

China Re-manufacturing Industry Development Prospect and Investment Forecast Report

目 录

CONTENTS

Chapter 1: Overview of Re-manufacturing Industry

1.1 Definition of Re-manufacturing Industry

- 1.1.1 Basic Connotation of Re-manufacturing
- 1.1.2 Difference between Re-manufacturing and Maintenance
- 1.1.3 Position of Re-manufacturing in Product's Whole Life Cycle

1.2 Features of Re-manufacturing

- 1.2.1 Physical Property
- 1.2.2 Features of Production Model
- 1.2.3 Development Thresholds for Industry
 - (1) Technical Threshold
 - (2) Industrialization Threshold
 - (3) Conditions for Subject of Re-manufacturing

1.3 Urgency and Necessity for developing Re-manufacturing Industry

- 1.3.1 Analysis of Benefits of Re-manufacturing Industry
 - (1) Economic Benefit
 - (2) Social Benefit
 - (3) Resource and Environment Benefit
- 1.3.2 Urgency and Necessity for developing Re-manufacturing Industry
 - (1) Objective Requirement for Constructing A Resource-conserving and Environment-friendly

Environment

- (2) Inevitable Requirement for Adapting to A World of Gradually Scarce Resources
- (3) Effective Solution to Promoting the Development of Manufacturing Industry and Modern Service

Industry

Chapter 2: Analysis of Development Environment for China Re-manufacturing Industry

2.1 Analysis of Policy Environment for Industry

2.1.1 Explanation for Released Policies

- (1) History of Industry Policy
- (2) Explanation for Key Policies
 - 1) Several Opinions of the State Council on Speeding up the Development of Circular Economy
 - 2) Circular Economy Promotion Law of the People's Republic of China
 - 3) Opinions on Promoting Development of the Remanufacturing Industry
 - 4) Interim Measures for Identifying and Managing Re-manufactured Products
 - 5) Implementation Guideline for Identifying Re-manufactured Products
 - 6) Re-manufactured Product Catalog (First Batch)
 - 7) Re-manufactured Product Catalog (Second Batch)
 - 8) Support from Twelfth Five-year Planning Outline on Re-manufacturing Industry
 - 9) Support from Industrial Transformation and Upgrading Plan (2011-2015) on Re-manufacturing

Industry

- 10) Notice on Deepening Re-manufacturing Demonstration Pilot Work

2.1.2 Upcoming Released Policies and Standards

- (1) Development Plan for Re-manufacturing Industry
- (2) Development Plan for Energy Saving and Environmental Protection Industry
- (3) "Twelfth Five-year" Special Plan for Energy Saving and Environmental Equipment
- (4) Standards Related to Re-manufacturing Industry

2.1.3 Trend Anticipation for Future Policies in the Industry

2.2 Analysis of Economic Environment for Industry

2.2.1 International Economic Status and Trend

- (1) Status of International Economic Situation
- (2) Forecast for International Economic Situation

- 2.2.2 Domestic Economic Status and Trend
 - (1) Status of Domestic Economic Situation
 - (2) Forecast for Domestic Economic Situation
- 2.2.3 Equipment Manufacturing Status and Trend
- 2.3 Analysis of Social Trend for Industry**
 - 2.3.1 China Energy Environment Status
 - 2.3.2 Goal for China Energy Saving and Consumption Reduction
 - 2.3.3 National Policy Promotes the Development of Circular Economy
- 2.4 Analysis of Technology Environment for Industry**
 - 2.4.1 Basic Method for Re-manufacturing
 - 2.4.2 Key Technology and Equipment of Re-manufacturing
 - (1) Key Technology for Re-manufacturing
 - (2) Key Equipment and System for Re-manufacturing
 - 2.4.3 China Re-manufacturing Technology Level
 - 2.4.4 Development Trend for Re-manufacturing Technology
- 2.5 Analysis of Logistics Environment for Industry**
 - 2.5.1 Overview of Re-manufacturing Reverse Logistics
 - (1) Connotation of Re-manufacturing Reverse Logistics
 - (2) Features of Re-manufacturing Reverse Logistics
 - 2.5.2 Major Links in Re-manufacturing Reverse Logistics
 - (1) Recycling of Waste Material Product
 - (2) Initially Classify and Store
 - (3) Package and Transportation
 - (4) Re-manufacturing Process
 - (5) Sales and Service of Re-manufactured Product
 - 2.5.3 Development of Re-manufacturing Reverse Logistics
 - 2.5.4 Strategy for Improving the Level of Re-manufacturing Reverse Logistics

