

China Intelligent Lighting Industry Development Prospect and Investment Strategic Planning Report, 2013-2017

目 录

CONTENTS

Chapter 1: Development Overview of Intelligent Lighting Industry

1.1 Overview of Intelligent Lighting Industry

- 1.1.1 Definition of Intelligent Lighting Industry
- 1.1.2 Occurrence Background of Intelligent Lighting
 - (1) Occurrence and Development of Intelligent Building
 - (2) Development of Ways to Control Lighting
- 1.1.3 Functions and Features of Intelligent Lighting
 - (1) Functions Achieved by Intelligent Lighting
 - (2) Features of Intelligent Lighting
- 1.1.4 Position and Role of Intelligent Lighting Industry
 - (1) Impact on Future Lighting
 - (2) Impact on Intelligent Home
 - (3) Impact on Urban Development in Future

1.2 Overview of Intelligent Lighting Control System

- 1.2.1 Introduction to Intelligent Lighting Control System Overview
- 1.2.2 Development Stage of Intelligent Lighting Control System
 - (1) Centralized Stage
 - (2) Distributed Stage
 - (3) Early Distributed Stage
 - (4) Dispersed Stage
- 1.2.3 Constitution of Intelligent Lighting Control System
 - (1) Spot Control Equipment
 - (2) Sensor
 - (3) Communication/Signal Transmission System
- 1.2.4 Content of Intelligent Lighting Control System
 - (1) Time Control
 - (2) Auto Brightness Adjustment Control
 - (3) Scene Control
 - (4) Auto On-off Control
 - (5) Emergency Lighting Control
 - (6) Manual Remote Control
- 1.2.5 Functions of Intelligent Lighting Control System
 - (1) Full Automatic Lighting
 - (2) Make Full Use of Natural Light
 - (3) Good Consistency for Illumination
 - (4) Smart Switch of Luminous Environment
 - (5) Energy Saving
 - (6) Extend Life Span of Light Source

1.3 Contrast for Intelligent Lighting and Traditional Lighting

- 1.3.1 Contrast between Intelligent and Traditional Lighting Tools
- 1.3.2 Contrast for Intelligent and Traditional Lighting Circuit Systems
 - (1) Contrast for Single-circuit Control System
 - (2) Contrast for Double-circuit Control System
- 1.3.3 Contrast for Intelligent and Traditional Lighting Control Systems
 - (1) Contrast for Control Model
 - (2) Contrast for Lighting Model
 - (3) Contrast for Management

1.4 Research Department and Method of this Report

- 1.4.1 Introduction to Research Department

1.4.2 Overview of Research Method

Chapter 2: Development Situation of Foreign and Domestic Intelligent Lighting Industry**2.1 Development Situation of Foreign Intelligent Lighting Industry**

2.1.1 Overall Development of Foreign Intelligent Lighting Industry

- (1) Development Overview of LED Lighting
- (2) Development Overview of Green Lighting
- (3) Development Overview of High-end Lighting

2.1.2 Development Situation of US Intelligent Lighting Industry

2.1.3 Development Situation of Canada Intelligent Lighting Industry

2.1.4 Development Situation of Japan Intelligent Lighting Industry

2.1.5 Development Situation of Singapore Intelligent Lighting Industry

2.1.6 Development Situation of South Korea Intelligent Lighting Industry

2.1.7 Development Situation of France Intelligent Lighting Industry

2.1.8 Development Situation of UK Intelligent Lighting Industry

2.2 Analysis of Development Environment for China Intelligent Lighting Industry

2.2.1 Management Regulations for Industry

- (1) Supervision Department
- (2) Policies Related to Industry
 - 1) National Policies
 - 2) Local Policies
- (3) Standards for Industry

2.2.2 Economic Conditions

- (1) International Macro-environment
- (2) Domestic Macro-environment
- (3) Environment for Lighting Industry

2.2.3 Social Environment

- (1) Resident's Consumption Income and Consumption Concept
- (2) Resident's Quality of Life and Energy Saving Concept

