China Numerical Control System Industry Report 2016-2021, Development Prospect and Investment Forecast

目 录

CONTENTS

Chapter 1: Analysis of background of development of China's numerical control system industry
1.1 definition and classification of China's numerical control system industry
1.1.1 concept of numerical control system
1.1.2 constitutes of numerical control system
(1) hardware structure
(2) software structure
1.1.3 classification of numerical control system
(1) by trajectory
(2) by servo system
(3) by function level of numerical control system
1.2 business model and features of China's numerical control system industry
1.2.1 operation mode of the industry
1.2.2 analysis of characteristics of the industry
(1) market type of the industry
(2) cyclical property of the industry
(3) market structure of the industry
1.2.3 entry barriers of the industry
(1) technical barrier
(2) financial barrier
(3) brand barrier
(4) talent barrier
1.3 analysis of market environment of China's numerical control system industry
1.3.1 analysis of policy environment of the industry
(1) regulatory regime of the industry
(2) analysis of impact of policies of the industry
1.3.2 analysis of economic environment of the industry
1.3.3 analysis of social environment of the industry
1.4 analysis of industrial chain of China's numerical control system industry
1.4.1 introduction of industry chain of the industry
1.4.2 analysis of operation of major raw materials of the industry
(1) analysis of operation of IPC industry
(2) analysis of operation of display industry
(3) analysis of operation of power modules industry
(4) analysis of operation of servo motor industry
1.4.3 analysis of operation of main operational features of the industry
(1) analysis of operation of NC device industry
(2) analysis of operation of servo drive industry
(3) analysis of operation of motor carrier industry
Chapter 2: Status quo of development and competitive landscape of China's numerical control system industry
2.1 status quo of development of the international numerical control system industry
2.1.1 overview of development of the international numerical control system industry
(1) development course of the international numerical control system industry
(2) analysis of development of major international numerical control system markets
(3) characteristics of development of international CNC system market
2.1.2 analysis of competition of international CNC system market
(1) competitive landscape of international CNC system market
(2) competitive trends of international CNC system market

2.1.3 analysis of development of the world's major numerical control system enterprises
(1) FANUC
(2) SIEMENS
(3) DMG
(4) Mitsubishi
(5) HAAS
2.2 status quo of development of China's numerical control system industry
2.2.1 overview of development of China's numerical control system industry
2.2.2 characteristics of development of China's numerical control system industry
2.2.3 influencing factors of China's numerical control system industry
(1) analysis of favorable factors
(2) analysis of unfavorable factors
2.2.4 analysis of operation of China's numerical control system industry
(1) quantity of enterprises of the industry
(2) market scale of the industry
(3) operation efficiency of the industry
(4) regional distribution of the industry
2.3 analysis of competition of China's numerical control system industry
2.3.1 analysis of competition environment of the industry
(1) competition among existing enterprises
(2) analysis of potential entrants
(3) analysis of threat of substitutes
(4) bargaining power of suppliers
(5) bargaining power of customers
2.3.2 market share of major enterprises of the industry
2.3.3 analysis of development trends of competition of the industry
(1) analysis of competition strategy of the industry
(2) analysis of competitive trends of the industry
Chapter 3: Analysis of technical level of China's numerical control system industry
3.1 key factors in the development of numerical control system technology
3.1.1 development of electronic components technology
(1) status quo of electronic components technology
(2) application of electronic components technology in the NC system
(3) development trends of electronic components technology
3.1.2 application of software technology
(1) status quo of development of software technology
(2) application of software technology in the NC system
(3) development trends of software technology
3.1.3 introduction of NC standards
(1) course of discovery of NC standards
(2) China's existing NC standards
(3) development trends of NC standards
3.1.4 development of servo technology
(1) status quo of development of servo technology
(2) application of servo technology in the NC system
(3) development trends of servo technology
3.1.5 adoption of automatic programming
(1) status quo of development of automatic programming
(2) application of automatic programming in the NC system
(3) development trends of automatic programming
3.1.6 introduction and development of DNC concept
(1) status quo of development of DNC technology
(2) application of DNC technology in the NC system
(3) development trends of DNC technology
3.1.7 adoption of programmable logic controller
(1) status quo of development of programmable logic controller
(2) application of programmable logic controller in the NC system
(3) development trends of programmable logic controller
3.1.8 development of sensor technology

