

China Intelligent Transportation Industry Report (2016–2021), Market Prospective and Investment Strategy Planning

目 录

CONTENTS

Chapter 1: Summary of the development of Chinese intelligent transportation industry

1.1 definition of intelligent transportation system

- 1.1.1 definition of intelligent transportation system
- 1.1.2 origin of intelligent transportation system
- 1.1.3 construction content of intelligent transportation system
- 1.1.4 analysis of application effect of intelligent transportation system

1.2 analysis of industry chain of intelligent transportation industry

- 1.2.1 composition of intelligent transportation industry chain
- 1.2.2 analysis of downstream demand of intelligent transportation industry
 - (1) development status quo of traffic management industry
 - (2) development status quo of automobile industry
 - (3) development status quo of logistics industry
- 1.2.3 analysis of upstream market of intelligent transportation industry
 - (1) analysis of development of IT industry
 - (2) analysis of development of the electronic components industry
 - (3) analysis of development of new materials industry

1.3 analysis of development environment of intelligent transportation industry

- 1.3.1 analysis of policy environment
 - (1) regulators and management system of the industry
 - (2) laws, regulations and major policies of the industry
 - (3) interpretation of policies of intelligent transportation industry
- 1.3.2 analysis of economic environment
 - (1) analysis of domestic GDP growth
 - (2) analysis of the correlation of intelligent transportation industry and GDP
 - (3) analysis of industrial economic growth
 - (4) analysis of the correlation of intelligent transportation industry and industrial economy
 - (5) investment in fixed assets
 - (6) analysis of the correlation of intelligent transportation industry and fixed asset

investment

- 1.3.3 analysis of technical environment
 - (1) analysis of Things and cloud computing environment
 - (2) application of intelligent transportation technology patents
 - (3) structure of intelligent transportation patent applicants
 - (4) structure of intelligent transportation technology invention patent holders

Chapter 2: Analysis of development of the global intelligent transportation industry

2.1 summary of development of intelligent transportation industry worldwide

- 2.1.1 development process of the global intelligent transportation industry
- 2.1.2 characteristics of development of intelligent transportation in various countries

2.2 development of intelligent transportation industry in main countries

- 2.2.1 analysis of development of ITS market in America
 - (1) analysis of development course of ITS in America
 - (2) analysis of development of ITS market in America
 - (3) analysis of characteristics of the development of ITS in America
 - (4) analysis of ITS strategic trend in America
 - (5) analysis of ITS typical case in America
- 2.2.2 analysis of development of ITS market in Japan
 - (1) analysis of development course of ITS in Japan
 - (2) analysis of development of ITS market in Japan
 - (3) analysis of characteristics of the development of ITS in Japan

- (4) analysis of ITS strategic trend in Japan
- (5) analysis of ITS typical case in Japan
- 2.2.3 analysis of development of ITS market in Europe
 - (1) analysis of development course of ITS in Europe
 - (2) analysis of development of ITS market in Europe
 - (3) analysis of characteristics of the development of ITS in Europe
 - (4) analysis of ITS strategic trend in Europe
 - (5) analysis of ITS typical case in Europe
- 2.2.4 analysis of development of ITS market in South Korea
 - (1) analysis of development course of ITS in South Korea
 - (2) analysis of ITS related technology in South Korea
 - (3) analysis of ITS typical case in South Korea
- 2.2.5 analysis of development of ITS market in Singapore
 - (1) analysis of development course of ITS in Singapore
 - (2) analysis of ITS related technology in Singapore
 - (3) analysis of ITS typical case in Singapore
- 2.2.6 analysis of development of ITS market in Australia
 - (1) analysis of development course of ITS in Australia
 - (2) analysis of ITS related technology in Australia
 - (3) analysis of ITS typical case in Australia
- 2.2.7 analysis of development of ITS market in Malaysia
 - (1) analysis of development course of ITS in Malaysia
 - (2) analysis of ITS related technology in Malaysia
 - (3) analysis of ITS typical case in Malaysia
- 2.2.8 analysis of summary of development experiences of intelligent transportation abroad
- 2.3 operation of multinational companies and analysis of ITS technology applications**
 - 2.3.1 Siemens
 - (1) introduction of Siemens
 - (2) operation of Siemens
 - (3) layout of Siemens in China
 - (4) Siemens' ITS technology application
 - 2.3.2 German PTV Group
 - (1) operation of Siemens
 - (2) layout of Siemens in China
 - (3) Siemens' ITS technology application
 - 2.3.3 American MEAS Sensor Group
 - (1) operation of American MEAS Sensor Group
 - (2) layout of American MEAS Sensor Group in China
 - (3) American MEAS Sensor Group's ITS technology application
 - 2.3.4 American Trafficware Company
 - (1) operation of American Trafficware Company
 - (2) layout of American Trafficware Company in China
 - (3) American Trafficware Company's ITS technology application
 - 2.3.5 Canadian IRD Company
 - (1) operation of Canadian IRD Company
 - (2) layout of Canadian IRD Company in China
 - (3) Canadian IRD Company's ITS technology application

