

China Membrane Industry Indepth Research and Investment Strategy Planning Report, 2013-2017

目 录

CONTENTS

Chapter 1: Development Environment Analysis of China Membrane Industry

1.1 Overview of China Membrane Industry

- 1.1.1 Membrane and its Separation Principles
- 1.1.2 Main Categories of Membrane
- 1.1.3 Water Treatment Technologies for Membrane

1.2 Policy Environment Analysis of China Membrane Industry

- 1.2.1 Technological Standard for Membrane Industry
- 1.2.2 Policies and Regulations for Membrane Industry
 - (1) Supporting Policies for Membrane Industry
 - (2) Supporting Policies for Sea Water Desalinization
 - (3) Supporting Policies for Sewage Resources

1.3 Analysis of Scientific Research Environment of China Membrane Industry

- 1.3.1 Chinese “973” Program
- 1.3.2 Chinese “863” Program
- 1.3.3 “Eleventh Five-year” National Scientific and Technological Support Program
- 1.3.4 Natural Science Foundation of China
- 1.3.5 Key Scientific and Technological Special Project - “Water Pollution Control and Treatment”
- 1.3.6 Local Governmental Major Scientific and Technological Special Projects
- 1.3.7 “Twelfth Five-year” Industrial Technology Innovation Planning
- 1.3.8 National Environmental Protection “Twelfth Five-year” Science and Technology Development Plan
- 1.3.9 National “Twelfth Five-year” Science and Technology Development Plan

1.4 Social Environment Analysis of China Membrane Industry

- 1.4.1 China Energy Environment Status
- 1.4.2 China Water Resource Shortage Problems
- 1.4.3 Analysis of China Water Pollution

Chapter 2: Analysis of Upstream and Downstream Industrial Chain of China Membrane Industry

2.1 Analysis of China Membrane Industry's Industrial Chain

2.2 Analysis of China Membrane Industry's Downstream Demand Market

- 2.2.1 Analysis of Gray-water Recycle Market
- 2.2.2 Analysis of Sea Water Desalinization Market
- 2.2.3 Analysis of Drinking Water Market
- 2.2.4 Analysis of Industrial Water Saving Market

2.3 Analysis of China Membrane Industry's Downstream Raw Materials Market

- 2.3.1 Overview of China Membrane Materials Market
 - (1) Types Analysis of China Membrane Materials
 - (2) Modification Analysis of China Membrane Materials
 - (3) Latest Progress in Membrane Materials
- 2.3.2 Analysis of China Main Membrane Markets
 - (1) Analysis of PVDF Market
 - 1) Application
 - 2) Supply and Demand Status
 - 3) Price Trend
 - 4) Main Manufacturing Enterprises
 - (2) Analysis of PES Market
 - 1) Application
 - 2) Supply and Demand Status

- 3) Price Trend
- 4) Main Manufacturing Enterprises
- (3) Analysis of PE Market
 - 1) Application
 - 2) Supply and Demand Status
 - 3) Price Trend
 - 4) Main Manufacturing Enterprises
- (4) Analysis of PP Market
 - 1) Application
 - 2) Supply and Demand Status
 - 3) Price Trend
 - 4) Main Manufacturing Enterprises
- (5) Analysis of CA Market
 - 1) Application
 - 2) Supply and Demand Status
 - 3) Price Trend
 - 4) Main Manufacturing Enterprises
- (6) Analysis of PTFE Market
 - 1) Application
 - 2) Supply and Demand Status
 - 3) Price Trend
 - 4) Main Manufacturing Enterprises
- (7) Analysis of PA Market
 - 1) Application
 - 2) Supply and Demand Status
 - 3) Price Trend
 - 4) Main Manufacturing Enterprises
- (8) Analysis of PSF Market
 - 1) Application
 - 2) Supply and Demand Status
 - 3) Price Trend
 - 4) Main Manufacturing Enterprises
- 2.3.3 Analysis of China Other Membrane Materials Markets
 - (1) Analysis of PAN Market
 - (2) Analysis of NC Market
 - (3) Analysis of PI Market
 - (4) Analysis of Alumina Market
 - (5) Analysis of Silicon Dioxide Market

