China Economic Development Zone Report (2014-2020), Construction and Investment Introduction Strategy

目 录

CONTENTS

Chapter 1: Overview of China's economic development zones
1.1 linkage of the development of economic development zone and the development of the region
1.1.1 linkage of the development of economic development zone and the development of the region
1.1.2 path for coordinated development of economic development zone and the region
(1) optimize the industrial layout, promote industrial upgrading
(2) use the policy of "first move, first try" to speed up institutional innovation
(3) clear its positioning itself
(4) improve infrastructure, build and create a favorable environment for investment
1.2 analysis of the driving forces of the construction of economic development zones
1.2.1 analysis of the driving force of policy
1.2.2 the driving force of the local governments
1.2.3 analysis of the driving force of enterprises
1.3 analysis of the attractiveness of economic development zones
1.3.1 policy attraction
1.3.2 infrastructure attraction
1.3.3 ancillary services attraction
1.3.4 human resource attraction
1.3.5 financing innovation attraction
1.4 analysis of vitality composition of economic development zones
1.4.1 sustainability of land resources
1.4.2 innovation environment within economic development zone
1.4.3 attraction mechanism for enterprises of economic development zones
1.4.4 sustainability of regional economic system
Chapter 2: Analysis of construction environment of Chinese economic development zone
2.1 analysis of policy environment of economic development zone construction
2.1.1 analysis of the central government's idea of a new round of reform and opening up
2.1.2 regional economic development plan during the "twelfth-five year"
2.1.3 analysis of industrial development plan during the "twelfth-five year"
2.1.4 analysis of land policy in 2012-2013
2.2 analysis of economic environment of economic development zone construction
2.2.1 correlation between economic development zone and GDP growth
2.2.2 China macroeconomic environment risks and warning
2.3 analysis of construction land status of economic development zone
2.3.1 overall situation of the national land use
2.3.2 the basic situation of the national land market
2.3.3 analysis of different types of land prices
(1) analysis of price levels of different types of land use
(2) regional price differences of different types of land
(3) trends of prices of different types of land
(4) trends of prices of residential land
(5) trends of prices of commercial land
(6) trends of prices of industrial land
2.3.4 forecast of the land market in.....2014
2.4 industrial development environment of economic development zone construction
2.4.1 analysis of the development of domestic key industries
2.4.2 analysis of status quo of domestic industry cluster
2.4.3 analysis of regional industrial structure adjustment
2.4.4 analysis of regional industrial transfer trend
2.4.5 analysis of life cycle of key industries

2.5 regional development environment of economic development zone construction
2.5.1 Yangtze River Delta economic circle
2.5.2 Pearl River Delta economic circle
2.5.3 Bohai Economic Rim
2.5.4 Economic Zone of the Taiwan Straits
2.5.5 Beibu Gulf Economic Circle
2.5.6 Northeast Economic Circle
2.5.7 economic circle of the middle reaches of the Yangtze River
2.5.8 economic circle of the upstream of the Yangtze River
Chapter 3: Analysis of construction and investment and financing of Chinese economic development zone
3.1 analysis of major economic indicators of Chinese economic development zone
3.1.1 analysis of quantity scale
3.1.2 analysis of output value scale
3.1.3 analysis of financial tax
3.1.4 analysis of import and export
3.1.5 analysis of introduction of foreign investment
3.2 analysis of capital supply and demand of construction of economic development zone
3.2.1 structure of capital demand of economic development zone
(1) analysis of capital demand of first-tier land development process
(2) analysis of capital demand of second-tier land development process
(3) analysis of capital demand of public service facilities project
3.2.2 capital supply opportunities of economic development zone
(1) analysis of supply opportunity of the financial allocation
(2) analysis of supply opportunity of development finance
(3) analysis of supply opportunity of commercial finance
3.3 analysis of financing modes of economic development zone
3.3.1 analysis of the main financing modes of economic development zone
(1) credit financing
(2) securities financing
(3) project financing
1) operation characteristics of BOT mode
2) operation characteristics of TOT mode
3) operation characteristics of BOO mode
4) operation characteristics of BT mode
5) operation characteristics of ABS mode
6) operation characteristics of APP mode
7) comparative analysis of six modes
(4) comparative analysis of several financing modes
3.3.2 analysis of financing modes of innovative enterprises of economic development zone
(1) path to achieve enterprise financing
(2) advantages of enterprise financing
3.4 analysis of four-tier investment and financing system of economic development zone
3.4.1 analysis of "resources --- asset "phase
(1) overview of the development and construction of the phase
(2) major investment and financing modes of the phase
(3) typical case study of the phase
3.4.2 analysis of " asset --- property "phase
(1) overview of the development and construction of the phase
(2) major investment and financing modes of the phase
(3) typical case study of the phase
3.4.3 analysis of " property - capital "phase
(1) overview of the development and construction of the phase
(2) major investment and financing modes of the phase
(3) typical case study of the phase
3.4.4 analysis of " capital - wealth "phase
(1) overview of the development and construction of the phase
(2) major investment and financing modes of the phase
(3) typical case study of the phase

