production and marketing situation of the basic passenger cars	
(sedans)	
(5) analysis of the overall production and marketing situation of multi-passenger vehicles (MPV)	
(6) analysis of the overall production and marketing situation of passenger sport-utility (SUV)	
1) analysis of the overall production and marketing situation of cross-type passenger vehicles	
2.3.2 Production and marketing situation of Chinese commercial vehicles	
(1) analysis of the overall production and marketing situation of the overall commercial	
vehicles	
(2) analysis of the proportion of commercial vehicle in 2005-2012 in total production and trend	
(3) analysis of model structure of commercial car	
(4) analysis of the overall production and marketing situation of buses	
1) analysis of the overall production and marketing situation of trucks	
2.4 The overall production and marketing situation of key Chinese auto companies	
2.4.1 top ten companies in car sales	
2.4.2 top ten enterprises in passenger car sales	
2.4.3 top ten enterprises commercial car sales	
2.5 Forecast trends of China automotive industry	
2.5.1 China auto consumption will enter a period of popularity	
2.5.2 demand focus for automobiles will extend to the second, third-tier regions	
2.5.3 automobile market will generate new demand structure changes	
Chapter 3: Development of China auto electronics industry	
3.1 Analysis of global automotive electronics market development	
3.1.1 overview of the global automotive electronics market	
3.1.2 the developments of global automotive electronics market	
(1) global automotive electronics market	
(2) overview of the global automotive electronic information market	
(3) overview of the global automotive electronic systems	
3.1.3 Characteristics of the global automotive electronics market	
(1) characteristics of regional markets of global automotive electronics	
(2) characteristics of structure of the global automotive electronic products	
3.2 Analysis of China auto electronics industry market	
3.2.1 analysis of China auto electronics market	
3.2.2 characteristics of China auto electronics market	
3.2.3 the developments of the construction of the automotive electronics industry bases	
3.3 Analysis of development strategies of China auto electronics industry	
3.3.1 issues facing the development of China's auto electronics market	
(1) issues facing the development of the automotive electronics industry	
(2) constraints influencing the development of automotive electronics market	
3.3.2 analysis of development strategy of China auto electronics market	

- (1) analysis of development measures for the automotive electronics market
- (2) suggestions for key areas of automotive electronics innovation
- 3.3.3 Reference of strategy of Taiwan's automotive electronics business supply chain
 - (1) analysis of operation of "initiative diversity" mode
 - (2) analysis of operation of "passive diversification" mode
 - (3) analysis of operation of "deepening original field" mode
 - (4) analysis of operation of the "new market operation" mode

Chapter 4: analysis of China auto electronics industry market

4.1 Application structure of automotive electronics

4.2 market analysis of automotive semiconductors and electronic components

- 4.2.1 market analysis of the automotive semiconductor
 - (1) analysis of global automotive semiconductor market
 - (2) analysis of Chinese automotive semiconductor market
- 4.2.2 analysis of the development of basic automotive electronic components
 - (1) analysis of automotive sensor market demand
 - (2) analysis of car controller market demand
 - (3) analysis of automotive relay market demand
 - (4) analysis of car actuator market demand
 - (5) analysis of PCB high-end applications in automotive electronics

4.3 Market analysis of automotive electronic control devices

- 4.3.1 Overview of development of automotive electronic control devices
 - (1) the current development of automotive electronic control systems
 - (2) analysis of small car engine electronic control system
- 4.3.2 market analysis of power transmission electronic control devices
 - (1) analysis of the development of independent brand engine
 - (2) analysis of the automatic transmission market demand
 - (3) analysis of power transmission innovation
 - 1) automotive engine development trend analysis
 - (4) micro motor has much to offer in the field of automotive electronics
- 4.3.3 Market analysis of electronic control devices for automotive chassis systems
 - (1) the development of automotive technology ABB
 - (2) ESP becomes a new trend in car safety
- 4.3.4 Market analysis of electronic control devices for body systems
 - (1) body electronics upgrade to semiconductor expansion
 - (2) analysis of development trend of car body control
 - (3) automotive airbag technology and development trends
- 4.3.5 Application and development trend of automotive electronic control technology
 - (1) compositions of automotive electronic control system
 - (2) application of automotive electronic control technology
 - (3) the development trend of automotive electronic technology applications

4.4 Analysis of automotive electronics market

- 4.4.1 market analysis of car navigation systems
 - (1) the development status of China car navigation industry
 - (2) analysis of GPS navigation market's opportunities
 - (3) analysis of GPS navigation market's competition
 - (4) GPS navigation market trends
- 4.4.2 Market analysis of automotive entertainment systems
 - (1) analysis of Car TV market development
 - (2) analysis of car audio market
 - (3) analysis of automotive infotainment market
 - (4) analysis of car DVD market
 - (5) analysis of the development of Car MP3 Players
 - (6) analysis of the development of car FM transmitters
- 4.4.3 Market analysis of automotive information systems
 - (1) analysis of the development status of in-vehicle information systems
 - (2) market trends of vehicle information systems
 - (3) analysis of Telemetric industry market
 - (4) analysis of interior automotive electronics information systems
 - (5) market prospects for wireless vehicle communication

