

China Geological Engineering Industry Market Research and Investment Forecast Report

目 录

CONTENTS

Chapter 1: Development Overview of China Geological Engineering Industry

1.1 Definition of Geological Engineering Industry

- 1.1.1 Definition of Geological Engineering Industry
- 1.1.2 Classification of Geological Engineering Business

1.2 Analysis of Position of Geological Engineering Industry

- 1.2.1 Relation between Geological Engineering Industry and Engineering Geology
- 1.2.2 Relation between Geological Engineering Industry and Civil Engineering
- 1.2.3 Position of Geological Engineering Industry in Construction Engineering Industry
- 1.2.4 Position of Geological Engineering Industry in National Economy

1.3 Analysis of Policy Environment for Geological Engineering Industry

- 1.3.1 Management System of Geological Engineering Industry
 - (1) Regulatory Department of Industry
 - (2) Mineral Resources Management
 - (3) Corporate Qualification Management
 - (4) Mineral Resources Exploration Management and Mining Transfer
 - (5) Safety Production Supervision Management
 - (6) Rules and Regulations Related to Environmental Protection
- 1.3.2 Analysis of Geological Prospecting Reform
 - (1) Key Problems in Geological Prospecting Reform
 - (2) Progress of Geological Prospecting Reform
 - (3) Analysis of Successful Modes of Geological Prospecting Reform
- 1.3.3 Development Planning of Geological Engineering Industry
 - (1) National Plan for Mineral Resources, 2008-2015
 - (2) “Twelfth Five-year” Prevention and Control Plan for Geological Disasters
 - (3) National Comprehensive Plan for Prevention and Reduce Disasters, 2011-2015

1.4 Analysis of Economic Environment for Geological Engineering Industry

- 1.4.1 Analysis of National GDP Growth
- 1.4.2 Analysis of National Industrial Value Added Growth
- 1.4.3 Analysis of National FAI Growth

Chapter 2: Analysis of Development of China Geological Engineering Industry

2.1 Overview of Geological Conditions

- 2.1.1 Definition of Geological Conditions for Engineering
- 2.1.2 Geographic And Geomorphic Conditions
- 2.1.3 Geologic Structure and Ground Stress
- 2.1.4 Geotechnical Conditions
- 2.1.5 Hydrogeological Conditions
- 2.1.6 Geophysical Phenomenon
- 2.1.7 Natural Building Materials

2.2 Development Status of Geological Engineering Industry

- 2.2.1 Development Size of Geological Engineering Industry
- 2.2.2 Development Features of Geological Engineering Industry
- 2.2.3 Qualifications of Geological Engineering Industry
- 2.2.4 Income Structure of Geological Engineering Industry
- 2.2.5 Analysis of Geological Mineral Exploration Results
 - (1) Land and Resource Survey Achievements, 1998-2010
 - (2) China Geological Prospecting Achievements, 2010-2011

2.3 Analysis of Bidding of Geological Engineering

- 2.3.1 Bidding Management System for Geological Engineering
- 2.3.2 Analysis of Bidding Links for Geological Engineering

2.4 Operating Status of Downstream Parts Related to Geological Engineering Industry

- 2.4.1 Analysis of Supply and Demand Situation of Coal Industry
 - (1) Analysis of Supply and Demand Situation Close to Coal Industry in.....2011
 - (2) Supply and Demand Situation of Coal Industry in Q1,.....2012
 - (3) Analysis of Factors of Coal Economic Operation in.....2012
- 2.4.2 Analysis of Operating Status of Petroleum and Natural Gas Industry
 - (1) Analysis of Operating Status of Industry in.....2011
 - (2) Analysis of Operating Status of Industry in Q1,.....2012
- 2.4.3 Analysis of Operating Status of Non-ferrous Metal Industry
 - (1) Overall Operating of Industry
 - (2) Gross Output of Industry
 - (3) Supply and Demand of Major Product Markets
 - (4) Price Trend of Major Product Markets
- 2.4.4 Analysis of Operating Status of Construction Engineering Industry
 - (1) Analysis of Output Value of Construction Engineering Industry
 - (2) Analysis of Regional Development of Construction Engineering Industry
 - (3) Analysis of Operating Efficiency of Construction Engineering Industry
 - (4) Analysis of Operating Status of Various Types of Construction Companies