(1) status quo of development of sensor technology
(2) application of sensor technology in the NC system
(3) development trends of sensor technology
3.1.9 generation of open technology
(1) status quo of development of open technology
(2) application of open technology in the NC system
(3) development trends of open technology
3.1.10 development of manufacturing technology
(1) status quo of development of manufacturing technology
(2) application of manufacturing technology in the NC system
(3) development trends of manufacturing technology
3.2 analysis of technical level of CNC transformation
3.2.1 selection of NC system of CNC transformation
(1) open-loop CNC system
(2) closed-loop CNC system
(3) semi-closed loop CNC system
3.2.2 modified of functional components during CNC transformation
(1) slide guideway
(2) gear pair
(3) slide screw and ball screw
(4) security
3.2.3 major steps of CNC transformation
(1) determination of transformation program
(2) preparation of transformation technology
(3) implementation of transformation
(4) acceptance and subsequent work
3.2.4 typical cases of CNC transformation
(1) transformation of X53 milling with SIEMENS810M
(2) transformation C6140 lathe with GSK980T and stepper drive system
(3) transformation C6140 lathe with GSK980T and AC servo drive system
(4) transformation of X53 milling with SIEMENS802S
3.2.5 problems of CNC transformation and recommendations
3.3 analysis of development level of international numerical control system technology
3.3.1 status quo of development of international numerical control system technology
(1) rapid development of hardware technology
(2) development of system structure to open style
(3) real-time operating system into CNC
(4) extensive use of fieldbus technology
(5) PLC functions continue to strengthen
(6) communications, networking capabilities continue to expand
(7) digital AC servo into the mainstream
(8) development environment becomes more friendly
(9) related technologies and social service system gradually improve
3.3.2 trends of international new technology of numerical control system
3.3.3 application of new technology in the NC system
(1) application of digital image processing technology
(2) application of automatic programming technology
(3) application of artificial intelligence control technology
3.3.4 development trends of international numerical control system technology
(1) open architecture direction
(2) soft CNC direction
(3) intelligent direction
(4) high reliability direction
(5) composite direction
(6) multi-axis direction
3.4 analysis of development level of China's numerical control system technology
3.4.1 status quo of development of China's numerical control system technology
3.4.2 analysis of the gap between domestic and foreign CNC system technology
(1) main gap in terms of industry technology

