

# China Garbage Power Industry Indepth Research and Investment Strategy Planning Report, 2013-2017

## 目 录

### CONTENTS

#### Chapter 1: Development Overview of China Garbage Power Industry

##### 1.1 Definition and Classification of Garbage Power Industry

- 1.1.1 Definition of Garbage Power
- 1.1.2 Methods of Garbage Power
- 1.1.3 Position of Industry in National Economy

##### 1.2 Statistical Standards of Garbage Power Industry

- 1.2.1 Statistical Departments and Statistical Coverage of Garbage Power Industry
- 1.2.2 Statistical Methods of Garbage Power Industry
- 1.2.3 Data Categories of Garbage Power Industry

##### 1.3 Market Environment of Garbage Power Industry

- 1.3.1 Analysis of Environmental Protection of Garbage Power Industry
- 1.3.2 Analysis of Energy Environment of Garbage Power Industry
- 1.3.3 Technology Environment of Garbage Power Industry

##### 1.4 Analysis of Industrial Chain Development of Garbage Power Industry

- 1.4.1 Analysis of Emission and Treatment Conditions of China's Garbage
  - (1) Analysis of Garbage Supply Quantity
  - (2) Analysis of Garbage Supply Quality
  - (3) Analysis of Garbage Treatment Structure
- 1.4.2 Distribution of Garbage Incineration Treatment Enterprises
- 1.4.3 Development Analysis of Main Equipment in Garbage Power Generation
- 1.4.4 Analysis of Investment Situation of China Renewable Energy Growth

#### Chapter 2: Analysis of Development Situation of Garbage Power Industry

##### 2.1 Analysis of Development Situation of China Garbage Power Industry

- 2.1.1 Overall Development Overview of China Garbage Power Industry
- 2.1.2 Main Development Features of China Garbage Power Industry
- 2.1.3 Analysis of Operation Conditions of Garbage Power Industry
  - (1) Analysis of Economic Benefits of Garbage Power Industry
  - (2) Analysis of Profitability of Garbage Power Industry
  - (3) Analysis of Operation Capability of Garbage Power Industry
  - (4) Analysis of Debt-paying Ability of Garbage Power Industry
  - (5) Analysis of Development Capability of Garbage Power Industry

##### 2.2 Analysis of Economic Indicators of Garbage Power Industry

- 2.2.1 Main Influencing Factors to Economic Benefits of Garbage Power Industry
- 2.2.2 Analysis of Economic Indicators of Garbage Power Industry
- 2.2.3 Analysis of Economic Indicators of Enterprise with Different Sizes
- 2.2.4 Analysis of Economic Indicators of Enterprises with Different Economic Properties

##### 2.3 Analysis of Supply and Demand Balance of Garbage Power Industry

- 2.3.1 Analysis of Supply Conditions of National Garbage Power Industry
  - (1) Analysis of Total Industrial Output Value of National Garbage Power Industry
  - (2) Analysis of Finished Products of National Garbage Power Industry
- 2.3.2 Analysis of Supply Conditions of Regional Garbage Power Industry
  - (1) Analysis of Top 10 Regions with Highest Total Industrial Output Value
  - (2) Analysis of Top Regions with Most Finished Products
- 2.3.3 Analysis of Demand Conditions of National Garbage Power Industry
  - (1) Analysis of Sales Value of National Garbage Power Industry
  - (2) Analysis of Sales Revenue of National Garbage Power Industry
- 2.3.4 Analysis of Demand Conditions of Regional Garbage Power Industry
  - (1) Analysis of Top 10 Regions with Highest Sales Value
  - (2) Analysis of Top Regions with Highest Sales Revenue

### 2.3.5 Analysis of Production and Marketing Rate of National Garbage Power Industry

## Chapter 3: Development Experiential Learning of International Garbage Power Industry

### 3.1 Development Experiential Learning of USA Garbage Power Industry

- 3.1.1 Analysis of USA Garbage Supply Conditions
- 3.1.2 Policies Support for USA Garbage Power Generation
- 3.1.3 Analysis of USA Garbage Power Generation Technologies
- 3.1.4 Development Status of USA Garbage Power Generation
- 3.1.5 Development Prospects of USA Garbage Power Generation
- 3.1.6 Experiential Learning of USA Garbage Power Generation

### 3.2 Development Experiential Learning of Japan Garbage Power Industry

- 3.2.1 Analysis of Japan Garbage Supply Conditions
- 3.2.2 Policies Support for Japan Garbage Power Generation
- 3.2.3 Analysis of Japan Garbage Power Generation Technologies
- 3.2.4 Development Status of Japan Garbage Power Generation
- 3.2.5 Development Prospects of Japan Garbage Power Generation
- 3.2.6 Experiential Learning of Japan Garbage Power Generation

### 3.3 Development Experiential Learning of Garbage Power Industry in Other Countries

- 3.3.1 Development Experiential Learning of France Garbage Power Industry
- 3.3.2 Development Experiential Learning of Denmark Garbage Power Industry
- 3.3.3 Development Experiential Learning of UK Garbage Power Industry

## Chapter 4: Status and Prospects of China Garbage Power Generation Technologies

### 4.1 Analysis of Garbage Power Generation Technologies

- 4.1.1 Current Garbage-to-energy Incineration Technology
- 4.1.2 Domestic Garbage Incineration and Dust Technology
- 4.1.3 Garbage Incineration Leachate Treatment Technology
- 4.1.4 Garbage Incineration Gas Cleaning Technology
- 4.1.5 Operation Status and Development Trend of Garbage Incineration Power Generation Technologies

