

# China Animal Vaccine Industry Report (2016-2021), In-depth Research and Investment Strategy Planning

## 目 录

### CONTENTS

#### Chapter 1: Review of development of China animal vaccine industry

- 1.1 overview of research methods of the industry
  - 1.1.1 research methods of the industry
  - 1.1.2 data source of the industry
- 1.2 research definition of animal vaccine industry
  - 1.2.1 definition of animal vaccine industry
  - 1.2.2 classification of animal vaccine products
- 1.3 characteristics of the animal vaccine industry
  - 1.3.1 cyclical property of animal vaccine industry
  - 1.3.2 regional property of animal vaccine industry
  - 1.3.3 seasonal property of animal vaccine industry
- 1.4 analysis of animal vaccine industry chain
  - 1.4.1 introduction of animal vaccine industry chain
    - (1) introduction of animal vaccine industry chain
    - (2) association with the upstream industry
    - (3) association with the downstream industry
  - 1.4.2 analysis of the upstream of animal vaccines industry
    - (1) development of growth medium industry
    - (2) development of chemical reagent industry

#### Chapter 2: Analysis of market environment of Chinese animal vaccine

- 2.1 analysis of policy environment of animal vaccine industry
  - 2.1.1 departments in charge of animal vaccine industry
  - 2.1.2 regulatory system of animal vaccine industry
  - 2.1.3 related policies of animal vaccine industry
    - (1) summary of the main policies
    - (2) adjustment of product structure
    - (3) pharmacopoeia products
    - (4) quality standards to enhance
  - 2.1.4 major planning of animal vaccine industry
    - (1) "Long-term animal epidemic prevention plan ( 2012-2020 ) "
    - (2) "Long-term Science and Technology Development Plan ( 2006-2020 ) "
    - (3) " Agricultural science and technology development of " Twelfth Five-Year Plan " ( 2011-2015 ) ."
    - (4) "Opinions on accelerating the continued strengthening of agricultural science and technology innovation to ensure adequate supply of agricultural products."
- 2.2 analysis of economic environment of the animal vaccine industry
  - 2.2.1 analysis of GDP growth
    - (1) GDP growth
    - (2) analysis of correlation between GDP and industry
    - (3) proportion of veterinary industry in GDP
  - 2.2.2 analysis of livestock output growth
    - (1) livestock output growth
    - (2) analysis of correlation between animal husbandry and the industry
- 2.3 analysis of social environment of animal vaccine industry
  - 2.3.1 the impact of " National Animal Disease Compulsory Immunization Program in 2013 " on the industry
  - 2.3.2 the impact of major animal epidemic prevention and control in the border areas on animal vaccine market

#### Chapter 3: Analysis of current development of animal vaccine industry

### 3.1 overview of development of animal vaccine industry

- 3.1.1 construction of animal epidemic prevention system
- 3.1.2 development course of animal vaccine industry
- 3.1.3 status quo of development of animal vaccine products
- 3.1.4 factors of the animal vaccine market demand

### 3.2 analysis of development of veterinary biological products

#### 3.2.1 drug approval number of veterinary biological products

- (1) by product category
  - 1) the quantity of statistical approval number
  - 2) analysis of utilization of approval number
- (2) by the use of animals
  - 1) the quantity of statistical approval number
  - 2) analysis of utilization of approval number

#### 3.2.2 market scale of veterinary biologics

- (1) by product category
  - 1) the growth of the market scale
  - 1. analysis of structure of product types
- (2) by the use of animals
  - 1) the growth of the market scale
  - 1. analysis of structure of product types

#### 3.2.3 competition of veterinary biologics market

- (1) by product category
- (2) by the use of animals

### 3.3 analysis of development of animal vaccine industry

#### 3.3.1 analysis of scale of animal vaccine market

- (1) scale of international animal market
- (2) scale of domestic animal vaccine market

#### 3.3.2 analysis of structure of animal vaccine products

#### 3.3.3 profitability of animal vaccine market

- (1) profit margins of large -scale enterprises are higher than small -scale enterprises
- (2) profit margins of national compulsory veterinary vaccines are higher than other veterinary

vaccines

#### 3.3.4 regional distribution of animal vaccine market

- (1) capacity transfer path
- (2) regional distribution of production capacity
- (3) provinces and distribution capacity

