

China Vehicle Detection Industry Report (2016–2021), Development Prospect and Investment Opportunities

目 录

CONTENTS

Chapter 1: Overview of development of China's vehicle detection industry

- 1.1 related overview of vehicle detection industry**
 - 1.1.1 definition of vehicle detection industry
 - 1.1.2 classification of items of vehicle detection
 - 1.1.3 features of vehicle detection industry
 - 1.1.4 analysis of necessity of vehicle detection
 - 1.1.5 analysis of feasibility of vehicle detection
- 1.2 analysis of policy environment of vehicle detection industry**
 - 1.2.1 management system of vehicle detection industry
 - 1.2.2 policy drives development of vehicle detection
 - 1.2.3 interpretation of major policies of vehicle detection
 - 1.2.4 interpretation of related planning of vehicle detection
- 1.3 analysis of economic environment of vehicle detection industry**
 - 1.3.1 analysis of international macroeconomic environment
 - (1) status quo of international macroeconomy
 - (2) forecast of international macroeconomy
 - 1.3.2 analysis of domestic macroeconomic environment
 - (1) GDP growth
 - (2) status quo of development of manufacturing industry
 - (3) residents' income
 - 1.3.3 impact of economic environment on vehicle detection industry
- 1.4 analysis of social environment of vehicle detection industry**
 - 1.4.1 status quo of China's demand for vehicle detection
 - 1.4.2 new requirements for management of vehicle detection

Chapter 2: Development of related industries of China's vehicle detection industry

- 2.1 analysis of overall development of China's automobile industry**
 - 2.1.1 automobile production and sales
 - (1) production and sales of automobile in the first quarter of.....2013
 - (2) analysis of production and sales of automobile in 2005年以来
 - 2.1.2 automobile import and export
 - (1) China's auto export
 - (2) China's auto import
 - 2.1.3 analysis of competitive landscape of automobile industry
 - (1) analysis of competitive landscape of regions
 - (2) analysis of competitive landscape of enterprises
 - (3) analysis of competitive landscape of products
 - (4) analysis of market concentration
 - 2.1.4 development trends of automobile industry
 - 2.1.5 forecast of development of automobile industry
- 2.2 analysis of development of China's automobile maintenance industry**
 - 2.2.1 status quo of development of automobile maintenance industry
 - (1) analysis of market scale of automobile maintenance industry
 - (2) analysis of corporate scale of automobile maintenance industry
 - (3) analysis of market structure of automobile maintenance industry
 - (4) analysis of operational cost of automobile maintenance industry
 - 2.2.2 operation of automobile maintenance industry
 - (1) analysis of operational efficiency of the industry
 - (2) analysis of profitability capability of the industry
 - (3) analysis of operational capability of the industry

- (4) analysis of solvency capability of the industry
- (5) analysis of development capability of the industry
- 2.2.3 analysis of competitive landscape of automobile maintenance industry
 - (1) analysis of competitive landscape of regions of the industry
 - (2) analysis of competitive landscape of enterprises of the industry
- 2.2.4 problems of automobile maintenance industry
- 2.2.5 development measures of automobile maintenance industry
- 2.2.6 prospects for development of automobile maintenance
- 2.3 analysis of development of vehicle detection equipment industry**
 - 2.3.1 testing and calibration of vehicle detection equipment
 - 2.3.2 type of China's vehicle detection equipment
 - (1) test items of vehicle grading and equipment types
 - (2) test items of vehicle safety and environmental protection and equipment types
 - (3) test items of vehicle maintenance quality and equipment types
 - (4) test items of vehicle maintenance quality disputes and equipment types
 - (5) test items of common vehicle fault and equipment requirements
 - 2.3.3 analysis of decision model of vehicle detection equipment selection
 - 2.3.4 status quo of scale of China's vehicle detection equipment
 - 2.3.5 development bottleneck of China's vehicle detection equipment
 - 2.3.6 development trends of China's vehicle detection equipment

Chapter 3: Analysis of development of China's vehicle detection industry

3.1 overview of development of vehicle detection industry

- 3.1.1 development course of vehicle detection industry
- 3.1.2 diagnostic methods and standards of vehicle detection
- 3.1.3 main contents of vehicle detection diagnosis
- 3.1.4 scale of development of vehicle detection industry
- 3.1.5 competitive situation of vehicle detection industry
- 3.1.6 problems of vehicle detection industry

