

China Enterprise Institute Report of Construction mode and Research technical market demand, 2016-2021

目 录

CONTENTS

Chapter 1: Summary of construction of enterprise institute

1.1 definition of enterprise institute

- 1.1.1 definition
- 1.1.2 development history
- 1.1.3 functions
- 1.1.4 positioning
 - (1) strategic positioning
 - (2) task orientation

1.2 Necessity of construction of enterprise institute

- 1.2.1 to ensure implementation of enterprise development strategy
- 1.2.2 to centralize resources for technological breakthroughs
- 1.2.3 to avoid duplication of research within the company

1.3 Analysis of development status of construction of enterprise institute

- 1.3.1 development status of construction of enterprise institute of foreign companies
 - (1) the development status
 - (2) the quantity
 - (3) R & D investment
- 1.3.2 development status of construction of enterprise institute of domestic companies
 - (1) the development status
 - (2) the quantity
 - (3) R & D investment
 - (4) the limitations

Chapter 2: Analysis of establishment mode of enterprise institute

2.1 Analysis of the existing upgrade mode of enterprise institute

- 2.1.1 suitable for types of business organizations
- 2.1.2 advantages and disadvantages
- 2.1.3 analysis of relevant cases
 - (1) Intel China Research Institute has more power of independent research and development
 - (2) Intel China Research Institute connects closer with the market
 - (3) R & D funding of Intel China Research Institute will increase

2.2 Analysis of the existing integrated model of research institutes

- 2.2.1 suitable for types of business organizations
- 2.2.2 advantages and disadvantages
- 2.2.3 analysis of relevant cases
 - (1) development significance of Board Strip Institute of Tianjin Metallurgy Group
 - (2) mission objectives of Board Strip Institute of Tianjin Metallurgy Group
 - (3) development strategy of Board Strip Institute of Tianjin Metallurgy Group

2.3 Analysis of the new mode of research institutes

- 2.3.1 suitable for types of business organizations
- 2.3.2 advantages of the new mode
- 2.3.3 disadvantages of the new build mode
- 2.3.4 analysis of relevant cases
 - (1) analysis of organization structure of Metal Products Research Institute of Tianjin Metallurgy Group
 - (2) analysis of technical patent of Metal Products Research Institute of Tianjin Metallurgy Group
 - (3) analysis of personnel development of Metal Products Research Institute of Tianjin Metallurgy Group
 - (4) analysis of development strategy of Metal Products Research Institute of Tianjin Metallurgy Group

Group

2.4 Analysis of the existing combination model of research institutes

- 2.4.1 suitable for types of business organizations
- 2.4.2 analysis of the advantages of mergers and other agencies
- 2.4.3 analysis of the disadvantages of mergers and other agencies
- 2.4.4 analysis of relevant cases
 - (1) to unify the company to introduce third-party authoritative research institutions
 - (2) to promote the upgrading of product quality and taste

Chapter 3: Analysis of internal system construction model of enterprise institute

3.1 construction strategies of enterprise institute research system

- 3.1.1 overview of two-tier R & D system
- 3.1.2 advantages of two-tier R & D system
 - (1) focus on the company's future
 - (2) the economic returns
- 3.1.3 features of two-tier R & D system
 - (1) emphasizing innovation team
 - (2) the protection of creativity and divergent thinking
- 3.1.4 experience of two-tier R & D system
 - (1) the introduction of professionals
 - (2) leaders have insight into the market demand
 - (3) spiraling from research to study

3.2 Analysis of talent strategy of enterprise institute

- 3.2.1 the selection of advanced talents
- 3.2.2 strategy of meeting employees' requirements
- 3.2.3 strategy of identifying talents
- 3.2.4 strategy of retaining talents

3.3 Points of construction of enterprise institute decision mechanism

- 3.3.1 main points of the decision-making mechanism
- 3.3.2 points of positioning the decision-making body
 - (1) the researchers play a leading role in decision-making
 - (2) scientific decision-making shall meet the interests of investors
- 3.3.3 Points of construction of the decision-making structure
- 3.3.4 main points of the decision-making methods

3.4 Points of construction of evaluation and monitoring mechanisms of enterprise institute

- 3.4.1 construction points of evaluation and monitoring mechanisms
- 3.4.2 positioning points of evaluation and oversight body
- 3.4.3 selection points of evaluation and oversight contents
- 3.4.4 optimization points of evaluation and monitoring methods
 - (1) the cost-utility analysis
 - (2) multi-target system analysis.
 - (3) performance appraisal oversight

3.5 Points of construction of incentive system of enterprise institute

- 3.5.1 pressure incentive system
- 3.5.2 property incentive system
- 3.5.3 reputation incentive system
- 3.5.4 reward incentive system

3.6 Successful enterprise institute experience

- 3.6.1 Successful experience of Lenovo Research Institute
 - (1) Lenovo Research Institute focuses on market demand
 - (2) the organizational structure of the Institute of Lenovo
 - (3) development strategy of Lenovo Research Institute
- 3.6.2 successful experience of Microsoft Research
 - (1) the specific mechanism of Microsoft Research
 - (2) Microsoft Research's opening-up of research approaches
 - (3) Microsoft Research hires expert consultants from famous universities
- 3.6.3 Successful experience of SUN Institute
- 3.6.4 Successful experience of IBM Institute
- 3.6.5 Successful experience of ZTE Communication Institute

Chapter 4: Development status and construction model of state key laboratories

4.1 background of state key laboratories

- 4.1.1 analysis of the internal environment
- 4.1.2 external Environment Analysis
- 4.1.3 advantages of development

4.2 the need to build state key enterprise laboratories

- 4.2.1 analysis of global corporate R & D investment
 - (1) overview
 - (2) ranking analysis
 - (3) regional analysis
- 4.2.2 analysis of China R & D investment
- 4.2.3 willingness of R & D investment of Chinese enterprises

4.3 development status of state key laboratories

- 4.3.1 scale
- 4.3.2 structural characteristics
- 4.3.3 layout
- 4.3.4 personnel
- 4.3.5 financial support
- 4.3.6 operation

4.4 construction paths of state key enterprise laboratories

- 4.4.1 positioning analysis
- 4.4.2 construction path
 - (1) conditions of the establishment of a comprehensive research laboratory
 - (2) the establishment of combination of corporate and laboratory management mode
 - (3) high level of scientific and technological personnel

4.5 Platform construction of state key enterprise laboratories

- 4.5.1 necessity of laboratory platform
- 4.5.2 the overall ideas of construction of the laboratory platform
 - (1) the operation and management platform
 - (2) the basic research platform
 - (3) the experimental test platform
 - (4) the transformation platform
