

China Aviation Logistics Industry Report (2016–2021), Prospect and Investment Forecast

目 录

CONTENTS

Chapter 1: Background of development of China aviation logistics industry

1.1 analysis of definition and development process of aviation logistics industry

1.1.1 related definitions of aviation logistics industry

- (1) definition of aviation logistics industry
- (2) definition of aviation logistics enterprise

1.1.2 classification and characteristics of aviation logistics

- (1) analysis of classification of aviation logistics
- (2) analysis of characteristics of aviation logistics
- (3) significance of development of aviation logistics

1.1.3 analysis of the development course of aviation logistics

- (1) early stage of development of aviation logistics
- (2) period of large-scale development of aviation logistics
- (3) period of professional development of aviation logistics

1.2 analysis of development environment of aviation logistics industry

1.2.1 analysis of policy environment of the industry

- (1) analysis of related policies and regulations
- (2) analysis of related development planning

1.2.2 analysis of economic environment of the industry

- (1) analysis of international macroeconomic environment
- (2) analysis of domestic macro economy

1.2.3 analysis of technology environment of the industry

- (1) application of RFID technology in aviation logistics
- (2) development of aviation IT systems
- (3) analysis of related models of cargo plane
- (4) application of aviation logistics equipment and technology
- (5) management of supply chain of aviation logistics

1.3 analysis of development of related industries of China aviation logistics industry

1.3.1 analysis of development of air transport industry

- (1) analysis of development process of air transport industry
- (2) analysis of operation status quo of air transport industry
- (3) analysis of development trends of air transport industry

1.3.2 the overall development of China's logistics industry

- (1) overview of development of logistics industry
- (2) analysis of operation of logistics industry
- (3) forecast of development of the logistics industry during the twelfth-five year period

Chapter 2: Analysis of development of international aviation logistics industry

2.1 analysis of operation of international air cargo

2.1.1 analysis of the global air cargo traffic

- (1) overall global air cargo
- (2) operation of regional air cargo
- (3) market assessment of global air cargo

2.1.2 development of global air cargo alliance

2.1.3 change of the global air cargo industry

2.2 analysis of competition pattern of international aviation logistics industry

2.2.1 ranking of quantity of shipment of major airlines

2.2.2 ranking of freighters of major airlines

2.2.3 freight network layout of major airlines

2.3 analysis of operation of major international air logistics companies

2.3.1 FedEx

- (1) analysis of the company's development
- (2) analysis of the company's operation
- (3) analysis of the company's expansion history
- (4) analysis of the company's services in China
- (5) analysis of advantages of the company's aviation logistics
- 2.3.2 UPS
 - (1) analysis of the company's development
 - (2) analysis of the company's operation
 - (3) analysis of the company's expansion history
 - (4) analysis of the company's services in China
 - (5) analysis of advantages of the company's aviation logistics
- 2.3.3 Cathay Pacific Airways
 - (1) analysis of the company's development
 - (2) analysis of the company's operation
 - (3) analysis of the company's expansion history
 - (4) analysis of the company's services in China
 - (5) analysis of advantages of the company's aviation logistics
- 2.3.4 Korean Air
 - (1) analysis of the company's development
 - (2) analysis of the company's operation
 - (3) analysis of the company's expansion history
 - (4) analysis of the company's services in China
 - (5) analysis of advantages of the company's aviation logistics
- 2.3.5 Emirates Airlines
 - (1) analysis of the company's development
 - (2) analysis of the company's operation
 - (3) analysis of the company's expansion history
 - (4) analysis of the company's services in China
 - (5) analysis of advantages of the company's aviation logistics
- 2.3.6 Lufthansa
 - (1) analysis of the company's development
 - (2) analysis of the company's operation
 - (3) analysis of the company's expansion history
 - (4) analysis of the company's services in China
 - (5) analysis of advantages of the company's aviation logistics
- 2.3.7 Singapore Airlines
 - (1) analysis of the company's development
 - (2) analysis of the company's operation
 - (3) analysis of the company's expansion history
 - (4) analysis of the company's services in China
 - (5) analysis of advantages of the company's aviation logistics
- 2.3.8 Cargolux
 - (1) analysis of the company's development
 - (2) analysis of the company's operation
 - (3) analysis of the company's expansion history
 - (4) analysis of the company's services in China
 - (5) analysis of advantages of the company's aviation logistics

Chapter 3: Analysis of development of China's aviation logistics industry

3.1 analysis of operation of China's aviation logistics

- 3.1.1 analysis of air cargo traffic
- 3.1.2 analysis of air cargo turnover
- 3.1.3 analysis of aviation airport traffic
- 3.1.4 analysis of air cargo configuration
- 3.1.5 analysis of operation efficiency of aviation logistics
- 3.1.6 analysis of types of air cargo transport
- 3.1.7 forecast of aviation logistics in.....2013

