

# China Shale Gas Industry Report (2016–2021), Market Forecast and Investment Strategic Planning

## 目 录

### CONTENTS

#### Chapter 1: Analysis of shale gas resource potential

- 1.1 definition of shale gas industry
- 1.2 strategic positioning of shale gas
  - 1.2.1 status quo of oil and gas resource consumption in China
  - 1.2.2 China's dependence on foreign oil and gas resources
  - 1.2.3 position of natural gas in the energy structure in China
  - 1.2.4 China's development potential of unconventional gas
  - 1.2.5 China will usher in a golden age of shale gas
- 1.3 evaluation and optimization of shale gas resource potential
  - 1.3.1 process and outcome of evaluation of resource potential
  - 1.3.2 assessment and optimization of resource potential
    - (1) national shale gas resource potential
    - (2) upper Yangtze and Yunnan-Guizhou-Guangxi area
    - (3) middle and lower Yangtze and Southeast China
    - (4) North China and Northeast China
    - (5) North West China

#### Chapter 2: Status quo of shale gas exploration and development and objectives of planning

- 2.1 support policy of shale gas exploration and development
- 2.2 status quo of shale gas exploration and development and utilization
  - 2.2.1 status quo of resource survey
  - 2.2.2 status quo of resource management
  - 2.2.3 status quo of resource exploration
  - 2.2.4 status quo of foreign cooperation
  - 2.2.5 status quo of scientific and technological breakthroughs
- 2.3 analysis of model of shale gas exploration and development
  - 2.3.1 model of output demonstration
  - 2.3.2 model of block bidding
- 2.4 analysis and plan of bidding for exploration rights of shale gas
  - 2.4.1 analysis of first-round bidding for exploration rights of shale gas
  - 2.4.2 analysis of second-round bidding for exploration rights of shale gas
  - 2.4.3 plan of third-round bidding for exploration rights of shale gas
- 2.5 goals of planning of shale gas exploration and development and outlook
  - 2.5.1 goals of planning of exploration and development during the twelfth-five year period
  - 2.5.2 key tasks of exploration and development during the twelfth-five year period
    - (1) investigation and evaluation of the resource potential
    - (2) science and technology research
    - (3) exploration and development layout
  - 2.5.3 prospects of planning of shale gas exploration and development during the thirteenth-five year period

#### Chapter 3: Analysis of cost of shale gas development and pricing mechanism

- 3.1 estimation of cost of shale gas development
  - 3.1.1 cost of shale gas development of typical enterprises
  - 3.1.2 theoretical estimation of cost of production of shale gas
  - 3.1.3 cost of single well development of shale gas
- 3.2 analysis of breakeven price of shale gas
  - 3.2.1 analysis of single factor sensitivity
  - 3.2.2 analysis of dual-factor sensitivity
- 3.3 formation mechanism of shale gas price
  - 3.3.1 formation mechanism of natural gas price

### 3.3.2 main problems of natural gas pricing system

## Chapter 4: Analysis of market of shale gas exploration and development equipment and service

### 4.1 analysis of process of shale gas exploration and development

#### 4.1.1 analysis of process of shale gas exploration and development

#### 4.1.2 analysis of protection of shale gas exploration and development

### 4.2 analysis of market of shale gas exploration and development core equipment

#### 4.2.1 analysis of market of drilling equipment

##### (1) main competitive enterprises

##### (2) status quo of product application

##### (3) analysis of gross margin of products

##### (4) forecast of market capacity of products

#### 4.2.2 analysis of market of logging equipment

##### (1) main competitive enterprises

##### (2) status quo of product application

##### (3) analysis of gross margin of products

##### (4) forecast of market capacity of products

#### 4.2.3 analysis of market of fracturing equipment

##### (1) main competitive enterprises

##### (2) status quo of product application

##### (3) analysis of gross margin of products

##### (4) forecast of market capacity of products

### 4.3 analysis of market of shale gas exploration and development services

#### 4.3.1 analysis of market of shale gas drilling service

#### 4.3.2 analysis of market of shale gas logging service

#### 4.3.3 analysis of market of shale gas fracturing service

## Chapter 5: Analysis of technology of shale gas exploration and development

### 5.1 evaluation technology of shale gas area

#### 5.1.1 evaluation technology of favorable target areas of shale gas

#### 5.1.2 evaluation technology of shale gas reservoir

### 5.2 methods for determination of content of shale gas

#### 5.2.1 methods for determination of content of international shale gas

##### (1) natural desorption

##### 1) SCAL assay

##### 2) EGI.UTAH assay

#### 5.2.2 methods for determination of content of domestic shale gas

##### (1) methods for determination of the early stage of Langfang

##### (2) methods for determination of the current stage of Langfang

#### 5.2.3 comparison of domestic and foreign methods for determination

#### 5.2.4 ideas of methods for determination of domestic shale gas

### 5.3 shale gas horizontal drilling technology

#### 5.3.1 advantages of horizontal wells

#### 5.3.2 considerations of deployment of horizontal well

#### 5.3.3 to determine the location and direction of horizontal well bore

#### 5.3.4 cluster drilling of horizontal well and well construction

#### 5.3.5 three core technologies of horizontal wells

##### (1) underbalanced drilling technology

##### (2) controlled pressure drilling technology

##### (3) rotary steerable drilling technology

#### 5.3.6 Horizontal Well Drilling Fluid System

### 5.4 shale gas horizontal well fracturing technology

#### 5.4.1 crack design and fracturing monitoring

#### 5.4.2 fracturing fluids and additives

#### 5.4.3 fracturing technology and process

##### (1) multi-stage fracturing

##### (2) water fracturing

##### (3) synchronization fracturing

##### (4) hydraulic fracturing injection

##### (5) refracturing

- (6) Comparative analysis of different fracturing
- 5.4.4 optimization of content of fracturing process
- 5.4.5 fracturing supporting technologies
  - (1) perforation optimization
  - (2) easy drilling bridge plugs
  - (3) flowback after pressure
  - (4) fracture monitoring technology

#### 5.5 direction of research of shale gas development technology

### Chapter 6: Progress and planning of shale gas exploration and development in key areas

#### 6.1 exploration and development progress and planning of shale gas in Sichuan

- 6.1.1 analysis of resource potential of shale gas in Sichuan
- 6.1.2 exploration and development subjects and progress of shale gas in Sichuan
- 6.1.3 exploration and development investment and planning of shale gas in Sichuan

#### 6.2 exploration and development progress and planning of shale gas in Chongqing

- 6.2.1 analysis of resource potential of shale gas in Chongqing
