

# China Electricity Consumption Information Collection System Industry Development Prospects and Investment Forecast Report, 2013-2017

## 目 录

### CONTENTS

#### Chapter 1: Development Overview of China Electricity Consumption Information Collection System Industry

##### 1.1 Definition, Structure and Functions of Electricity Consumption Information Collection System

###### 1.1.1 Definition of Electricity Consumption Information Collection System

###### 1.1.2 Structure of Electricity Consumption Information Collection System

###### (1) Logic Structure of the System

###### (2) Physical Structure of the System

###### (3) Security Protection of the System

###### 1.1.3 Functions of Electricity Consumption Information Collection System

###### (1) Data Collection and Management

###### (2) Automatic Data Logging and Prepayment Management

###### (3) Orderly Power Utility Management

###### (4) Operation Maintenance Management

###### (5) Data Interactive Function

##### 1.2 Market Environment of Electricity Consumption Information Collection System Industry

###### 1.2.1 Policy Environment of Electricity Consumption Information Collection System Industry

###### (1) Relevant Standards of the Industry

###### (2) Management System of the Industry

###### (3) Relevant Policies of the Industry

###### (4) Development Planning of the Industry

###### 1.2.2 Economic Environment of Electricity Consumption Information Collection System Industry

###### (1) Status of China Domestic Macro-Economic Environment

###### (2) Tendency of China Domestic Macro-Economic Environment

###### (3) Influence of China Domestic Economy to Electricity Consumption Information Collection System

Industry

##### 1.3 Analysis of Electricity Consumption Information Collection System Industry Chain

###### 1.3.1 Structure of Electricity Consumption Information Collection System Industry Chain

1.3.2 Coordination between Electricity Consumption Information Collection System Industry and the Upstream Industry

1.3.3 Downstream Demanding Subjects of Electricity Consumption Information Collection System Industry

###### (1) Development of

###### 1) Development Briefing of the Company

###### 2) Power Supply Capability of the Company

###### 3) Operation Status of the Company

###### 4) Development Planning of the Company

###### (2) Development of

###### 1) Development Briefing of the Company

###### 2) Power Supply Capability of the Company

###### 3) Operation Status of the Company

###### 4) Development Planning of the Company

###### (3) Bidding Ways of Power Grid Companies

###### 1) Principle Bidding Parts of Power Grid Companies

###### 2) Bidding Ways of Power Grid Companies

###### 3) Bidding Model

#### Chapter 2: Construction Demand and Efficiency of China Electricity Consumption Information Collection System Industry

## 2.1 Construction Demand of Electricity Consumption Information Collection System Industry

### 2.1.1 Demand of Power Corporations

- (1) Demand of Power Generating Corporations
- (2) Demand of Power Grid Corporations

### 2.1.2 Demand of Power Consumers

- (1) Demand of Enterprise-oriented Consumers
- (2) Demand of Resident-oriented Consumers

### 2.1.3 Social Demand

- (1) Demand of Safety and Reliable Power Supply
- (2) Demand of Reasonable Power Supply
- (3) Promote Social Technology Innovation
- (4) Support National "Maintaining Growth" Demand
- (5) Promote the Construction Demand of Intelligent Power Grid

## 2.2 Construction Benefit of Electricity Consumption Information Collection System Industry

### 2.2.1 Analysis of Economic Benefit

- (1) Reduce Labor Cost
- (2) Reduce the Cost of Goods, Materials and Auto Transportation
- (3) Reduce the Loss of Stealing Electricity
- (4) Increase Measuring Accuracy and Power Sales Volume
- (5) Reduce Human Error

### 2.2.2 Analysis of Management Benefit

- (1) Promote the Innovation of Marketing and Management Mechanism
- (2) Increase the Modernization Construction of Corporation Management

### 2.2.3 Analysis of Social Benefit

- (1) Realize Safety and Reliable Power Supply
- (2) Implementing Ladder Power Price, and Promoting Energy Conservation and Emission Reduction
- (3) Guiding Reasonable Power Consumption
- (4) Support the Policy of Promoting Internal Demand and Maintaining Growth, and Promote

Technology Innovation

## Chapter 3: Development Status of China Electricity Consumption Information Collection System Industry

### 3.1 Development Status of Electricity Consumption Information Collection System Industry

#### 3.1.1 Development Progress of Electricity Consumption Information Collection System Industry

- (1) First Phase
- (2) Second Phase
- (3) Third Phase
- (4) Fourth Phase

#### 3.1.2 Factors to Influent the Development of Electricity Consumption Information Collection System Industry

- (1) Favorable Factors to Influent the Development of Electricity Consumption Information Collection System Industry
- (2) Unfavorable Factors to Influent the Development of Electricity Consumption Information Collection System Industry

#### 3.1.3 Development Status of Electricity Consumption Information Collection System Industry

#### 3.1.4 Covering Ratio of Electricity Consumption Information Collection System

- (1) Covering Status of Electricity Consumption Information Collection System
- (2) Covering Trend of Electricity Consumption Information Collection System

#### 3.1.5 Existing Problems of Electricity Consumption Information Collection System Construction

- (1) Linking up Different Systems
- (2) Major Technological Challenges

### 3.2 Electricity Consumption Information Collection System Construction to Different Users

#### 3.2.1 Electricity Consumption Information Collection System Construction Status to Different Users

- (1) Electricity Consumption Information Collection System Construction Overview to Different Users
- (2) Electricity Consumption Information Collection System Construction Structure to Different Users