Chapter 3: Development Analysis of China Membrane Industry

3.1 Development Features Analysis of China Membrane Industry

- 3.1.1 Development Phases Analysis of China Membrane Industry
- 3.1.2 Development Features Analysis of China Membrane Industry
- 3.1.3 Influencing Factors Analysis of China Membrane Industry
 - (1) Driving Factors to Development of Membrane Industry
 - (2) Restraining Factors to Development of Membrane Industry

3.2 Operation Analysis of China Membrane Industry

- 3.2.1 Enterprise Scale of China Membrane Industry
- 3.2.2 Output Value Scale of China Membrane Industry
- 3.2.3 Import of China Membrane Industry
- 3.2.4 Regional Distribution of China Membrane Industry

3.3 Development Analysis of China Membrane Product Market

- 3.3.1 Market Scale Analysis of China Membrane Industry
- 3.3.2 Price Trend Analysis of China Membrane Products
- 3.3.3 Competitive Landscape of China Membrane Product Market
 - (1) Market Satisfaction Research on Membrane Products
 - (2) Brand Enterprises Ranking in.....2011
 - (3) Innovation Enterprises Ranking in.....2011
- 3.3.4 Existing Problems in China Membrane Product Market

3.4 Development Analysis of China Membrane Technology Engineering Market

- 3.4.1 Analysis of China Membrane Technology Engineering Market Scale
- 3.4.2 Competitive Landscape of China Membrane Technology Engineering Market
- 3.4.3 Bidding Analysis of China Membrane Technology Engineering
 - (1) Bidding Methods for Membrane Technology Engineering
 - (2) Bidding Projects of Membrane Technology Engineering
 - (3) Bidding Winning of Membrane Technology Engineering
- 3.4.4 Problems in China Membrane Engineering
- 3.5 Analysis of Membrane Industry's Multinationals Investment in China**
 - 3.5.1 The Dow Chemical (USA) in China
 - 3.5.2 NITTO DENKO (USA) in China
 - 3.5.3 Toray (Japan) in China
 - 3.5.4 Woongjin (South Korea) in China
 - 3.5.5 Saehan (South Korea) in China
 - 3.5.6 Veolia Environnement (France) in China
- 3.6 Merger and Restructuring Analysis of China Membrane Market**
 - 3.6.1 Merger and Restructuring Features of China Membrane Industry
 - 3.6.2 Merger and Restructuring Tendency of China Membrane Industry
 - 3.6.3 Merger and Restructuring Trend of China Membrane Industry

Chapter 4: Market Segments Analysis of China Membrane Products

4.1 Market Structure Analysis of China Membrane Products

4.2 Analysis of Reverse Osmosis Membrane

- 4.2.1 Principles and Features of Reverse Osmosis Membrane
- 4.2.2 Market Scale of Reverse Osmosis Membrane
- 4.2.3 Market Competition of Reverse Osmosis Membrane
- 4.2.4 Technology Status of Reverse Osmosis Membrane
- 4.2.5 Application Status of Reverse Osmosis Membrane
 - (1) Sea Water and Brackish Water Desalination
 - (2) Preparation of Pure Water and Ultrapure Water
 - (3) Waste Water Treatment
 - (4) Separation of Chemical Materials
 - (5) Food Processing
- 4.2.6 Problems in Reverse Osmosis Membrane
- 4.2.7 Market Prospects for Reverse Osmosis Membran

4.3 Analysis of Ultrafiltration Membrane Market

- 4.3.1 Principles and Features of Ultrafiltration Membrane
- 4.3.2 Market Scale of Ultrafiltration Membrane
- 4.3.3 Market Competition of Ultrafiltration Membrane
- 4.3.4 Technology Status of Ultrafiltration Membrane
- 4.3.5 Application Status of Ultrafiltration Membrane
 - (1) Industrial Effluents Treatment
 - (2) Urban Sewage Treatment
 - (3) Preparation of Ultrapure Water
 - (4) Food Processing
 - (5) Healthcare and Pharmacy
- 4.3.6 Problems in Ultrafiltration Membrane Market
- 4.3.7 Market Prospects for Ultrafiltration Membrane