(2) major reasons for the gap
3.4.3 trends of China's new technology of numerical control system
3.4.4 development trends of China's numerical control system technology
Chapter 4: Analysis of product market of China's numerical control system industry
4.1 overview of major product markets of the industry
4.1.1 structural characteristics of main products of the industry
4.1.2 overview of major product markets of the industry
4.2 analysis of product market classified by trajectory
4.2.1 analysis of point control CNC system market
4.2.2 analysis of direct control CNC system market
4.2.3 analysis of contouring control CNC system market
4.3 analysis of product market classified by servo system
4.3.1 analysis of open-loop control CNC system market
4.3.2 analysis of semi-closed control CNC system market
4.3.3 analysis of closed-loop CNC system market
4.4 analysis of product market classified by function level
4.4.1 analysis of economical CNC system market
(1) status quo of market development
(2) scale of market demand
(3) market competitive landscape
(4) forecast of the market
4.4.2 analysis of universal CNC system market
(1) status quo of market development
(2) scale of market demand
(3) market competitive landscape
(4) forecast of the market
4.4.3 analysis of high-end CNC system market
(1) status quo of market development
(2) scale of market demand
(3) market competitive landscape
(4) forecast of the market
Chapter 5: Analysis of operation of leading enterprises of China's numerical control system industry
5.1 analysis of overall situation of China's numerical control system enterprises
5.1.1 ranking of scale of numerical control system enterprises
(1) ranking of scale of production
(2) ranking of sales volume
(3) ranking of total profit
5.1.2 analysis of innovation capability of numerical control system enterprises
5.1.3 analysis of comprehensive competitiveness of numerical control system enterprises
(1) description of principal component analysis
(2) evaluation index of comprehensive competitiveness of enterprises
(3) overall competitiveness ranking of enterprises
5.2 research of example enterprises of China's numerical control system industry
5.2.1 GSK CNC Equipment Co., Ltd.
(1) analysis of the company's development process
(2) analysis of the company's numerical control products
(3) analysis of the company's business scope
(4) analysis of the company's scientific achievements
(5) analysis of the company's major customers
(6) the company's educational training and training base
(7) analysis of the company's operation
(8) analysis of the company's development advantages and disadvantages
(9) analysis of investment, merger and restructuring of the company
(10) analysis of the company's latest development trend
5.2.2 Wuhan Huazhong Numerical Control Co.,Ltd.
(1) analysis of the company's development process
(2) analysis of the company's numerical control products
(3) analysis of the company's industrial base

(4) market position of the company's products
(5) analysis of the company's major customers
(6) the company's educational training and training base
(7) analysis of the company's operation
(8) analysis of the company's development advantages and disadvantages
(9) analysis of the company's operation mode
(10) analysis of the company's development strategy
(11) analysis of investment, merger and restructuring of the company
(12) analysis of the company's latest development trend

5.3 analysis of leading enterprises of China's numerical control system industry

5.3.1 Dalian Dasen Numerical Control Technology Development Center Co., Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's numerical control products
(3) analysis of the company's operation
(4) analysis of the company's development advantages and disadvantages
(5) analysis of investment, merger and restructuring of the company
(6) analysis of the company's latest development trend

5.3.2 Beijing KND CNC Technology Co., Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's numerical control products
(3) analysis of the company's operation
(4) analysis of the company's development advantages and disadvantages
(5) analysis of investment, merger and restructuring of the company
(6) analysis of the company's latest development trend

5.3.3 Shenyang High-precision CNC Technology Co., Ltd
(1) brief introduction of the company's development
(2) analysis of the company's numerical control products
(3) analysis of the company's operation
(4) analysis of the company's development advantages and disadvantages
(5) analysis of investment, merger and restructuring of the company
(6) analysis of the company's latest development trend

5.3.4 Shanghai Capital CNC Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's numerical control products
(3) analysis of the company's operation
(4) analysis of the company's development advantages and disadvantages
(5) analysis of investment, merger and restructuring of the company
(6) analysis of the company's latest development trend

5.3.5 Nanjing Huaxing CNC Technology Co., Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's numerical control products
(3) analysis of the company's operation
(4) analysis of the company's development advantages and disadvantages
(5) analysis of investment, merger and restructuring of the company
(6) analysis of the company's latest development trend

5.3.6 Dalian Gona Technology Engineering Co., Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's numerical control products
(3) analysis of the company's operation
(4) analysis of the company's development advantages and disadvantages
(5) analysis of investment, merger and restructuring of the company
(6) analysis of the company's latest development trend

5.3.7 Chengdu Gunt Industrial Co., Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's numerical control products
(3) analysis of the company's operation
(4) analysis of the company's development advantages and disadvantages
(5) analysis of investment, merger and restructuring of the company
(6) analysis of the company's latest development trend