Chapter 3: Analysis of development of Chinese intelligent transportation industry

3.1 overview of development of Chinese intelligent transportation industry

- 3.1.1 analysis of the current traffic industry development in China
 - (1) analysis of passenger traffic and growth of the whole society
 - (2) analysis of cargo traffic and growth of the whole society
 - (3) analysis of fixed asset investment and growth
- 3.1.2 development process of Chinese intelligent transportation industry
- 3.1.3 development status quo of Chinese intelligent transportation industry
 - (1) analysis of the scale of intelligent transportation industry
 - (2) analysis of development of intelligent transportation systems
 - (3) development status quo in terms of the policy level
 - (4) development status quo in terms of the technical level

- (5) development status quo in terms of the investment level
- 3.1.4 analysis of development of Chinese intelligent transportation market
 - (1) analysis of demand of intelligent transportation market
 - (2) analysis of scale of intelligent transportation market
 - (3) competition pattern of intelligent transportation market
- 3.1.5 analysis of cycle of Chinese intelligent transportation industry
 - (1) cycle of urban intelligent transportation industry
 - (2) cycle of intercity intelligent transportation industry
- 3.1.6 analysis of development bottleneck of Chinese intelligent transportation
- 3.2 analysis of intellectualization of urban rail transit industry**
 - 3.2.1 introduction of intelligent system of urban rail transit
 - 3.2.2 policy background of intelligent system of urban rail transit
 - 3.2.3 advantages of intelligent system of urban rail transit
 - 3.2.4 market scale of intelligent system of urban rail transit
 - 3.2.5 competition pattern of intelligent system of urban rail transit
 - (1) analysis of the overall market share of intelligent system
 - (2) market share of passenger information system and integrated security system
 - (3) market share of subdivided market of comprehensive monitoring system

3.3 analysis of intellectualization of city bus

- 3.3.1 status and development trends of urban public transport
- 3.3.2 background of policy of city bus first
- 3.3.3 development model of city bus first
- 3.3.4 development review of intelligent bus system
 - (1) definition of intelligent bus system
 - 1) significance of intelligent bus system
 - 2) composition of intelligent bus system
- 3.3.5 development process of intellectualization of city bus
- 3.3.6 development features of intellectualization of city bus
 - (1) the gap between large cities and small cities in terms of pace of development
 - (2) products of a higher degree of integration to meet customer demands
 - (3) not appear market pattern of dominancy
 - (4) technology is the most critical factor affecting the development of the industry
- 3.3.7 development status quo of intellectualization of city bus
 - (1) market capacity of city bus intellectualization
 - (2) construction of intelligent transportation in major cities
- 3.3.8 development and application of key technologies of urban intelligent transportation

3.4 analysis of freeway intellectualization

- 3.4.1 related overview of highway network charges
- 3.4.2 composition of highway intelligent transportation system
- 3.4.3 toll collection (ETC) system
 - (1) development status quo of China's ETC system
 - 1) analysis of social benefits of ETC system
 - 2) analysis of market scale of ETC system
 - 3) analysis of main companies of ETC system
 - 4) analysis of competition of ETC equipment market