Chapter 3: Analysis of Development Status and Trend of China Re-manufacturing Industry

- 3.1 Analysis of Development of Foreign Re-manufacturing Industry**
 - 3.1.1 System for Foreign Re-manufacturing Industry
 - 3.1.2 Foreign Re-manufacturing Industry Status
 - (1) Re-manufacturing Industry in US
 - (2) Re-manufacturing Industry in Japan
 - (3) Re-manufacturing Industry in Europe
 - 3.1.3 Development Experience of Foreign Re-manufacturing Industry
- 3.2 Development Status of China Re-manufacturing Industry**
 - 3.2.1 Development History of Industry
 - 3.2.2 Development Stage of Industry
 - 3.2.3 Pilot Project of Industry
 - 3.2.4 Key Development Field
 - 3.2.5 Gap between China and Advanced Countries
- 3.3 Analysis of Cluster Region for China Re-manufacturing Industry**
 - 3.3.1 Re-manufacturing Industry Base in Liuyang, Hunan Province
 - (1) Development Advantage of Industry
 - (2) Supporting Policy for Industry
 - (3) Development Status of Base
 - (4) Construction Goal for Base
 - 3.3.2 Chongqing Jiulong Industrial Park
 - 3.3.3 Industry Aggregation - A Trend for China Re-manufacturing Industry
- 3.4 Sino-Foreign Cooperation for Re-manufacturing Industry**
 - 3.4.1 Sino-Foreign Cooperation for Research and Development
 - 3.4.2 Sino-Foreign Cooperation for Communication Platform
 - 3.4.3 Sino-Foreign Cooperation for Technology
 - 3.4.4 Sino-Foreign Cooperation for Academy
- 3.5 Analysis of Development Trend for China Re-manufacturing Industry**
 - 3.5.1 Science Foundation for Discussing Re-manufacturing
 - 3.5.2 Key Technology for Innovation of Re-manufacturing
 - 3.5.3 Formulate Standards for Re-manufacturing Industry

Chapter 4: Development Status and Prospects Forecast of China Auto Re-manufacturing

Industry

4.1 Overview of Auto Re-manufacturing

- 4.1.1 Connotation of Auto Re-manufacturing
- 4.1.2 Scope of Auto Re-manufacturing
- 4.1.3 Benefit of Auto Re-manufacturing

4.2 Status of China Auto Re-manufacturing Industry

- 4.2.1 Development Status of Auto Industry
 - (1) Auto Production and Marketing Volume
 - (2) Car Ownership
 - (3) Number of ELV
- 4.2.2 Policies and Standards for Auto Re-manufacturing
 - (1) ELV Recovery and Management Measure
 - (2) Policy for the Recovery and Utilization of Automobile Products
 - (3) Notice on Organizing and Conducting Re-manufacturing Demonstration Pilot Work of Auto

Component

- (4) Administration Measures for Auto Component Remanufacturing Demonstration Pilot
- (5) Notice on Starting to Use the Mark of Remanufactured Auto Part and Component Products and

Strengthening the Administration and Protection of the Mark

- (6) Administration Regulation for Recovering and Disassembling End-Life Vehicle (Exposure Draft)
- (7) Establishment of Auto Component Re-manufacturing Sub-branch Affiliated with China

Association of Automobile Manufacturers

- (8) Opinion on Establishing A Complete and Advanced Waste Goods Recovery System
- (9) Technical Standards Related to Auto Re-manufacturing

4.2.3 Auto Re-manufacturing Industry Status

- (1) Development History of Industry
- (2) Auto Re-manufacturing Capacity
- (3) Size of Auto Re-manufacturing Industry
- (4) Re-manufacturing Demonstration Pilot Enterprise

4.2.4 Re-manufacturing Status of Major Components

- (1) Engine Re-manufacturing
- (2) Transmission Re-manufacturing
- (3) Generator Re-manufacturing
- (4) Starter Re-manufacturing
- (5) Redirector Re-manufacturing