(6) development direction of intelligent transportation vehicle information systems

Chapter 5: Analysis of China auto electronics industry in key areas

5.1 regional distribution of automotive electronics industry

5.2 analysis of development of the automotive electronics industry in Shenzhen

- 5.2.1 analysis of car ownership and growth in Shenzhen
- 5.2.2 overview of automotive electronics industry in Shenzhen
- 5.2.3 analysis of major automotive electronics enterprises in Shenzhen
- 5.2.4 advantages of development of automotive electronics in Shenzhen
- 5.2.5 development outlook for automotive electronics in Shenzhen

5.3 analysis of development of the automotive electronics industry in Shanghai

- 5.3.1 analysis of car ownership and growth in Shanghai
- 5.3.2 overview of automotive electronics industry in Shanghai
- 5.3.3 analysis of major automotive electronics enterprises in Shanghai
- 5.3.4 advantages of development of automotive electronics in Shanghai
- 5.3.5 development outlook for automotive electronics in Shanghai

5.4 analysis of development of the automotive electronics industry in Beijing

- 5.4.1 analysis of car ownership and growth in Beijing
- 5.4.2 overview of automotive electronics industry in Beijing
- 5.4.3 analysis of major automotive electronics enterprises in Beijing
- 5.4.4 advantages of development of automotive electronics in Beijing
- 5.4.5 development outlook for automotive electronics in Beijing

5.5 analysis of development of the automotive electronics industry in Tianjing

- 5.5.1 analysis of car ownership and growth in Tianjing
- 5.5.2 overview of automotive electronics industry in Tianjing
- 5.5.3 analysis of major automotive electronics enterprises in Tianjing
- 5.5.4 advantages of development of automotive electronics in Tianjing
- 5.5.5 development outlook for automotive electronics in Tianjing

5.6 analysis of development of the automotive electronics industry in Nanjing

- 5.6.1 overview of development of automotive electronics in Nanjing
- 5.6.2 analysis of major automotive electronics enterprises in Nanjing
- 5.6.3 advantages of development of automotive electronics in Nanjing
- 5.6.4 development outlook for automotive electronics in Nanjing

5.7 analysis of development of the automotive electronics industry in Wuhan

- 5.7.1 analysis of car ownership and growth in Wuhan
- 5.7.2 overview of automotive electronics industry in Wuhan
- 5.7.3 analysis of major automotive electronics enterprises in Wuhan
- 5.7.4 advantages of development of automotive electronics in Wuhan
- 5.7.5 development outlook for automotive electronics in Wuhan

5.8 analysis of development of the automotive electronics industry in Hangzhou

- 5.8.1 analysis of car ownership and growth in Hangzhou
- 5.8.2 overview of automotive electronics industry in Hangzhou
- 5.8.3 analysis of major automotive electronics enterprises in Hangzhou
- 5.8.4 advantages of development of automotive electronics in Hangzhou
- 5.8.5 development outlook for automotive electronics in Hangzhou

5.9 analysis of development of the automotive electronics industry in Changchun

- 5.9.1 analysis of car ownership and growth in Changchun
- 5.9.2 overview of automotive electronics industry in Changchun
- 5.9.3 analysis of major automotive electronics enterprises in Changchun
- 5.9.4 advantages of development of automotive electronics in Changchun
- 5.9.5 the latest developments of automotive electronics in Changchun
- 5.9.6 development outlook for automotive electronics in Changchun

5.10 analysis of development of the automotive electronics industry in Foshan

- 5.10.1 overview of automotive electronics industry in Foshan
- 5.10.2 analysis of major automotive electronics enterprises in Foshan
- 5.10.3 advantages of development of automotive electronics in Foshan
- 5.10.4 development outlook for automotive electronics in Foshan

5.11 analysis of development of the automotive electronics industry in Wuhu

- 5.11.1 overview of automotive electronics industry in Wuhu
- 5.11.2 analysis of major automotive electronics enterprises in Wuhu

5.11.3 advantages of development of automotive electronics in Wuhu

5.11.4 the latest developments of automotive electronics in Wuhu

5.11.5 development outlook for automotive electronics in Wuhu

5.12 analysis of development of the automotive electronics industry in Shiyan

5.12.1 overview of automotive electronics industry in Shiyan

5.12.2 analysis of major automotive electronics industrial clusters in Shiyan

5.12.3 advantages of development of automotive electronics in Shiyan
