

China Biomass Power Generation Industry Indepth Research and Investment Strategy Report, 2013–2017

目 录

CONTENTS

Chapter 1: Overview of China Biomass Power Generation Industry

1.1 Definition of Biomass Power Generation Industry

- 1.1.1 Definition of the Industry
- 1.1.2 Classification of the Industry

1.2 Statistical Standards of Biomass Power Generation

- 1.2.1 Statistical Department and Coverage
- 1.2.2 Statistical Methods
- 1.2.3 Data Category

1.3 Analysis of Biomass Resource

- 1.3.1 Category and Characteristics of Biomass
- 1.3.2 Structure of Biomass Resource
 - (1) Agricultural Waste
 - (2) Livestock Excreta
 - (3) Forest Waste
 - (4) Industrial Waste
 - (5) Municipal Solid Waste
- 1.3.3 Cost Research of Biomass Resource
- 1.3.4 Cost Structure of Biomass Resource

1.4 Analysis of Biomass Raw Material Supply System

- 1.4.1 Problems of Biomass Resource Collection
 - (1) Difficult to Collect
 - (2) Difficult to Store and Transport
- 1.4.2 Development Status of Biomass Raw Material Supply System
- 1.4.3 Development Trend of Biomass Raw Material Supply System

1.5 Changing Trend of the Cost of Biomass Power Generation

Chapter 2: Development of Global Biomass Power Generation Industry

2.1 Development Overview of Global Biomass Power Generation Industry

- 2.1.1 Development Overview of the Industry
- 2.1.2 Technology Overview of the Industry
- 2.1.3 Policy Overview of the Industry

2.2 Analysis of Biomass Power Generation Industry in Major Countries

- 2.2.1 Analysis of Biomass Power Generation Industry in America
- 2.2.2 Analysis of Biomass Power Generation Industry in Denmark
- 2.2.3 Analysis of Biomass Power Generation Industry in Finland
- 2.2.4 Analysis of Biomass Power Generation Industry in Sweden
- 2.2.5 Analysis of Biomass Power Generation Industry in British
- 2.2.6 Analysis of Biomass Power Generation Industry in Germany
- 2.2.7 Analysis of Biomass Power Generation Industry in Austria

2.3 Highlights of Global Biomass Power Generation Industry

Chapter 3: Development of 2010 China Biomass Power Generation Industry

3.1 Development of China Biomass Power Generation Industry

- 3.1.1 Development Overview of China Biomass Power Generation Industry
- 3.1.2 Major Development Characteristics of China Biomass Power Generation Industry
- 3.1.3 Management of 2010 Biomass Power Generation Industry
 - (1) Management Benefit of 2010 Biomass Power Generation Industry
 - (2) Profitability of 2010 Biomass Power Generation Industry
 - (3) Operational Capability of 2010 Biomass Power Generation Industry
 - (4) Debt-paying Capability of 2010 Biomass Power Generation Industry
 - (5) Development Capability of 2010 Biomass Power Generation Industry

3.2 Economic Index of 2009–2010 Biomass Power Generation Industry

- 3.2.1 Major Influencing Factors of Economic Benefit to Biomass Power Generation Industry
- 3.2.2 Economic Index of 2009–2010 Biomass Power Generation Industry
- 3.2.3 Economic Index of 2009–2010 Enterprises of different Scales
- 3.2.4 Economic Index of 2009–2010 Enterprises of different Natures

3.3 Balance between Supply and Demand of 2009–2010 Biomass Power Generation Industry

- 3.3.1 Supply of 2009–2010 National Biomass Power Generation Industry
 - (1) Total Output Value of 2009–2010 National Biomass Power Generation Industry
 - (2) Finished Products of 2009–2010 National Biomass Power Generation Industry
- 3.3.2 Supply of 2009–2010 Regional Biomass Power Generation Industry
 - (1) Top 10 Regions in the aspect of Total Output Value
 - (2) Top 10 Regions in the aspect of Finished Product
- 3.3.3 Demand Analysis of National Biomass Power Generation Industry
 - (1) Sales Value of National Biomass Power Generation Industry
 - (2) Sales Revenue of National Biomass Power Generation Industry
- 3.3.4 Demand Analysis of Regional Biomass Power Generation Industry
 - (1) Top 10 Regions in the aspect of Sales Value
 - (2) Top 10 Regions in the aspect of Sales Revenue
- 3.3.5 Production and Marketing Ratio of National Biomass Power Generation Industry

