

Chinese Subway Industry Report (2013–2020), Development Forecast and Investment Strategic Planning

目 录

CONTENTS

Chapter 1: Environment for investment and construction of China' s subway industry

1.1 analysis of policy environment of subway industry

- 1.1.1 development planning of subway industry
- 1.1.2 application conditions of subway project
- 1.1.3 main policies of subway industry

1.2 analysis of economic environment of subway Industry

- 1.2.1 GDP growth
- 1.2.2 scale of social financing

1.3 analysis of technical environment of subway industry

- 1.3.1 status quo of development of domestic technology
 - (1) construction technology
 - (2) vehicle equipment technology
 - (3) communication signal system
 - (4) power monitoring system
- 1.3.2 technological progress and development trends
 - (1) progress of construction technology and development trends
 - (2) progress of vehicle equipment technology and development trends
 - (3) progress of communication signal system technology and development trends
 - (4) progress of power monitoring system technology and development trends
 - (5) development trends of energy-saving technology

1.4 analysis of social environment of subway industry

- 1.4.1 acceleration of China' s urbanization process
 - (1) status quo of development of urbanization
 - (2) development trends of urban development
 - (3) the demand of urbanization for the industry
- 1.4.2 gap of regional economic development is narrowing
- 1.4.3 popular trend of tourism development

1.5 opportunities and threats of subway industry

- 1.5.1 opportunities of subway industry
- 1.5.2 threats of subway industry

Chapter 2: Status quo of construction and investment of China' s subway industry

2.1 overview of development of China' s subway industry

- 2.1.1 traffic volume of subway industry
- 2.1.2 line density of subway industry
- 2.1.3 operation mileage of subway industry
- 2.1.4 transport planning of subway industry

2.2 analysis of the development of China' s subway construction

- 2.2.1 analysis of China' s subway project
 - (1) construction period of subway project
 - (2) construction costs of subway project
- 2.2.2 analysis of construction model of subway project
 - (1) design and management model
 - (2) joint development model of subway and real estate
- 2.2.3 analysis of competition of subway construction industry
 - (1) pattern of subway construction industry
 - (2) market pattern of subway shield machine
- 2.2.4 analysis of progress of subway project construction

2.3 analysis of the development of China' s subway equipment

- 2.3.1 status quo of subway equipment market

- (1) barriers to enter subway equipment industry
- (2) status quo of localization of subway equipment
- 2.3.2 analysis of development of subway vehicle
 - (1) analysis of subway vehicle scale
 - (2) analysis of subway vehicle demand
 - (3) market competition pattern of subway transport vehicles
 - (4) trends of technology product of subway vehicle
- 2.3.3 analysis of development of subway electrical equipment
- 2.3.4 analysis of market of subway intelligent products
 - (1) analysis of scale of subway intelligentization market
 - (2) analysis of competition of subway intelligentization market
 - (3) development trends of subway intelligent systems
- 2.4 analysis of management and operation of China's subway**
 - 2.4.1 analysis of model of subway construction and operation
 - (1) model of subway construction and operation
 - (2) examples of model of subway construction and operation
 - 2.4.2 analysis of management model of subway operator
 - (1) management model of subway operator
 - (2) business model of subway operator
 - 2.4.3 analysis of profit-creating factor of subway operator

Chapter 3: Status quo of construction of subway in major cities at home and abroad and comparison

3.1 development of subway in major foreign cities

- 3.1.1 development of subway in New York
 - (1) development course of subway in New York
 - (2) status quo of development of subway in New York
 - (3) line layout of subway in New York
 - (4) main characteristics of subway in New York
- 3.1.2 development of subway in Washington
 - (1) development course of subway in Washington
 - (2) status quo of development of subway in Washington
 - (3) line layout of subway in Washington
 - (4) main characteristics of subway in Washington
- 3.1.3 development of subway in Tokyo
 - (1) development course of subway in Tokyo
 - (2) status quo of development of subway in Tokyo
 - (3) line layout of subway in Tokyo
 - (4) main characteristics of subway in Tokyo
- 3.1.4 development of subway in Osaka
 - (1) development course of subway in Osaka
 - (2) status quo of development of subway in Osaka
 - (3) line layout of subway in Osaka
 - (4) main characteristics of subway in Osaka
- 3.1.5 development of subway in Seoul
 - (1) development course of subway in Seoul
 - (2) status quo of development of subway in Seoul
 - (3) line layout of subway in Seoul
 - (4) main characteristics of subway in Seoul
- 3.1.6 development of subway in Moscow
 - (1) development course of subway in Moscow
 - (2) status quo of development of subway in Moscow
 - (3) line layout of subway in Moscow
 - (4) main characteristics of subway in Moscow
- 3.1.7 development of subway in London
 - (1) development course of subway in London
 - (2) status quo of development of subway in London
 - (3) line layout of subway in London
 - (4) main characteristics of subway in London
- 3.1.8 development of subway in Paris