4.4 Analysis of Microfiltration Membrane (MF) Market

- 4.4.1 Principles and Features of MF
- 4.4.2 Market Scale of MF
- 4.4.3 Market Competition of MF
- 4.4.4 Technology Status of MF
- 4.4.5 Application Status of MF
 - (1) Industrial Effluents Treatment
 - (2) Urban Sewage Treatment
 - (3) Preparation of Ultrapure Water
 - (4) Pre-treatment of Sea Water Desalination
 - (5) Electronic Industry
- 4.4.6 Market Prospects for MF

4.5 Analysis of Nanofiltration Membrane (NF) Market

- 4.5.1 Principles and Features of NF
- 4.5.2 Market Scale of NF
- 4.5.3 Main NF Manufacturing Enterprises
- 4.5.4 Technology Status of NF
- 4.5.5 Pollution and Control of NF
- 4.5.6 Application Status of NF
 - (1) Application in Industrial Effluents Treatment
 - (2) Application in Drinking Water
 - (3) Application in Pharmaceutical Water Waste
 - (4) Application in Landfill Leachate
 - (5) Application in Shower Water
 - (6) Application in Special Water
 - (7) Application in Sea Water Desalination
- 4.5.7 Market Prospects for NF
- 4.6 Analysis of Electrodialysis Membrane Market**
 - 4.6.1 Principles and Features of Electrodialysis Membrane
 - 4.6.2 Market Demand for Electrodialysis Membrane
 - 4.6.3 Main Electrodialysis Membrane Manufacturing Enterprises
 - 4.6.4 Technology Status of Electrodialysis Membrane
 - 4.6.5 Application Status of Electrodialysis Membrane
 - (1) Drinking Water and Process Water
 - (2) Industrial Effluents and Pharmaceutical Waste Water Treatment
 - (3) Food Processing
 - (4) Chemical Industry
 - 4.6.6 Market Prospects for Electrodialysis Membrane
- 4.7 Analysis of Gas Separation Membrane Market**
 - 4.7.1 Principles and Features of Gas Separation Membrane
 - 4.7.2 Market Demand for Gas Separation Membrane
 - 4.7.3 Main Gas Separation Membrane Manufacturing Enterprises
 - 4.7.4 Technology Status of Gas Separation Membrane
 - 4.7.5 Application Status of Gas Separation Membrane
 - (1) Gas Separation
 - (2) Hydrogen Recycle
 - (3) Getting Rid of Acid Gas from Natural Gas
 - (4) Steam/Gas Separation
 - (5) Natural Gas Dehydration and Dew Point Adjustment
 - (6) Methane on Process of Producing Gas from Oilfield
 - (7) Steam/Steam Separation
 - 4.7.6 Development Trend of Gas Separation Technology
- 4.8 Analysis of Inorganic Ceramic Membrane Market**
 - 4.8.1 Principles and Features of Inorganic Ceramic Membrane
 - 4.8.2 Market Scale of Inorganic Ceramic Membrane
 - 4.8.3 Market Competition of Inorganic Ceramic Membrane
 - 4.8.4 Technology Status of Inorganic Ceramic Membrane
 - 4.8.5 Application Status of Inorganic Ceramic Membrane
 - (1) Water Treatment
 - (2) Food Processing
 - (3) Medical and Chemical Industry
 - 4.8.6 Market Prospects for Inorganic Ceramic Membrane
- 4.9 Analysis of Membrane Bioreactor (BMR) Market**
 - 4.9.1 Principles and Features of BMR Market
 - 4.9.2 Sewage Treatment Industrial Chain of BMR Market
 - 4.9.3 Operation Cost of BMR Market
 - 4.9.4 Market Scale of BMR Market
 - 4.9.5 Market Competition of BMR Market
 - 4.9.6 Technology Status of BMR Market
 - 4.9.7 Application Status of BMR Market
 - (1) Night Soil Waste Water Treatment
 - (2) Industrial Waste Water Treatment