Chapter 4: Market Environment of China Biomass Power Generation Industry

4.1 Agreements of United Nations Climate Change Conference

- 4.1.1 United Nations Framework Convention on Climate Change
- 4.1.2 Kyoto Protocol
- 4.1.3 Copenhagen Conference
- 4.1.4 Cancun Ministerial Conference
- 4.1.5 Influence of the Agreements to Biomass Power Generation Industry

4.2 Policy Environment of the Industry

- 4.2.1 Supervisory System of the Industry
 - (1) Competent Department of the Industry
 - (2) Supervisory Mechanism of the Industry
- 4.2.2 Relevant Policies to the Industry
 - (1) Renewable Energy Law
 - (2) Implementation Advice on Supporting Tax Policy to Develop Bio-energy and Bio-chemical
 - (3) Development Plan on Agricultural Biomass Industry
 - (4) Management on Power Grid Enterprises to Purchase Renewable Energy Electricity by Full Sum
 - (5) Advice on Accelerating the Comprehensive Utilization of Crop Straws
 - (6) Interim Management Procedures on Subsidy to the Utilization of Straws
 - (7) Guidance on Preparation of the Plan to the Straw Comprehensive Utilization
 - (8) Some Policies to Promote the Fast Development of Biomass Industry
 - (9) Notice on Improving the Price Policy of Agricultural and Forest Biomass Power Generation
 - (10) Notice on Management of the Construction of Biomass Power Generation Project
 - (11) Guidance List of Industry Structure Adjustment (2011 Edition)
- 4.2.3 Local Policies of the Industry
 - (1) Policy of Biomass Power Generation in Shandong
 - (2) Policy of Biomass Power Generation in Guangdong
 - (3) Policy of Biomass Power Generation in Sichuan
 - (4) Policy of Biomass Power Generation in Heilongjiang

4.3 Economic Environment of the Industry

- 4.3.1 Analysis of International Macro Economic Environment
- 4.3.2 Analysis of Domestic Macro Economic Environment
- 4.3.3 Analysis of Industry Macro Economic Environment

4.4 Electricity Price of Biomass Power Generation

- 4.4.1 Electricity Price System of Biomass Power Generation
 - (1) Brief Introduction of Fixed Electricity Price System
 - (2) Existing Problems of Fixed Electricity Price System
- 4.4.2 Influence of Fixed Electricity Price System to the Industry
- 4.4.3 Subsidy Program of the Electricity Price to Renewable Energy Power
- 4.4.4 Suggestions to Improve Electricity Price System

4.5 Social Benefit of the Industry

- 4.5.1 Coordinate with National Energy Strategy
- 4.5.2 Coordinate with New Rural Reconstruction
- 4.5.3 Coordinate with Environmental Protection

Chapter 5: Development of China Straw Power Generation Industry

5.1 Overview of Straw Power Generation Industry

- 5.1.1 Production Process of Straw Power Generation
- 5.1.2 Development Mode of Straw Power Generation Industry
 - (1) Straw Purchasing Mode of Power Plant
 - (2) Sales Mode of Straw Power Generation

5.2 Development of Straw Power Generation Industry

- 5.2.1 Status of Foreign Straw Power Generation
- 5.2.2 Status of Domestic Straw Power Generation
- 5.2.3 Supply and Demand of Domestic Straw Power Generation
- 5.2.4 Competition of Domestic Straw Power Generation
- 5.2.5 Construction of Domestic Straw Power Generation Projects
 - (1) Projects Put into Production
 - (2) Projects Plan to Construct

5.3 Comparison of Straw Power Generation and Thermal Power Generation

- 5.3.1 Comparison of Financial Index
- 5.3.2 Comparison of Internal Power Generation Cost
- 5.3.3 Comparison of External Power Generation Cost
- 5.3.4 Sensitive Factors to Electricity Price
- 5.3.5 Economic Benefit of Straw Power Generation

