# China Reactor Industry Development Prospects and Investment Forecast Report, 2013-2017

## 目 录

*CONTENTS*

Chapter 1: Development Overview of Reactor Industry
1.1 Brief Introduction of Reactor
1.1.1 Definition of Reactor
1.1.2 Classification of Reactor
1.1.3 Working Principles of Reactor
1.1.4 Function of Reactor
1.1.5 Difference Between Reactor and Inductor
1.2 Analysis of Industry Development Environment
1.2.1 Policy Environment
1.2.2 Economic Environment
1.2.3 Demand Environment
1.3 Analysis of Industry Raw Materials Production
1.3.1 Analysis of Steel Market
(1) Analysis of Common Steel Market
(2) Analysis of Silicon Steel Market
1.3.2 Analysis of Non-Ferrous Metal
(1) Analysis of Copper Market
(2) Analysis of Aluminum Market
1.3.3 Analysis of Insulating Material
Chapter 2: Analysis of the Development of Reactor Industry
2.1 Development Status of Reactor Industry
2.1.1 Industry Development Status
2.1.2 Industry Market Trend
2.2 Market Analysis of Reactor Industry
2.2.1 Analysis of Equipment Market Capacity
2.2.2 Analysis of Market Occupancy
2.2.3 Leading Enterprises Profit Situation
2.3 Core Technology Research of Reactor
2.4 Reactor Common Problems Resolution
2.5 Development Trend Analysis of Reactor Industry
2.5.1 Analysis of Industry Influencing Factors
2.5.2 Analysis of Profit Level and Changing Tendency
Chapter 3: Production Application Analysis of Reactor Industry
3.1 Application Analysis of Shunt Reactor
3.1.1 Market Capacity Analysis of Shunt Reactor
3.1.2 Market Competitive Landscape Analysis of Shunt Reactor
3.1.3 Technology Development Analysis of Shunt Reactor
3.2 Application Analysis of Series Reactor
3.2.1 Application Analysis of Smoothing Reactor
(1) Application Market Analysis of Smoothing Reactor
(2) Market Capacity Analysis of Smoothing Reactor
(3) Market Competitive Landscape Analysis of Smoothing Reactor
(4) Technology Development Analysis of Smoothing Reactor
3.2.2 Application Analysis of Current Limiting Reactor
(1) Basic Short Circuit Measures for Current Limiting Series Reactor
(2) General Overview of Current Limiting Series Reactor
(3) Technology Development Analysis of Current Limiting Series Reactor
3.2.3 Application Analysis of Communication Reactor
(1) General Overview of Communication Reactor

(2) Working Conditions and Performance Introduction of Communication Reactor
3.2.4 Application Analysis of Filter Reactor
(1) General Overview of Filter Reactor
(2) Structure Characteristics Analysis of Filter Reactor
3.2.5 Application Analysis of Saturable Reactor
(1) Characteristics Analysis of Saturable Reactor
(2) Application Field Analysis of Saturable Reactor
(3) Technology Development Analysis of Saturable Reactor
3.2.6 Application Analysis of Magnetically controlled Reactor
(1) Principles and Characteristics of Magnetically controlled Reactor
(2) Application Field Analysis of Magnetically controlled Reactor
(3) Application Prospects Analysis of Magnetically controlled Reactor
**3.3 Application Analysis of Arc-suppression Reactor**
3.3.1 Principles and Characteristics of Arc-suppression Reactor
3.3.2 Application Characteristics Analysis of Arc-suppression Reactor
3.3.3 Technology Development Analysis of Equipment
Chapter 4: New Technology Application Analysis of Reactor Industry
**4.1 Application of Shunt Reactor in High-voltage Grid**
4.1.1 Necessity of Shunt Reactor in high-voltage Grid
4.1.2 Depression Overvoltage Function Analysis of Series Reactor
4.1.3 Performance Analysis of Super (Ultra) Pressure Controllable Shunt Reactor
(1) Types and Principles of Super (Ultra) Pressure Controllable Shunt Reactor
(2) Characteristic Analysis of Ultra Pressure Controllable Shunt Reactor
(3) Particularity of Ultra Pressure Controllable Shunt Reactor
4.1.4 Selection Criteria of Ultra Pressure Controllable Shunt Reactor
(1) Structure Type Selection
(2) Nominal Voltage Selection
(3) Installed Capacity Selection
(4) Installation Site Selection
4.1.5 Advantages of the Shunt Reactor Installation in Ultra-high-voltage Grid
**4.2 Smoothing Reactor Application in High-voltage convertor station**
4.2.1 Major Functions Analysis of Ultra-high Voltage Smoothing Reactor
4.2.2 Major Parameters Analysis of Ultra-high Voltage Smoothing Reactor
4.2.3 Structure Type Analysis of Ultra-high Voltage Smoothing Reactor
(1) Advantages and Disadvantages Analysis of Dry-type Smoothing Reactor
(2) Advantages and Disadvantages Analysis of Oil-immersed Smoothing Reactor
4.2.4 Development Prospects Analysis of Ultra-high voltage Smoothing Reactor
**4.3 Development Analysis of High-speed Train Reactor**
4.3.1 Technology Difficulties of High-speed Train Threephase Reactor
4.3.2 Design Analysis and Study of High-speed Train Reactor
(1) Iron Core Design
(2) Coil Design
(3) Insulating Structure Design
4.3.3 Special Measures for Development of High-speed Train Reactor
(1) Special Measures for Improving No-load Performance and Reducing Noise
(2) Effective Measures for Controlling Partial Discharge
Chapter 5: Operating Analysis of Major Enterprises in Reactor Industry
**5.1 overall Situation Analysis of the Development of Reactor Enterprises**
5.1.1 Size of Reactor Enterprises
5.1.2 Industrial Output Value Situation of Reactor Industry
5.1.3 Sales Revenue and Profits of Reactor Industry
**5.2 Leading Enterprises Analysis of Reactor Industry**
5.2.1 Operational Situation Analysis of China XD Electric Co., Ltd.
(1) Brief Analysis of Enterprise Development
(2) Analysis of Enterprise Main Business and Product Structure
(3) Analysis of Enterprise Technology Level and R&D Capability
(4) Overall Operational Analysis of Enterprise
(5) Analysis of Enterprise Advantages and Disadvantages
(6) Analysis of Development Strategy

(7) Analysis of Enterprise Latest Development Trend
5.2.2 Operational Situation Analysis of Rongxin Power Electronic Co., Ltd.
(1) Brief Analysis of Enterprise Development
(2) Analysis of Enterprise Main Business and Product Structure
(3) Analysis of Enterprise Technology Level and R&D Capability
(4) Overall Operational Analysis of Enterprise
(5) Analysis of Enterprise Advantages and Disadvantages