2.2.4 Technology

- (1) Development of Lighting Technology
- (2) Smart Control Technology

2.3 Development Situation of China Intelligent Lighting Industry

2.3.1 Overall Information of China Intelligent Lighting Industry

- (1) Start Early
- (2) Low Popularization Rate
- (3) High Degree of Attention

2.3.2 Intelligent Lighting Industry in Regions around China

- (1) Development of Intelligent Lighting in Guangdong
- (2) Development of Intelligent Lighting in Beijing
- (3) Development of Intelligent Lighting in Nanjing
- (4) Development of Intelligent Lighting in Qinghai
- (5) Development of Intelligent Lighting in Hubei
- (6) Development of Intelligent Lighting in Changsha
- (7) Development of Intelligent Lighting in Chongqing
- (8) Development of Intelligent Lighting in Harbin

2.3.3 Development Influencing Factors of China Intelligent Lighting Industry

- (1) Development Driving Factors of Industry
- (2) Development Obstacles for Industry

2.3.4 Development Opportunities for China Intelligent Lighting Industry

- (1) Development of Intelligence Home Accelerates
- (2) Social Demand for Saving

Chapter 3: Analysis of Market Competition for Intelligent Lighting Industry**3.1 Competition for International Market**

3.1.1 Competition Situation of International Intelligent Lighting Industry

- (1) LED Competitive Landscape
- (2) Layout of China Creative Intelligent Lighting Market

3.1.2 Development Trend for International Intelligent Lighting Industry

- (1) Integrated Development Trend for Brand
- (2) Development Trend for Technology

- (3) Development Trend for Personalized Lighting
- (4) Development Trend for Technological Convergence
- 3.1.3 Multinationals' Investment Layout in China's Market
 - (1) NXP's Investment Layout in China
 - 1) Corporate Profile
 - 2) Investment Layout in China
 - (2) Schneider
 - 1) Corporate Profile
 - 2) Investment Layout in China
 - (3) Wieland
 - 1) Corporate Profile
 - 2) Investment Layout in China
 - (4) GE
 - 1) Corporate Profile
 - 2) Investment Layout in China
 - (5) Osram
 - 1) Corporate Profile
 - 2) Investment Layout in China

3.2 Competition for Domestic Market

- 3.2.1 Market Scale of Domestic Intelligent Lighting Industry
- 3.2.2 Competitive Landscape of Domestic Intelligent Lighting Industry
- 3.2.3 Competition Status of Domestic Intelligent Lighting Industry
- 3.2.4 Potential Threats within Domestic Intelligent Lighting Industry

Chapter 4: Analysis of Technology and Product Development of Intelligent Lighting Industry

4.1 Introduction to Key Technologies for Intelligent Lighting Industry

- 4.1.1 Power Line Carrier Technology
 - (1) Basic Concept
 - (2) Foreign Power Line Carrier Communication Technology Status
 - (3) Domestic Power Line Carrier Communication Technology Status
- 4.1.2 Bus Technology
 - (1) Basic Concept
 - (2) Classification
 - (3) Bus Protocol of Intelligent Lighting
- 4.1.3 Wireless Communication Technology
 - (1) Basic Concept
 - (2) Development Trend

4.2 Analysis of Major Intelligent Lighting Control Systems

- 4.2.1 Cable Intelligent Lighting Control System
 - (1) DALI
 - (2) EIB
 - (3) DMX512 and DMX-NET
 - (4) Other Bus Lighting Control Systems
- 4.2.2 Power Line Carrier Lighting Control Systems
 - (1) Profile of Power Line Carrier Lighting Control System
 - (2) Representative Brands of Power Line Carrier Lighting Control System
- 4.2.3 Wireless Intelligent Lighting Systems
 - (1) ZigBee Intelligent Lighting Control System
 - (2) GPRS Intelligent Lighting Control System
 - (3) Other Wireless Intelligent Lighting Control System