5.4 Problems and Counterplan of Straw Power Generation Industry

- 5.4.1 Existing Problems of Straw Power Generation Industry
 - (1) Over-high Cost of Straw Collection
 - (2) Technology Needed to Further Improve
 - (3) Incomplete National Supporting Policies
- 5.4.2 Counterplan of Straw Power Generation Industry
 - (1) Establish Straw Collection System
 - (2) Improve Technology and Lower Cost
 - (3) Accelerate the Publish of Policy and Standard
 - (4) Establish Long-term and Efficient Incentive Mechanism

5.5 Prospects of Straw Power Generation Industry

- 5.5.1 Entry Barriers of Straw Power Generation Industry
- 5.5.2 Influencing Factors to Straw Power Generation Industry
 - (1) Favorable Factors
 - (2) Unfavorable Factors
- 5.5.3 Prospects of Straw Power Generation Industry

Chapter 6: Development of China Garbage Power Industry

6.1 Overview of Garbage Power Industry

- 6.1.1 Production Process of Garbage Power
- 6.1.2 Necessary Conditions of Garbage Power
- 6.1.3 Development Mode of Garbage Power
 - (1) Purchasing Mode of Garbage Power
 - (2) Sales Mode of Garbage Power
 - (3) 2 Development of Garbage Power Industry
- 6.1.4 Status of Foreign Garbage Power
- 6.1.5 Status of Domestic Garbage Power
 - (1) Operation of Garbage Power Industry Needed to Improve
 - (2) Current Status of Garbage Power Industry
 - (3) Garbage Power Industry in Major Areas
- 6.1.6 Supply and Demand of Domestic Garbage Power
- 6.1.7 Competition of Garbage Power
- 6.1.8 Construction of Domestic Garbage Power Projects
 - (1) Projects Put into Production
 - (2) Projects Plan to Construct

6.2 Economic Benefit of Garbage Power Industry

- 6.2.1 Cost of Garbage Power Industry

6.2.2 Revenue of Garbage Power Industry

- (1) Garbage Disposal Fee
- (2) Income of Electricity Price

6.2.3 Economic Benefit of Garbage Power Industry

6.3 Problems and Suggestions to Garbage Power Industry

6.3.1 Problems of Garbage Power Needed to be Solved

6.3.2 Suggestions to the Development of Biomass Power Generation Industry

6.4 Prospects of Garbage Power Industry

6.4.1 Entry Barriers of Garbage Power Industry

6.4.2 Influencing Factors to Garbage Power Industry

- (1) Favorable Factors
- (2) Unfavorable Factors

6.4.3 Prospects of Garbage Power Industry

Chapter 7: Development of China Biogas Power Generation Industry

7.1 Overview of Biogas Power Generation Industry

7.1.1 Production Process of Biogas Power Generation

7.1.2 Economic Benefit of Biogas Power Generation

7.2 Development of Biogas Power Generation Industry

7.2.1 Status of Foreign Biogas Power Generation

7.2.2 Status of Domestic Biogas Power Generation

7.2.3 Domestic Biogas Power Generation Projects

- (1) Projects Put into Production
- (2) Projects Plan to Construct

7.3 Cases Study of Biogas Constructing Projects

7.3.1 Biogas Engineering of 2MW Centralized Cooperation of Gas Thermoelectricity and Fertilizer

- (1) Engineering Introduction
- (2) Production Process
- (3) Technology Characteristics
- (4) Implementation of Major Projects
- (5) Project Operation
- (6) Summary

7.3.2 Biogas Engineering of 2MW Centralized Cooperation of Thermoelectricity and Fertilizer

- (1) Engineering Introduction
- (2) Major Construction Content
- (3) Technology Characteristics
- (4) Summary

7.4 Economic Benefit of Biogas Power Generation Industry

7.4.1 Cost of Biogas Power Generation Industry

7.4.2 Economic Benefit of Biogas Power Generation Industry

7.5 Obstacles and Suggestions to Biogas Power Generation Industrialization

7.5.1 Major Obstacles of Biogas Power Generation Commercialization

7.5.2 Development Suggestions of Biogas Power Generation Commercialization

7.6 Prospects of Biogas Power Generation Industry

7.6.1 Development Plan of Biogas Power Generation Industry

7.6.2 Prospects Forecast of Biogas Power Generation Industry

Chapter 8: Technology and Equipment Market of China Biomass Power Generation Industry

