

China Aviation Parts Industry Report on Market Prospective and Investment Forecast, 2016–2021

目 录

CONTENTS

Chapter 1: Summary of the development of China's aviation parts manufacturing industry

1.1 definition of aviation parts manufacturing industry

- 1.1.1 definition
- 1.1.2 main product categories
- 1.1.3 position of the industry in the national economy

1.2 summary of China's civil aviation industry development

- 1.2.1 development history of civil aviation industry
- 1.2.2 development status of civil aviation industry
 - (1) the size and growth rate
 - (2) the economic operation efficiency
 - (3) analysis of investment income
- 1.2.3 structural characteristics of civil aviation industry
- 1.2.4 distribution of civil aviation enterprises
- 1.2.5 development model of civil aviation industry
 - (1) development model of foreign civil aviation industry
 - (2) development model of China's civil aviation industry
 - (3) Comparison of industrial development of China's and foreign civil aviation

1.3 analysis of environment of aviation parts manufacturing industry

- 1.3.1 analysis of policy environment
 - (1) investment and financing policies
 - (2) tax fiscal policy
 - (3) industry development policy
 - (4) industry development plan
- 1.3.2 analysis of economic environment
 - (1) analysis of international macroeconomy
 - (2) analysis of domestic macroeconomy
- 1.3.3 analysis of technical environment
 - (1) features of technology development
 - (2) technology trends

Chapter 2: Analysis of the development of China's aviation parts manufacturing industry

2.1 development of China's civil aviation industry

- 2.1.1 Chinese air transport market developments
 - (1) analysis of aviation transportation
 - (2) analysis of development of air passenger
 - (3) analysis of development of air cargo
- 2.1.2 analysis of China's civil aviation security capability
 - (1) analysis of civilian airport
 - (2) overview of the development of the domestic transport fleet
 - (3) analysis of movements of civil aviation security
- 2.1.3 analysis of China air services and operation
 - (1) analysis of aviation service network
 - (2) analysis of aviation investment and operation
- 2.1.4 development of China's general aviation industry
 - (1) analysis of the number of aircraft registered
 - (2) analysis of structure of general aviation aircraft
 - (3) analysis of the amount of general aviation aircraft operation
 - (4) analysis of general aviation enterprise quantity
 - (5) the general aviation industry competitive analysis
 - (6) analysis of general aviation aircraft manufacturers and products

2.2 analysis of development of China aviation parts manufacturing industry

- 2.2.1 analysis of aviation parts manufacturing industry output
 - (1) the value of civilian aircraft parts
 - (2) the value of civil aviation engine parts
- 2.2.2 analysis of aviation parts manufacturing subcontract production
 - (1) subcontract production of civilian aircraft parts
 - (2) subcontract production of civil aviation engine parts
- 2.2.3 analysis of new orders of aviation parts manufacturing
 - (1) new orders for civil aircraft parts
 - (2) new orders for civil aviation engine parts
- 2.2.4 analysis of aviation parts manufacturing backlog
 - (1) The backlog of civil aircraft parts
 - 1) backlog of civil aviation engine parts

2.3 analysis of China aviation parts manufacturing industry layout

- 2.3.1 analysis of the overall layout of the aviation industry
- 2.3.2 analysis of Bohai Rim industrial layout
 - (1) Beijing Aviation Industry
 - (2) Tianjin Aviation Industry
 - (3) Hebei Aviation Industry
 - (4) Liaoning Aviation Industry
- 2.3.3 analysis of regional industrial layout of Yangtze River Delta
 - (1) Shanghai Aviation Industry
 - (2) Jiangsu Aviation Industry
 - (3) Zhejiang Aviation Industry
- 2.3.4 3 analysis of regional industrial layout of Pearl River Delta
 - (1) Zhuhai Aviation Industry
 - (2) Guangzhou Aviation Industry
 - (3) Shenzhen Airlines Industry
- 2.3.5 analysis of regional industrial layout of central China
 - (1) Hunan Aviation Industry
 - (2) Jiangxi Aviation Industry
 - (3) Hubei Aviation Industry
- 2.3.6 analysis of regional industrial layout of western China
 - (1) Shaanxi Aviation Industry
 - (2) Sichuan Aviation Industry
 - (3) Chongqing aviation industry