4.3 Evaluation Indicators of Selecting Model for Intelligent Lighting Control Products

- 4.3.1 Evaluation on System Structure
- 4.3.2 Evaluation on Control Functions
- 4.3.3 Evaluation on Dimming Performance
- 4.3.4 Evaluation on Power Supply Performance
 - (1) Temperature Performance
 - (2) Power Supply Evaluation Indicators
 - (3) Power Supply Protection
 - (4) Memory Function

- 4.3.5 System Integration and Linkage Evaluation
- 4.3.6 Evaluation on Quality and Reputation
 - (1) Project Cases
 - (2) Quality Certification
 - (3) Quality Assessment
- 4.4 Introduction to Some Typical Intelligent Lighting Control Systems**
 - 4.4.1 Intelligent Lighting System from Dynalite Corporation
 - (1) Structure of System
 - (2) Advantage of System
 - (3) Classification of System
 - 4.4.2 FULL-2WAY Lighting Control System from Panasonic Corporation
 - (1) Working Principle of System
 - (2) Control Methods for System
 - (3) Constitution of System
 - (4) Features of System
 - 4.4.3 Instabus EIB from Siemens Corporation
 - (1) Structure of System
 - (2) Light Control Function
 - (3) Features of Transmission Technology
 - 4.4.4 Other Typical Intelligent Lighting Control Systems
 - (1) Intelligent Environment Lighting System from Hdl Corporation
 - (2) Digital Lighting System from Tridonic Corporation
 - (3) Scene Lighting System from Schneider Kreuznach

Chapter 5: Analysis of Development of Intelligent Lighting Application Fields

5.1 Application Field Overview of Intelligent Lighting

- 5.1.1 For Household - Provide Comfortable Living Space
- 5.1.2 For Business - Improve Energy Saving Efficiency
- 5.1.3 For Public Facility - Achieve Green, Safety and Environmental Protection
- 5.1.4 For Auto Lighting - Realize Curvature Beauty for Vehicle

5.2 Intelligent Lighting Application in Household

- 5.2.1 Development Situation of Home Lighting
- 5.2.2 Household Intelligent Lighting Effects
 - (1) Lighting for Living Room
 - (2) Lighting for Dining Room
 - (3) Lighting for Bed Room
 - (4) Lighting for Bed Room
 - (5) Lighting for Kitchen
 - (6) Lighting for Study Room
 - (7) Lighting for Bathroom
- 5.2.3 Features of Household Intelligent Lighting System
- 5.2.4 Application Status of Household Intelligent Lighting

5.3 Intelligent Lighting Application in Office Working

- 5.3.1 Lighting Demand for Office Building
- 5.3.2 Intelligent Lighting Effect on Office Building
 - (1) Lighting for Office Area
 - (2) Lighting for Functional Zone
 - (3) Lighting for Auxiliary Zone
 - (4) Lighting for Park Lot and Outdoor Lighting
- 5.3.3 Features of Office Building Intelligent Lighting System
- 5.3.4 Application Status of Office Building Intelligent Lighting

5.4 Intelligent Lighting Application in Commerce

- 5.4.1 Application of Intelligent Lighting in Hotel
 - (1) Division of Lighting Zones in Modern Hotel
 - (2) Modern Hotel Demand for Intelligent Lighting
 - (3) Intelligent Lighting Effect on Key Zone of Hotel
- 5.4.2 Application of Intelligent Lighting in Exhibition Venue
 - (1) Light Control Requirement for Exhibition Venue
 - (2) Intelligent Lighting Effect on Regions of Exhibition Venue
- 5.4.3 Application of Intelligent Lighting in Other Commercial Fields

- (1) Application of Intelligent Lighting in Sport Gym
- (2) Application of Intelligent Lighting in Shopping Mall

5.5 Application of Intelligent Lighting in Public Facility

- 5.5.1 Application of Intelligent Lighting in Public Facility
- 5.5.2 Application of Intelligent Lighting in Road, Bridge and Tunnel
- 5.5.3 Application of Intelligent Lighting in Landscaping
- 5.5.4 Application of Intelligent Lighting in School
