

China Mobile Payment Industry Report (2016–2021), Typical Cases of Business Model and Analysis of Innovation Strategy

目 录

CONTENTS

Chapter 1: Analysis of development environment of mobile payment industry

1.1 definition and classification of mobile payment industry

1.1.1 definition of the mobile payment industry

1.1.2 classification of mobile payment industry

1.2 analysis of driving factors of mobile payment industry

1.2.1 market drivers of the mobile payment industry

(1) analysis of transaction scale of e-commerce market

(2) analysis of transaction scale of online shopping market

(3) analysis of transaction scale of mobile shopping market

(4) summary of market drivers of the mobile payment

1.2.2 policy drivers of mobile payment industry

(1) technical standards of mobile payment industry

(2) third-party payment license issuance

(3) impact of third-party payment license issuance

1.2.3 technology drivers of mobile payment industry

(1) analysis of technology development of mobile payment industry

(2) analysis of technology performance of mobile payment industry

(3) analysis of scales of Internet users and mobile phone users

1.2.4 infrastructure drivers of mobile payment industry

(1) analysis of quantity of mobile phone users

(2) analysis of quantity of 3G network mobile users

(3) analysis of POS terminal construction

Chapter 2: Analysis of evolution of business models of mobile payment industry,

2.1 analysis of development status quo of mobile payment industry

2.1.1 analysis of mobile payment industry market

(1) analysis of transaction scale of global mobile payment

(2) analysis of transaction scale of Chinese mobile payment

(3) analysis of transaction methods of Chinese mobile payment

2.1.2 analysis of competition patterns of mobile payment industry

(1) analysis of share of enterprises in mobile payment market

(2) analysis of share of enterprises in mobile Internet payment market

2.2 forecast of application scenarios of mobile payment industry

2.2.1 non- cash payments continue to replace cash payments

2.2.2 bank card consumption is dominant in non- cash consumption

2.2.3 mobile payments continue to replace bank card payments

2.2.4 mobile payment tools are the future direction of development

2.3 analysis of development stages of mobile payment industry

2.3.1 three stages of development of mobile payment industry

2.3.2 comparison of mobile payment methods three generations

(1) SMS and other traditional remote payment

(2) mobile Internet payment

(3) NFC near field payment

(4) development trends of mobile payment

1) obstacles for NFC payment development - competition between operators and Unionpay

2) drivers for NFC payment development - convenience of NFC

2.3.3 function positioning of participants of the third generation of mobile payment

2.3.4 operators to promote the third generation of mobile payment

2.3.5 the progress of the promotion of the third generation of mobile payment

2.4 evolution of business models of mobile payment industry

- 2.4.1 business features of the first generation of mobile payment
 - (1) features of business model of the first generation of mobile payment
 - (2) structure of business model of the first generation of mobile payment
- 2.4.2 business features of the second generation of mobile payment
 - (1) features of business model of the second generation of mobile payment
 - (2) structure of business model of the second generation of mobile payment
- 2.4.3 business features of the third generation of mobile payment
 - (1) features of business model of the third generation of mobile payment
 - (2) structure of business model of the third generation of mobile payment

Chapter 3: Analysis of ecosystem of mobile payment industry

3.1 analysis of ecosystem of mobile payment industry

- 3.1.1 introduction of the mobile payment industry chain
- 3.1.2 analysis of ecosystem of mobile payment industry
- 3.1.3 overview of the members of ecosystem of mobile payment industry
 - (1) mobile operator
 - (2) banks and other financial institution
 - (3) third-party payment service provider
 - (4) merchant
 - (5) user
- 3.1.4 types of ecosystem of mobile payment industry
 - (1) ecosystem of banks and other financial institutions
 - (2) ecosystem of mobile operators
 - (3) ecological subsystem of third-party payment

3.2 competition between main participants of ecosystem of mobile payment industry

- 3.2.1 relationship between telecom operators and other subjects
 - (1) progress of mobile payment services of three operators
 - 1) progress of mobile payment services of China Mobile
 - 2) progress of mobile payment services of China Unicom
 - 3) progress of mobile payment services of China Telecom
 - (2) competition between telecom operators
 - (3) relationship between telecom operators and other agencies
- 3.2.2 relationship between financial institutions and other bodies
 - (1) progress of mobile payment services of financial institutions
 - 1) progress of mobile payment services of Chinese commercial banks
 - 2) progress of mobile payment services of China UnionPay
 - (2) competition between financial institutions
 - 1) analysis of competition of China UnionPay
 - 2) analysis of competition of commercial banks
 - (3) relationship between financial institutions and other subjects
- 3.2.3 the relationship between the third party payment platforms and other subjects
 - (1) competition between third-party payment platforms
 - (2) relationship between third-party payment platforms and other subjects

3.3 analysis of main competition points of mobile payment industry

- 3.3.1 the competition for control of the mobile payment platform
 - (1) mastering platform control means mastering fee income
 - (2) mastering platform control means mastering consumer data
 - (3) mastering platform control means value-added service revenue
- 3.3.2 payment platform competition is giants' competition
- 3.3.3 the third-party payment institutions survive in the cracks

Chapter 4: Analysis of business models of mobile payment industry

4.1 concept and composition of business model

- 4.1.1 concept of business model
- 4.1.2 composition of business model
 - (1) overall structure of business model
 - (2) parts of business model
 - (3) core elements of business model

4.2 characteristics of a successful business model

- 4.2.1 successful business model is innovative
- 4.2.2 successful business model has profit

- 4.2.3 successful business model explores customer value
- 4.2.4 successful business model has an anti-risk capability
- 4.2.5 successful business model for sustainable development
- 4.2.6 successful business model has overall coordination
- 4.3 classification of business models of mobile payment industry**
 - 4.3.1 business model under ecosystem of mobile operators
 - (1) flow chart of the business model
 - (2) typical case of the business model - NTT DoCoMo, Inc. in Japan
 - (3) analysis of the common business model
 - 4.3.2 business model under ecosystem of banks
 - (1) flow chart of the business model
 - (2) typical case of the business model
 - (3) analysis of the common business model
 - 4.3.3 business model under ecosystem of third-party payment
 - (1) flow chart of the business model
 - (2) typical case of the business model
 - (3) analysis of the common business model

Chapter 5: Analysis of innovation of Chinese mobile payment ecosystem

- 5.1 analysis of innovation of ecosystem of mobile payment of mobile operator**
 - 5.1.1 core resources
 - 5.1.2 the ability to control core resources
 - 5.1.3 SWOT analysis of innovation of ecosystem of mobile payment of mobile operator
- 5.2 analysis of innovation of ecosystem of mobile payment of commercial banks**
 - 5.2.1 core resources
 - 5.2.2 the ability to control core resources
 - 5.2.3 SWOT analysis of innovation of ecosystem of mobile payment of commercial banks
- 5.3 analysis of innovation of ecosystem of third-party mobile payment**
 - 5.3.1 core resources
 - 5.3.2 the ability to control core resources
 - 5.3.3 SWOT analysis of innovation of ecosystem of mobile payment of third-party payment agencies
