

Global Solar Inverter Industry Report (2016–2021), Market Forecast and Investment Strategic Planning

目 录

CONTENTS

Chapter 1: Analysis of solar inverter industry chain

- 1.1 definition of solar inverter industry
- 1.2 introduction of solar inverter industry chain
 - 1.2.1 model of industry chain
 - 1.2.2 transmission mechanism of industry chain
- 1.3 upstream raw material market of solar inverter industry
 - 1.3.1 operation of market of electronic components
 - (1) analysis of IGBT market
 - (2) analysis of MOSFET market
 - (3) analysis of silicon carbide diode market
 - (4) analysis of filter capacitor market
 - 1.3.2 operation of market of electrical components
 - (1) analysis of transformer market
 - (2) analysis of low-voltage circuit breaker market
 - (3) analysis of inductor market
- 1.4 downstream applications of solar inverter industry
 - 1.4.1 classification of downstream customers of solar inverter
 - 1.4.2 structure of downstream demand of solar inverter
 - 1.4.3 areas of downstream demand of solar inverter
 - (1) in solar grid-connected power generation
 - (2) in the field of rural electrification
 - (3) in the field of industry and communications
 - (4) other application areas

Chapter 2: Status quo and forecast of market of the global solar inverter industry

- 2.1 status quo of the global solar inverter market
 - 2.1.1 development of the global solar inverter market
 - 2.1.2 competitive landscape of the global solar inverter market
- 2.2 analysis of development of solar market in major countries
 - 2.2.1 status quo and forecast of photovoltaic market in Germany
 - (1) subsidy policy for photovoltaic in Germany
 - (2) photovoltaic installed capacity in Germany
 - (3) forecast of photovoltaic power generation market in Germany
 - 2.2.2 status quo and forecast of photovoltaic market in Italy
 - (1) subsidy policy for photovoltaic in Italy
 - (2) photovoltaic installed capacity in Italy
 - (3) forecast of photovoltaic power generation market in Italy
 - 2.2.3 status quo and forecast of photovoltaic market in Spain
 - (1) subsidy policy for photovoltaic in Spain
 - (2) forecast of photovoltaic power generation in Spain
 - (3) forecast of photovoltaic power generation market in Spain
 - 2.2.4 status quo and forecast of photovoltaic market in America
 - (1) subsidy policy for photovoltaic in America
 - (2) photovoltaic installed capacity in America
 - (3) forecast of photovoltaic power generation market in America
 - 2.2.5 status quo and forecast of photovoltaic market in Japan
 - (1) subsidy policy for photovoltaic in Japan
 - (2) photovoltaic installed capacity in Japan
 - (3) forecast of photovoltaic power generation market in Japan
- 2.3 forecast of the global solar inverter market

2.3.1 scale of the global solar inverter shipments and forecast

2.3.2 scale of the global solar inverter market and forecast

Chapter 3: Analysis of development of China's solar inverter industry

3.1 status quo of China's solar market and planning

3.1.1 distribution of China's solar resource

3.1.2 overview of China's policy of photovoltaic power generation

(1) industry policy of photovoltaic power generation

(2) price subsidies for photovoltaic power generation

(3) development policy of photovoltaic power plant

3.1.3 analysis of China's solar installed capacity

3.1.4 China market competition of photovoltaic power generation

3.1.5 forecast of China's photovoltaic power generation

3.2 analysis of production of solar inverter industry

3.2.1 major suppliers of solar inverter

3.2.2 scale of output of solar inverter

3.3 analysis of research and development of solar inverter technology

3.3.1 R & D approaches of solar inverter enterprises

3.3.2 analysis of patents of solar inverter industry

(1) analysis of patent applications of the industry

(2) analysis of quantity of patent publications of the industry

(3) analysis of patent application unit of the industry

(4) analysis of hot technology of the industry

3.4 analysis of price and profit of solar inverter

3.4.1 cost structure of solar inverter

3.4.2 Price of solar inverter

3.4.3 profitability of solar inverter

3.5 marketing model of solar inverter industry

3.5.1 traditional marketing model of solar inverter

3.5.2 joint marketing model of solar inverter

Chapter 4: Market competition and overseas distribution of China's solar inverter industry

4.1 analysis of market competition of solar inverter

4.1.1 analysis of five forces of the domestic solar inverter market

(1) analysis of the upstream bargaining power

(2) analysis of the downstream bargaining power

(3) analysis of the threat of new entrants

(4) analysis of the threat of substitute products

(5) analysis of competition within the industry

4.1.2 investment of the international solar inverter giants in China

(1) investment layout of SMA Company in China

(2) investment layout of KACO New Energy Company in China

(3) investment layout of SATCON Company in China

(4) investment layout of Conergy Group in China

(5) investment layout of Xantrex in China

4.2 analysis of overseas layout of solar inverter enterprises

4.2.1 overseas layout of domestic solar inverter enterprises

4.2.2 overseas layout of domestic solar inverter enterprises

Chapter 5: Analysis of market of products of China's solar inverter industry

5.1 analysis of structure of solar inverter products

5.2 analysis of market of solar inverter products

5.2.1 analysis of grid-connected inverter market

(1) function of grid-connected inverter

(2) performance advantage of grid-connected inverter

(3) grid mode of grid-connected inverter

(4) classification of products of grid-connected inverter

(5) manufacturer of grid-connected inverter

(6) market demand for grid-connected inverter

5.2.2 analysis of off-grid inverter market

(1) application terminal of off-grid inverter

(2) applicable regions of off-grid inverter

(3) market demand for off-grid inverter

5.3 development trends of micro inverter products

5.3.1 application of micro inverter