3.2 analysis of competition of subdivided segments of aviation logistics

- 3.2.1 analysis of main subdivided segments of the industry
 - (1) transport

- (2) airport
- (3) agent
- 3.2.2 analysis of competition in transport
 - (1) analysis of major transport companies
 - (2) cargo aircraft configuration
 - (3) analysis of freight revenue
 - (4) comparative analysis of freight strength
- 3.2.3 analysis of competition of airport
 - (1) layout of major aviation airports
 - (2) analysis of airport cargo throughput
 - (3) airport cargo facilities
- 3.2.4 analysis of competition of agency
 - (1) major freight forwarding companies
 - (2) operation income of freight forwarding
 - (3) bargaining power of freight forwarding companies

3.3 analysis of management of sales channels of China aviation logistics

- 3.3.1 analysis of status quo of sales channels of aviation logistics
- 3.3.2 comparative analysis of different sales channels
- 3.3.3 analysis of value-added management of distribution channels
- 3.3.4 analysis of value-added management of direct sales channels

3.4 analysis of the problems of China's aviation logistics industry

- 3.4.1 analysis of problems of aviation logistics industry
 - (1) one-way air cargo logistics
 - (2) extension competition of delivery network
 - (3) imbalance of air passenger transport and freight transport
 - (4) confusion of air cargo market management
- 3.4.2 analysis of problems of aviation logistics companies
 - (1) service chain and value-added issues
 - (2) analysis of market adaptability
 - (3) analysis of cargo terminal construction
 - (4) market integration of enterprises
 - (5) analysis of overall operation efficiency
 - (6) analysis of information resource of service chain
- 3.4.3 analysis of the gap between China's aviation logistics and foreign aviation logistics

Chapter 4: Analysis of development models of Chinese aviation logistics industry

4.1 development model of balance of both passenger and freight

- 4.1.1 introduction of model of balance of both passenger and freight
- 4.1.2 advantages of model of balance of both passenger and freight
- 4.1.3 analysis of Southern Airlines' balance of both passenger and freight
 - (1) the company's freight development strategy
 - (2) the company's cargo revenue
 - (3) the company's sales channels
 - (4) the company's cargo service quality

4.2 analysis of development model of specialized freight

- 4.2.1 introduction of model of specialized freight
- 4.2.2 classification of model of specialized freight
- 4.2.3 advantages of model of specialized freight
- 4.2.4 development of New China Cargo Airlines
 - (1) the company's freight development strategy
 - (2) the company's service products
 - (3) the company's cargo marketing
- 4.2.5 development of Air China Cargo
 - (1) the company's freight development strategy
 - (2) the company's service products
 - (3) the company's cargo marketing

4.3 analysis of the development model of integrated logistics provider

- 4.3.1 introduction of the model of integrated logistics provider
- 4.3.2 advantages of the model of integrated logistics provider
- 4.3.3 analysis of integrated logistics services of FedEx

- (1) analysis of the development process of FedEx
- (2) analysis of FedEx transport performance
- (3) analysis of integration of FedEx
- (4) summary of FedEx integrated logistics

4.4 analysis of the development model of aviation airport logistics

- 4.4.1 analysis of operation model of Hong Kong airport
 - (1) logistics operation of Hong Kong airport
 - (2) analysis of logistics operation model of Hong Kong airport
- 4.4.2 analysis of operation model of Incheon airport
 - (1) logistics operation of Incheon airport
 - (2) analysis of operation model of Incheon airport

4.5 analysis of business model innovation of aviation logistics

- 4.5.1 analysis of competition dilemma of aviation logistics
- 4.5.2 analysis of the need for business model innovation
- 4.5.3 analysis of innovation path of business model
 - (1) analysis of concept innovation
 - (2) analysis of market innovation
 - (3) analysis of product innovation
 - (4) analysis of organization innovation

Chapter 5: Analysis of integration of service chain of Chinese aviation logistics industry

5.1 analysis of service chain of aviation logistics industry

- 5.1.1 operation procedure of aviation logistics industry
- 5.1.2 composition of service chain of aviation logistics industry
- 5.1.3 characteristics of the service chain of aviation logistics industry

5.2 analysis of success factors of aviation logistics industry

- 5.2.1 success factor based on the traditional freight
 - (1) route coverage
 - (2) ground transport capacity
 - (3) customer relationship
 - (4) IT
 - (5) value-added service capability
- 5.2.2 success factor based on air express
 - (1) transport capacity
 - (2) process efficiency
 - (3) brand effect
 - (4) IT system
 - (5) quality of service

5.3 analysis of motivation for service chain integration of aviation logistics

- 5.3.1 bottlenecks of the service chain of aviation logistics
 - (1) split of service chain
 - (2) lack of coordination of logistics operation
 - (3) freight infrastructure lags behind