Chapter 3: Analysis of Development of China Mineral Exploration and Exploitation Engineering Industry

3.1 Distribution and Utilization of Mineral Resources

- 3.1.1 Coal Resources Distribution and Status of Exploitation And Utilization
- 3.1.2 Metal Resources Distribution and Status of Exploitation And Utilization
- 3.1.3 Petroleum Resources Distribution and Status of Exploitation And Utilization
- 3.1.4 Natural Gas Resources Distribution and Status of Exploitation And Utilization
- 3.1.5 Ground Water Resources Distribution and Status of Exploitation And Utilization

3.2 Investment of Exploration and Exploitation in Minerals

- 3.2.1 Analysis of Prospecting Investment in Minerals
 - (1) Money Size of Prospecting Investment in Minerals
 - (2) Money Sources of Prospecting Investment in Minerals
 - (3) Mineral Structure of Prospecting Investment in Minerals
 - (4) Regional Distribution of Prospecting Investment in Minerals
- 3.2.2 Investment Size of Industries Related to Mineral Exploration
 - (1) Investment Size of Mining Industry
 - (2) Investment Size of Metallurgy Industry

3.3 Analysis of Development of Mineral Exploration and Exploitation Engineering Industry

- 3.3.1 Analysis of Development of Coal Exploration and Exploitation Engineering Market
 - (1) Major Types of Coal Exploration and Exploitation Engineering
 - (2) Construction Status of Coal Exploration and Exploitation Engineering
 - (3) Construction Enterprises of Coal Exploration and Exploitation Engineering
- 3.3.2 Analysis of Development of Metal Exploration and Exploitation Engineering Market
 - (1) Major Types of Metal Exploration and Exploitation Engineering
 - (2) Construction Status of Metal Exploration and Exploitation Engineering
 - (3) Construction Enterprises of Metal Exploration and Exploitation Engineering
- 3.3.3 Analysis of Development of Oil and Gas Exploration and Exploitation Engineering Market
 - (1) Major Types of Oil and Gas Exploration and Exploitation Engineering
 - (2) Construction Status of Oil and Gas Exploration and Exploitation Engineering
 - (3) Construction Enterprises of Oil and Gas Exploration and Exploitation Engineering
- 3.3.4 Analysis of Development of Water and Gas Exploration and Exploitation Engineering Market
 - (1) Major Types of Water and Gas Exploration and Exploitation Engineering
 - (2) Construction Status of Water and Gas Exploration and Exploitation Engineering
 - (3) Construction Enterprises of Water and Gas Exploration and Exploitation Engineering

3.4 Analysis of Key Regions for Developing Mineral Exploration and Exploitation Engineering Industry

- 3.4.1 Analysis of Development of Mineral Exploration and Exploitation Engineering Industry in Inner Mongolia
- 3.4.2 Analysis of Development of Mineral Exploration and Exploitation Engineering Industry in Shanxi
- 3.4.3 Analysis of Development of Mineral Exploration and Exploitation Engineering Industry in Henan

3.4.4 Analysis of Development of Mineral Exploration and Exploitation Engineering Industry in Yunnan

3.4.5 Analysis of Development of Mineral Exploration and Exploitation Engineering Industry in Xinjiang

3.5 Problems in Mineral Prospecting and Development Solutions

3.5.1 Problems in Mineral Prospecting and Development Solutions

(1) Problems in Mineral Prospecting

(2) Development Strategies and Solutions for Mineral Prospecting

3.5.2 Environmental Problems and Protection Measures for Groundwater Resource

(1) National Groundwater Quality

(2) Geological Disasters Triggered by Excessive Exploitation of Groundwater

(3) Environmental Protection Measures for Groundwater Resource

3.6 Development Prospects of Mineral Exploration and Exploitation Engineering Industry

3.6.1 Planning for Mineral Exploration and Exploitation

(1) Executive Outline for Geological Prospecting

(2) Development Planning for Coal Industry

(3) Development Planning for Metallurgy Industry

(4) Construction Planning for Oilfield Production Capacity

(5) Construction Planning for Oil-refinery Engineering

(6) Exploration and Exploitation Planning for Unconventional Oil and Gas

3.6.2 Development Prospects for Mineral Exploration and Exploitation Engineering Industry

(1) Development Prospects for Coal Mining Geological Engineering Market

(2) Development Prospects for Metal Mining Geological Engineering

(3) Development Prospects for Oil and Gas Mining Geological Engineering

(4) Development Prospects for Groundwater Development Geological Engineering Market