8.1 Major Equipment Market of the Industry

8.1.1 Analysis of Straw Power Generating Equipment Market

- (1) Water-cooled Vibration Grate Boiler
 - 1) Introduction of Water-cooled Vibration Grate Boiler
 - 2) Problems of Water-cooled Vibration Grate Boiler
 - 3) Competitor Enterprises of Water-cooled Vibration Grate Boiler
- (2) High-low Circulating Fluidized Bed Boiler
 - 1) Introduction of Circulating Fluidized Bed Boiler
 - 2) Characteristics of High-low Circulating Fluidized Bed Boiler
 - 3) Competitor Enterprises of High-low Circulating Fluidized Bed Boiler
- (3) Straw Gasification Furnace

8.1.2 Analysis of Garbage Power Equipment Market

- (1) Garbage Incinerator

- 1) Comparison of Major Garbage Incinerators
- 2) Major Garbage Incinerator Markets
- 3) Major Competitor Enterprises of Garbage Incinerator
- (2) Dusting Equipment
 - 1) Development and Application of Bag-Type Dust Collector
 - 2) Development and Application of Electrostatic Precipitator
 - 3) Comparison of Bag-Type Dust Collector and Electrostatic Precipitator
- 8.1.3 Analysis of Biogas Power Generating Equipment Market
 - (1) R&D and Manufacturing of Biogas Power Generating Set
 - (2) Application of Biogas Power Generating Set
 - (3) Existing Problems of Biogas Power Generating Equipments

8.2 Development of Major Industry Technology

- 8.2.1 Category of Biomass Power Generation Technology
 - (1) Power Generation by Directly Burning Biomass
 - (2) Power Generation by Biomass Gasification
 - (3) Power Generation by Mixed Burning of Biomass and Coal
- 8.2.2 Status of Biomass Power Generation Technology
 - (1) Development of Foreign Biomass Power Generation Technology
 - 1) Foreign Application of Power Generation by Directly Burning Biomass
 - 2) Foreign Application of Power Generation by Biomass Gasification
 - 3) Foreign Application of Power Generation by Mixed Burning of Biomass and Coal
 - (2) Development of Domestic Biomass Power Generation Technology
 - 1) Domestic Application of Power Generation by Directly Burning Biomass
 - 2) Domestic Application of Power Generation by Biomass Gasification
 - 3) Domestic Application of Power Generation by Mixed Burning of Biomass and Coal
- 8.2.3 Economic Benefit of Biomass Power Generation Technology
 - (1) Economic Benefit of Power Generation by Directly Burning Biomass
 - (2) Economic Benefit of Power Generation by Biomass Gasification
 - (3) Economic Benefit of Power Generation by Mixed Burning of Biomass and Coal
- 8.2.4 Comparison of Biomass Power Generation Technologies
- 8.2.5 Trend of Biomass Power Generation Technologies

8.3 Existing Problems of Biomass Power Generation

- 8.3.1 Not yet Form Marketization
- 8.3.2 Lack of Mature Core Technology and Equipment
- 8.3.3 High Cost of Power Generating Operation
- 8.3.4 Biomass Resource Difficult to Store

Chapter 9: Leading Enterprises of China Biomass Power Generation Industry

9.1 Management Analysis of Leading Biomass Power Generation Enterprises

- 9.1.1 Management Analysis of Fuchunjiang Environmental Thermoelectric Co., Ltd.
 - (1) Brief Analysis of Enterprise Development
 - (2) Analysis of Enterprise's Major Business
 - (3) Analysis of Enterprise's Equipment and Technological Level
 - (4) Analysis of Enterprise Management
 - 1) Analysis of Major Economic Index
 - 2) Analysis of Enterprise Profitability
 - 3) Analysis of Enterprise Operational Capability
 - 4) Analysis of Enterprise Debt-paying Ability
 - 5) Analysis of Enterprise Development Capability
 - (5) SWOT Analysis of Enterprise Management
 - (6) Analysis of Enterprise Investment, Merger and Reconstruction
 - (7) Analysis of Enterprise Latest Development Trend