- (3) Drinking Water Production
- (4) Urban Living Sewage Treatment
- (5) Urban Sewage Recycle
- (6) Hard Biodegradation Organic Sewage Treatment

4.9.8 Capacity Forecast for BMR Market

Chapter 5: Analysis of Market Segments of China Membrane Technology Engineering

5.1 Application Fields Analysis of China Membrane Technology Engineering

5.2 Analysis of Membrane Technology Sewage Treatment and Recycle Engineering Market

5.2.1 China Sewage Pollution and Treatment/Recycle Status

- (1) Living Sewage Pollution and Treatment
- (2) Industrial Waste Water Pollution and Treatment

5.2.2 Membrane Technology Application in Sewage Treatment and Recycle

5.2.3 Projects Analysis of Municipal Sewage Resources by Membrane Technology

(1) MBR Engineering in Miyun Sewage Treatment Factory

- 1) Project Background
- 2) Investment Scale
- 3) Technology Process
- 4) Cost Analysis

(2) Gray-water Recycle Projects in Tangshan Nanbao Development Zone

- 1) Project Background
- 2) Investment Scale
- 3) Technology Process
- 4) Project Meaning

(3) Gray-water Recycle Projects in Dalian Thermal Power Plant

- 1) Project Background
- 2) Engineering Design
- 3) Operation Effects
- 4) Benefits Analysis

(4) Sewage Treatment and Recycle Engineering in Qingdao Liuting Airport

- 1) Project Background
- 2) Raw Water Quality
- 3) Technology Process
- 4) Operation Effects
- 5) Operation Cost

(5) MBR Engineering in Wuxi Mei County Wastewater Treatment Factory

- 1) Engineering Overview
- 2) Technology Process
- 3) Engineering Design
- 4) Operation Effects
- 5) Economic Analysis

(6) Rehabilitation and Expansion Project in Beijing Bei Xiao He Sewage Treatment Factory

- 1) Engineering Overview
- 2) Water Quality
- 3) Technology Process
- 4) Design Parameters
- 5) Analysis of Operational Energy Consumption

5.2.4 Analysis of Sewage Treatment Projects for Membrane Technology Industry

(1) Sewage Treatment of Xuzhou Cigarette Factory

- 1) Project Background
- 2) Technology Process
- 3) Cost Analysis
- 4) Economic and Social Benefits

(2) Sewage Treatment and Recycle Project in Xing Ang skinn (Huizhou) Co., Ltd.

- 1) Project Background
- 2) Design Water Quantity and Quality
- 3) Technology Process
- 4) Operation Conditions

(3) Landfill Leachate Treatment in Shanghai Hongqiao Waste Incineration Plant

- 1) Project Profile

- 2) Technology Process
- 3) Analysis of Technology System Operation
- 4) Economic Analysis
- (4) Printing Wastewater Treatment in Wuqing Printing Dyeing Co., Ltd.
 - 1) Project Background
 - 2) Design Water Quantity and Quality
 - 3) Technology Process
 - 4) Operation Conditions
 - 5) Operation Cost
- (5) Production Wastewater Recycle Project in Taiyuan Iron & Steel (Group) Co., Ltd.
 - 1) Project Profile
 - 2) Technology Process
 - 3) System Operation Conditions
 - 4) Economic and Social Benefits
- (6) Reforming Project of Tianjin Gangnan Oily Wastewater Treatment System
 - 1) Technology Process
 - 2) Operation Effects
 - 3) Economic Analysis of Main Technologies
- (7) Refinery Wastewater by MBR Treatment in Sinopec Jinling Company
 - 1) Technology Process
 - 2) MBR Operation Conditions
 - 3) Cost Accounting
- (8) Leachate Treatment Project in Yixing Waste Incineration Power Plant
 - 1) Project Overview
 - 2) Design Water Quantity and Quality
 - 3) Technology Process
 - 4) Main Structure Design
 - 5) Treatment Effects
 - 6) Analysis of Operation Cost
- (9) A Case Brewery Wastewater Treatment by UASB-MBR Treatment Technology in Nanchang
 - 1) Project Overview
 - 2) Project Adjustment and Operation
 - 3) Treatment Effects
 - 4) Technological Economic Indicators
- 5.2.5 Market Prospects for Membrane Technology Sewage Treatment and Recycle Projects
 - (1) Huge Market Space for Sewage Treatment and Recycle
 - (2) Huge Market Space for Reforming Current Sewage Treatment Plants
 - (3) Fate of Industrial Wastewater Resources
 - (4) Huge Scale of Governmental Investment in the Future
 - (5) Gradually Improvement of Economic Property of Recycling Waster