4.3 Analysis of China Auto Re-manufacturing Technology Progress

- 4.3.1 Key Technologies for Auto Re-manufacturing
 - (1) Nano Electro-Brush Plating Technology
 - (2) High Velocity Arc Spraying Technology
 - (3) Nano Dry Film Lubricant Technology
 - (4) Other Technologies
- 4.3.2 Tendency for Auto Re-manufacturing Technology
- 4.3.3 Trend for Auto Re-manufacturing Technology
 - (1) Carry out Research on Design Technology of Re-manufactured Product
 - (2) Carry out Research on Re-manufacturing Production and Management Technology
 - (3) Carry out Research on Re-manufacturing Processing & Testing Technology and Outfit of Key

Components

4.4 Analysis of Development of ELV Reverse Logistics in China

- 4.4.1 Recovery and Utilization of ELV in China
- 4.4.2 Features of ELV Reserve Logistics in Foreign Countries
 - (1) Features of ELV Reserve Logistics in US
 - (2) Features of ELV Reserve Logistics in Japan
 - (3) Features of ELV Reserve Logistics in Germany
- 4.4.3 ELV Reverse Logistics Status in China
 - (1) ELV Reverse Logistics Status in China
 - (2) Contrast between China and Foreign ELV Reverse Logistics
- 4.4.4 Strategy for China Developing ELV Reverse Logistics
 - (1) Experiential Learning from Development of Foreign Re-manufacturing Logistics for China
 - (2) Strategy for China Developing ELV Reverse Logistics

4.5 Discussion on Development Model for China Auto Re-manufacturing Industry

- 4.5.1 Development Status of Foreign Auto Re-manufacturing Industry
- 4.5.2 Development Experience of Foreign Auto Re-manufacturing Industry
 - (1) Promote the Development of Industry According to Law
 - (2) Effective Policy Mechanism
 - (3) Total Employee Involvement
- 4.5.3 Discussion on Development Model for China Auto Re-manufacturing Industry
 - (1) “Five Elements” for United Development Model
 - (2) Development Model for Auto Industry Eco-park
 - (3) Auto Promotion Development Model
- 4.5.4 Strategy for China Promoting the Development of Auto Re-manufacturing Industry
 - (1) Implementation Steps for Developing Industry
 - (2) Specific Strategy for Promoting the Development of Industry
- 4.6 Prospects Forecast for Developing China Auto Re-manufacturing Industry**
 - 4.6.1 Driving Factors of Auto Re-manufacturing Industry
 - (1) Re-manufacturing – A Development Direction for Auto Industry
 - (2) Considerable ELV Volume in China
 - (3) A large Sum of Auto Parts Demand
 - (4) Sino-Foreign Gap Indicates Huge Growth Potentials
 - 4.6.2 Restraints of Auto Re-manufacturing Industry
 - (1) Consumption Concept Barrier
 - (2) Not High Enough Technology Level
 - (3) Imperfect Policy
 - (4) Difficulty in Gaining Raw Material
 - 4.6.3 Size Forecast for Auto Re-manufacturing Industry

Chapter 5: Development Status and Prospects Forecast of China Engineering Machinery Re-manufacturing Industry

- 5.1 Overview of Engineering Machinery Re-manufacturing**
 - 5.1.1 Connotation of Engineering Machinery Re-manufacturing
 - 5.1.2 Scope of Engineering Machinery Re-manufacturing
- 5.2 Experiential Learning from Foreign Engineering Machinery Re-manufacturing**
 - 5.2.1 Overview of Foreign Engineering Machinery Re-manufacturing Industry
 - 5.2.2 Re-manufacturing Experiential Learning from Caterpillar in US
 - (1) Profile of Caterpillar Inc.
 - (2) Caterpillar Re-manufacturing Business Status
 - 1) Business around the World
 - 2) Business in China
 - (3) Business Model of Caterpillar’ s Re-manufacturing
 - (4) Development Experience from Caterpillar’ s Re-manufacturing Business
- 5.3 Feasibility Analysis of China Engineering Machinery Re-manufacturing**
 - 5.3.1 Analysis of External Environment for Industry Development
 - (1) Development of Engineering Machinery Industry
 - 1) Market Size
 - 2) Production and Marketing Volume of Product
 - 3) Product Ownership
 - (2) Engineering Machinery Shifts to Low-carbon Economy
 - (3) Policy Supports Engineering Machinery Re-manufacturing
 - 5.3.2 Necessity Analysis of Engineering Machinery Re-manufacturing
 - 5.3.3 Feasibility Analysis of Engineering Machinery Re-manufacturing
 - (1) Feasibility Analysis of Technology
 - (2) Feasibility Analysis of Market
 - (3) Re-manufacturing Economic Benefit
- 5.4 Case Study of Engineering Machinery Re-manufacturing Enterprises in China**
 - 5.4.1 Tendency for Engineering Machinery Re-manufacturing Enterprise
 - 5.4.2 Three Types of Engineering Machinery Re-manufacturing Enterprises
 - (1) Establish Professional Re-manufacturing Company
 - (2) Mixed-line Re-manufacturing Company
 - (3) Overhaul Maintenance Factory
 - 5.4.3 Engineering Machinery Re-manufacturing Strength for Leading Enterprises
 - (1) Xuzhou Heavy Machinery Co., Ltd.