5.3.8 Beijing Aerospace CNC Systems, Inc.
(1) brief introduction of the company's development
(2) analysis of the company's numerical control products
(3) analysis of the company's operation
(4) analysis of the company's development advantages and disadvantages
(5) analysis of investment, merger and restructuring of the company
(6) analysis of the company's latest development trend
5.3.9 Dalian Golded CNC Group Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's numerical control products
(3) analysis of the company's operation
(4) analysis of the company's development advantages and disadvantages
(5) analysis of investment, merger and restructuring of the company
(6) analysis of the company's latest development trend
5.3.10 Jiangsu Renhe New Technology Industrial Co., Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's numerical control products
(3) analysis of the company's operation
(4) analysis of the company's development advantages and disadvantages
(5) analysis of investment, merger and restructuring of the company
(6) analysis of the company's latest development trend
5.3.11 Beijing Catch CNC Equipment Co., Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's numerical control products
(3) analysis of the company's operation
(4) analysis of the company's development advantages and disadvantages
(5) analysis of investment, merger and restructuring of the company
(6) analysis of the company's latest development trend
5.3.12 Shenzhen Shanxing Computer Co., Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's numerical control products
(3) analysis of the company's operation
(4) analysis of the company's development advantages and disadvantages
(5) analysis of investment, merger and restructuring of the company
(6) analysis of the company's latest development trend
5.3.13 Beijing Powerland CNC Technology Co., Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's numerical control products
(3) analysis of the company's operation
(4) analysis of the company's development advantages and disadvantages
(5) analysis of investment, merger and restructuring of the company
(6) analysis of the company's latest development trend
5.3.14 Nanjing Sky Electronic Enterprise Co., Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's numerical control products
(3) analysis of the company's operation
(4) analysis of the company's development advantages and disadvantages
(5) analysis of investment, merger and restructuring of the company
(6) analysis of the company's latest development trend
5.3.15 Shenzhen Goalway Technology Co., Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's numerical control products
(3) analysis of the company's operation
(4) analysis of the company's development advantages and disadvantages
(5) analysis of investment, merger and restructuring of the company
(6) analysis of the company's latest development trend
5.3.16 Nanjing Dadi CNC Technology Co., Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's product structure

(3) analysis of the company's operation
(4) analysis of the company's development advantages and disadvantages
(5) analysis of investment, merger and restructuring of the company
(6) analysis of the company's latest development trend
5.3.17 Nanjing XFD CNC Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's product structure
(3) analysis of the company's operation
(4) analysis of the company's development advantages and disadvantages
(5) analysis of investment, merger and restructuring of the company
(6) analysis of the company's latest development trend
5.3.18 Shenzhen Adtech Technology Co., Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's product structure
(3) analysis of the company's operation
(4) analysis of the company's development advantages and disadvantages
(5) analysis of investment, merger and restructuring of the company
(6) analysis of the company's latest development trend
5.3.19 Guangzhou Zhengteng CNC Technology Co., Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's product structure
(3) analysis of the company's operation
(4) analysis of the company's development advantages and disadvantages
(5) analysis of investment, merger and restructuring of the company
(6) analysis of the company's latest development trend
5.3.20 Beijing Autobase Mechanical and Electrical Equipment Co., Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's product structure
(3) analysis of the company's operation
(4) analysis of the company's development advantages and disadvantages
(5) analysis of investment, merger and restructuring of the company
(6) analysis of the company's latest development trend
5.4 analysis of China's leading enterprises of numerical control system parts
5.4.1 Lanzhou Electric Corporation
(1) brief introduction of the company's development
(2) analysis of the company's product structure
(3) analysis of the company's R&D capability
(4) analysis of the company's sales channels
(5) analysis of the company's operation
(6) analysis of the company's development advantages and disadvantages
(7) analysis of investment, merger and restructuring of the company
(8) analysis of the company's latest development trend
5.4.2 Wuhan Huada New Motor Technology Co., Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's product structure
(3) analysis of the company's R&D capability
(4) analysis of the company's sales channels
(5) analysis of the company's operation
(6) analysis of the company's development advantages and disadvantages
(7) analysis of investment, merger and restructuring of the company
(8) analysis of the company's latest development trend
5.4.3 Changzhou AMEC BMW Motor Co.,Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's product structure
(3) analysis of the company's R&D capability
(4) analysis of the company's sales channels
(5) analysis of the company's operation
(6) analysis of the company's development advantages and disadvantages
(7) analysis of investment, merger and restructuring of the company