#### 3.2.2 Changing Tendency of Electricity Consumption Information Collection System User Group

### 3.3 Market Analysis of Electricity Consumption Information Collection System Industry

#### 3.3.1 Investment Scale of Electricity Consumption Information Collection System Industry

- (1) Investment Scale of Electricity Consumption Information Collection System Industry
- (2) Investment Structure of Electricity Consumption Information Collection System Industry
- 3.3.2 Market Capacity of Electricity Consumption Information Collection System Products
- 3.4 Development Experience of Electricity Consumption Information Collection System Industry**
  - 3.4.1 Construction Experience of Electricity Consumption Information Collection System Industry
    - (1) Standardization
    - (2) Large-scale
    - (3) Adjust Measures to Local Conditions
  - 3.4.2 Operation Experience of Electricity Consumption Information Collection System Industry
    - (1) Operation Professionalization
    - (2) Management Professionalization
    - (3) Cooperation of Different Specialties
  - 3.4.3 Maintenance Experience of Electricity Consumption Information Collection System Industry
    - (1) Examine and Repair at Regular Intervals
    - (2) Timely Sales Guarantee

## **Chapter 4: Construction Model of China Electricity Consumption Information Collection System**

### **4.1 Main Station Construction Model**

- 4.1.1 Unified Electricity Consumption Information Collection
  - (1) Construction of Main Station System
  - (2) Integration of Current Systems
- 4.1.2 Unified Marketing Application
- 4.1.3 Application Deploying Model
  - (1) Deploying Scheme
  - (2) Scheme Selection

### **4.2 Electricity Consumption Information Collection Model**

- 4.2.1 Information Collection Model of Large-scale Specifically Changed Users
- 4.2.2 Collection Model of Small-scale Specifically Changed Users
- 4.2.3 Collection Model of Public Distribution Transforming to Single Phase and Three Phases for Commercial Users
- 4.2.4 Collection Models of Residential Users and Public Measuring Points
  - (1) Model One: Concentrator plus Carrier
  - (2) Model Two: Concentrator plus Collector plus RS-485 Meter
  - (3) Model Three: Network Concentrator plus Broadband Carrier Collector plus RS-485 Meter

### **4.3 Digital Communication Model**

- 4.3.1 Remote Communication
  - (1) Specialized Optical Network
  - (2) Public Wireless Network
  - (3) 230MHz Wireless Communication Specialized Network
- 4.3.2 Local Communication
  - (1) RS-485 Communication
    - 1) Technology Characteristics
    - 2) Technology Standards
  - (2) Low-pressure Narrow-band Communication
    - 1) Technology Characteristics
    - 2) Technology Standards
  - (3) Low-pressure Broadband Communication
    - 1) Technology Characteristics
    - 2) Technology Standards

### **4.4 Prepayment Management Model**

- 4.4.1 Main-station Prepayment Model
- 4.4.2 Terminal Prepayment Model
- 4.4.3 Electricity Meter Prepayment Model
- 4.4.4 Field Management of Prepayment

## **Chapter 5: Construction and Equipment Market of China Electricity Consumption Information Collection System**

### **5.1 Main Station Construction and Equipment Market**

- 5.1.1 Investment Evaluation of Main Station System
- 5.1.2 Construction Status and Prospects of Main Station System

5.1.3 Market Competition of Main Station System

5.1.4 Market Profit Level of Main Station System

5.1.5 Bidding of Main Station System

(1) Bidding of Main Station System Construction

(2) Bidding Parts' Qualification of Main Station System

## 5.2 Construction and Equipment Market of Communication Channel

5.2.1 Investment Evaluation of Communication Channel

5.2.2 Construction Status of Communication Channel

5.2.3 Equipment Demand of Communication Channel

(1) Development of Communication Equipment

1) Optical Cable and Communication Equipment Market

2) GPRS/CDMA Module Market

3) 230 Wireless Radio Market

(2) Demand of Communication Channel Equipment

(3) Competition of Communication Channel Equipment Market

5.2.4 Bidding of Communication Channel Construction

(1) Bidding of Communication Channel Construction

(2) Bidding Parts' Qualification of Communication Channel

## 5.3 Construction and Equipment Market of Field Terminal

5.3.1 Investment Evaluation of Field Terminal

5.3.2 Analysis of Collection Terminal Market

(1) Analysis of Specifically Changed Terminal Market

1) Demanding Users of Specifically Changed Terminal

2) Bidding Qualification Requirements of Specifically Changed Terminal

3) Demanding Scale of Specifically Changed Market

4) Competition of Specifically Changed Market

(2) Analysis of Reading System Market

1) Demanding Users of Reading System

2) Bidding Qualification Requirements of Reading System

3) Demanding Scale of Reading System Market

4) Competition of Reading System Market

5.3.3 Analysis of Equipment Terminal Market

(1) Investment and Cost of Equipment Terminal

(2) Scale of Electricity Meter Market

(3) Bidding of Intelligent Electricity Meter

1) Bidding Scale of Intelligent Electricity Meter

2) Bidding Parts' Qualification of Intelligent Electricity Meter

3) Market Shares of the Intelligent Electricity Meter Corporations which Win the Bids

# Chapter 6: Development of Electricity Consumption Information Collection System Industry in Major Regions

## 6.1 Development of Electricity Consumption Information Collection System Industry in Jiangsu Province

6.1.1 Development Environment of Electricity Consumption Information Collection System Industry in Jiangsu Province

(1) Development of Power Grid in Jiangsu Province

(2) Relevant Policies to Electricity Consumption Information Collection System Industry in Jiangsu Province

6.1.2 Construction Status and Prospects of Electricity Consumption Information Collection System in Jiangsu Province