### 4.2 Analysis of Landfill Power Generation Technologies

- 4.2.1 Overview of Landfill Gas Power Generation Technology
- 4.2.2 Landfill Leachate Treatment Technology
- 4.2.3 Renewable Development of Garbage Landfill Power Generation

### 4.3 Feasibility Analysis of Garbage Power Generation Technologies

- 4.3.1 Feasibility Analysis of Garbage Heating
- 4.3.2 Feasibility Analysis of Fluidized Bed Technology for Garbage Power Generation
- 4.3.3 Feasibility of Boiler Transformation for Garbage Power Generation

### 4.4 Trend Analysis of Garbage Power Generation New Technologies

- 4.4.1 Thermal Garbage Power Generation
- 4.4.2 Base Metal Efficiency Garbage Power Generation
- 4.4.3 Gasification-pyrolysis Incineration Power Generation

### 4.5 Prospects Analysis of Garbage-to-Energy Technologies

- 4.5.1 Development Prospects for Garbage-to-Energy Technologies
- 4.5.2 Application Prospects Forecast for Garbage-to-Energy Technologies
- 4.5.3 New Technologies Replacing of Household Incineration and Landfill

## Chapter 5: Development and Forecast of China Waste Generation Machines

### 5.1 Development and Transformation of Garbage Incinerator

- 5.1.1 Main Types and Features of Garbage Incinerator in Early Days
- 5.1.2 Main Types and Features of Garbage Incinerator in Modern Days
- 5.1.3 Features of Chinese Municipal Garbage and Development of Incineration Machines
- 5.1.4 Transformation Plan of Incinerator

### 5.2 Analysis of Development of Main Garbage Incinerator

- 5.2.1 Advantages and Disadvantages of All Kinds of Garbage Incinerators
- 5.2.2 Mechanical Grate Incinerator
  - (1) Working Principles of Mechanical Grate Incinerator
  - (2) Features of Mechanical Grate Incinerator
  - (3) Burning Technologies of Mechanical Grate Incinerator
  - (4) Manufacturers of Mechanical Grate Incinerator
  - (5) Problems in Mechanical Grate Incinerator
- 5.2.3 Fluidized Bed Incinerator
  - (1) Working Principles of Fluidized Bed Incinerator

- (2) Features of Fluidized Bed Incinerator
- (3) Burning Technologies of Fluidized Bed Incinerator
- (4) Manufacturers of Fluidized Bed Incinerator
- (5) Problems in Fluidized Bed Incinerator
- 5.2.4 CAO Incinerator
  - (1) Working Principles of CAO Incinerator
  - (2) Features of CAO Incinerator
  - (3) Manufacturers of CAO Incinerator
  - (4) Problems in CAO Incinerator
- 5.2.5 Rotary-kiln Incinerator
  - (1) Working Principles of Rotary-kiln Incinerator
  - (2) Features of Rotary-kiln Incinerator
  - (3) Burning Technologies of Rotary-kiln Incinerator
  - (4) Manufacturers of Rotary-kiln Incinerator
  - (5) Problems in Rotary-kiln Incinerator
- 5.3 Dust Removal for Incinerator**
  - 5.3.1 Development and Application Analysis of Bag Dust Collector
  - 5.3.2 Development and Application Analysis of Electric Dust Collector
  - 5.3.3 Comparison between Electric Dust Collector and Bag Dust Collector
- 5.4 Market Prospects for Garbage Power Generation Equipment**
  - 5.4.1 Competitive Landscape of Garbage Power Generation Equipment
  - 5.4.2 Localization Trend of Garbage Power Generation Equipment
  - 5.4.3 Market Prospects for Garbage Power Generation Equipment

## Chapter 6: Analysis of Development Modes and Economic Benefits of China Garbage Power Generation Plants

- 6.1 Investment Modes and Project Construction of Garbage Power Generation Plants**
  - 6.1.1 Investment Modes Situation of Garbage Power Generation Plants
    - (1) Investment Modes of Garbage Power Generation Plants
    - (2) Risk and Control of BOT Project
    - (3) Structure Design and Basic Process of BOT Project
    - (4) Boundary Conditions of BOT Project
    - (5) Legal Person Selection for BOT Project
    - (6) Technical Problems in BOT Project
    - (7) Financial Problem in BOT Project
    - (8) Legal Problems in BOT Project
  - 6.1.2 Project Construction Conditions of Garbage Power Generation Plants
    - (1) Production Projects of Garbage Power Generation
    - (2) Garbage Power Generation Projects under Planning
- 6.2 Project Construction of Garbage Power Generation Plants**
  - 6.2.1 Development Modes of Garbage Power Generation Plants
    - (1) Garbage Procurement Modes of Power Plants
    - (2) Sales Modes of Garbage Power Generation
  - 6.2.2 Analysis of Economic Benefits of Garbage Power Generation Plants
    - (1) Cost Analysis of Garbage Power Generation Industry
    - (2) Income Analysis of Garbage Power Generation Industry
      - 1) Garbage Treatment Fee
      - 2) Income of Feed-in-tariff
    - (3) Analysis of Economic Benefits of Garbage Power Generation Industry