- (2) Sevalo Construction Machinery Group Co., Ltd.
- (3) LiuGong Machinery Co., Ltd.
- (4) Hunan Sany Engineering Machinery Re-manufacturing Company
- 1) Development Opportunities and Threats of China Engineering Machinery Re-manufacturing

Industry

- 5.4.4 Development Opportunities for Engineering Machinery Re-manufacturing Industry
 - (1) Engineering Machinery Industry Ushers into "Golden Age"
 - (2) Supply and Demand of Diversified Market Generates Re-manufacturing
 - (3) 80% Engineering Machinery Reach Time to Overall Maintenance
- 5.4.5 Threats Confronted by Engineering Machinery Re-manufacturing Industry
 - (1) Imperfect Supporting Policy for Industry
 - (2) Re-manufacturing Technology Capability Is Urgent to Be Industrialization
 - (3) Narrow Raw Material Source Channel Restrains the Development of Industry
- 5.4.6 Suggestions for Developing Engineering Machinery Re-manufacturing Industry

Chapter 6: Development Status and Prospects Forecast of China Engineering Machinery Re-manufacturing Industry

6.1 Overview of Machine Tool Re-manufacturing

- 6.1.1 Connotation of Machine Tool Re-manufacturing
- 6.1.2 Scope of Machine Tool Re-manufacturing
- 6.1.3 Features of Machine Tool Re-manufacturing
- 6.1.4 Benefit of Machine Tool Re-manufacturing

6.2 Foreign Machine Tool Re-manufacturing Status

6.3 China Machine Tool Re-manufacturing Status

- 6.3.1 Development Status of Machine Tool Industry
 - (1) Output Volume of Machine Tool
 - (2) Numerical Control Rate of Machine Tool
 - (3) Machine Tool Ownership
- 6.3.2 Policies Related to Machine Tool Re-manufacturing
- 6.3.3 Machine Tool Re-manufacturing Industry Status
 - (1) Development History of Machine Tool Re-manufacturing
 - (2) Size of Machine Tool Re-manufacturing Industry
 - (3) Technical Level of Machine Tool Re-manufacturing
 - (4) Application of Re-manufactured Machine Tool
- 6.3.4 Development Model for Machine Tool Re-manufacturing in China
 - (1) Model of Ordered Service Model for Re-manufacturer and User
 - (2) Model of Recycling Used Machine Tool for Re-manufacturing
 - (3) Machine Tool Replacement Model

6.4 Three Subjects and Case Study of Machine Tool Re-manufacturing

- 6.4.1 Machine Tool Maintenance and Reconstruction Enterprises
 - (1) Major Enterprises
 - (2) Major Features
 - (3) Case Study
 - 1) Wuhan Huazhong Automatic Control Co., Ltd.
 - 2) Beijing San lantop Numerical Control Technology Co., Ltd.
 - 3) Beijing Catch-Innovation Mechanical & Electrical Equipment Co., Ltd.
 - 4) Wuhan Stm Electronic & Mechanical Technology Development Co., Ltd.
- 6.4.2 Machine Tool Manufacturers
 - (1) Major Enterprises
 - (2) Major Features
 - (3) Case Study
 - 1) Chongqing Machine Tool Group Co., Ltd.
 - 2) Wuhan Heavy Machine Tools Group Co., Ltd.
 - 3) Tianjin No.1 Machine Tool Works
- 6.4.3 Numerical Control System Manufacturers