Chapter 4: Analysis of Development of China Geological Disaster Prevention and Treatment Engineering Industry

4.1 Loss Caused by Geological Disasters

4.1.1 Occurrence of Geological Disasters

4.1.2 Casualties Triggered by Geological Disasters

4.1.3 Financial Loss Caused by Geological Disasters

4.2 Investment in Geological Disaster Prevention and Treatment

4.2.1 Capital Investment in Treatment for Mining Geology Environment

4.2.2 Progress of Monitoring and Warning for Geological Disasters

4.2.3 Construction of National Geological Parks

4.3 Analysis of Key Regions for Developing Geological Disaster Prevention and Treatment Industry

4.3.1 Analysis of Development of Geological Disaster Prevention and Treatment Industry in Sichuan

(1) Types and Features of Geological Disasters Happened in Sichuan

(2) Policies and Regulations Related to Geological Disasters in Sichuan

(3) Investment in Sichuan Geological Disaster Prevention and Treatment Projects

(4) Construction Status of Sichuan Geological Disaster Prevention and Treatment Projects

(5) Sichuan Geological Disaster Prevention and Treatment Engineering Construction Enterprises

4.3.2 Analysis of Development of Geological Disaster Prevention and Treatment Industry in Gansu

(1) Types and Features of Geological Disasters Happened in Gansu

(2) Policies and Regulations Related to Geological Disasters in Gansu

(3) Investment in Gansu Geological Disaster Prevention and Treatment Projects

(4) Construction Status of Gansu Geological Disaster Prevention and Treatment Projects

(5) Gansu Geological Disaster Prevention and Treatment Engineering Construction Enterprises

4.3.3 Analysis of Development of Geological Disaster Prevention and Treatment Industry in Shaanxi

(1) Types and Features of Geological Disasters Happened in Shaanxi

(2) Policies and Regulations Related to Geological Disasters in Shaanxi

(3) Investment in Shaanxi Geological Disaster Prevention and Treatment Projects

(4) Construction Status of Shaanxi Geological Disaster Prevention and Treatment Projects

(5) Shaanxi Geological Disaster Prevention and Treatment Engineering Construction Enterprises

4.3.4 Analysis of Development of Geological Disaster Prevention and Treatment Industry in Shanxi

(1) Types and Features of Geological Disasters Happened in Shanxi

(2) Policies and Regulations Related to Geological Disasters in Shanxi

(3) Investment in Shanxi Geological Disaster Prevention and Treatment Projects

(4) Construction Status of Shanxi Geological Disaster Prevention and Treatment Projects

- (5) Shanxi Geological Disaster Prevention and Treatment Engineering Construction Enterprises
- 4.3.5 Analysis of Development of Geological Disaster Prevention and Treatment Industry in Yunnan
 - (1) Types and Features of Geological Disasters Happened in Yunnan
 - (2) Policies and Regulations Related to Geological Disasters in Yunnan
 - (3) Investment in Yunnan Geological Disaster Prevention and Treatment Projects
 - (4) Construction Status of Yunnan Geological Disaster Prevention and Treatment Projects
 - (5) Yunnan Geological Disaster Prevention and Treatment Engineering Construction Enterprises
- 4.3.6 Analysis of Development of Geological Disaster Prevention and Treatment Industry in Jilin
 - (1) Types and Features of Geological Disasters Happened in Jilin
 - (2) Policies and Regulations Related to Geological Disasters in Jilin
 - (3) Jilin Geological Disaster Prevention and Treatment Engineering Construction Enterprises