(8) analysis of the company's latest development trend
5.4.4 Beijing Chaotongbu Technology Co., Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's product structure
(3) analysis of the company's R&D capability
(4) analysis of the company's sales channels
(5) analysis of the company's operation
(6) analysis of the company's development advantages and disadvantages
(7) analysis of investment, merger and restructuring of the company
(8) analysis of the company's latest development trend
5.4.5 Dalian Electric Group Co., Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's product structure
(3) analysis of the company's R&D capability
(4) analysis of the company's sales channels
(5) analysis of the company's operation
(6) analysis of the company's development advantages and disadvantages
(7) analysis of investment, merger and restructuring of the company
(8) analysis of the company's latest development trend
5.4.6 Beijing Catchet Electrical Technology Co., Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's product structure
(3) analysis of the company's R&D capability
(4) analysis of the company's sales channels
(5) analysis of the company's operation
(6) analysis of the company's development advantages and disadvantages
(7) analysis of investment, merger and restructuring of the company
(8) analysis of the company's latest development trend
5.4.7 Wuhan Gold-age Motor Technology Corp. Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's product structure
(3) analysis of the company's R&D capability
(4) analysis of the company's sales channels
(5) analysis of the company's operation
(6) analysis of the company's development advantages and disadvantages
(7) analysis of investment, merger and restructuring of the company
(8) analysis of the company's latest development trend
5.4.8 Beijing Hollysys Motor Technology Co., Ltd.
(1) brief introduction of the company's development
(2) analysis of the company's product structure
(3) analysis of the company's R&D capability
(4) analysis of the company's sales channels
(5) analysis of the company's operation
(6) analysis of the company's development advantages and disadvantages
(7) analysis of investment, merger and restructuring of the company
(8) analysis of the company's latest development trend
Chapter 6: Forecast of market demand of China's numerical control system industry
6.1 analysis of development of China's CNC machine industry
6.1.1 analysis of development of the international CNC machine industry
(1) status quo of development of the international CNC machine industry
(2) development trends of the international CNC machine market
6.1.2 analysis of development of China's CNC machine market
(1) development environment of China's CNC machine market
(2) status quo of development of China's CNC machine market
(3) analysis of subdivided markets of China's CNC machine
(4) forecast of development of China's CNC machine market
6.2 analysis of China's CNC transformation market
6.2.1 necessity of CNC transformation
(1) from the microscopic view

(2) from the macroscopic view
6.2.2 content and advantages and disadvantages of CNC transformation
(1) foreign rising CNC transformation
(2) content of CNC transformation
(3) advantages and disadvantages of CNC transformation
6.2.3 market of CNC transformation of machine tools and production lines
(1) CNC transformation market
(2) CNC transformation market of imported equipment and production lines
6.2.4 forecast of CNC transformation
(1) analysis of development trends
(2) forecast of market scale during "twelfth-five year" period
6.3 forecast of demand of China's numerical control system industry
6.3.1 analysis of development drivers of the industry
(1) favorable policy support
(2) R & D strength to enhance
(3) need of industrial upgrading
(4) development of downstream industries
6.3.2 forecast of scale of the industry during the "twelfth-five year" period
Chapter 7: Analysis of development trends and investment of China's numerical control system industry
7.1 development trends of China's numerical control system industry
7.2 analysis of risks of investment of China's numerical control system industry
7.2.1 policy risk of the industry
7.2.2 technical risk of the industry
7.2.3 risk of supply and demand of the industry
7.2.4 risk of macro economic fluctuation of the industry
7.2.5 risk of related industries of the industry
7.2.6 risk of product structure of the industry
7.2.7 other risks of the industry
7.3 status quo of investment of China's numerical control system industry and proposals
7.3.1 status quo of investment of the industry
7.3.2 investment proposals for the industry