5.3 Analysis of Membrane Technology Sea Water Desalination and Brackish Water Desalination

Engineering Market

- 5.3.1 China Sea Water Resources and Sea Water Desalination Status
- 5.3.2 Distribution, Exploitation and Utilization of Brackish Water Amount
- 5.3.3 Membrane Technology Application in Sea Water Desalination and Brackish Water Desalination
 - (1) Membrane Technology Application in Sea Water Desalination
 - (2) Membrane Technology Application in Brackish Water Desalination
- 5.3.4 Project Analysis of Membrane Technology Sea Water Desalination and Brackish Water Desalination Engineering
 - (1) Sea Water Desalination Project by Qingdao Befesa Agua Co., Ltd.
 - 1) Project Overview
 - 2) Investment Scale
 - 3) Project Capacity
 - 4) Project Technology Process
 - (2) Sea Water Desalination Project by Tangshan Caofeidian Ake Ling Co., Ltd.
 - 1) Project Overview
 - 2) Project Technology and Equipment
 - 3) Project Capacity
 - 4) Investment Scale

- 5) Financing Conditions
- (3) Tonnage Seawater Reverse Osmosis Pilot Project in Rongcheng
 - 1) Project Overview
 - 2) Project Design and Equipment
 - 3) Floor Plan
 - 4) Debugging Result
 - 5) Analysis of Cost and Benefits
- (4) Sea Water Desalination Project by Huaneng Yuhuan Power Plant
 - 1) Project Overview
 - 2) Project Technology and Equipment
 - 3) Project Capacity
 - 4) System Design
 - 5) Analysis of Operation Cost
- (5) Brackish Water Desalination Engineering Projects in Huanghua City
 - 1) Project Background
 - 2) Technology Process
 - 3) Cost Analysis

5.3.5 Market Capacity Forecast for Membrane Sea Water Desalination and Brackish Water Desalination Engineering

5.4 Analysis of Membrane Technology Water Supply Engineering Market

- 5.4.1 China Urban Supply Conditions
- 5.4.2 Membrane Technology Application in Water Supply Project
- 5.4.3 Analysis of Membrane Technology Water Supply Projects
 - (1) Membrane Project of Cixi Hangzhou Water Bay Factory
 - 1) Project Background
 - 2) Technology Process
 - 3) Economy Analysis
 - (2) PVC Alloy Ultrafiltration Membrane Application in A Taiwan Water Plant
 - 1) Project Background
 - 2) Raw Water Quality and Selection of Water Purification Technology
 - 3) Feasibility Analysis of PVC Alloy Capillary Ultra-Filtration Membrane
 - 4) Water Purification Technology Process and Ultrafiltration System
 - 5) Water Quality and Operation Condition of Ultrafiltration System
 - 6) Analysis of Investment and Operation Cost
 - (3) Design and Operation of High-quality Water Factory in Foshan New Urban District
 - 1) Project Background
 - 2) Goals for Raw Water Quality and High-quality Water Quality
 - 3) Technology Process
 - 4) Technology Design Features and Major Parameters
 - 5) Operation Ways of Water Purification System
 - 6) Production and Operation Effects of High-quality Water Factories in New Urban Districts
 - (4) Membrane Technology Water Treatment Pilot Project in Tianjin Yangliuqing Municipal Water Plant
 - 1) Project Background
 - 2) Technology Process
 - 3) Technology Design
 - 4) Analysis of Operation Effects and Cost
 - (5) Ground Water Treatment by Ultrafiltration Technology
 - 1) Project Overview
 - 2) Technology Selection
 - 3) Analysis of Water Production Cost
 - 4) Analysis of Output Water Quality
 - (6) Ultrafiltration Membrane Treatment Project for Drinking Water in Yangshan Deep Water Port
 - 1) Project Overview
 - 2) Raw Water Features and Optimization of Treatment System
 - 3) Technology Process
 - 4) Cost Analysis
- 5.4.4 Market Capacity Forecast for Membrane Water Supply Engineering
 - (1) Forecast for Water Supply Membrane Treatment Capability