3.2 development and innovation of China's vehicle detection technology

- 3.2.1 analysis of China's key technologies of vehicle detection
- 3.2.2 status quo of technology of China's vehicle detection industry
- 3.2.3 sport vehicle detection and identification technologies in intelligent transportation
 - (1) analysis of status quo of development of China's intelligent transportation
 - (2) necessity of sports vehicle detection in intelligent transportation system
 - (3) application of vehicle detection in intelligent transportation system
 - (4) analysis of status quo of development of sports vehicle detection technology
 - (5) development outlook for sports vehicle detection technology
- 3.2.4 problems of China's vehicle detection technology
- 3.2.5 forecast of trends of China's vehicle detection technology
- 3.2.6 latest trends of China's vehicle detection technology

3.3 analysis of application of computer in vehicle detection industry

- 3.3.1 application of computer control system in automobile performance testing
 - (1) PLC control system
 - (2) object-oriented control system
 - (3) DCS control system
 - (4) modular control system
- 3.3.2 application of computer control system in vehicle monitoring
 - (1) summary of functions of in-vehicle computer control system
 - (2) summary of functions of monitoring-end computer control system
- 3.3.3 application of computer control system in vehicle detection
 - (1) application of computer control system in vehicle management detection
 - (2) application of computer control system in vehicle fault detection

Chapter 4: Analysis of construction and operation of China's vehicle detection station

4.1 overview of development of vehicle detection station

- 4.1.1 definition of vehicle detection station
- 4.1.2 necessity of vehicle detection station
- 4.1.3 functions of vehicle detection station
- 4.1.4 level division of vehicle detection station

4.2 forecast of demand for detection and analysis of scale of construction

- 4.2.1 basic idea of demand forecasting of vehicle detection
- 4.2.2 factors influencing demand for vehicle detection
 - (1) rapid growth in vehicle ownership
 - (2) transport external costs
 - (3) requirements for support of vehicle maintenance and inspection technology
- 4.2.3 forecast of demand for detection of vehicle detection station
 - (1) model for forecasting of demand for vehicle detection
 - (2) methods for forecasting of demand for vehicle detection
 - (3) issues should be noted during the forecasting practice

4.3 construction site selection and layout of vehicle detection station

- 4.3.1 overview of operation system of vehicle detection
 - (1) constituents of the process of production and operational activities
 - (2) analysis of production and operational activities
 - (3) overview of operation system of vehicle detection
- 4.3.2 significance of site selection of vehicle detection station
- 4.3.3 factors influencing site selection of vehicle detection station
 - (1) market demand
 - (2) natural resources
 - (3) economic and technological level
 - (4) social environmental conditions
- 4.3.4 principles and steps of site selection of vehicle detection station
 - (1) analysis of principles for site selection of vehicle detection station
 - (2) analysis of steps of site selection of vehicle detection station
- 4.3.5 layout of vehicle detection workshop
 - (1) principles for vehicle detection station layout
 - (2) station layout of vehicle detection stations
 - (3) layout style of (channel) test line
 - (4) sequence of station layout of test line

4.4 analysis of status quo of operation of vehicle detection station

- 4.4.1 status quo of scale of construction of vehicle detection station
- 4.4.2 analysis of business model of vehicle detection station
- 4.4.3 discussion on profit factors of vehicle detection station
- 4.4.4 prospects of development of vehicle detection station

Chapter 5: Development pattern of foreign vehicle detection industry and experience

5.1 overall profile of foreign vehicle detection industry

5.2 analysis of typical cases of development of foreign vehicle detection

- 5.2.1 analysis of development model of vehicle detection industry in France
 - (1) status quo of development of automobile industry in France
 - (2) management model of vehicle detection industry in France
 - (3) equipment and content of vehicle detection in France
 - (4) gap between China and France in terms of vehicle detection
 - (5) implications of vehicle detection model in France for China
- 5.2.2 analysis of development model of vehicle detection industry in Germany
 - (1) status quo of development of automobile industry in Germany
 - (2) management model of vehicle detection industry in Germany
 - (3) equipment and content of vehicle detection in Germany
 - (4) gap between China and Germany in terms of vehicle detection
 - (5) implications of vehicle detection model in Germany for China
- 5.2.3 analysis of development model of vehicle detection industry in Japan
 - (1) status quo of development of automobile industry in Japan
 - (2) management model of vehicle detection equipment in Japan
 - (3) gap between China and Japan in terms of vehicle detection
 - (4) implications of vehicle detection model in Japan for China

5.3 comparison of domestic vehicle detection technology and reference
