China Mobile Payment Industry Report (2016-2021), Development Trend and Investment Decision

目 录

CONTENTS

Chapter 1: Overview of development of mobile payment industry and prediction of overall trends
1.1 definition and classification of mobile payment industry
1.1.1 definition of the mobile payment industry
1.1.2 classification of mobile payment methods
1.1.3 introduction of research ideas of this report
1.2 overview of the global mobile payment industry
1.2.1 development status quo of the global mobile payment industry
(1) overview of global mobile payment industry development
(2) characteristics of global mobile payment industry
1.2.2 development scale of the global mobile payment industry
(1) analysis of transaction scale of global mobile payment
(2) market structure of global mobile payment industry
(3) types of structure of global mobile payment business
1.2.3 development trends of the global mobile payment industry
(1) development trends of global mobile payment infrastructure
(2) development trends of technology models of global mobile payment
(3) development trends of business models of global mobile payment
(4) development trends of product structure of global mobile payment
1.3 analysis of life cycle of domestic mobile payment industry
1.3.1 development history of domestic mobile payment industry
1.3.2 life cycle of domestic mobile payment industry
1.4 status of development status quo of domestic mobile payment industry
1.4.1 analysis of transaction locations of mobile payment industry market
(1) analysis of transaction scale of Chinese mobile payment
(2) analysis of transaction methods of Chinese mobile payment
1.4.2 analysis of competition pattern of mobile payment industry
(1) analysis of market share of mobile payment
(2) analysis of market share of mobile Internet payment in the enterprise
1.5 prediction of overall development trends of domestic mobile payment industry
1.5.1 mobile payment industry will be in explosive growth
1.5.2 many standards of mobile payment are expected to unify
1.5.3 the gradual integration of remote payment and near field payment
1.5.4 the opening up of mobile payment platforms become a trend
1.5.5 operators will focus on near-field payment
1.5.6 security remains a core element of the mobile payment
Chapter 2: Forecast of market scale of Chinese mobile payment industry
2.1 analysis of driving factors of mobile payment industry
2.1.1 market drivers of the mobile payment industry
(1) analysis of transaction scale of e-commerce market
(2) analysis of transaction scale of online shopping market
(3) analysis of transaction scale of mobile shopping market
(4) summary of drivers of the mobile payment market
2.1.2 policy drivers of the mobile payment industry
(1) technical standards for mobile payment industry
(2) third-party payment license issuance
(3) impact of third-party payment license issuance
2.1.3 drivers for the mobile payment industry technology
(1) analysis of technology development of the mobile payment industry

(2) analysis of technology performance of mobile payment industry
2.1.4 drivers for the mobile payment industry infrastructure
(1) analysis of scale of netizens and mobile phone users
(2) analysis of scale of mobile phone users
(3) analysis of the quantity of 3G network mobile users
(4) analysis of POS terminal construction
2.2 development trends of application scenarios of mobile payment industry
2.2.1 non- cash payments continue to replace cash payments
2.2.2 bank card consumption is dominant in non- cash consumption
2.2.3 mobile payments continue to replace bank card payments
2.2.4 mobile payment tools are the future direction of development
2.3 forecast of market scale of mobile payment industry
2.3.1 reference of development path of Japanese mobile payment industry
2.3.2 forecast of market scale of Chinese mobile payment industry
Chapter 3: Analysis of development trends of Chinese mobile payment industry technology
3.1 analysis of development trends of mobile payment implementation
3.1.1 analysis of development stages of the implementation of mobile payment
3.1.2 comparative analysis of three generations of mobile payment implementations
(1) remote SMS and other traditional payment methods
(2) mobile Internet payment
(3) NFC near field payment
3.1.3 analysis of development trends of mobile payment implementation
(1) prediction of overall development trends of ways of implementation of mobile payment
(2) prediction of development trends of types of mobile payment implementation
3.2 analysis of the key technology patent applications of mobile payment
3.2.1 analysis of global NFC mobile payment patents
(1) development status quo of global NFC mobile payment patent applications
(2) basically completed the layout of global NFC technology patents
(3) various countries focus on overseas layout of NFC technology patents
(4) Japan’s advantages of NFC technology and market are obvious
3.2.2 analysis of NFC mobile payment patent applications in China
(1) overview of patent applications of NFC mobile payment in China
(2) Chinese enterprises need to strengthen its patent application strength
(3) Chinese patent portfolio has not yet covered the whole industry chain
(4) equipment manufacturers led NFC patent applications
3.3 prediction of development trends of key China mobile payment technologies
3.3.1 Chinese enterprises’ overseas layout of NFC technology to increase
3.3.2 China’s NFC technology will extend to the upstream
Chapter 4: Analysis of development trends of main operators of China mobile payment platforms
4.1 analysis of main operators of foreign mobile payment platforms
4.1.1 the international card companies leading operation modes
4.1.2 mobile operators leading operation modes
4.1.3 third-party payment leading operation modes
4.1.4 information technology companies leading operation modes
4.2 analysis of the main operators of domestic mobile payment platforms
4.2.1 analysis of mobile operators leading operation modes
(1) introduction of mobile operators leading operation modes
(2) processes of mobile operators leading operation modes
(3) the relationship of mobile operators with other subjects
(4) factors for successful operation of mobile operators leading operation modes
4.2.2 analysis of financial institutions leading operation modes
(1) introduction of financial institutions leading operation modes
(2) processes of financial institutions leading operation modes
(3) the relationship of financial institutions with other subjects
(4) factors for successful operation of financial institutions leading operation modes
4.2.3 analysis of third-party payment leading operation modes
(1) introduction of third-party payment leading operation modes
(2) processes of third-party payment leading operation modes

(3) the relationship of third party payment with other subjects
(4) factors for successful operation of third-party payment leading operation modes
4.3 prediction of development trends of main operators of domestic mobile payment platforms
4.3.1 comparative analysis of the main operators of mobile payments abroad
4.3.2 development trends of main operators of domestic mobile payment platforms
(1) short-term development trends of main operators of domestic mobile payment platforms
(2) long-term development trends of main operators of domestic mobile payment platforms
(3) main operators are both in competition and supplemented
Chapter 5: Analysis of development trends of payment services of different types of mobile companies
5.1 analysis of main competition points and main operators of mobile payment industry
5.1.1 the competition for control of the mobile payment platform
(1) mastering platform control means mastering fee income
(2) mastering platform control means mastering consumer data
5.1.2 payment platform competition is giants' competition
5.1.3 the third-party payment institutions survive in the cracks
5.1.4 prediction of development trends of mobile payment revenue sources
5.2 new thinking of business development of mobile payment
5.2.1 analysis of mobile payment models and service providers
5.2.2 prediction of development trends of mobile payment models
(1) mobile payment is divided into small payment and big payment
(2) small account of small payment and large account of big payment
(3) prediction of development trends of mobile payment models
5.3 analysis of development trends of mobile payment business of mobile operators
5.3.1 opportunities brought by mobile payment for mobile operators
5.3.2 advantages of mobile operators to develop mobile payment business