3.5 analysis of typical investment and financing cases of economic development zones
3.5.1 investment and financing cases of Qingdao Economic Development Zone
(1) divided by the nature of the capital
(2) divided by the nature of the industry
3.5.2 investment and financing cases of Tangshan Seaport Development Zone
3.5.3 investment and financing cases of Wuhan East Lake High-tech Zone
3.5.4 investment and financing cases of Hefei Economic Development Zone
3.5.5 investment and financing cases of Guangzhou Economic and Technological Development Zone
Chapter 4: Analysis of construction and investment introduction of subdivided Chinese economic development zones
4.1 analysis of construction of subdivided economic development zones
4.1.1 analysis of construction and investment introduction of economic and technological development zone
(1) basic situation
(2) development scale
(3) regional distribution
(4) operating efficiency
(5) product structure
(6) status quo of investment introduction
(7) mode of investment introduction
(8) proposals for investment introduction
4.1.2 analysis of construction and investment introduction of high-tech development zone
(1) development process
(2) development scale
(3) economic indicators
(4) corporate nature
(5) product structure
(6) export analysis
(7) investment introduction strategy
1) product strategy of investment introduction
2) pricing strategy of investment introduction
3) channel strategy of investment introduction
4) promotion strategy of investment introduction
(8) investment introduction mode
1) mode of agency investment introduction
2) mode of industrial investment introduction
3) mode of online investment introduction
4) other modes of investment introduction
(9) proposals for investment introduction
4.1.3 analysis of construction and investment introduction of bonded area
(1) main course of development
(2) analysis of economic indicators
(3) major trade methods
(4) analysis of places of import
(5) analysis of import products
(6) analysis of places of export
(7) analysis of export products
(8) status quo of investment introduction
(9) mode of investment introduction
(10) proposals for investment introduction
4.1.4 analysis of construction and investment introduction of export processing zone and
(1) main course of development
(2) analysis of economic indicators
(3) major trade methods
(4) analysis of places of import
(5) analysis of import products
(6) analysis of places of export
(7) analysis of export products
(8) status quo of investment introduction

(9) mode of investment introduction
(10) proposals for investment introduction
4.1.5 analysis of construction and investment introduction of national resort district
(1) basic situation
(2) development scale
(3) main types of domestic and international tourist resorts
(4) corporate nature
(5) product structure
(6) status quo of investment introduction
(7) mode of investment introduction
(8) proposals for investment introduction
4.2 analysis of construction of subordinate industrial park under economic development zone
4.2.1 analysis of construction and investment introduction of biomedical industry park
(1) development model
(2) main features
(3) economic benefit
(4) operating model
(5) profit model
(6) investment risk
(7) investment progress and trends
(8) status quo of investment introduction
(9) proposals for investment introduction
4.2.2 analysis of construction and investment introduction of new materials industrial park
(1) main classification
(2) main features
(3) economic benefit
(4) operating model
(5) investment risk
(6) investment progress and trends
(7) status quo of investment introduction
(8) proposals for investment introduction
4.2.3 analysis of construction and investment introduction of general industrial park
(1) development mode
(2) co-operation mode
(3) product mode
(4) operating mode
(5) revenue mode
(6) development trends
(7) status quo of investment introduction
(8) proposals for investment introduction
4.2.4 analysis of construction and investment introduction of modern agricultural park
(1) classification
(2) construction scale
(3) economic benefit
(4) development model
(5) operating mode
(6) profit model
(7) investment risk
(8) construction progress and trends
(9) proposals for investment introduction
4.2.5 analysis of construction and investment introduction of chemical industrial park
(1) development mode
(2) construction scale
(3) economic benefit
(4) operating model
(5) profit model
(6) investment risk
(7) investment progress and trends
(8) status quo of investment introduction

(9) mode of investment introduction
(10) proposals for investment introduction
4.2.6 analysis of construction and investment introduction of automobile industrial park
(1) classification
(2) development model
(3) main features
(4) major role
(5) investment risk
(6) investment progress and trends
(7) status quo of investment introduction
(8) proposals for investment introduction
4.2.7 analysis of construction and investment introduction of food industrial park
(1) classification
(2) development model
(3) main features
(4) major role
(5) operating model
(6) profit model
(7) investment risk
(8) investment progress and trends
(9) mode of investment introduction
(10) proposals for investment introduction
4.2.8 analysis of construction and investment introduction of logistics park
(1) classification
(2) construction scale
(3) economic benefit
(4) development model
(5) development and operation model
(6) management model
(7) profit model
(8) investment risk
(9) construction progress and trends
(10) status quo of investment introduction
(11) proposals for investment introduction
4.2.9 analysis of construction and investment introduction of creative industrial park
(1) classification
(2) development path
(3) construction scale
(4) economic benefit
(5) development model
(6) profit model
(7) business gathering momentum
(8) investment risk
(9) construction progress and trends
(10) mode of investment introduction
(11) proposals for investment introduction
4.2.10 analysis of construction and investment introduction of headquarter economic park
(1) features
(2) construction points
(3) construction status quo
(4) economic benefit
(5) development model
(6) profit model
(7) construction progress and trends

Chapter 5: Analysis of construction of public service platform of Chinese economic development zone

5.1 structure and function of public service platform of Chinese economic development zone

5.1.1 analysis of the overall architecture of public service platform
5.1.2 analysis of components of public service platform

(1) supply and demand body of the platform
(2) agency of the operation of the platform
(3) hardware system of the operation of the platform
(4) software system of the operation of the platform
5.1.3 analysis of public service platform modules
(1) data query service system
(2) intellectual resources service system
(3) equipment sharing system
(4) R & D services system
(5) service system for SMEs
(6) inspection service system
(7) pilot test service system
(8) technology transfer service system
(9) business incubation service system
(10) energy-saving and environmental protection service system
5.2 operations and services of public service platform of economic development zone
5.2.1 the process of the use of public service platform
5.2.2 operation model of public service platform
5.2.3 service model of public service platform
(1) pricing strategy of the service platform
(2) charges for resource use
5.3 construction and safeguard of public service platform of economic development zone
5.3.1 main construction body of the public service platform
(1) analysis of the investment bodies of the platform
(2) the management bodies of the platform
(3) analysis of the main participants of the platform
5.3.2 safeguard mechanisms of the public service platform
(1) analysis of financial safeguard mechanism
(2) analysis of system safeguard mechanism