Chapter 3: Analysis of China aviation parts manufacturing industry chain

3.1 introduction of aviation parts manufacturing industry chain

- 3.1.1 civil aircraft manufacturing cost split analysis
- 3.1.2 analysis of aviation parts manufacturing industry chain

3.2 analysis of upstream aviation parts manufacturing industry

- 3.2.1 analysis of metallic materials of aviation market
 - (1) structural steel
 - (2) stainless steel
 - (3) aluminum
 - (4) magnesium alloy
 - (5) titanium / alloy
 - (6) high-temperature alloys
- 3.2.2 analysis of special aviation ceramic material market
 - (1) development of specialty ceramics
 - (2) special ceramics in aerospace applications
 - (3) market size of special ceramic
 - (4) aviation ceramic industrial layout
- 3.2.3 analysis of aviation polymer materials market
 - (1) special rubber
 - (2) special engineering plastics
 - (3) aerospace coatings
- 3.2.4 analysis of aerospace composites market
 - (1) production scale

- (2) production capacity
- (3) the scale of demand
- (4) the structure of demand
- (5) aerospace applications
- (6) technology development

3.3 analysis of downstream aviation parts manufacturing industry

3.3.1 analysis of global civil aircraft manufacturing

- (1) the overall global market for civil aircraft
 - 1) production of the global commercial aircraft in areas
 - 2) major aircraft manufacturers' production
 - 3) general global aviation production
 - 4) constitution of various types of general aviation aircraft deliveries in worldwide regions

3.3.2 analysis of China's civil aircraft manufacturing industry

- (1) analysis of China's civil aircraft manufacturing industry
- (2) analysis of general aviation aircraft manufacturing industry
- (3) analysis of the suppliers of large aircraft core parts
- (4) analysis of civil aircraft manufacturing enterprises' procurement of materials

3.3.3 analysis of aero-engine manufacturing industry

- (1) market size of the global aviation engines
- (2) analysis of China's aviation engine demands
- (3) analysis of aero-engine industry layout

3.3.4 analysis of aviation maintenance industry

- (1) the size of the global MRO market
- (2) the size of China's aviation maintenance industry
- (3) maintenance mode of aircraft and parts
- (4) MRO market size forecast

Chapter 4: analysis of subcontract production of China aviation parts manufacturing industry

4.1 analysis of development status of Chinese civil aircraft subcontract production

4.1.1 analysis of subcontract business stages of Chinese civil aircraft

- (1) stages of civil aircraft subcontracting business
- (2) the stage of Chinese civil aircraft subcontracting business

4.1.2 development of Chinese civil aircraft subcontracting business

- (1) development of civil aircraft subcontracting business
- (2) advantage of civil aircraft subcontracting business

4.1.3 market structure of Chinese civil aircraft manufacturing subcontracting business

- (1) analysis of competitive pattern
- (2) analysis of market concentration

4.1.4 analysis of subcontracted production of civil aircraft engine industry

- (1) international subcontracting production of engine industry
- (2) AVIC engine subcontract production

4.2 analysis of Chinese civil aircraft subcontracting business -level

4.2.1 analysis of high-end subcontracting technology and finance

4.2.2 drivers of subcontracted shift to China

4.2.3 analysis of Chinese subcontracting chain stage

4.2.4 analysis of subcontract machining operations to enhance profitability

4.3 prospects of Chinese civil aircraft subcontracting business

4.3.1 factors of China winning subcontract civil aircraft manufacturing business

4.3.2 to estimation of the amount of aircraft of China future available subcontract parts

- (1) estimate the domestic market demand
- (2) estimate the international market demand
- (3) profitability and prospects of Chinese civil aircraft subcontracting business

Chapter 5: Analysis of subcontract production model of China aviation parts manufacturing

5.1 analysis of international civil aircraft manufacturing companies' subcontract business

5.1.1 Boeing's subcontract business development

- (1) Boeing subcontracting business structure
- (2) Boeing subcontracting strategy
- (3) Boeing subcontract mode
- (4) Boeing subcontracting cooperation in China

- (5) Boeing Company developments in China
- 5.1.2 Airbus subcontracting business development
 - (1) Airbus subcontracting strategy
 - (2) Airbus subcontracting cooperation in China
 - (3) the size of Airbus subcontractors in China
 - (4) Airbus developments in China
- 5.1.3 subcontract business development of other companies
 - (1) Embraer subcontract business
 - (2) Bombardier subcontract business
- 5.2 analysis of subcontract aviation parts manufacturing production model**