3.5 analysis of waterway transport system intellectualization

- 3.5.1 related overview of information system of water transport management
- 3.5.2 main contents of waterway transport system intellectualization
 - (1) ship intellectualization
 - (2) shore support system intellectualization
 - (3) overall intellectualization of waterway transport system
- 3.5.3 development pattern of information system of waterway transport management

Chapter 4: Analysis of major subsystems of intelligent transportation and product market

4.1 coverage of ITS and introduction of its subsystems

4.2 analysis of Intelligent Traffic Management System (ATMS)

- 4.2.1 analysis of ATMS definition and function
- 4.2.2 analysis of composition structure of ATMS system
- 4.2.3 main application technology of ATMS system
- 4.2.4 main product market of ATMS system

- (1) electronic police
 - 1) LED display
- (2) traffic lights
- (3) traffic signal controller

4.3 analysis of Traffic Information Service System (ATIS)

- 4.3.1 analysis of ATIS definition and function
- 4.3.2 analysis of composition structure of ATIS system
- 4.3.3 main application technology of ATIS system
- 4.3.4 main product market of ATIS system
 - (1) meteorological detector
 - (2) vehicle detector
 - (3) sensor

4.4 analysis of intelligent vehicle control system (AVCS)

- 4.4.1 analysis of AVCS definition and function
- 4.4.2 analysis of composition structure of AVCS system
- 4.4.3 main application technology of AVCS system
- 4.4.4 main product market of AVCS system
 - (1) auto navigation GPS
 - (2) vehicle anti-theft alarm system

4.5 analysis of Intelligent Electronic Toll Collection System (ETC)

- 4.5.1 analysis of ETC definition and function
- 4.5.2 analysis of composition structure of ETC system
- 4.5.3 main application technology of ETC system
- 4.5.4 main product market of ETC system
 - (1) electronic tags
 - (2) drive control system
 - (3) dynamic weighing equipment

4.6 analysis of Intelligent Public Transportation Operations System (APTS)

- 4.6.1 analysis of APTS definition and function
- 4.6.2 analysis of composition structure of APTS system
- 4.6.3 main application technology of APTS system
- 4.6.4 main product market of APTS system
 - (1) electronic stop sign
 - (2) bus IC card

4.7 analysis of Vehicle Scheduling Management System (CVOM)

- 4.7.1 analysis of CVOM definition and function
- 4.7.2 analysis of composition structure of CVOM system
- 4.7.3 main application technology of CVOM system

4.8 analysis of Emergency Rescue System (EMS)

- 4.8.1 analysis of EMS definition and function
- 4.8.2 analysis of composition structure of EMS system
- 4.8.3 main application technology of EMS system

Chapter 5: Development of intelligent transportation industry in key cities

5.1 development of intelligent transportation system in Beijing

- 5.1.1 analysis of motor ownership in Beijing
- 5.1.2 overview of development of intelligent transportation in Beijing
 - (1) overview of the overall development of intelligent transportation in Beijing
 - (2) overview of the development of transportation real-time detection system in Beijing
 - (3) overview of the development of intersection signal coordination control in Beijing
 - (4) overview of the development of B real-time information dissemination system in Beijing
- 5.1.3 development plan of intelligent transportation in Beijing
- 5.1.4 analysis of results of intelligent traffic construction in Beijing
 - (1) results of intelligent road traffic management in Beijing
 - (2) results of intelligent public transport management in Beijing
 - (3) results of intelligent highway management in Beijing
 - (4) results of intelligent travel information service in Beijing
 - (5) results of intelligent electronic toll in Beijing
 - (6) results of intelligent passenger transport in Beijing
- 5.1.5 latest market trends of intelligent transportation in Beijing

5.2 development of intelligent transportation system in Shanghai

5.2.1 analysis of motor ownership in Shanghai

5.2.2 overview of development of intelligent transportation in Shanghai

(1) mainly the construction of facilities and equipment in the early stage

(2) basically complete information management system

5.2.3 analysis of intelligent transportation construction in Shanghai

5.2.4 development plan of intelligent transportation in Shanghai

5.2.5 latest market trends of intelligent transportation in Shanghai

5.3 development of intelligent transportation system in Guangzhou

5.3.1 analysis of motor ownership in Guangzhou