### 3.4 analysis of status quo of animal vaccine technology

#### 3.4.1 R & D level of veterinary biological products

#### 3.4.2 R & D regulation of veterinary biological products

#### 3.4.3 technical level of veterinary biologics enterprises

### 3.5 analysis of status quo of animal vaccine R & D

#### 3.5.1 R & D capabilities of animal vaccine industry

- (1) R & D department
- (2) R & D investment
- (3) R & D personnel

#### 3.5.2 R & D methods of animal vaccine industry

#### 3.5.3 R & D results of animal vaccine industry

#### 3.5.4 development trends of animal vaccine industry

- (1) development trends of conventional vaccine
- (2) development trends of new genetically engineered vaccines

### 3.6 analysis of competition of animal vaccine market

#### 3.6.1 comparison of yield of animal vaccine companies

- (1) yield of CAHIC
- (2) yield of Tiankang Biological Company
- (3) yield of Jinyu Group

#### 3.6.2 comparison of sales outcome of animal vaccine companies

- (1) sales outcome of CAHIC
- (2) sales outcome of Jinyu Group

#### 3.6.3 comparison of production lines of animal vaccine companies

- (1) production lines of CAHIC
- (2) production lines of Tiankang Biological Company
- 3.6.4 comparison of R&D strength of animal vaccine companies
  - (1) comparison of R & D investment of various companies
  - (2) comparison of suspension culture technology of various companies
- 3.6.5 competition patterns of animal vaccine industry
  - (1) competition of enterprises of different scales
  - (2) competition of leading listed companies
  - (3) competition of mandatory vaccines

## Chapter 4: Analysis of market of subdivided products of animal vaccine

### 4.1 structure of animal vaccine products

- 4.1.1 classified by category of prevention
- 4.1.2 classified by development technologies
- 4.1.3 classified by use on animals

### 4.2 analysis of market of single vaccine

- 4.2.1 overview of market of single vaccine
- 4.2.2 approval number of single vaccine
  - (1) quantity of approval number of single vaccine
  - (2) utilization rate of approval number of single vaccine
- 4.2.3 market scale of single vaccine
- 4.2.4 application areas of single vaccine
- 4.2.5 forecast of single vaccine

### 4.3 analysis of market of polyvalent vaccine

- 4.3.1 overview of market of polyvalent vaccine
- 4.3.2 approval number of polyvalent vaccine
  - (1) quantity of approval number of polyvalent vaccine
  - (2) utilization rate of approval number of polyvalent vaccine
- 4.3.3 market scale of polyvalent vaccine
- 4.3.4 application areas of polyvalent vaccine
- 4.3.5 forecast of polyvalent vaccine

### 4.4 analysis of market of live vaccine

- 4.4.1 market scale of live vaccine
- 4.4.2 structure of live vaccine
- 4.4.3 application areas of live vaccine
- 4.4.4 analysis of the main products of live vaccines
  - (1) analysis of market of organization toxic vaccine
  - (2) analysis of market of cytotoxic live vaccine
  - (3) analysis of market of bacterial vaccine
- 4.4.5 forecast of market of live vaccine

### 4.5 analysis of market of inactivated vaccine

- 4.5.1 market scale of inactivated vaccine
- 4.5.2 structure of inactivated vaccine
- 4.5.3 application areas of inactivated vaccine
- 4.5.4 analysis of the main products of inactivated vaccine
  - (1) analysis of market of organization toxic vaccine
  - (2) analysis of market of cytotoxic inactivated vaccine
  - (3) analysis of market of bacterial vaccine market
- 4.5.5 forecast of market of inactivated vaccine

### 4.6 analysis of market of genetically engineered vaccine

- 4.6.1 market scale of genetically engineered vaccine
- 4.6.2 application areas of genetically engineered vaccine
- 4.6.3 forecast of market of genetically engineered vaccine

### 4.7 analysis of market of other animal vaccines

- 4.7.1 analysis of market of bird flu vaccine
- 4.7.2 analysis of market of FMD vaccine
- 4.7.3 analysis of market of PRRS vaccine

## Chapter 5: Analysis of downstream demand of animal vaccine industry

### 5.1 analysis of demand of poultry industry

- 5.1.1 overview of development of poultry industry

- (1) analysis of production and sales of poultry industry
- (2) forecast of poultry industry
- 5.1.2 analysis of incidence of diseases in poultry
- 5.1.3 analysis of status quo of demand of poultry vaccine
  - (1) market scale of poultry biologics
  - (2) analysis of market scale of poultry vaccine
  - (3) major producers of poultry vaccines
  - (4) analysis of subdivided products of poultry vaccine
- 5.1.4 forecast of market of poultry vaccine
- 5.2 analysis of demand of pig industry**
  - 5.2.1 overview of development of pig industry
    - (1) analysis of production and sales of pig industry
      - 1) analysis of yield
      - 2) analysis of demand