- (2) Forecast for Water Supply Market Capacity
- (3) Forecast for Membrane Technology Water Supply Engineering Market Capacity
- 5.4.5 Risks Tips of Membrane Technology Water Supply Engineering Market
 - (1) Cost Risks of Membrane Technology Water Supply Engineering
 - (2) Damage Risks of Membrane Technology Water Supply Engineering
 - (3) Other Risks of Membrane Technology Water Supply Engineering

Chapter 6: Analysis of Membrane Products Demand Potentials in Chinese Key Regions

6.1 Analysis of Membrane Products Demand Potentials in Beijing

- 6.1.1 Analysis of Economic Environment of Beijing Membrane Industry
- 6.1.2 Analysis of Policy Environment of Beijing Membrane Industry
- 6.1.3 Analysis of Beijing Environmental Protection Investment Efforts
- 6.1.4 Beijing Water Resources and Water Pollution Status
- 6.1.5 Analysis of Beijing Membrane Products Demand Status
- 6.1.6 Analysis of Beijing Membrane Products Demand Prospects

6.2 Analysis of Membrane Products Demand Potentials in Shanghai

- 6.2.1 Analysis of Economic Environment of Shanghai Membrane Industry
- 6.2.2 Analysis of Policy Environment of Shanghai Membrane Industry
- 6.2.3 Analysis of Shanghai Environmental Protection Investment Efforts
- 6.2.4 Shanghai Water Resources and Water Pollution Status
- 6.2.5 Analysis of Shanghai Membrane Products Demand Status
- 6.2.6 Analysis of Shanghai Membrane Products Demand Prospects

6.3 Analysis of Membrane Products Demand Potentials in Tianjin

- 6.3.1 Analysis of Economic Environment of Tianjin Membrane Industry
- 6.3.2 Analysis of Policy Environment of Tianjin Membrane Industry
- 6.3.3 Analysis of Tianjin Environmental Protection Investment Efforts
- 6.3.4 Tianjin Water Resources and Water Pollution Status
- 6.3.5 Analysis of Tianjin Membrane Products Demand Status
- 6.3.6 Analysis of Tianjin Membrane Products Demand Prospects

6.4 Analysis of Membrane Products Demand Potentials in Jiangsu

- 6.4.1 Analysis of Economic Environment of Jiangsu Membrane Industry
- 6.4.2 Analysis of Policy Environment of Jiangsu Membrane Industry
- 6.4.3 Analysis of Jiangsu Environmental Protection Investment Efforts
- 6.4.4 Jiangsu Water Resources and Water Pollution Status
- 6.4.5 Analysis of Jiangsu Membrane Products Demand Status
- 6.4.6 Analysis of Jiangsu Membrane Products Demand Prospects

6.5 Analysis of Membrane Products Demand Potentials in Zhejiang

- 6.5.1 Analysis of Economic Environment of Zhejiang Membrane Industry
- 6.5.2 Analysis of Policy Environment of Zhejiang Membrane Industry
- 6.5.3 Analysis of Zhejiang Environmental Protection Investment Efforts
- 6.5.4 Zhejiang Water Resources and Water Pollution Status
- 6.5.5 Analysis of Zhejiang Membrane Products Demand Status
- 6.5.6 Analysis of Zhejiang Membrane Products Demand Prospects