- (1) development course of subway in Paris
- (2) status quo of development of subway in Paris
- (3) line layout of subway in Paris
- (4) main characteristics of subway in Paris
- 3.1.9 development of subway in Berlin
 - (1) development course of subway in Berlin
 - (2) status quo of development of subway in Berlin
 - (3) line layout of subway in Berlin
 - (4) main characteristics of subway in Berlin
- 3.1.10 development of subway in Madrid
 - (1) development course of subway in Madrid
 - (2) status quo of development of subway in Madrid
 - (3) line layout of subway in Madrid
 - (4) main characteristics of subway in Madrid
- 3.2 development of subway in major domestic cities**
 - 3.2.1 development of subway in Beijing
 - (1) developments of planning and construction of subway in Beijing
 - (2) demand for subway and developments of bidding and purchasing
 - (3) newly-opened subway lines in Beijing
 - (4) operation of subway market in Beijing
 - 3.2.2 development of subway in Shanghai
 - (1) developments of planning and construction of subway in Shanghai
 - (2) demand for subway and developments of bidding and purchasing
 - (3) newly-opened subway lines in Shanghai
 - (4) operation of subway market in Shanghai
 - 3.2.3 development of subway in Guangzhou
 - (1) developments of planning and construction of subway in Guangzhou
 - (2) demand for subway and developments of bidding and purchasing
 - (3) newly-opened subway lines in Guangzhou
 - (4) operation of subway market in Guangzhou
 - 3.2.4 development of subway in Shenzhen
 - (1) developments of planning and construction of subway in Shenzhen
 - (2) model of subway construction in Shenzhen
 - (3) demand for subway and developments of bidding and purchasing
 - (4) newly-opened subway lines in Shenzhen
 - (5) operation of subway market in Shenzhen
 - (6) main development strategies of subway in Shenzhen
 - 3.2.5 development of subway in Tianjin
 - (1) construction of subway lines in Tianjin
 - (2) operation of subway market in Tianjin
 - (3) development planning of subway in Tianjin
 - 3.2.6 development of subway in Chongqing
 - (1) construction of subway lines in Chongqing
 - (2) operation of subway market in Chongqing
 - (3) development planning of subway in Chongqing
 - 3.2.7 development of subway in Chengdu
 - (1) construction of subway lines in Chengdu
 - (2) operation of subway market in Chengdu
 - (3) development planning of subway in Chengdu
 - 3.2.8 development of subway in Dalian
 - (1) construction of subway lines in Dalian
 - (2) operation of subway market in Dalian
 - (3) outlook for development of subway in Dalian
 - 3.2.9 development of subway in Nanjing
 - (1) construction of subway lines in Nanjing
 - (2) operation of subway market in Nanjing
 - (3) impact of subway on real estate market in Nanjing
 - (4) development planning of future subway in Nanjing
 - 3.2.10 development of subway in Wuhan

- (1) construction of subway lines in Wuhan
- (2) operation of subway market in Wuhan
- (3) outlook for development of subway in Wuhan
- 3.2.11 development of subway in Hangzhou
 - (1) construction of subway lines in Hangzhou
 - (2) economic effect of subway in Hangzhou
 - (3) development planning of subway in Hangzhou
- 3.2.12 development of subway in Changchun
 - (1) construction of subway lines in Changchun
 - (2) operation of subway market in Changchun
 - (3) development planning of subway in Changchun
- 3.2.13 development of subway in Shenyang
 - (1) construction of subway lines in Shenyang
 - (2) operation of subway market in Shenyang
 - (3) development planning of subway in Shenyang
- 3.2.14 development of subway in Xi'an
 - (1) construction of subway lines in Xi'an
 - (2) operation of subway market in Xi'an
 - (3) development planning of subway in Xi'an
- 3.2.15 development of subway in Harbin
 - (1) construction of subway lines in Harbin
 - (2) economic effect of subway in Harbin
 - (3) development planning of subway in Harbin
- 3.2.16 overall development of subway in other cities
 - (1) developments of planning and construction of subway in other cities
 - (2) newly opened subway lines in other cities
 - (3) vehicle demand and developments of bidding and purchasing in other cities

3.3 comparison of status quo of construction of subway in major cities at home and abroad

- 3.3.1 comparison of main construction parties
- 3.3.2 comparison of subway quantity
- 3.3.3 comparison of subway layout
- 3.3.4 comparison of subway construction and operation model

3.4 implications of construction of subway in foreign major cities for China's urban subway construction

- 3.4.1 for China's first-tier cities on the quantity of subway
- 3.4.2 for China's second-tier cities on the development of subway
- 3.4.3 for China's subway layout
- 3.4.4 for China's subway construction and operation model
- 3.4.5 for China's full development of subway economy

Chapter 4: Analysis of representative enterprises of China's subway industry

4.1 analysis of operation of main enterprises in subway construction market

- 4.1.1 China Railway Group Limited
 - (1) brief introduction of the company's development
 - (2) analysis of the company's major economic indicators
 - (3) analysis of the company's profit-creating capability
 - (4) analysis of the company's operation capability
 - (5) analysis of the company's solvency capability
 - (6) analysis of the company's development capability
 - (7) subway line construction
 - (8) analysis of advantages of the company's competition
 - (9) analysis of the company's latest developments
- 4.1.2 China Railway Construction Corporation Limited
 - (1) brief introduction of the company's development
 - (2) analysis of the company's major economic indicators
 - (3) analysis of the company's profit-creating capability
 - (4) analysis of the company's operation capability
 - (5) analysis of the company's solvency capability