6.6 Analysis of Membrane Products Demand Potentials in Guangdong

- 6.6.1 Analysis of Economic Environment of Guangdong Membrane Industry
- 6.6.2 Analysis of Policy Environment of Guangdong Membrane Industry
- 6.6.3 Analysis of Guangdong Environmental Protection Investment Efforts
- 6.6.4 Guangdong Water Resources and Water Pollution Status
- 6.6.5 Analysis of Guangdong Membrane Products Demand Status
- 6.6.6 Analysis of Guangdong Membrane Products Demand Prospects

6.7 Analysis of Membrane Products Demand Potentials in Liaoning

- 6.7.1 Analysis of Economic Environment of Liaoning Membrane Industry
- 6.7.2 Analysis of Policy Environment of Liaoning Membrane Industry
- 6.7.3 Analysis of Liaoning Environmental Protection Investment Efforts
- 6.7.4 Liaoning Water Resources and Water Pollution Status
- 6.7.5 Analysis of Liaoning Membrane Products Demand Status
- 6.7.6 Analysis of Liaoning Membrane Products Demand Prospects

6.8 Analysis of Membrane Products Demand Potentials in Inner Mongolia

- 6.8.1 Analysis of Economic Environment of Inner Mongolia Membrane Industry
- 6.8.2 Analysis of Policy Environment of Inner Mongolia Membrane Industry

- 6.8.3 Analysis of Inner Mongolia Environmental Protection Investment Efforts
- 6.8.4 Inner Mongolia Water Resources and Water Pollution Status
- 6.8.5 Analysis of Inner Mongolia Membrane Products Demand Status
- 6.8.6 Analysis of Inner Mongolia Membrane Products Demand Prospects

6.9 Analysis of Membrane Products Demand Potentials in Shandong

- 6.9.1 Analysis of Economic Environment of Shandong Membrane Industry
- 6.9.2 Analysis of Policy Environment of Shandong Membrane Industry
- 6.9.3 Analysis of Shandong Environmental Protection Investment Efforts
- 6.9.4 Shandong Water Resources and Water Pollution Status
- 6.9.5 Analysis of Shandong Membrane Products Demand Status
- 6.9.6 Analysis of Shandong Membrane Products Demand Prospects

6.10 Analysis of Membrane Products Demand Potentials in Hubei

- 6.10.1 Analysis of Economic Environment of Hubei Membrane Industry
- 6.10.2 Analysis of Policy Environment of Hubei Membrane Industry
- 6.10.3 Analysis of Hubei Environmental Protection Investment Efforts
- 6.10.4 Hubei Water Resources and Water Pollution Status
- 6.10.5 Analysis of Hubei Membrane Products Demand Status
- 6.10.6 Analysis of Hubei Membrane Products Demand Prospects

6.11 Analysis of Membrane Products Demand Potentials in Hunan

- 6.11.1 Analysis of Economic Environment of Hunan Membrane Industry
- 6.11.2 Analysis of Policy Environment of Hunan Membrane Industry
- 6.11.3 Analysis of Hunan Environmental Protection Investment Efforts
- 6.11.4 Hunan Water Resources and Water Pollution Status
- 6.11.5 Analysis of Hunan Membrane Products Demand Status
- 6.11.6 Analysis of Hunan Membrane Products Demand Prospects

Chapter 7: Operation Analysis of Main Enterprises in China Membrane Industry

7.1 Case Study of Leading Membrane Products Enterprises

- 7.1.1 Operation Analysis of Dow Chemical (China) Investment Co., Ltd.
 - (1) Analysis of Enterprise Development Profile
 - (2) Analysis of Enterprise Main Products
 - (3) Analysis of Operation Conditions
 - (4) Analysis of Enterprise Product Application Status
 - (5) Enterprise Technology R&D Status
 - (6) Analysis of Enterprise Operational Advantages and Disadvantages
 - (7) Analysis of Enterprise Investment, Merger and Restructuring
 - (8) Analysis of Enterprise Latest Development Trend
